Credit Recommendation: In the vocational certificate category, 2 semester hours in material supply procedure when taken in conjunction with Supported Activities Supply System Management Unit by Correspondence, 30.10b (MC-1405-0026)(8/84).

MC-1405-0025

ACCOUNTING FOR PLANT PROPERTY BY CORRESPONDENCE

Course Number: 34.5c.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 8/80–Present.
Objectives: To enable the student to establish and maintain plant property ledgers and to prepare plant property reports required in the Marine Corps plant account system.
Instruction: Topics include the plant property accounting cycle, classes of plant property, responsibilities for plant property accounting, cost criteria, and determination of costs. A major area is that of maintaining plant property records and preparing the plant account report.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in property accounting (8/84). There is a proctored final examination.

MC-1405-0026

SUPPORTED ACTIVITIES SUPPLY SYSTEM (SASSY) MANAGEMENT UNIT BY CORRESPONDENCE

Course Number: 30.10b.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 4/83–12/88.
Objectives: To provide supply personnel with knowledge of the basic principles and procedures employed by a supply management unit, with emphasis placed on exceptions to normal processing which requires manual control and/or decisions to resolve.
Instruction: This correspondence course familiarizes supply personnel with the responsibilities of a supply management unit applicable to the preparation and maintenance of files and records in the areas of receipt and stock control, backorder validation, shipment discrepancies, inventory recounts and adjustments, and maintenance floats. Course also identifies procedures used to process the exception type transaction and programs.
Credit Recommendation: In the vocational certificate category, 2 semester hours in material or supply procedures when taken in conjunction with Supported Activities Supply System (SASSY) Organic Procedures, 30.9f and 30.9e (MC-1405-0024) (8/84). Final proctored examination is required.

MC-1405-0027

SUPPLY MANAGEMENT BY CORRESPONDENCE

Course Number: 30.20.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 4/82–Present.
Objectives: To provide the supply chief with an understanding of the functions necessary to organize and manage a supply office.
Instruction: This correspondence course familiarizes the supply chief with the managerial functions of planning, organizing, directing and controlling. Additionally, it defines methods for identifying the proper problem solving techniques through steps ranging from problem identification through the use of feedback in measuring goal achievement.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of management. Course concludes with a proctored examination (8/84).

MC-1405-0028

MARINE CORPS INTEGRATED MAINTENANCE MANAGEMENT SYSTEM (MIMMS) PROCEDURES FOR THE SUPPLY CLERK BY CORRESPONDENCE

Course Number: 30.21.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 7/82–12/84.
Objectives: To train supply clerks in the procedures necessary to perform supply functions in coordination with a newly automated integrated maintenance management system.
Instruction: This correspondence course provides supply clerks with a general background and overviews of an automated, integrated maintenance management system, requisition procedures for repair parts, data flow between user, service, and management units, and procedures to be followed in the validation/reconciliation process.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/84).

MC-1405-0029

MARINE CORPS STOCK LISTS BY CORRESPONDENCE

Course Number: 30.5G.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 7/78–12/85.
Objectives: To give instruction in the proper use of Marine Corps stock lists to obtain information related to the description, price, units of issue and the maintenance of equipment.
Instruction: The material covered in this correspondence course is specific to the Marine Corps. Although there is some interface with the other services and the federal government the major instructional content is Corps oriented. Instructional materials include stock lists, management data lists and Marine Corps cross reference lists.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/84).

MC-1405-0030

ORGANIC PROPERTY CONTROL BY CORRESPONDENCE

Course Number: 30.6K.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 4/84–12/87.
Objectives: To instruct the student in the procedures used in the organic property control office.
Instruction: This correspondence course covers the aread of property control records, invoicing, receiving and shipping (transfer) procedures.
Credit Recommendation: In the vocational certificate category, 2 semester hours in material control. Course concludes with a proctored examination (8/84).

MC-1405-0031

ADJUTANT

Course Number: AAF.
Location: Financial Management and Personnel Administration School, Cp. Lejeune, NC.
Length: 6 weeks (202–219 hours).
Exhibit Dates: 3/87–Present.
Learning Outcomes: Upon completion of the course, the student will be able to perform functions of an adjutant including general administration, management of correspondence and directives, supervision of military pay and allowances, personal records and legal administration of a command.
Instruction: The lecture method and practical applications are used as teaching methods. Topics include correspondence and directives, military pay and allowances, general administration, individual records, separations, personnel assets and legal administration.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in business communications and 3 in office administration (3/88).

MC-1405-0032

ADVANCED PERSONNEL ADMINISTRATION

Course Number: AAD.
Location: Financial Management and Personnel Administration School, Cp. Lejeune, NC.
Length: 9 weeks (338 hours).
Exhibit Dates: 4/87–Present.
Learning Outcomes: Upon completion of the course, the student will be able to produce a unit diary, supervise the administration of military pay and allowances, serve as the unit administrative chief, edit correspondence and directives, verify the maintenance of correspondence files and directive systems, verify assignment eligibility

and audit individual records, review processing requirements for absentees, non-judicial punishments, court martials, vacation suspension, or confinements. verify separation requirements, retirement and resignation eligibility.

MC-1405-0034

Personnel Clerk

Course Number: OIC.

Location: Schools Battalion, Cp. Pendleton, CA; Financial Management and Personnel Administration School, Cp. Lejeune, NC.

Length: 7-8 weeks (229-282 hours).

Exhibit Dates: 1/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to type at a speed of at least 25 wpm, type correspondence and necessary military reports, maintain service records, prepare and process personnel separation/retention documents.

Instruction: Methods of instruction include automated typing instruction, critiques, video tapes, lecture, practical applications and self-paced instruction. Topics covered are typing power drills, type correspondence and reports, the maintenance of service records, audit of computer generated documents and the processing of separation/retention documents.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic typing (10/87).

MC-1405-0035

Enlisted Supply Basic
(Basic Supply Stock Control)

Course Number: 30V.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 7 weeks (232 hours). *Version 2:* 7 weeks (172-186 hours).

Exhibit Dates: *Version 1:* 7/87-Present. *Version 2:* 4/80-6/87.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to perform basic inventory and supply control procedures; operate personal computers using elementary word-processing and spread sheet applications, file and maintain supply records. *Version 2:* Upon completion of the course, the student will be able to maintain filing system and perform basic supply clerk function.

Instruction: *Version 1:* Covers technical skills for supply clerks utilizing computer software and hardware within a basic record keeping process. Methodology includes lecture and practical application exercises. *Version 2:* Covers basic skills of supply accounting, typing and records control. Methodology includes lecture, discussion and practical application.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in computer literacy, 3 in filing and rcords control, and 1 in keyboarding (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in keyboarding and 3 in filing and records controls (4/89).

MC-1405-0036

Enlisted Warehousing Intermediate

Course Number: 30H.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 5 weeks (164 hours). *Version 2:* 6 weeks (132 hours).

Exhibit Dates: *Version 1:* 2/88-Present. *Version 2:* 4/83-1/88.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to perform general warehousing functions; use specific publications; operate automated material handling equipment; use associated data processing hardware; monitor an inventory control system. *Version 2:* Upon completion of the course, the student will be able to perform general warehousing functions; use specific warehousing documents; operate automated material handling equipment; and monitor an inventory control system.

Instruction: *Version 1:* Covers warehousing operations to include use of equipment, facilities, and space; methods and systems of receiving, storing and shipment equipment. Also includes the use of data processing equipment to facilitate control procedures. Methodology include lecture, practical exercices, guest speakers, and field trips. *Version 2:* Covers warehousing operations to include the optimum use of equipment space and facilities; methods of receiving, storing and shipping of goods are discussed with emphasis on safety. Methodology includes lectures, class discussion, practical exercises, field trips and guest speakers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in warehousing operations and 1 in computer operations (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semster hours in warehousing operation (4/89).

MC-1405-0037

Enlisted Supply Reorientation
(Enlisted Supply Advanced)

Course Number: 30G.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 4 weeks (142 hours). *Version 2:* 6 weeks (186 hours).

Exhibit Dates: *Version 1:* 10/87-Present. *Version 2:* 6/83-9/87.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to use supply publications and directives; perform manual accounting procedures; use automated data processing equipment, maintain supply files and reconcile supply management reports. *Version 2:* Upon completion of the course, the student will be able to use supply publications and manuals; process correspondence and equipment repair orders; conduct supply related investigations, use computerized information and video systems; produce appropriate budget reports.

Instruction: *Version 1:* Covers manual accounting procedures, personal effects, automated data processing functions, reporting functions, inventory control and shipping and receiving responsibilities. Methodology includes lecture, class discussion, field trip and practical application. *Version 2:* Covers the use of supply directives, computerized information and video inquiry systems, management reports, and special accounts. Also covers basic management and supervisor principles related to supply management. Methodology includes lectures, class discussion, guest speakers and practical application exercise.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management and 3 in introduction to data processing (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management and 3 in computer concepts and software applications (4/89).

MC-1405-0038

Ground Supply Officer

Course Number: COG.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 11-12 weeks (386-387 hours). *Version 2:* 12 weeks (340-381 hours).

Exhibit Dates: *Version 1:* 8/87-Present. *Version 2:* 10/76-5/87.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to manage all the personnel and assets necessary for a Marine Corps operating unit. *Version 2:* Upon completion of the course, the student will be able to perform the duties and responsibilities of a Marine Corps ground supply officer.

Instruction: *Version 1:* Covers supply procedures, including supply management, office management, property control, financial management, accounting, systems analysis, purchasing, transportation, distribution, warehousing, and computerized supply operations. Methodology includes lectures, demonstrations, practical applications, and performance exercises. *Version 2:* Covers supply procedures, including supply management, office management, property control, financial management, accounting, systems analysis, purchasing, transportation, distribution, warehousing and computerized supply operations. Methodology includes lectures, demonstrations, and practical applications.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 1 semester hour in computer concepts and sof ware application (4/89); in the upper-division baccalaureate category, 4 semester hours in supply management (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management and 1 in data processing (4/89).

MC-1405-0039

Enlisted Supply Intermediate

Course Number: 30A.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 10 weeks (318-319 hours). *Version 2:* 10 weeks (269-270 hours).

Exhibit Dates: *Version 1:* 8/86-Present. *Version 2:* 5/84-7/86.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to plan, organize, and control the purchasing function of an organization. Supervise and direct department personnel and use computer methods to solve procurement problems. *Version 2:* Upon completion of the course, the student will be able to plan, organize, direct and control the function of a supply and material management department.

Instruction: *Version 1:* Covers supply procurement, administration and operations with emphasis on management controls. Also includes training in the use of computers related to purchasing practices. Contract principles, and budgeting procedures are also discussed. Methodology include lecture, class discussion and practical applications in procurement operations and procedures. *Version 2:* Upon completion of the course, the student will be able to plan, organize, direct and control to function of a supply and material management department.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management, 2 in supervisory principles, and 3 in office procedures (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in supply management and 3 in recordkeeping (4/89).

MC-1405-0040

Enlisted Supply Independent Duty

Course Number: SAF.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (73-74 hours).

Exhibit Dates: 8/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to prepare course documents related to procurement of materials and supplies; complete purchase transaction and maintain related inventory records; monitor and process bid requests and determining purchases which involve imprest funds; and complete annual accounting and summary reports for management reviews.

Instruction: Covers procurement, supply, and requisitioning procedures, purchasing accounting management, and reporting of source document. Methodology includes lectures and practical applications in procurement, with emphasis on contract procedures and process.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in purchasing or procurements (4/89).

MC-1405-0041

Reserve Enlisted Unit Supply Refresher

Course Number: CEX.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (67 hours).

Exhibit Dates: 11/83-5/87.

Learning Outcomes: Upon completion of the course, the student will be able to perform clerical supply functions at a using unit level, involving computer and manual-based supply accounting procedures, requisitioning, warehousing, and distribution of ground supply accounts.

Instruction: Covers technical research, property and financial management, and use of the computerized system to requisition, account for, monitor, distribute and dispose of supply assets. Methodology includes lectures, demonstrations and practical appplications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management (4/89).

MC-1405-0042

Reserve Supply Officer Refresher

Course Number: COU.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (73 hours).

Exhibit Dates: 10/85-5/87.

Learning Outcomes: Upon completion of the course, the student will be able to provide technical assistance and supervise subordinates in the managing of supply operations.

Instruction: Covers technical research, property and financial management, and the use of the computerized system to requisition, account for, monitor, distribute and dispose of supply assets. Methodology includes lectures, demonstrations, and practical applications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management (4/89).

MC-1405-0043

Reserve Unit Supply Refresher

Course Number: SCA.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (73-74 hours).

Exhibit Dates: 6/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform supply operations at a using unit level. Involving computer and manual-based supply accounting procedures, requisitioning, warehousing and distribution of ground supply accounts.

Instruction: Covers the basic supply administration skills required in the daily operation of a unit supply account. Includes instruction in technical research, property and financial management, and use of the computerized system to requisition, account for, monitor, distribute and dispose of supply assests. Methodology includes lectures, demonstrations and practical applications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in supply management (4/89).

MC-1405-0044

SASSY: Organic Procedures by Correspondence

Course Number: 30.9g-1.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 8/86-Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide supply personnel with a basic knowledge of techniques for recording periodic and miscellaneous transactions between user units and a centralized management unit.

Instruction: This correspondence course trains supply clerks in the proper procedure for processing forms relative to subjects such as warehousing operations, maintenance of equipment and deployment procedures necessary in the operation of a supply unit. The course has a proctored final examination which is required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in supply procedures (6/89).

MC-1406-0001

Enlisted Instructor Orientation

Course Number: None.

Location: Development and Education Command, Quantico, VA.

Length: 2 weeks (70 hours).

Exhibit Dates: 12/68-1/80.

Objectives: To train instructors in the basic procedures and techniques of instruction, with emphasis on communication skills.

Instruction: Lectures and practical experience in the professional foundations of learning and teaching, communication skills, procedures and techniques of instruction, objective examination techniques, and a series of practice presentations.

Credit Recommendation: In the vocational certificate category, 1 semester hour in instructional methods (1/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in instructional methods (1/74); in the upper-division baccalaureate category, 1 semester hour in instructional methods (1/74).

MC-1406-0002

Women Physical Training Instructor
(Physical Training Instructor (Women))

Course Number: None.

Location: Development and Education Command, Quantico, VA.

Length: 11 weeks (427-482 hours).

Exhibit Dates: 12/68-1/80.

Objectives: To train military personnel as instructors of physical training.

Instruction: Structural and functional kinesiology; applied principles of physical training; personal grooming; sports skills; aquatics; physical fitness training methodology; techniques of instruction; individual conditioning.

Credit Recommendation: In the vocational certificate category, 8 semester hours in physical education (1/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in physical education (1/74); in the upper-division baccalaureate category, 8 semester hours in physical education (1/74).

MC-1406-0003

INSTRUCTOR ORIENTATION

Course Number: None.

Location: Marine Corps School, Quantico, VA.

Length: 3 weeks (68–105 hours).

Exhibit Dates: 12/56–4/65.

Objectives: To provide enlisted personnel with a knowledge of the principles and techniques of instruction.

Instruction: Lectures and practical experience in teaching methodology, educational psychology, and effective writing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in instructional methods (1/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in instructional methods (1/74); in the upper-division baccalaureate category, 2 semester hours in instructional methods (12/68).

MC-1406-0004

SERGEANTS MAJOR PERSONNEL ADMINISTRATION

Course Number: None.

Location: Personnel Administration School, Parris Island, SC.

Length: 6 weeks (260 hours).

Exhibit Dates: 7/58–12/68.

Objectives: To train sergeants major in basic personnel management procedures.

Instruction: Lectures in personnel administrative procedures, including personnel records and classification systems; separations and pay procedures; office management; English and speech; correspondence and publications; and naval justice.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in personnel records and classification administration (12/68).

MC-1406-0005

FIRST SERGEANTS PERSONNEL ADMINISTRATION

Course Number: None.

Location: Personnel Administration School, Parris Island, SC.

Length: 6 weeks (197–241 hours).

Exhibit Dates: 4/63–1/88.

Objectives: To train first sergeants in the procedures involved in military personnel administration.

Instruction: Lectures and practical exercises in enlisted and officer records, personnel classification and accounting, pay and benefits, naval justice, correspondence, combat and casualty reporting, and personnel actions and related reports.

Credit Recommendation: In the vocational certificate category, 3 semester hours in personnel administration (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in personnel administration (2/74); in the upper-division baccalaureate category, 2 semester hours in personnel records and classification administration (12/68).

MC-1406-0006

WARRANT OFFICER PERSONNEL ADMINISTRATION

Course Number: None.

Location: Personnel Administration School, Parris Island, SC.

Length: 5 weeks (143–146 hours).

Exhibit Dates: 4/63–12/72.

Objectives: To train warrant officers in the duties of administrative officers.

Instruction: Lectures and practical exercises in regulatory publications, service records, personnel accounting, classification, naval justice, correspondence, personnel records, personnel management, and custodial duties.

Credit Recommendation: In the vocational certificate category, 2 semester hours in personnel administration (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in personnel administration (2/74); in the upper-division baccalaureate category, 2 semester hours in personnel administration (12/68).

MC-1406-0007

BASIC PERSONNEL ADMINISTRATION

Course Number: None.

Location: Personnel Administration School, Parris Island, SC.

Length: 5 weeks (166 hours).

Exhibit Dates: 1/66–12/68.

Objectives: To train enlisted personnel in the fundamentals of personnel administration.

Instruction: Lectures and practical exercises in typing, utilization of regulatory publications, maintenance and disposition of files, Marine Corps directives system, correspondence practices, personnel accounting, military justice, maintenance of personnel records, and completion of allotment forms.

Credit Recommendation: In the vocational certificate category, 2 semester hours in office administration (2/74).

MC-1406-0008

ADMINISTRATIVE CHIEF'S PERSONNEL ADMINISTRATION

(Personnel Chief's Personnel Administration)

Course Number: None.

Location: Marine Corps Recruit Depot, Parris Island, SC; Personnel Administration School, Parris Island, SC.

Length: 6–10 weeks (213–440 hours).

Exhibit Dates: 7/58–1/88.

Objectives: To train noncommissioned officers for supervisory duties in military personnel administration.

Instruction: Lectures and practical exercises in manpower management, enlisted records, pay and allowances, correspondence, naval justice, personnel classification and personnel actions, and office management.

Credit Recommendation: In the vocational certificate category, 6 semester hours in personnel administration (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in personnel administration (2/74); in the upper-division baccalaureate category, 3 semester hours in personnel administration (12/68).

MC-1406-0009

1. MARINE CORPS RECRUITER
2. RECRUITER

Course Number: None.

Location: Recruit Depot, Parris Island, SC; Recruit Depot, San Diego, CA.

Length: 6 weeks (227 hours).

Exhibit Dates: *Version 1:* 5/72–7/78. *Version 2:* 3/58–4/72.

Objectives: To train selected noncommissioned officers in personnel recruiting duties and responsibilities.

Instruction: Lectures and practical exercises in recruitment of personnel. Course includes screening and processing procedures, salesmanship and public speaking, operation of recruiting substations, officer selection, advertising and community relations, leadership training, and typing.

MC-1406-0010

INSTRUCTIONAL MANAGEMENT

(Officer Instructor Orientation)

Course Number: None.

Location: Instructional Management School, Cp. Pendleton, CA; Service Support School, Cp. Lejeune, NC; Instructor Training School, Quantico, VA.

Length: 2 weeks (67–105 hours).

Exhibit Dates: *Version 1:* 9/77–6/82. *Version 2:* 10/69–8/77.

Objectives: To train commissioned officers and instructors to assume the role of instructional managers in foundations, methodologies, academic procedures, and techniques of instruction.

Instruction: *Version 1:* Instruction is accomplished through the following three phases: Phase I, introduction to the course and to systematic instructional designs. The students accomplish learning activities that will teach them to task analyze, select job performance requirements, design learning objectives and criterion referenced items and develop the instructional package up to the point where documentation would begin. Phase II has student performing the role of supervisor by evaluating documentation, monitoring lesson tryouts and applying internal evaluation techniques to evaluate, validate and plan the revision of an instructional package. Phase III has the student applying all previously learned concepts by developing an evaluation plan, responding to recommended course changes and documenting the need for a course of instruction. *Version 2:* Lectures and practical exercises in instructional methods. Course includes scientific fundamentals, methodologies, academic procedures, and techniques of military instruction.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in instructional management(11/80) *Version 2:* In the upper-division baccalaureate category, 1 semester hour in educational technology (7/74).

MC-1406-0011

TECHNICAL INSTRUCTOR BASIC

Course Number: None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 2 weeks (67 hours).

Exhibit Dates: 7/75–11/78.

Objectives: To develop attitudes, knowledge, and skills necessary to instill mastery learning through systematic instruction.

Instruction: Lectures and student presentation to include and incorporate academic guidelines, construction of learning objectives, test item construction, methods of instruction, and communication skills.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in instructional methods (8/77).

MC-1406-0012

Instructor
(Formal School Instructor)

Course Number: T4B.

Location: *Version 1:* Service Support School, Cp. Lejeune, NC; Landing Force Training Command, Quantico, VA; Development and Education Command, San Diego, CA. *Version 2:* Service Support School, Cp. Lejeune, NC; Landing Force Training Command, Quantico, VA; Development and Education Command, San Diego, CA.

Length: *Version 1:* 3-4 weeks (131-155 hours). *Version 2:* 4 weeks (131-143 hours).

Exhibit Dates: *Version 1:* 1/78-4/85. *Version 2:* 10/75-12/77.

Objectives: To train selected personnel to perform as instructors at formal schools.

Instruction: *Version 1:* Instruction is provided in practical application, analysis design development, and implementation of instructional tasks through the use of multimedia techniques. Students are engaged in microteaching situations in order that they may benefit from self evaluation as well as peer and instructor evaluation. They are evaluated on a behavioral competency basis. For the course after 1985, see MC-1406-0029. *Version 2:* Instruction includes lecture, demonstration, discussion and programmed text in basic communication skills; instructional planning, preparation, strategies, presentation, evaluation, and revision.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in educational communication technology, 3 in instructional media production (11/80). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in instructional methods (10/77).

MC-1406-0013

Principles of Instruction for Marine
Noncommissioned Officers (NCO)
by Correspondence

Course Number: 99.56.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 1/83-12/84.

Objectives: To provide basic educational theory, techniques, and procedures for effective instruction.

Instruction: This correspondence course provides an introduction to general educational methods and instructional techniques including the teaching/learning process, job analysis preparation and evaluation of learning objectives and course outlines, research, and selection of appropriate learning strategies and training resources, lecture and demonstration techniques and lesson/instructor evaluation.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/83).

MC-1406-0014

Personnel Administration for the
Reporting Unit by
Correspondence

Course Number: 01.36a; 01.36b; 01.36c.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 11/81-5/87.

MC-1406-0015

Reserve Personnel Administration by
Correspondence

Course Number: 01.20K.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 5/81-12/82.

Objectives: This course is designed as a review analysis for military personnel experienced in the field of reserve administration. It's primary focus is directed toward the instruction of the newly assigned administrative clerk in the preparation of forms and reports.

Instruction: This correspondence course covers principles, terms, techniques, organization and preparation of forms and reports. Such topics as retirement credit reports, centralized automated reserve pay system,statement of understanding, interclass and interunit transfers and various types of programs existing in the reserve establishment.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/83).

MC-1406-0016

Personnel Reporting for Marine
Manpower Management System
(MMS) and the Reserve
Personnel Management
Information System (REPMIS) by
Correspondence

Course Number: 01.33e.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 8/79-5/84.

Objectives: To train enlisted personnel in standard procedures in the use of basic tools in human resources management systems and personnel management information systems.

Instruction: This correspondence course includes instructionand practical application in the identification, use, and coordination of documents involved in the data entry of personnel changes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in personnel administration when taken in conjunction with Individual Personnel Records (01.35e, 01.35d) (MC-1406-0019) OR Personnel Administration for the Reporting Unit (01.36)(MC-1406-0014) AND Basic Personnel Administration (01.37) (MC-1406-0017) (3/83).

MC-1406-0017

Basic Personnel Administration by
Correspondence

Course Number: 01.37A, 01.37.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/79-12/86.

Objectives: To provide military personnel with an overview of basic personnel procedures and administration.

Instruction: This correspondence course consists of Naval correspondence with appropriate endorsements, appointments, extensions, entitlements, joint military pay system (JUMPS),deductions, and allotments being covered.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to personnel administration when taken in conjunction with Individual Personnel Records (01.33e) (MC-1406-0019) OR Personnel Administration for the Reporting Unit (01.36) (MC-1406-0014) AND Personnel Reporting for Marine Manpower Management System (MMS) and the Reserve Personnel Management System (REPMIS) (01.33e) (MC-1406-0016)(3/83).

MC-1406-0018

Manpower Management System for
Supervisors by Correspondence

Course Number: 01.34A.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/81-12/86.

Objectives: To provide officers with instruction in administrative procedures and management responsibilities within a manpower management system.

Instruction: This correspondence course uses written and practical exercises and study assignments to train officers in the management of personnel data entry; emphasis is on overseeing the identification, utilization, coordination, and verification of the manpower management system.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/83).

MC-1406-0019

Individual Personnel Records by
Correspondence

Course Number: 01.35f, 01.35e, 01.35d.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 10/80-10/88.

Objectives: To train enlisted personnel in identifying the composition and content of personnel records, and the procedures for their maintenance.

Instruction: This correspondence course presents the principles and concepts that underlie the procedures of personnel recordkeeping; emphasizes procedures for preparing, assembling, servicing, and auditing personnel records and record books in areas such as separation,promotion, performance evaluation, and absenteeism.

Credit Recommendation: In the lower-division baccalaureate/associate degree cate-

gory, 1 semester hour in introduction to personnel administration when taken in conjunction with Basic Personnel Administration (01.37)(MC-1406-0017) and Personnel Reporting for Marine Manpower Management System (MMS) and the Reserve Personnel Management Information System (REPMIS) (01.33e) (MC-1406-0016) (3/83).

MC-1406-0020

The Marine Noncommissioned Officer (NCO) by Correspondence

Course Number: 03.3J.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 10/80-10/84.

Objectives: To provide a course of study dealing with the problems and techniques of leadership with emphasis on personnel relations.

Instruction: This correspondence course offers a series of study units with such topics as measurements and techniques of leadership, motivation, corrective counseling, measuring morale, race relations, equal opportunity and women's issues, drug and alcohol abuse, combat leadership, and senior/subordinate relations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in personnel relations (3/85).

MC-1406-0021

Basic Typing

(Basic Typing and Personnel Adminstration)

Course Number: AAB.

Location: Financial Management and Personnel Administration School, Cp. Lejeune, NC; Schools Battalion, Cp. Pendleton, CA.

Length: 2 weeks (62-64 hours).

Exhibit Dates: 7/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to type at least 15 words per minute by using the touch method; describe the duties of a personnel clerk, a unit diary cler, an administrative clerk, and a personnel/administration chief; and demonstrate proper office telephone techniques.

Instruction: Basic instruction is from an instructional television system, an automated typewriting systems which enables students to learn touch typing and to develop speed in an individualized atmosphere. In addition, there are lectures, discussions, and a series of slides and tapes that address the responsibilities of the personnel clerk, unit diary clerk, administrative clerk, and the personnel/administrative chief as well as proper office telephone techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic typing or keyboarding (11/87).

MC-1406-0022

Reserve Administration

Course Number: 01J.

Location: Financial Management and Personnel Administration School, Cp. Lejeune, NC.

Length: 2 weeks (68-69 hours).

Exhibit Dates: 1/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform tasks associated with general administration, preparation of drill accounting reports, prepartion of management pay system and maintaining individual records.

Instruction: The lecture method and practice applications are used in training students to perform tasks of general administration, drill accounting, reserve manpower management pay system and individual records.

Credit Recommendation: In the vocational certificate category, 1 semester hour in clerical procedures (9/87).

MC-1406-0023

Fundamentals of Marine Corps Leadership by Correspondence

The Noncommissioned Officer (NCO) by Correspondence)

Course Number: 03.3M; 03.3K.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: *Version 1:* 2/90-Present. *Version 2:* 11/84-1/90.

Learning Outcomes: Upon completion of the course, the student will be familiar with various principles and techniques of leadership and their applications to problems in areas such as race relations and substance abuse.

Instruction: This is a self-instruction course covering topics of leadership traits and principles, measurements and techniques of leadership, race relations, women's issues, drug and alcohol abuse and leader/subordinate relations.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in employee relations (6/89).

MC-1406-0024

Legal Administration for the Reporting Unit by Correspondence

Course Number: 01.43.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 10/88-Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the context of personnel records, describe procedures for proper entry and maintenance of records; identify documents used in personnel audits and report casualty and emergency data.

Instruction: Maintenance of records performance evaluations, time lost procedures, handling absentees and deserters, auditing requirements, medical and health documentation and identification cards. Methodology includes use of scenarios; test questions relative to how personnel records should be completed based on given scenarios.

Credit Recommendation: In the vocational certificate category, 1 semester hour in personnel record keeping (6/89).

MC-1406-0025

General Personnel Administration for Reserves by Correspondence

Course Number: *Version 1:* 01.28A. *Version 2:* 01.28.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: *Version 1:* 2/90-Present. *Version 2:* 10/87-1/90.

Learning Outcomes: Upon completion of the course, the student will be able to prepare documents for new personnel entering the unit, continually process and audit such documents as personnel are transferred, promoted, discharged, etc., and maintain a system of reports and files to account for all personnel movements both by individuals and the unit collectively.

Instruction: This is a self-instructed course covering topics of general personnel administration, assignment of personnel, record keeping and auditory, and general office procedures.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in personnel administration (6/89).

MC-1406-0026

Personnel Administration for the Reporting Unit by Correspondence

Course Number: 01.36e; 01.36f.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 6/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform basic personnel administrative functions at the reporting unit level; understand the content and be able to use and complete various forms and book entries related to assignment and transfer, promotion, performance evaluation and dismissal.

Instruction: This is a self-instructed course that includes general personnel record keeping, document processing, and file maintenance and retrieval.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in personnel administration (6/89).

MC-1406-0027

Personnel Reporting for REMMPS by Correspondence

Course Number: 01.39.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 11/88-Present.

Learning Outcomes: Upon completion of the course, the student will be familiar with the military reserve pay system; be able to use a standardized, automated system to collect, sort and classify data, audit entries, correct errors, update and change files, store records on disks or tape, and retrieve data from existing files.

Instruction: This is a self instructed course covering topics of data entry and retrieval, auditing procedures, and record keeping within an automated pay system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in payroll administration (6/89).

MC-1406-0028

Principles of Instruction for the Marine Noncommissioned Officer (NCO) by Correspondence

Course Number: 00.1a.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/86-Present.

Learning Outcomes: Upon completion of the course, the student will understand general concepts relating to teaching and learning procedures designed to solve instructional needs, and apply a systems approach to training covering following phases: analyze, design, develop, implement and evaluate.

Instruction: This correspondence course is designed to provide marine NCOs with necessary background data regarding educational theory, techniques and procedures which will assist in their becoming effective instructors.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in instructional methodology (9/89).

MC-1406-0029

FORMAL INSTRUCTOR
(Formal School Instructor)

Course Number: T4B.

Location: Instructional Management School, Quantico, VA.

Length: 3-4 weeks (134-156 hours).

Exhibit Dates: *Version 1:* 6/88-Present. *Version 2:* 12/86-5/88. *Version 3:* 5/85-11/86.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to develop a task list and select tasks for training; write and sequence learning objectives; write objective-referenced test items; select methods and media for lesson design; develop lectures and student handouts; conduct lectures; apply concepts of motivation and mastery learning; and evaluate and recommend revisions to a lesson. Students will be able to conduct learning analysis of a task; develop training aids; and write an instructors guide. *Version 2:* Upon completion of the course, the student will be able to develop a task list and select tasks for training; write and sequence learning objectives; write objective-referenced test items; select methods and media for lesson design; develop lectures and student handouts; conduct lectures; apply concepts of motivation and mastery learning; and evaluate and recommend revisions to a lesson. Students will be able to develop a lesson file; analyze teaching/learning styles using Myer Briggs type indicator; describe principles of communication, listening, questioning, and coaching; and define facilitative teaching behaviors. *Version 3:* Upon completion of the course, the student will be able to develop a task list and select tasks for training; write and sequence learning objectives; write objective-referenced test items; select methods and media for lesson design; develop lectures and student handouts; conduct lectures; apply concepts of motivation and mastery learning; and evaluate and recommend revisions to a lesson.

Instruction: *Version 1:* Students are oriented to the Instructional Systems Development (ISD) approach to training design and delivery. Course concepts and skills are taught within the ISD framework. Methods include lectures, guided discussions, and instructional design project, and both written and performance testing. Topics include the systematic approach to instructional design, target population analysis, performance-based training, and effective verbal and nonverbal behavior for classroom teaching. *Version 2:* Students are oriented to the Instructional Systems Development (ISD) approach to training design and delivery. Course concepts and skills are taught within the ISD framework. Methods include self-paced learning, lectures, interpersonal communication concepts; guided discussions, and instructional design project, and both written and performance testing. Topics include the systematic approach to instructional design, target population analysis, performance-based training, and effective verbal and nonverbal behavior for classroom teaching. *Version 3:* Students are oriented to the Instructional Systems Development (ISD) approach to training design and delivery. Course concepts and skills are taught within the ISD framework. Methods include self-paced learning, lectures, guided discussions, and instructional design project, and both written and performance testing. Topics include the systematic approach to instructional design, target population analysis, performance-based training, and effective verbal and nonverbal behavior for classroom teaching.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in instructional technology or educational technology or instructional design and/or development or training and development (9/89); in the graduate degree category, credit to be granted based in institution's review of student's course project (9/89). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in instructional technology or educational technology or instructional design and/or development or training and development (9/89); in the graduate degree category, credit to be granted based in institution's review of student's course project (9/89). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in instructional technology or educational technology or instructional design and/or development or training and development (9/89); in the graduate degree category, credit to be granted based in institution's review of student's course project (9/89).

MC-1406-0030

INSTRUCTOR ORIENTATION

Course Number: XRG.

Location: Instructional Management School, Quantico, VA; Instructional Management School, Cp. Pendleton, CA; Service Support Schools, Cp. Lejeune, SC.

Length: 2 weeks (66-70 hours).

Exhibit Dates: *Version 1:* 5/88-Present. *Version 2:* 4/84-4/88.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to outline and deliver a lecture using appropriate visual aids and question/answer techniques. The student will be able to construct test items formatted as multiple choice, short answers, essay, matching, listing, and performance. The student will be able to demonstrate understanding of learning objectives, construction, learning motivation, communication barriers and counseling. The sequencing of instruction is added to content and there is not emphasis on outlining; presentation is emphasized. *Version 2:* Upon completion of the course, the student will be able to outline and deliver a lecture using appropriate visual aids and question/answer techniques. The student will be able to construct test items formatted as multiple choice, short answers, essay, matching, listing, and performance. The student will be able to demonstrate understanding of learning objectives, construction, learning motivation, communication barriers and counseling. There is a heavy emphasis on the format and process of outlining a lecture.

Instruction: *Version 1:* Lecture is used to overview the topics of learning objectives, learning motivation, instructional system development, evaluation, communication, and counseling students. A major portion of the course is devoted to students making and critiquing presentations, employing detailed checklists. The checklists reference voice, gestures, facial expression and eye contact, listening skills, questioning techniques, motivational stratgies, and transitions. Students formulate written plans for improvement based on the feedback from instructors and peer critique. *Version 1:* Lecture is used to overview the topics of learning objectives, learning motivation, instructional system development, evaluation, communication, and counseling students. The checklists reference voice, gestures, facial expression and eye contact, listening skills, questioning techniques, motivational stratgies, and transitions. Students formulate written plans for improvement based on the feedback from instructors and peer critique.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 2 semester hours in training and development (instructional methods) (9/89). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in training and development (instructional methods) (9/89).

MC-1406-0031

INSTRUCTIONAL MANAGEMENT

Course Number: RF9.

Location: Instructional Management School, Quantico, VA.

Length: 2-3 weeks (69-77 hours).

Exhibit Dates: *Version 1:* 7/87-Present. *Version 2:* 4/84-6/87. *Version 3:* 7/82-3/84.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to train personnel in the appropriate skills required to supervise instruction and contribute to the planning and decision making process. The student will understand and be able to apply the five phases of instructional systems development; mastery learning, criterion referenced learning objectives; and selection of instructional methods as well as enhancement of their verbal communication skills and management abilities. *Version 2:* Upon completion of the course, the student will be able to train personnel in the appropriate skills required to supervise instruction and contribute to the planning and decision making process. The student will understand and be able to apply the five phases of instructional systems development; mastery learning, criterion referenced learning objectives; and selection of instructional methods as well as enhancement of their verbal communication skills and management abilities. *Version 3:* Upon completion of the course, the student will be able to train personnel in the appropriate skills required to supervise instruction and contribute to the planning and decision making process. The student will understand and be able to apply the five phases of instructional systems development; mastery learning, criterion referenced learning objectives; and selection of instructional methods as well as enhancement of their verbal communication skills and management abilities.

Instruction: *Version 1:* The instruction covers course requirements analysis: develop objectives and tests; supervise preparation of instruction; evaluation of the instructional process; develop budget proposals; supervise academic functions and counsel students and staff. The methods used are lecture, self-paced learning, and performance, groups techniques, and role playing. Course was well organized; phase I was self-paced individualized, and phase II was groups paced instruction. Training equipment includes multi-media approach including films, slides, tapes as well as television shows, manuals and several texts. The methods used are comprehensve and give each student hands-on approach to the teaching/learning process. Topics covered are the systematic approach to training; instructional development; communications skills; and management skills. *Version 2:* The instruction covers course requirements analysis: develop objectives and tests; supervise preparation of instruction; evaluation of the instructional process; develop budget proposals; supervise academic functions and counsel students and staff. The methods used are lecture, self-paced learning, and performance. Equipment includes film, instructional television, tape, text and transparancies. Students develop manager traits; manage the analysis effort, coordinate the revision process; coordinate program of instruction development; manage staff; student performance evaluations. The methods utilized are limited to self-paced learning, lectures, guided discussions and homework. *Version 3:* The instruction covers course requirements analysis: develop objectives and tests; supervise preparation of instruction; evaluation of the instructional process; develop budget proposals; supervise academic functions and counsel students and staff. The methods used are lecture, self-paced learning, and performance. Equipment includes film, instructional television, tape, text and transparancies.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in educational administration to include instructional stragegies, educational supervision training and development (9/89); in the graduate degree category, credit to be granted based on institution's review of student's course project (9/89). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in educational administration to include instructional stragegies, educational supervision training and development (9/89); in the graduate degree category, credit to be granted based on institution's review of student's course project (9/89). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in educational administration to include instructional stragegies, educational supervision training and development (9/89); in the graduate degree category, credit to be granted based on institution's review of student's course project (9/89).

MC-1407-0001

Legal Clerk/Court Reporter
(Basic Legal Clerk and Reporter)

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: 4 weeks (126 hours).

Exhibit Dates: 8/72-5/74.

Objectives: To train enlisted personnel to perform as legal clerks or court reporters.

Instruction: Lectures and practical exercises in the duties of a legal clerk or court reporter. Course includes use of recording equipment, dictation and transcription, and court reporting techniques and procedures.

Credit Recommendation: In the vocational certificate category, 4 semester hours in dictation and legal printing (7/74).

MC-1408-0001

Disbursing Clerk Course

Course Number: None.

Location: Supply Schools, Cp. Lejeune, NC.

Length: 6 weeks (210 hours).

Exhibit Dates: 12/59-12/68.

Objectives: To provide disbursing clerks with advanced training in the administration of pay records and travel expenses.

Instruction: Lectures and practical exercises in disbursement management, including administration of pay records, allowances, personnel travel expenses, and personnel separations.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (2/74).

MC-1408-0002

Advanced Disbursing Clerk

Course Number: None.

Location: Service Support School, Cp. Lejeune, NC; Supply Schools, Cp. Lejeune, NC.

Length: *Version 1:* 12 weeks (351 hours). *Version 2:* 5 weeks (179 hours). *Version 3:* 8-9 weeks (265 hours).

Exhibit Dates: *Version 1:* 10/83-Present. *Version 2:* 4/69-9/83. *Version 3:* 2/64-3/69.

Objectives: To train enlisted personnel in the advanced techniques and procedures of disbursing office organization and management.

Instruction: *All Versions:* Lectures and practical experience in correspondence procedures, military pay and allowances, appropriation accounting, public funds, financial returns, and personnel supervision. *Version 3:* Includes a nine-day practicum.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in office administration (2/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 1 semester hour in office administration (2/74); in the upper-division baccalaureate category, 2 semester hours in disbursing procedures (12/68).

MC-1408-0003

Ordnance Officer/Chiefs
(Ordnance Officer)

Course Number: None.

Location: Ordnance School, Aberdeen Proving Ground, MD; Ordnance School, Quantico, VA.

Length: 10-26 weeks (302-720 hours).

Exhibit Dates: *Version 1:* 4/68-12/72. *Version 2:* 1/58-3/68.

Objectives: To train enlisted personnel in the procedures of ordnance maintenance management.

Instruction: Lectures in the principles, concepts, and techniques of management; integrated resource control and allocation; and technical aspects of maintenance equipment and facilities.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of management (2/74); in the upper-division baccalaureate category, 3 semester hours in maintenance management (2/74). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in principles of management (2/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management for the 10- to 16-week course, 3 for the 22- to 26-week course (12/68).

MC-1408-0004

Communication Center Chief

Course Number: *Version 1:* 253. *Version 2:* None. *Version 3:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, San Diego, CA.

Length: *Version 1:* self-paced maximum 11 weeks (345 hours). *Version 2:* 9-10 weeks (344-365 hours). *Version 3:* 10-15 weeks (336-506 hours).

Exhibit Dates: *Version 1:* 5/84-Present. *Version 2:* 5/76-4/84. *Version 3:* 1/68-4/76.

Objectives: To train senior noncommissioned officers to supervise military communication centers.

Instruction: *Version 1:* Self-paced instruction in the operation, supervision, and employment of communications facilities and agencies. Includes crypto, field teletype, and AUTODIN equipment deployment, fundamentals of organization, management, planning and control. *Version 2:* Lectures in effective reading, management principles and procedures, fundamentals of communications, and security, equipment, supply and maintenance procedures. *Version 3:* Lectures in effective reading, management principles and procedures, fundamentals of communications, and security, equipment, supply and maintenance procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in communications administration (2/86). *Version 2:* In the vocational certificate category, 3 semester hours in basic communication skills, 3 in office administration (3/79). *Version 3:* In the vocational certificate category, 6 semester hours in office administration (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in office administration (2/74).

(Senior School)

Course Number: None

Location: Educational Center, Quantico, VA.

Length: *Version 1:* 43 weeks (1083-1400 hours). *Version 2:* 42-43 weeks (1044-1197 hours). *Version 3:* 40 weeks (1288 hours). *Version 4:* 40 weeks (1358 hours). *Version 5:* 40 weeks (1301-1379 hours). *Version 6:* 40 weeks (1239 hours). *Version 7:* 40 weeks (1146–1155 hours).

Exhibit Dates: *Version 1:* 8/80–9/86. *Version 2:* 8/71-7/80. *Version 3:* 8/66-7/71. *Version 4:* 8/65-7/66. *Version 5:* 8/62-7/65. *Version 6:* 8/61-7/62. *Version 7:* 9/58-7/61.

Objectives: To prepare Marine Corps officers and officers from other services and foreign countries for command and staff duty at high levels.

Instruction: *All Versions:* Lectures and practical exercises on command and staff duty at high levels. *Version 1:* Program is presented through a variety of instructional techniques including: seminars, senior level government and civilian guest lectures, multimedia presentations, problem solving, role playing, computer simulation and case study development, presentation, and discussion. Topics include philosophy and ethics, business management and administration, geopolitics and international relations. Military subjects include leadership, logistics, budgeting, management, computer utilization, amphibious operations, comprehensive world survey of international relations and management systems. *Version 2:* Topics include leadership; professional skills and fundamentals; staff functioning; management; adjunct faculty seminars; amphibious operations; operations ashore; counterinsurgency; national policy; organization, functioning, and decision making within the Dod; Army, Navy Air Force concepts; strategic surveys; military strategy; domestic forces and factors affecting the military; and American military policy. *Version 3:* Topics include air-ground task force operations; amphibious operations, management techniques and procedures, organization and functioning for national security; foreign language instrument; geopolitics and current world situations; and executive leadership. *Version 4:* Topics include geopolitical and current world situation; air-ground task force operations; executive leadership; language qualification; organization and functioning for national security, amphibious operations; and management techniques and procedures. *Version 5:* Topics include organization and concepts of employment; command and staff principles and procedures; air/ground warfare tactics; amphibious operations; current world situation; counterinsurgency and operations against guerilla forces; political-military relationships and the military services; and research and development. *Version 6:* Topics include amphibious operations; offensive operations ashore; aviation, communication-electronics; administration and logistics; defensive operations and defense of advanced naval bases; intelligence; and political-military theory and organization for national security. *Version 7:* Topics include amphibious operations; offensive operations ashore; supporting arms; aviation; defensive operations and defense of advanced naval bases; command and staff principles and procedures; administration and logistics; intelligence; communication-electronics; and political-military theory and organization for national security.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in philosophy and ethics, 3 in basic introduction to management and business administration, 3 in geopolitics 3 in international relations (11/80); in the graduate degree category, 3 semester hours in research problem in geopolitics (11/80). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in public affairs, 6 in management, 3 as an elective in foreign language, 3 in independent research project as an elective (7/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in public affairs, 6 in management administration, 3 in independent research thesis, 3 in French, Spanish, or Vietnamese, and, on the basis of institutional evaluation, credit in oral and written communications (12/68). *Version 4:* In the upper-division baccalaureate category, 3 semester hours in public affairs, 6 in management administration 3 in independent research thesis, 3 in French or Spanish, and, on the basis of institutional evaluation, credit in oral and written communications (12/68). *Version 5:* In the upper-division baccalaureate category, 6 semester hours in business organization and management, 2 in political science, 3 in French or Spanish, and, on the basis of institutional evaluation, credit in oral and written communications (12/68). *Version 6:* In the upper-division baccalaureate category, 6 semester hours in business organization and management (12/68). *Version 7:* In the upper-division baccalaureate category, 6 semester hours in business organization and management (12/68).

MC-1408-0009

Basic Course, Postgraduate

Course Number: None.

Location: Basic School, Quantico, VA.

Length: 3 weeks (136 hours).

Exhibit Dates: 7/54–12/68.

Objectives: To train commissioned officers in Marine Corps administrative policies and procedures.

Instruction: Lectures and practical exercises in Marine Corps administrative policies and procedures.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in business organization and management (12/68).

MC-1408-0010

Junior Course

Course Number: None.

Location: Educational Center, Quantico, VA.

Length: 38–39 weeks (1130–1151 hours).

Exhibit Dates: 9/54–6/56.

Objectives: To train junior officers to solve tactical and administrative problems.

Instruction: Lectures and practical exercises in tactics and administration, including atomic, biological, and chemical warfare; amphibious operations; artillery; aviation; communications; engineering; intelligence operations; instructor training; logistics; medical services; gunfire; personnel and administration; and tactics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in business organization and management (7/74). organization and management (7/74);

MC-1408-0011

Senior Course

Course Number: None.

Location: Educational Center, Quantico, VA.

Length: 39–42 weeks (1130–1253 hours).

Exhibit Dates: 1/55–6/56.

Objectives: To provide advanced professional education to senior commissioned officers.

Instruction: Lectures and practical exercises in command and staff duties, including fundamentals of combat and basic tactical doctrine; weapons; staff functioning, procedures, and techniques; employment of Marine forces, concepts for future operations; Marine Corps policies; and amphibious command post exercise.

Credit Recommendation: In the vocational certificate category, 4 semester hours in business organization and management (7/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in business organization and management (7/74); in the upper-division baccalaureate category, 6 semester hours in business organization and management (12/68).

MC-1408-0012

Women Officers Indoctrination

Course Number: None.

Location: Women Marines Training Detachment, Quantico, VA.

Length: 5 weeks (213–229 hours).

Exhibit Dates: 10/55–6/60.

Objectives: To train female officers as company and staff officers.

Instruction: Lectures and practical exercises in the duties of company and staff officers, including leadership problems and counseling, principles of instruction, personnel administration, and general military subjects, such as food services, disbursing, administration, and map reading.

Credit Recommendation: In the upper-division baccaiaureate category, 2 semester hours in business organization and management, and credit in instructional methods on the basis of institutional evaluation (12/68).

MC-1408-0013

Disbursing Officer Leadership
(Disbursing Officer)

Course Number: None.

Location: Service Support School, Cp. Lejeune, NC; Supply School, Cp. Lejeune, NC.

Length: 8-12 weeks (280-385 hours).

Exhibit Dates: *Version 1:* 8/75-10/83. *Version 2:* 7/58-7/75.

Objectives: To train commissioned officers as disbursement officers through emphasis on supervisory principles and clerical procedures in the disbursing process.

Instruction: Lectures and practical exercises in the duties of a disbursement officer. Course includes adding-machine operation, military pay and accounts, military travel, accounting for public funds, office management, and general disbursement procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in clerical procedures (7/77); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of supervision (7/77). *Version 2:* In the upper-division baccalaureate category, 4 semester hours in finance and disbursement (12/68).

MC-1408-0014

Resident Staff Noncommissioned Officer (NCO) Career
(Staff Noncommissioned Officers (NCO) Resident Course)

Course Number: None.

Location: *Version 1:* Officer Candidate School, Quantico, VA; Staff Noncommissioned Officer Academy, Cp. Lejeune, NC; Staff Noncommissioned Officer Academy, El Toro, CA. *Version 2:* Officer Candidate School, Quantico, VA.

Length: 6 weeks (158-228 hours).

Exhibit Dates: *Version 1:* 9/80-12/84. *Version 2:* 6/73-8/80.

Objectives: To educate staff sergeants and selected personnel in professional knowledge and standards, leadership, and esprit-de-corps.

Instruction: *Version 1:* Multimedia instruction in general military administration, physical training, leadership, Marine Corps organization, and training management. *Version 2:* Lectures and practical exercises in effective communication, leadership, customs, courtesies, drill and inspections, and physical training.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in military science (11/80). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in interpersonal relations and 3 in written and oral communications (6/75).

MC-1408-0015

Command and Staff College Reserve Phase I, Phase II

Course Number: None.

Location: Command and Staff College, Quantico, VA.

Length: Phase I, 2 weeks; Phase II, 2 weeks (Phase I, 65 hours; Phase II, 62 hours).

Exhibit Dates: 6/76-Present.

Objectives: To train selected reserve officers of the U.S. Marine Corps and officers from foreign countries for higher reserve and mobilization activities.

Instruction: Workshops and lectures with emphasis on problem solving and planning and conduction emphibious warfare rounded out by briefings and seminars relative to current policies, plans and procedures.

Credit Recommendation: In the upper-division baccalaureate category, Phase I; 1 semester hour in geopolitics; Phase II 1 additional hour in geopolitics (7/82).

MC-1408-0016

Disbursing Officer

Course Number: CDA.

Location: Financial Management and Personnel Administration School, Cp. Lejeune, NC.

Length: 11-12 weeks (412-422 hours).

Exhibit Dates: 11/83-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform the functions of a disbursing officer which include identifying directives, interpreting publications related to disbursement functions, verifying travel status, certifying balance sheets, reports, distance computations, allotments, housing allowances and related military expenditures for personnel, supervising fiscal internal control records, auditing cash funds, bank deposits, subsistence, clothing, and other allowances and managing a video inquiry system and operating a calculator.

Instruction: Lectures and practical exercises in the duties of a disbursing officer covering military pay and accounts, military travel accounting for funds and general disbursement procedures. A simulated field disbursing workshop related to functional aspects of Marine Corps disbursing includes problem solving and customer service aspects of disbursing. After April 1987 the course adds a deployed field exercise simulation problem which evaluates the student's ability to function under field conditions.

Credit Recommendation: In the vocational certificate category, 2 semester hours in clerical procedures (9/87); in the lower-division baccalaureate/associate degree category, 3 semester hours in principles of financial statement analysis (9/87).

MC-1408-0017

Marine Corps Command and Staff College

Course Number: RHA.

Location: Education Center, Quantico, VA.

Length: 43 weeks (1234-1306 hours).

Exhibit Dates: 10/86-Present.

Learning Outcomes: Upon completion of the course, the student will be able to prepare and communicate ideas in writing on a variety of complex military subjects using expository, research, and persuasive formate. The student will be able to prepare clear, specific, and unambigious plans, directives, and orders for project and program management. The student will be able to deliver persuasive speeches, to organize and conduct briefings, and to communicate clearly with superior officers, subordinates and peers. The student will be able to analyze situations in program and project management and will be able to prepare logistics and operational plans to achieve the objectives and goals of a major organization. Those students electing to take the research seminar will achieve the development of historical and social science research and writing skills at a level acceptable to the professional military history and military policy studies fields.

Instruction: The specific communications skills are taught through writing exercises and critiques aimed at improving grammar, syntax, and general writing styles; specific task assignments that include written presentations; oral presentations and critiques; and simulated briefing sessions, and conference leadership situations. Instruction in other subjects is provided by means of lectures, multimedia presentations, managerial problem-solving, role playing, and the study and presentation of case studies. Topics include logistics, planning, managerial analysis and decision-making, and the development of plans to achieve objectives for a major organization. The research seminar covers the following: 1) the primary technique of instruction in research-mentoring or tutorial provided by a professional military historian; 2) students are encouraged to undertake research utilizing original document sources and interview techniques; 3) scheduled seminar sessions are provided to encourage exchange of ideas and to increase student awareness of the variety of research techniques and their uses; 4) research hypotheses and research designs are produced prior to the acquisition of the necessary data; 5) the research papers produced vary from 75 to over 100 pages of text, excluding tables of contents, annotated bibliographies, and other additional supplemental materials; 6) the student paper is reproduced and presented to all students and staff of the school; 7) each student is responsible for an oral briefing and question and answer session on the paper, of 60 minutes duration.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in written and oral communication (3/88); in the upper-division baccalaureate category, 3 semester hours in management problems, 3 in logistics management, 2 in military history, 3 in business organization and management (3/88); in the graduate degree category, 3-6 in military policy or military history for those completing the research seminar (3/88).

MC-1408-0018

Motor Transport Operations Noncommissioned Officer (NCO)

Course Number: CDG.

Location: Service Support School, Cp. Lejeune, NC.

Length: 4-5 weeks (146-157 hours).

Exhibit Dates: 5/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the Marine Corps Integrated Maintenance Management System; initiate procedures for smooth daily operation of a motor pool, load and unload vehicles, perform vehicle inspections; prepare vehicles for tactical convoys; and perform field expedient repairs.

Instruction: Covers maintenance administration and management, transportation procedures, loading cargoes, first echelon maintenance, and tactical operations. Methodology includes lecture, practical applications, performance and written examinations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in vehicle maintenance administration and management (4/89).

MC-1408-0019

Logistics Vehicle System Maintenance

Course Number: MBC.

Location: Service Support School, Cp. Lejeune, NC.

Length: 3-4 weeks (117-118 hours).

Exhibit Dates: 6/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to maintain logistics vehicles used in emergency recovery.

Instruction: Covers the repair and maintenance of automotive vehicles including the techniques of recovering disabled vehicles. Methodology includes lectures, laboratory exercises and demonstrations.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in advanced maintenance practices and 3 in hydraulic troubleshooting and maintenance (4/89).

MC-1408-0020

Reserve Automotive Mechanic

Course Number: CEU.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (68-74 hours).

Exhibit Dates: 12/83-Present.

Learning Outcomes: Upon completion of the course, the student will be able to inspect, diagnose, service, and repair the M998 and LVS automotive vehicles.

Instruction: Lectures and practical exercises in the inspection, service and repair of specified tactical automotive vehicles including shop procedures, power plants, and fuel and electrical systems; fuel and electrical systems trouble diagnosis and tune-up; power trains; chassis, brakes, and suspension systems; diesel and multi-fuel engines; motor vehicle operation; and preventative maintenance techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive maintenance and repair (11/89).

MC-1408-0021

Marine Corps Technical Publications System by Correspondence

Course Number: 30.23a.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 12/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to establish a technical publications library, and be familiar with procedures for identifying and retrieving stored information.

Instruction: This is a self instructed course which includes topics on the establishment and maintenance of a technical publications library, indexing and cross-referencing entries, locating stock numbers and sources of supply, and the identification of component and repair parts information.

Credit Recommendation: In the vocational certificate category, 2 semester hours in material management (6/89).

MC-1409-0001

Typing and General Office Procedures (Women)

Course Number: None.

Location: Training Center, Parris Island, SC.

Length: 4 weeks (155 hours).

Exhibit Dates: 7/59-12/68.

Objectives: To instruct enlisted personnel in typewriting and office procedures.

Instruction: Practical exercises in business English, spelling, correspondence, typing, filing, and office procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in typing, 3 in office practices (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in office practices (3/74).

MC-1409-0002

Field Radio Operator

Course Number: 25V.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 7 weeks (279 hours). *Version 2:* 8 weeks (278-280 hours).

Exhibit Dates: *Version 1:* 3/76-1/90. *Version 2:* 8/69-2/76.

Objectives: To train inexperienced enlisted personnel to operate a variety of radio communications sets.

Instruction: Lectures and practical exercises in radio procedures and equipment operation, including a brief introduction to electrical fundamentals. After 4/84 the brief introduction to electronics was deleted.

Credit Recommendation: *Version 1:* Credit is not recommended due to the military-specific nature of the course (3/79). *Version 2:* In the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (12/68).

MC-1409-0003

Cryptographer

Course Number: None.

Location: Communication-Electronics School, San Diego, CA; Basic Electronics School, San Diego, CA.

Length: 10 weeks (350 hours).

Exhibit Dates: 7/56-12/68.

Objectives: To train enlisted personnel to operate communications systems and cryptographic aids, and to typewrite.

Instruction: Lectures and practical exercises in the operation of communications systems and cryptographic aids, and in typewriting, including communications system organization, message preparation, operation and installation of teletypewriter equipment, radio telegraph procedures, cryptographic techniques, classified messages handling, administrative procedures, code systems, security communications, and typing applications.

Credit Recommendation: In the vocational certificate category, 2 semester hours in typing (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in typing (6/74).

MC-1409-0004

1. Communication Center Operator
2. Communication Center Man
3. Communication Center Man

Course Number: *Version 1:* 254. *Version 2:* None. *Version 3:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communications-Electronics School, Sub Unit 2, San Diego, CA.

Length: *Version 1:* 7-11 weeks (295 hours). *Version 2:* 9 weeks (333 hours). *Version 3:* 8-9 weeks (309-333 hours).

Exhibit Dates: *Version 1:* 10/84-9/86. *Version 2:* 9/76-9/84. *Version 3:* 12/71-8/76.

Objectives: To qualify personnel in the operation of teletype equipment in a tactical or fixed plant environment.

Instruction: For this course after 9/86 see MC-1409-0005. *Version 1:* Lectures and practical exercises in typing (to 35 words per minute); installation and operating adjustment of teletype equipment; procedures and message format. *Version 2:* Lectures and practical exercises in the operation of field communications equipment. Course includes training in typing, preventive maintenance, publications, and general operations of field communication equipment. *Version 3:* Lectures and practical exercises in the operation of field communications equipment. Course includes training in typing, preventive maintenance, publications, and general operations of field communication equipment.

Credit Recommendation: *Version 3:* In the vocational certificate category, 2 semester hours in teletype operator; in the lower-division baccalaureate/associate degree category, 1 semester hour in typing (2/86). *Version 4:* In the vocational certificate category, 2 semester hours in typing on the basis of demonstrated skills (3/79). *Version 5:* Credit in typing on the basis of institutional evaluation (2/76).

MC-1409-0005

Communication Center Operator

Course Number: 254.

Location: Communications Electronics School, Twentynine Palms, CA.

Length: 11 weeks (396-425 hours).

Exhibit Dates: 10/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to operate a communications center involving AUTODIN message preparation and teletype equipment; and be able to type thirty-five words per minute.

Instruction: Lectures and equipment operation training to operate the communications center. For this course before 10/86 see MC-1409-0004.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in typing (2/89).

MC-1601-0001

Engineer Equipment Officers

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 7-8 weeks (272-280 hours).

Exhibit Dates: 6/62-12/68.

Objectives: To train officers in engineer equipment operations and maintenance.

Instruction: Lectures and practical exercises in basic civil technology, earth moving estimating, construction equipment maintenance shops management, construction equipment limitations and capabilities, road design, and operator training.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 5 semester hours in maintenance management, 5 in civil technology (4/74); in the upper-division baccalaureate category, 2 semester hours in maintenance management (12/68).

MC-1601-0002

Engineer Officer's Orientation

Course Number: None.

Location: Engineer School Battalion, Cp. Lejeune, NC.

Length: 4 weeks (160 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train officers in basic engineering.

Instruction: Lectures and practical exercises in basic engineering, including organization of engineer units, military construction, engineer equipment, routes of communication, utilities, field electricity and plumbing, FMF refrigeration, maintenance, motor transport, embarkation of engineer equipment, and demolition and mine warfare.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in civil engineering (7/74); in the upper-division baccalaureate category, credit in engineering construction on the basis of institutional evaluation (12/68).

MC-1601-0003

Basic Combat Engineer

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 7-8 weeks (230-245 hours).

Exhibit Dates: 10/82-9/84.

Objectives: To train personnel in basic combat engineer tasks.

Instruction: Lectures, demonstrations, and practical exercises in the performance of basic combat engineering tasks in the areas of camouflage, demolitions, landmines, maps, construction, rigging, and bridging.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (1/86).

MC-1601-0004

Combat Engineer Officer

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 10 weeks. *Version 2:* 7 weeks (235 hours). *Version 3:* 6 weeks (242 hours). *Version 4:* 4 weeks (132 hours).

Exhibit Dates: *Version 1:* 10/83-9/85. *Version 2:* 7/71-9/83. *Version 3:* 6/67-6/71. *Version 4:* 6/62-5/67.

Objectives: To train warrant and company grade officers in the field engineering responsibilities of combat engineer officers.

Instruction: *All Versions:* Lectures and practical exercises in engineering subjects, including engineering job management, construction, bridges, roads, and demolition. *Version 1:* Covers performance and demonstration of the engineering tasks and requirements of a combat engineering officer to include engineering planning ground mobility and a survey of several general engineering subjects. *Version 2:* Topics include routes of communication, engineer equipment, landmine warfare, and field fortification and camouflage. *Version 3:* Topics include engineer equipment, field construction, routes of communication, landmine warfare, and job planning. *Version 4:* Topics include organization of Fleet Marine Force, engineer equipment, mine warfare, camouflage, field fortification, building construction, rigging, soils, engineer reconnaissance, and planning projects.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to civil engineering (3/83). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in civil engineering technology (7/74). *Version 3:* In the lower-division baccalaureate/associate degree category, 2 semester hours in civil engineering technology (7/74); in the upper-division baccalaureate category, credit in engineering construction on the basis of institutional evaluation (12/68). *Version 4:* In the lower-division baccalaureate/associate degree category, 2 semester hours in civil engineering technology (7/74); in the upper-division baccalaureate category, credit in engineering construction on the basis of institutional evaluation (12/68).

MC-1601-0005

Artillery Weapons Repairman

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 14 weeks (420 hours).

Exhibit Dates: 7/54-6/72.

Objectives: To train artillery weapons repairmen to maintain and repair field and antiaircraft artillery.

Instruction: Lectures and practical exercises in artillery fundamentals; rigging; major components operation, characteristics, disassembly, and assembly; and inspection and maintenance of various artillery weapons.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in mechanical or industrial technology (8/74).

MC-1601-0006

Infantry Weapons Armorer

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 10 weeks (420 hours).

Exhibit Dates: 7/54-6/72.

Objectives: To train infantry weapons armorers to maintain and repair infantry weapons at the advanced level.

Instruction: Lectures and practical exercises in small arms fundamentals; operation and characteristics of infantry weapons; and disassembly, assembly, inspection, maintenance, and repair of weapons, including rifles, machine guns, pistols, and mortars.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in industrial or mechanical technology (8/74).

MC-1601-0007

Engineer Operations Chief
(Combat Engineer Advanced)

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 10-14 weeks (315-400 hours).

Exhibit Dates: 11/74-12/86.

Objectives: To teach methods of engineering supervision.

Instruction: Lectures, demonstration, and practical exercises on the planning and management of engineering construction. The course includes some elementary design, estimating of materials, layout, construction management, and maintenance management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance management, 6 in engineering construction management and supervision (1/86).

MC-1601-0008

Engineer Equipment Officer

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 10 weeks (331 hours). *Version 2:* 8-9 weeks (262-270 hours).

Exhibit Dates: *Version 1:* 7/89-Present. *Version 2:* 5/82-6/89.

Objectives: To train personnel in the operation characteristics and capabilities of engineering construction equipment. Course also includes supply and repair support of engineering equipment (maintenance management), training in the use of mobile utilities and planning and design of roads and air fields.

Instruction: Lectures, demonstrations and actual performance of the various tasks required of an equipment officer.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 6 semester hours in operational characteristics and maintenance of engineering construction equipment (1/86).

MC-1601-0009

Journeyman Combat Engineer

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 11-12 weeks (383-397 hours). *Version 2:* 12 weeks.

Exhibit Dates: *Version 1:* 2/82-12/86. *Version 2:* 8/76-1/82.

Objectives: To develop the necessary skills and knowledge to construct, alter, repair, and maintain buildings and structures.

Instruction: *Version 1:* Lectures, demonstrations and practical exercises in engineering construction to include estimating materials, layout, and actual construction as a member of a construction crew. Students are exposed to detailed application of the above areas. *Version 2:* Lectures, demonstrations, and practical exercises in engineering construction to include estimating of materials, layout, and actual construction as a member of a construction crew.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in engineering construction (1/86). *Version 2:* In the vocational certificate category, 4 semester hours in engineering construction (3/83).

MC-1601-0010

Basic Hygiene Equipment Operator

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 12-13 weeks (476 hours).

Exhibit Dates: 10/82-2/87.

Objectives: To teach basic plumbing, water supply, and hygiene skills with an emphasis on field applications.

Instruction: Lectures and practical exercises in basic plumbing procedures, reconnaissance and development of water supplies, installation, and operation of water purification equipment, and installation and operation of equipment and facilities related to personal hygiene including field laundry, bath, and decontamination units. Ths course concludes with field exercises designed to reinforce the student's learning..

Credit Recommendation: In the vocational certificate category, 2 semester hours in basic plumbing and water supply studies

(3/83); In the lower-division baccalaureate/associate degree category, 4 semester hours in water purification, 2 in hygiene equipment operation (3/83).

MC-1601-0011

Construction Print Reading by Correspondence

Course Number: *Version 1:* 13.44B. *Version 2:* 13.44A.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: *Version 1:* 5/89–Present. *Version 2:* 12/81–4/89.
Objectives: To provide a source of study material designed to help the individual acquire a basic knowledge of blue print reading.
Instruction: This is an individualized, self-paced, self-study course on construction print reading. Study units in the course cover the following subjects: line construction, projections, plot plan, floor plan, elevation symbols, scales and dimensions, framing, plumbing and electrical plans.
Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in blueprint reading (8/83).

MC-1601-0012

Combat Engineer Chief, Construction Support by Correspondence

Course Number: 13.38C.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 4/80–Present.
Objectives: To provide the skills necessary to perform as platoon sergeant, construction foreman, or engineer operations chief and as supervisor on construction of buildings, roads, and airfields.
Instruction: This is a self-study course with emphasis placed on job planning and management, and estimation of equipment, materials, personnel, and time required for the various engineering projects that are accomplished in general support of the tactical situation. Emphasis is placed on supply, engineering equipment, and soil engineering and their relationship to construction projects.The course concludes with a proctored examination.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in engineering construction management (8/83).

MC-1601-0013

Combat Engineer Noncommissioned Officer (NCO) by Correspondence

Course Number: 13.19H.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 7/78–11/86.
Objectives: To advance the professional competence of noncommissioned officers as combat engineers.
Instruction: This correspondence course offers self-study to include a review of basic combat engineer skills and the various levels of responsibility and supervision involved. Emphasis is placed on the role of the noncommissioned officer as a small unit leader and his job as a supervisor for the various combat engineer functions. Course also stresses planning for equipment, materials, and personnel required for the various engineer projects.Thecourse concludes with a proctored examination.
Credit Recommendation: In the vocational certificate category, 3 semester hours in engineering construction (8/83).

MC-1601-0014

Engineer Equipment Operator by Correspondence

Course Number: 13.31H.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 7/78–7/85.
Objectives: To provide basic training in the theory of engineer equipment operations, equipment uses, and maintenance.
Instruction: This is an individual, self-paced, self-study course containing reading assignments and written lessons with objective type questions. Materials include the identification of and proper recommended task uses of various types of engineering equipment and the types of preventive maintenance required. The student will demonstrate achievement of objectives by answering correctly 65% of the questions on the final examination.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in construction planning (construction management or civil technology), 1 in equipment maintenance (8/83).

MC-1601-0015

Engineer Forms and Records by Correspondence

Course Number: 14.42B.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 11/80–6/90.
Objectives: To provide basic training in the theory of various equipment maintenance, and in the use of forms and records.
Instruction: This is an individual , self-paced, self-study course consisting of reading assignments and written lessons with objective type questions. Materials include the identification of various service forsm for scheduling and recording equipment use and maintenance. The student will demonstrate achievement of objectives by answering correctly 65% of the questions in the final examination.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/83).

MC-1601-0016

Engineer Equipment Chief by Correspondence

Course Number: 13.28D.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 8/81–Present.
Objectives: To provide advanced training in the theory of engineer equipment operation, maintenance, and scheduling.
Instruction: This is an individual, self-paced, self-study course containing reading assignments and written lessonswith objective type questions. materials include the identification of types of work projects and proper equipment selection for the task. Students will demonstrate achievement of objectives by answering correctly 65% of the questions on the final examination.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in construction planning (construction management or civil technologies) (8/83).

MC-1601-0017

Basic Combat Engineer by Correspondence

Course Number: 13.71K.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 3/79–12/85.
Objectives: To provide the knowledge to perform as basic combat engineers.
Instruction: This correspondence course offers individual, self-paced, self-study to include coverage of the use of hand tools and power tools, construction methods, rigging, military bridging, camouflage, field fortifications, mine warfare, and demolitions.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/83).

MC-1601-0018

Basic Engineer Equipment Mechanic by Correspondence

Course Number: 13.29E.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 4/81–12/85.
Objectives: To provide the principles of operation of internal-combustion engines, both gasoline and diesel; power trains; auxilliary equipment; components of chassis, and frames.
Instruction: This correspondence course offers self-paced, self-study to include the care and use of tools, procedures necessary to diagnose and correct engine and power train malfunction, principles of gasoline and diesel engines, principles of operation to include power train of wheeled and tracked vehicles, and qualities of fuels and lubricants.
Credit Recommendation: In the vocational certificate category, 3 semester hours in basic engineering equipment mechanics (8/83). Proctored final examination is required.

MC-1601-0019

Engineer Equipment Mechanic by Correspondence

Course Number: 13.41C.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 11/80–12/85.
Objectives: To advance the professional competence of those serving as engineer equipment mechanics in the use of diagnostic equipment and in the methods of conducting tests.
Instruction: This correspondence course presents a self-study, self-paced course to include procedures for using diagnostic equipment, and troubleshooting and correcting malfunctions of engines,power trains, and auxilliary equipment. Also, the course includes theory in use of tachometer compression gauge, pressure gauge, vacuum gauge, fuel pump pressure tester, diesel fuel system test equipment and electrical test sets.
Credit Recommendation: In the vocational certificate category, 3 semester hours in en-

gineering equipment mechanics (8/83). Final proctored examination is required.

MC-1601-0020

Journeyman Hygiene Equipment Operator

Course Number: None.

Location: Engineer School Cp. Lejeune, NC.

Length: 13-14 weeks (452-453 hours).

Exhibit Dates: 10/82-Present.

Objectives: To train noncommissioned officers as journeymen hygiene equipment operators.

Instruction: Lectures and practical exercises in the skills of a journeyman hygiene eqipment operator including records management, plumbing, water treatment, basic electrical principles, equipment operation and maintenance (hygiene, water purification, well drilling) and the development of water sources and field sanitation.

Credit Recommendation: In the vocational certificate category, 2 semester hours in plumbing and water supply, 4 in water treatment operation, 3 in principles of electricity and 3 in well drilling (9/88); in the lower-division baccalaureate/associate degree category, 2 semester hours in construction blueprint reading and 2 in business records management (9/88).

MC-1601-0021

Artillery Survey for the Fire Control Man by Correspondence

Course Number: 08.8F.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks.

Exhibit Dates: 7/78-12/87.

Objectives: To provide the artillery fire controlman with instruction in artillery survey.

Instruction: This correspondence course consists of six study units and includes the basic duties of a rodman-tapeman, and of the instrument operator recorder.It also covers instruction in the M-2 aiming circle, wild T-16 theodolite, distance-measuring electronic (DME) surveying instruments, survey methods (traverse and triangulation), and artillery mathematics. The course is followed by a three hour supervised examination without textbooks or notes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in elementary surveying (3/85).

MC-1601-0022

Map Reading by Correspondence

Course Number: 03.43F.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/80-12/85.

Objectives: To provide an introduction to the basic skills of map reading or to provide a review for those who have had previous map reading training.

Instruction: This course consists of seven lessons of programmed instruction to include coordinates, scale and distance, elevation and relief, azimuths, orientation, intersection and resection, and is followed by a supervised two hour examination without text or notes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in map reading (3/85).

MC-1601-0023

Installation of the Reserve Osmosis Water Purification Unit (ROWPU), 600GPH by Correspondence

Course Number: 11.22.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/84-2/89.

Learning Outcomes: Upon completion of the course, the student will be able to perform preoperation inspection, start operation, adjust shutdown, and repair the 600 gallons-per-hour Reverse Osmosis Water Purification Unit.

Instruction: The student shall receive instruction in the fundamentals of reverse osmosis, startup, operation, and repair of reverse osmosis water purification equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in principles of osmotic water purification (7/87).

MC-1601-0024

Basic Combat Engineer

Course Number: 130.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 5 weeks (180 hours). *Version 2:* 6-7 weeks (212-213 hours).

Exhibit Dates: *Version 1:* 6/90-Present. *Version 2:* 10/84-5/90.

Learning Outcomes: Upon completion of the course, the student will be able to perform the tasks of a combat engineer in the areas of camouflage, erection of pre-fabricated bridges, demolition, and construction of field fortifications.

Instruction: Instruction includes lectures, demonstrations, and practical exercises in construction of bunkers, trenches, and shelters, demolition of wood and steel with explosives, landmine warfare, erection of prefabricated bridges, construction of a simple concrete foundation, rigging, and culvert placement.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* Credit is not recommended because of the military-specific nature of the course (3/90).

MC-1601-0025

Basic Hygiene Equipment Operator

Course Number: 110.

Location: Engineer School, Cp. Lejuene, NC.

Length: 11-12 weeks (476 hours).

Exhibit Dates: 3/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to install plumbing to include pipe, plumbing fixtures, water supply line, stacks, vents drains, and waste disposal lines, perform a ph determination test, a chlorine residual test, a coagulation for test and develop a water point and a water source, operate and maintain a water purification unit, operate and maintain hygiene equipment to include field bath unit, decontamination apparatus, delousing unit, and laundry unit, install and maintain latrines, urinals, and leaching fields.

Instruction: Lectures, demonstrations and applications in basic plumbing installation, reconnaissance and development of a water point and a water source including routine control tests, operation and maintenance of water purification equipment, operation and maintenance of hygiene equipment including field bath units, decontamination apparatuses, laundry units, and delousing units, installation and maintenance of latrines, urinals, and leaching fields. The course concludes with a field exercise where the student establishes a water point and sets up and operates hygiene equipment in a field environment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in basic plumbing, 3 in water/sewerage treatment, 2 in hygiene equipment operator, and 3 in water testing and purification (12/88).

MC-1601-0026

Combat Engineer Officer

Course Number: ACC.

Location: Engineer School, Cp. Lejeune, NC.

Length: 11 weeks (361 hours).

Exhibit Dates: 10/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide technical assistance and leadership in engineering supervision with emphasis in the following areas: equipment organization, maintenance, and transportation, fortification and camouflage, demolitions with explosives, reconnaissance for road selection, vertical construction, and pre-fabricated bridge erection.

Instruction: Instruction includes lecture, demonstration, and practical exercises on management functions of equipment operation and maintenance, site clearing with explosives, wood frame structure construction, estimation techniques for cut, fill, and building, minefield clearing and installation, and job planning and management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in construction management/supervision (9/89).

MC-1601-0027

Engineer Operations Chief

Course Number: 13G.

Location: Engineer School, Cp. Lejeune, NC.

Length: 7-8 weeks (252 hours).

Exhibit Dates: 1/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide technical assistance on engineering supervision with primary emphasis in the following areas: equipment organization, maintenance, and transportation, demolitions, camouflage of fortified position, vertical construction techniques, military road planning and construction, airfield construction, and base camp layout and construction.

Instruction: Instruction includes lecture, demonstrations, and practical exercises on management functions of equipment oepration and maintenance, demolition of wood and steel barriers with explosives, mine warfare, camouflage techniques, construction of a wood frame structure, haul road location, cut and fill estimation, and base camp layout to include traffic flow, drainage, utilities, and billeting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in construction management/supervision (9/87).

MC-1601-0028

Journeyman Combat Engineer

Course Number: ACS.

Location: Engineer School, Cp. Lejeune, NC.

Length: 13-14 weeks (460-493 hours).

Exhibit Dates: 1/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide technical assistance for the mobilization of troops and equipment on the battlefield, for the counter mobilization of enemy forces on the battlefield, for survival on the battlefield, and to perform all combat engineers tasks relative to mobilization, counter mobilization, and survival on the battlefield.

Instruction: Includes lectures, demonstrations, applications and program instruction in engineer organization, the use of engineering tools and equipment, leadership, map reading, reconnaissance bridging, rafting, communciations, road construction, and obstacle breaching. Also covers demonstrations and applications in obstacle construction, landmine warfare, fire support, and obstacle planning, includes lectures, demonstrations, and applications in camouflage and fortified positions. Includes lectures, demonstrations, applications and program instruction in utilities equipment, welding, blueprint reading, project management, vertical construction, airfield construction, and maintenance management.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in engineering construction (4/89).

MC-1601-0029

RESERVE COMBAT ENGINEER OFFICER

Course Number: CEZ.

Location: Engineer School, Cp. Lejeune, NC.

Length: 2 weeks (61 hours).

Exhibit Dates: 6/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to continue functioning as a combat engineering officer through the instruction of current doctrine and trends in combat engineering.

Instruction: Lectures about new technology in the engineering field, amphibious operations, and Soviet organization and equipment; lectures and demonstrations on employment techniques of heavy engineering equipment and utilities, lectures concerning bridging, U.S. mine detectors, and landmine warfare; lectures, demonstrations and applications on engineer intelligence, reconnaissance and counter mobility through the use of obstacles; lectures, demonstrations, applications, critiques, and program instruction in priming and firing demolitions, and field fortification and camouflage.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (9/87).

MC-1601-0030

RESERVE COMBAT ENGINEER
NONCOMMISSIONED OFFICER (NCO)

Course Number: 43F.

Location: Engineer School, Cp. Lejeune, NC.

Length: 2 weeks (78 hours).

Exhibit Dates: 7/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to continue functioning as a combat engineering NCO through the instruction in current doctrine, equipment, and trends in combat engineering.

Instruction: Lectures, demonstrations, and practical applications in field fortifications and camouflage to include camouflage of equipment, construction of bunkers and shelters, and construction of barriers and obstacles. Lectures, demonstrations, and practical applications in demolitions to include demolition safety, tools, and equipment, military explosives, bangalore torpedoes and shaped charges, priming and firing systems, explosive created obstacles, landclearing with explosives, steel cutting, bridge demolition with explosives. Covers information on landmine warfare. Lectures, demonstrations and practical applications in bridging to include the erection of a double story medium girder bridge using link reinforcement.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (9/87).

MC-1601-0031

RESERVE ENGINEER EQUIPMENT
SUPERVISOR

Course Number: CEY.

Location: Engineer School, Cp. Lejeune, NC.

Length: 2 weeks (63-92 hours).

Exhibit Dates: 8/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform basic equipment operations and maintenance shop operations for heavy equipment.

Instruction: Instruction includes lecture, demonstrations, and practical exercises in the Marine Corps maintenance management system, equipment records and forms, inspection of a maintenance facility, operation of equipment such as backhoes, tractor/scrappers, road graders, forklifts, and cranes, preventive maintenance, logistical support estimation, and severe weather operation.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/89).

MC-1601-0032

ARTILLERY SURVEY INSTRUMENTS BY
CORRESPONDENCE

Course Number: 08.12.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 2/88–Presents.

Learning Outcomes: Upon completion of the course, the student will be able to set up, align, and operate either an M2 or M2A2 aiming circle and will be able to measure angles and declinate either instrument. The student will also be able to set up a T-16 Theodolite and measure both horizontal and vertical angles. The student will also be able to set up and operate Distomat/DI4L electronic distance measuring devices and be able to correct readings from slope to horizontal and for environmental changes. The student will be able to set up and align the reflection prism assembly for use with the Distomat/DI4L.

Instruction: Individual, self-paced, self-study course by correspondence. Materials include reading assignments, diagrams, and objective questions. A monitored final exam is taken when the student is ready, and a score of 70% or better is needed to pass the course. Topics include set up and operation of an aiming circle, Theodolite, and electronic distance measuring device.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in basic surveying (6/89).

MC-1601-0033

INTERIOR WIRING BY CORRESPONDENCE

Course Number: 11.43.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 8/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify and know the purpose for conductors, boxes and covers, conduit and conduit fittings, switches and recepticles, and lighting fixtures; install, service and distribute panels; perform circuit installation with nonmetallic cable and conduit; troubleshoot, repair, and maintain distribution systems.

Instruction: Individualized, self-paced, self-study course containing reading assignments and study questions with answers to study questions at the end of each unit. Materials include planning, installing, and maintaining of interior wiring for buildings. The student will demonstrate achievement of objectives by answering correctly 70% of the questions on a final examination.

Credit Recommendation: In the vocational certificate category, 6 semester hours in basic electrical installation (6/89); in the lower-division baccalaureate/associate degree category, 2 semester hours (mechanical and electrical equipment of buildings) in an architectural or construction management technology program (6/89).

MC-1601-0034

ENGINEER EQUIPMENT OPERATOR BY
CORRESPONDENCE

Course Number: 13.31i.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 8/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the duties of an equipment operator and determine proper procedures of equipment maintenance; understand basic engine principles and system; identify factors for efficient use of earth moving machinery; plan order of operation; read surveyors grade stakes; identify principal soil types; identify and operate tractors and tractor-drawn equipment; identify and operate material handling (fork-lifts) equipment; identify decontamination methods; fording procedures; and uses of wire rope.

Instruction: Individual, self-paced, self-study correspondence course. Materials includes reading assignments, diagrams, and objective questions. A monitored final exam is taken when the student is ready, and a score of 70% or better is needed to pass the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in construction planning, and 2 in heavy equipment operation and/or maintenance (6/89).

MC-1601-0035

AIMING CIRCLE OPERATOR BY
CORRESPONDENCE

Course Number: 08.11.

Location: Marine Corps Institute, Washington, DC.

Length: 11/88–Present.

Exhibit Dates: 52 weeks maximum.

Learning Outcomes: Upon completion of the course, the student will be able to set up and operate either an M2 or an M2A2 aiming circle. The student will be able to match components with functions; will be able to declinate and orient the instrument; and will be able to pass along basic commands for the artillery firing battery. The student will also be able to determine basic direction by simultaneous observation, polaris, or directional traverse.

Instruction: Individual, self-paced, self study course by correspondence. Materials include reading assignments, maps, diagrams, and objective questions. A monitored final exam is taken when the student is ready, and a score of 70% or better is needed to pass the course. Topics covered include set up, operation, and orientation of an aiming circle.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/89).

MC-1601-0036

Combat Engineer Noncommissioned Officer (NCO) by Correspondence

Course Number: 13.19i; 13.19h.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand basic construction techniques as related to building layout, concrete, forms and foundation, wood framing, and construction safety; perform standard rigging procedures with such devices as a gin pole, tripod and shears and be able to work with wire rope; layout, plan, and construct simple bridging and drainage structures such as simple stringer bridges, rope footbridges, open channels, calverts, and storm drains.

Instruction: Individual, self-paced, self study correspondence course. Materials include reading assignments, diagrams, charts, and objective questions. A monitored final exam is taken when the student is ready, and a score of 70% or better is needed to pass the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in methods of basic and building construction in an architectural, civil, or construction management technology program (4/89).

MC-1601-0037

Engineer Forms and Records by Correspondence

Course Number: 13.42c.

Location: Marine Crops Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 8/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to complete standardized forms used in operating and maintaining engineering equipment.

Instruction: Individualized, self-paced, self-study course containing reading assignments and study questions with answers to study questions at the end of each unit. Materials include maintenance systems and publications, administrative control and operational records, and maintenance records. The student will demonstrate achievement of objectives by answering correctly 70% of the questions on a final examination.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/89).

MC-1601-0038

Maintenance of Bulk Fuel Equipment by Correspondence

Course Number: 13.39.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum

Exhibit Dates: 10/84–6/90.

Learning Outcomes: Upon completion of the course, the student will be able to identify the Marine Corps maintenance system, procedures and troubleshooting procedures, for the care and handling of bulk fuel systems and equipment.

Instruction: This course content will include diagnosis, troubleshooting, and repair of bulk fuel systems, to include pumps, tanks, lubrication requirements, safety procedures, and preventive maintenance.

Credit Recommendation: In the vocational certificate category, 1 semester hour in maintenance of bulk fuel systems (6/89).

MC-1601-0039

Introduction to Field Artillery Survey by Correspondence

Course Number: 08.9.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to conduct field surveys in support of field artillery-application understand elevations and measurement tools, and measure survey accuracy.

Instruction: Descriptive, informative, limited skill transfer. Topics include: conducting the field artillery survey; survey equipment and accessories; survey taking, measuring dissimilities and comparative taping accuracy. The course also includes practical exercises which reinforce the material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in surveying (9/89).

MC-1601-0040

Infantry Staff Noncommissioned Officer (NCO): Military Symbols and Overlays

Course Number: 03.97.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 10/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to use 1-color/multi-color map symbols, understand geometric forms used in map symboling for military units, prepare and use overlays.

Instruction: A descriptive course which provides the student with reinforced skill to use and recognize military symbols on maps and overlays in the following areas: (1) development of the military symbol; (2) location and content of fields; (3) marine air symbols; and (4) tactical symbols. Two application exercises effectively reinforce all subject material.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-1601-0041

Construction Print Reading by Correspondence

Course Number: 13.44b.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 5/89–Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize terms and symbols used in construction prints, use of an architect's scale, and read and intercept plot plans, structural and utility plans.

Instruction: Independent study. Students are required to pass an end-of-course examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in architectural blueprint reading (6/90).

MC-1606-0001

Air Observation

Course Number: None.

Location: Educational Center, Quantico, VA.

Length: 13 weeks (445 hours).

Exhibit Dates: 2/56–12/68.

Objectives: To train enlisted personnel to perform as aerial observers.

Instruction: Lectures and field and flight exercises in basic air observation methods and techniques, communications, and tactical and gunnery aerial observation.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (12/68).

MC-1606-0002

Aerial Navigation
(Air Navigation)

Course Number: None.

Location: *Version 1:* Marine Aerial Navigation School, Mather AFB, CA. *Version 2:* Air Station, Cherry Point, NC.

Length: *Version 1:* 24 weeks (834 hours). *Version 2:* 14 weeks (535–557 hours).

Exhibit Dates: *Version 1:* 1/84–Present. *Version 2:* 7/58–12/83.

Objectives: To train enlisted personnel to be qualified aerial navigators.

Instruction: Lectures and practical exercises in basic aerial navigation, meteorology, and radar principles and operation.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in meteorology, 8 in navigation (11/86); in the upper-division baccalaureate category, 9 semester hours in advanced navigation (11/86). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in meteorology, 8 in navigation (2/74); in the upper-division baccalaureate category, 6 semester hours in navigation (12/68).

MC-1606-0003

8th Class Air Observation School

Course Number: None.

Location: Marine Corps School, Quantico, VA.

Length: 16 weeks (490 hours).

Exhibit Dates: 9/54–12/68.

Objectives: To train enlisted personnel as aerial observers.

Instruction: Lectures and practical exercises in aerial observation. Topics include tactical aerial observation, gunnery aerial observations, communications, and staff principles and techniques.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (12/68).

MC-1606-0004

Map and Aerial Photography Reading by Correspondence

Course Number: 03.17H.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 11/79–12/87.

Objectives: To provide instruction in basic map reading and aerial photographic interpretation.

Instruction: This correspondence course consists of eight units of self study in map and aerial photograph reading to include map symbols, coordinates, determination of distances and elevations, and directions and azimuths. The course is followed by a supervised three hour final examination without text books or notes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic map reading and aerial photographic interpretation (3/85).

MC-1606-0005

Intelligence for the Marine Air-Ground Task Force (MAGTF) by Correspondence

Course Number: 02.9a.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 6/86–Present.

Learning Outcomes: Upon completion of the course, the student will understand organization of a marine intelligence section and functions of intelligence personnel at different level, can identify and understand various phases of intelligence cycle, specifically identify capabilites of remote senors in developing intelligence, understand technique and procedures in recording, processing, evaluating and disseminating intelligence, and can identify components of marine air ground intelligence system (MAGIS).

Instruction: This correspondence course is designed to cover basics of intelligence collection and dissemination methodology utilized by marine air ground intelligence system (MAGIS).

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in intelligence (9/89).

MC-1606-0006

Military Operations on Urban Terrain by Correspondence

Course Number: 03.66a.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 11/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to survive in an urban environment and use combat skills to dislodge an enemy from urban areas.

Instruction: This correspondence course teaches urban warfare characteristics, offensive and defensive urban warfare and combat tactics in cities.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-1606-0007

Direction Finding Operations by Correspondence

Course Number: 26.1.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 11/88–Present.

Learning Outcomes: Upon completion of the course, the student will understand Soviet communications and tacticals systems.

Instruction: Descriptive course in understanding the background and approach to Soviety communications systems. Subjects include the Soviet communications doctrine, organizational structure, information gathering, countermeasures techniques, directional finding and the AN/PRD 10 and ODR-3045.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-1606-0008

Position Location Reporting System (PLRS) Capabilities and Employment by Correspondence

Course Number: 00.4.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 9/88–6/90.

Learning Outcomes: Upon completion of the course, the student will understand the ingredients of the PLRS, a technological system of tracking air and ground units.

Instruction: This descriptive course is aimed at providing information on the following: history and mission; system description; capabilities; ground and air application; and application to artillery 'hip shoots'.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-1606-0009

Introduction to Combat Intelligence by Correspondence

Course Number: 02.8a.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the principles of intelligence and understand the operations of a marine intelligence section.

Instruction: Descriptive, informative, no application; no skill reinforcement. Topics include: prinicples of organization of a battalion-level intelligence unit; methods of collection; source of collection; processing and dissemination of collected information; protecting classified information, and escape and evasion for intelligence personnel.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-1606-0010

Terrorism Counteraction for Marines by Correspondence

Course Number: 02.10.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 11/85–Present.

Learning Outcomes: Upon completion of the course, the student will understand international terrorism, methods of targeting, and the nature of the threat, how to prevent acts of terrorism, and how to survive as a hostage.

Instruction: Descriptive and informative. Topics include: background history of terrorism, protective measures against terrorism; and hostage survival.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to terrorism (9/89).

MC-1606-0011

Intelligence Brief: The Opposing Forces Nuclear, Biological, Chemical (NBC) Threat by Correspondence

Course Number: 02.13.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize and cope with chemical warfare directed at his unit, primarily informative but not skill producing.

Instruction: This correspondence course overviews the threat of chemical warfare originating from the Warsaw pact, including equipment, personnel, and tactics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-1606-0012

Intelligence Brief: The Military Threat by Correspondence

Course Number: 02.12.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 6/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to intergrate knowledge of Soviet history, tactics, equipment and organization in order to function as an NCO in any Marine unit.

Instruction: This correspondence course includes brief history of Russian army, organizational structure of the army, study of the Soviet soldier, Soviet tactics and specialized units of the Soviet military.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-1701-0001

Utilities Officer

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 13 weeks (402–486 hours).

Exhibit Dates: *Version 1:* 1/84–2/87. *Version 2:* 1/72–12/83.

Objectives: To train officers to perform as utilities managers.

Instruction: *Version 1:* Lectures, demonstrations and practical exercises in the principles and management of resources in the utilities field. Course includes basic mathematics and formula review, electricity concepts, construction print reading, refrigeration/air conditioning, plumbing, water supply, hygiene, and maintenance management. *Version 2:* Lectures and practical exercises in the inspection of utility systems. Course includes blueprint reading, introduction to engines, applied electrical fundamentals, AC motors and controls, generators, wiring, electric distribution, water purification procedures, water supply equipment, plumbing procedures, refrigeration theory and systems, refrigeration equipment, air conditioning, and technical inspections.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in refrigeration/air conditioning management and 3 in water supply/treatment; in the lower-division baccalaureate/associate degree category, 2 semester hours in D.C. circuits, 4 in utility systems operation and maintenance and 1 in blueprint reading (3/85). *Version 2:* In the vocational certificate category, 5 semester hours in basic refrigeration (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic refrigeration (6/74).

MC-1701-0002

Air Conditioning Mechanic by Correspondence

Course Number: 11.15B.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/82-12/86.

Objectives: To provide a comprehensive course in air conditioners and air conditioning systems.

Instruction: This is an individualized, self-paced, self-study course in air conditioners. Subject matter includes theory, the refrigeration cycle, component parts associated with air conditioning, testing, and repair. The student demonstrates achievement of the minimum objectives by passing a final examination with 65% accuracy.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic air conditioning theory (8/83).

MC-1703-0001

1. Tracked Vehicle Repairman, Tank
2. Tracked Vehicle Repairman, Tank, Basic

(Tank Vehicle Repairman)

Course Number: None.

Location: Headquarters, Schools Battalion, Cp. Pendleton, CA.

Length: *Version 1:* 5 weeks (174 hours). *Version 2:* 10 weeks (356 hours).

Exhibit Dates: *Version 1:* 2/72-12/74. *Version 2:* 10/66-1/72.

Objectives: To train enlisted personnel to inspect, troubleshoot, and repair tank systems.

Instruction: Lectures and practical exercises in tank systems inspection, troubleshooting, and repair, including tracked-vehicle introduction; maintenance procedures; electrical systems; engines; power train; hull, track, and suspension systems; care and use of tools and equipment; and engine tune-up and preventive maintenance checks and services.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in automobile mechanics or heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automobile mechanics or heavy equipment repair (4/74). *Version 2:* In the vocational certificate category, 1 semester hour in introduction to internal-combustion engines, 5 in automobile mechanics or heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to internal-combustion engines, 4 in automobile mechanics or heavy equipment repair (4/74).

MC-1703-0002

Advanced Motor Transport

Course Number: None.

Location: Supply School, Cp. Lejeune, NC.

Length: 16 weeks (511 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train noncommissioned officers to supervise, operate, and maintain motor transport equipment.

Instruction: Lectures and practical exercises in motor transport equipment operation and maintenance, including internal-combustion engines, carburetion and ignition, power train, hydraumatic transmission, and brakes; preventive maintenance and body repair; and supervisory procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in automotive mechanics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in automotive mechanics (4/74).

MC-1703-0003

Motor Transport Chief

Course Number: None.

Location: Supply School, Cp. Lejeune, NC.

Length: 10-13 weeks (358-454 hours).

Exhibit Dates: 9/64-12/68.

Objectives: To train noncommissioned officers to supervise personnel in the servicing, testing, maintenance, and repair of automobiles.

Instruction: Lectures and practical exercises in administration, maintenance management, and supply systems; automobile tools, power plant, electrical and fuel systems; tune-up; and power train, chassis, body, radiator, and fuel tank servicing, testing, maintenance, and repair.

Credit Recommendation: In the vocational certificate category, 3 semester hours in automotive mechanics or automotive technology (4/74); in the lower-division baccalaureate/associate degree category, 5 semester hours in automobile mechanics or automotive technology (4/74).

MC-1703-0004

ONTOS (M50) (Fourth and Fifth Echelon) Maintenance

Course Number: None.

Location: Tracked Vehicle Repairman School, Cp. Pendleton, CA.

Length: 3 weeks (126 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train tracked vehicle repairmen as specialists in combat tracked vehicle repair.

Instruction: Lectures and practical exercises in tracked vehicle hull, track, and suspension systems repair; removal, disassembly, repair, reassembly, and testing of engines and power trains; basic electricity; and troubleshooting and inspection procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in automobile mechanics or heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automobile mechanics or heavy equipment repair (4/74).

MC-1703-0005

Tracked Vehicle Repairman (ONTOS), Basic

(ONTOS Vehicle Repairman)

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: 5 weeks (200 hours).

Exhibit Dates: 8/67-12/68.

Objectives: To train enlisted personnel to inspect, troubleshoot, and repair tracked vehicles.

Instruction: Lectures and practical exercises in the functions of tracked vehicle repairmen, including basic driving; inspection, troubleshooting, and repair of electrical systems, engines and power trains, and hull, track, and suspension systems; and recovery procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in automobile mechanics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automobile mechanics (4/74).

MC-1703-0006

1. Tracked Vehicle Repairman Self-Propelled Artillery
2. Tracked Vehicle Repairman (Self-Propelled Artillery), Basic

(Self-Propelled Vehicle Repairman)

Course Number: None.

Location: Headquarters, Schools Battalion, Cp. Pendleton, CA.

Length: *Version 1:* 5 weeks (153 hours). *Version 2:* 10 weeks (356 hours).

Exhibit Dates: *Version 1:* 2/72-12/74. *Version 2:* 9/67-1/72.

Objectives: To train enlisted personnel to maintain and repair self-propelled, tracked artillery vehicles.

Instruction: Lectures and practical exercises in the maintenance and repair of self-propelled, tracked artillery vehicles, including operation and repair of hull and suspension systems, electrical systems, engines and power trains, basic driving, and recovery procedures.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in auto mechanics or heavy equipment repair (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in auto mechanics or heavy equipment repair (4/74). *Version 2:* In the vocational certificate category, 3 semester hours in auto mechanics or heavy equipment repair, 1 in auto electricity, 1 in introduction to internal-combustion engines (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automobile mechanics or heavy equipment repair, 1 in auto electricity, 1 in introduction to internal-combustion engines (4/74).

MC-1703-0007

Automotive Preventive Maintenance

Course Number: None.

Location: Supply School, Cp. Lejeune, NC.

Length: 6 weeks (203 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train enlisted personnel to perform preventive maintenance on automotive equipment.

Instruction: Lectures and practical exercises in preventive maintenance on automotive equipment, including nomenclature, construction, function and troubleshooting of fuel and electrical systems; power train, brake, steering and suspension systems; driver training; and lubrication and inspections.

Credit Recommendation: In the vocational certificate category, 6 semester hours in

automotive mechanics (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automotive mechanics (5/74).

MC-1703-0008

Automotive Organizational Maintenance
(Automotive Organizational Mechanics)

Course Number: None.

Location: *Version 1:* Service Support School, Cp. Lejeune, NC. *Version 2:* Headquarters, Schools Battalion, Cp. Pendleton, CA.

Length: *Version 1:* 7 weeks (288-298 hours). *Version 2:* 7 weeks (280-298 hours).

Exhibit Dates: *Version 1:* 9/70-9/83. *Version 2:* 6/66-8/70.

Objectives: To train enlisted personnel to perform as automotive mechanics.

Instruction: Lectures and practical exercises in the inspection, service, and repair of tactical automotive vehicles, including shop procedures, power plants, and fuel and electrical systems; fuel and electrical systems trouble diagnosis and tune-up; power trains; chassis, brakes, and suspension systems; diesel and multifuel engines; motor vehicle operation; and preventive maintenance techniques. After 9/83, see exhibit MC-1703-0027.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in automotive maintenance (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automotive maintenance (7/74). *Version 2:* In the vocational certificate category, 8 semester hours in automotive or heavy equipment repair (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automotive or heavy equipment repair (5/74).

MC-1703-0009

Basic Automotive Mechanic
(Automotive Mechanic)

Course Number: None.

Location: Supply School, Cp. Lejeune, NC.

Length: *Version 1:* 12 weeks (399 hours). *Version 2:* 13 weeks (450-455 hours). *Version 3:* 10 weeks (317-344 hours). *Version 4:* 14 weeks (422 hours).

Exhibit Dates: *Version 1:* 7/72-3/85. *Version 2:* 7/67-6/72. *Version 3:* 8/63-6/67. *Version 4:* 7/58-7/63.

Objectives: To train enlisted personnel to inspect, service, and repair motor transport equipment.

Instruction: *All Versions:* Lectures and practical exercises in motor transport equipment inspection, maintenance, and repair, including basic principles of electricity, automotive equipment components operation and repair, maintenance management, care and use of tools, and preventive maintenance. *Version 1:* Instruction includes driver training. *Version 2:* Instruction emphasizes power plants, power transmission systems, chassis, brakes, and suspension systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in a general motor transport automotive program/heavy equipment, 2 in automotive electrical systems, 1 in power transmission, 1 in brakes, chassis, and suspension, and 1 in driver education motor transport/heavy equipment (4/76). *Version 2:* In the vocational certificate category, 12 semester hours in automotive or heavy equipment (5/74); in the lower-division baccalaureate/associate degree category, 10 semester hours in automotive or heavy equipment (5/74). *Version 3:* In the vocational certificate category, 10 semester hours in automotive or heavy equipment (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in automotive or heavy equipment (5/74). *Version 4:* In the vocational certificate category, 12 semester hours in automotive or heavy equipment (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in automotive or heavy equipment (5/74).

MC-1703-0010

Tracked Vehicle Repairman

Course Number: None.

Location: Tracked Vehicle Repairman School, Cp. Pendleton, CA.

Length: 15 weeks (600 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train enlisted personnel to perform and supervise scheduled maintenance on tracked vehicles.

Instruction: Lectures and practical exercises in the maintenance, supervision, and repair of tracked vehicles. Topics include operation principles, publications and equipment use, nomenclature and construction, fundamentals of electricity, tracked vehicle ignition systems and generators, starters, generator control systems, hull wiring circuits, engines, and troubleshooting techniques.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/74).

MC-1703-0011

1. Tracked Vehicle Repairman Amphibian Tractor
2. Tracked Vehicle Repairman (Amphibian Vehicle)(Basic) (Amphibian Vehicle Repairman)

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: *Version 1:* 5 weeks (197 hours). *Version 2:* 10 weeks (356 hours).

Exhibit Dates: *Version 1:* 2/72-1/88. *Version 2:* 8/67-1/72.

Objectives: To train enlisted personnel as amphibious vehicle repairmen.

Instruction: *All Versions:* Lectures and practical exercises in amphibious vehicle inspection, troubleshooting, and repair, including introduction to maintenance, basic driving, engines, power train, electrical system, suspension, hydraulics, and recovery procedures. *Version 1:* Instruction emphasizes practical applications.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in basic electricity, 1 in introduction to automobile mechanics, 1 in general shop laboratory (7/74). *Version 2:* In the vocational certificate category, 2 semester hours in basic electricity, 3 in introduction to automobile mechanics, 3 in general shop laboratory (7/74).

MC-1703-0012

Advanced Automotive Mechanic/Maintenance Noncommissioned Officer (NCO) Leadership

Course Number: None.

Location: Service Support School, Cp. Lejeune, NC.

Length: 16 weeks (503 hours).

Exhibit Dates: 7/74-3/85.

Objectives: To train personnel to diagnose and repair defects in light-duty and medium-duty trucks and to demonstrate proficiency in those repairs. In addition, the student will have a working knowledge of maintenance management techniques relative to truck operations.

Instruction: Major areas of instruction include gasoline, diesel, and multi-fuel power plants; electrical and fuel systems; transmissions and drive trains; and brake systems. Management areas include maintenance management, allied trades, and specialized maintenance operations.

Credit Recommendation: In the vocational certificate category, 6 semester hours in automotive mechanics, 2 in automotive maintenance management (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical systems, 3 in diesel power plants, 3 in gasoline power plants, 2 in heavy-duty brake systems, 2 in heavy-duty power trains (4/76); in the upper-division baccalaureate category, 2 semester hours in truck maintenance management (4/76).

MC-1703-0013

Tracked Vehicle Maintenance Officer

Course Number: None.

Location: Tracked Vehicle Repairman School, Cp. Pendleton, CA.

Length: 12-13 weeks (480-520 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train officers to supervise, maintain, and repair tracked vehicles.

Instruction: Lectures and practical exercises in the supervision, maintenance, and repair of tracked vehicles, including hull, track, and suspension construction; electricity fundamentals; engine systems; generators; starters; wiring circuits; power train; tracked vehicle turrets; vehicle transmission; hydraulic operation of specific equipment; and troubleshooting procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in introductory auto mechanics, 2 in automobile electrical systems (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in introductory auto mechanics, 2 in automobile electrical systems (7/74).

MC-1703-0014

Automotive Maintenance Officer

Course Number: None.

Location: Supply School, Cp. Lejeune, NC.

Length: 12-14 weeks (395-490 hours).

Exhibit Dates: 5/64-3/85.

Objectives: To train warrant officers to organize, administer, and manage motor transport equipment maintenance and repair facilities.

Instruction: Lectures and practical exercises in the management of motor transport equipment maintenance and repair facilities. Course includes tools, power plant (spark and compression ignition), electrical and fuel systems, power train, maintenance management, preventive maintenance, unit removal and replacement, body radiator and fuel tank repair, and supply systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in automotive technology, 2 in shop foremanship (7/74), in the lower-division baccalaureate/associate degree category, 6 semester hours in automotive technology, 2 in shop foremanship (7/74).

MC-1703-0015

Light Vehicle Characteristics and Operating Techinques by Correspondence

Course Number: 35.35.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/81–12/84.

Objectives: To provide the Marine candidate through correpondence with broad coverage of various systems, characteristics, and operating techniques of light vehicles.

Instruction: This correspondence course includes: introduction to light vehicles which includes truck platforms of all light vehicles, full-tracked amphibious and unarmored; cargo trailer towing, cargo loading and unloading, load distribution, security, operating techniques, operation check, driving skills, safety, transfer gear operations, front wheel drive, recovery operation, winching operation and self recovery operation. There is no laboratory included in this correspondence course.

Credit Recommendation: Credit is not recommended because of the limited, technical nature of the course (8/83).

MC-1703-0016

Motor Transport Staff Noncommissioned Officer (NCO) Leadership
(Automotive Technicians)

Course Number: None.

Location: Service Support Schools, Cp Lejeune, NC.

Length: 13 weeks (467 hours).

Exhibit Dates: 7/73–6/86.

Objectives: Upon successful completion of this course the student will be able to supervise personnel performing inspection, repair, and replacement of all automotive wheeled vehicle components. Student will also be able to supervise the operation of a motor pool and motor vehicle use.

Instruction: Lecture-demonstrations and practical applications in the following areas: fuel and electrical systems, diesel engines, spark ignition engines, chassis and braking, body and fender repair, spark ignition engine tune-up, and motor transport supply, operation, and administration.

Credit Recommendation: In the vocational certificate category, 2 semester hours in automotive electrical systems, 5 in diesel engine diagnosis and repair, 2 in automotive suspension and braking, 1 in spark ignition tune-up (4/76); in the lower-division baccalaureate/associate degree category, 5 semester hours in motor vehicle service and maintenance management (4/76).

MC-1703-0017

Motor Vehicle Operator by Correspondence

Course Number: 35.31I; 35.31J.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78–9/88.

Objectives: To provide basic information for motor vehicle operators; the course emphasizes the characteristics of drivers, basic maneuvers of motorcycles, vehicle performance, tactical operations and forms and records keeping.

Instruction: A correspondence course that presents information on types of vehicles, responsibilities of drivers, rules of the road in operating vehicles, special driving conditions and schedule of preventive maintenance. The course does not present laboratory exercises.

Credit Recommendation: Credit is not recommeded because of the limited, technical nature of the course (8/83).

MC-1703-0018

Light Vehicle Preventive Maintenance by Correspondence

Course Number: 35.23.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 4/79–12/84.

Objectives: To prepare Marine candidates in light vehicle operation to perform duties more proficiently by providing them with study material concerning driver prevention maintenance (cleaning, inspecting, lubricating, tightening, replacing), safety and reporting.

Instruction: This correspondence course in light vehicle preventive maintenance includes: major maintenance areas; tires, effects of mechanical irregularities on tires, effects of vehicle operation, removal and mounting tires, tube repairs and storage of tires; batteries:introduction, description, function, hazards, removal and installation, cleaning, charging and servicing; cooling system: types of cooling systems, function of component, maintenance troubleshooting, cooling protection; vehicle lubrication: purpose, lubrication, lines and fittings. Daily maintenance through a designated check list is presented. Energency repairs on the light vehicle are included. The correspondence course does not include laboratory exercises.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in general introduction to automotive vehicle as a nontechnical elective (8/83).

MC-1703-0019

Preventive Maintenance and Operating Techniques on Heavy Vehicles by Correspondence

Course Number: 35.24.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/83–3/90.

Objectives: To enable the driver to identify the different systems and components of a heavy duty truck. In addition, the student will learn the necessary procedures to complete preventive maintenance on heavy duty vehicles.

Instruction: This is a correspondence course that presents information about the operation and maintenance of heavy duty tactical vehicles and includes characteristics and operation of power plant, power train and chassis system. The operators role in preventive maintenance scheduling, record keeping, and inspection are included. The course does not have laboratory exercises, but does have a proctored final examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to heavy duty vehicles as a nontechnical elective (8/83).

MC-1703-0020

Automotive Fuel and Exhaust Systems by Correspondence

Course Number: 35.25A.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 10/80–8/85.

Objectives: To provide the mechanic with technical information and study material on automotive fuel and exhaust systems for vehicles used in the motor transport field.

Instruction: This correspondence course presents information about the fundamentals of gasoline engine fuel systems including the tanks lines, fuel pump, carburetor, filters, intake manifolds and governors, the maintenance of fuel tanks, fuel pumps, air cleaner carburetor and fuel gauge are included. In addition, the fundamentals, maintenance and repair of diesel engine pumps, injectors, governors, and superchargers are presented. Material is also presented on the purpose, type, and maintenance of exhaust systems. The course does not include laboratory exercises.There is a proctored final examination required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in gasoline and diesel engine fuels systems (8/83).

MC-1703-0021

Automotive Cooling and Lubricating Systems by Correspondence

Course Number: 35.13.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78–11/84.

Objectives: To introduce the Marine Corps candidate through correspondence to the automotive cooling and lubricating systems.

Instruction: This correspondence course consists of four study units which contain statements of unit objectives, text materials and illustrations of applicable equipment to explain the course objectives, and items to teach and fully demonstrate the inspection, correction, and proper maintenance of cooling system. Course includes removal and replacement of cooling system component parts: radiator, water pump, belts and belt adjustments, thermostat, radiator hoses, and causes of cooling system malfunctions, methods of flushing and procedures for checking temperature sending units and gages including removal and replacement. Also covers purpose of lubrication system, types of systems component operation, maintenance procedures, types of oil pumps removal, repair and replacement procedures. Also includes crank case ventilating system. Course does not include laboratory exercises. There is a proctored final examination required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in cooling and lubricating system (8/83)

MC-1703-0022

Automotive Power Trains by Correspondence

Course Number: 35.9F.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 6/83–Present.

Objectives: To introduce the Marine to automotive power trains by presenting, through correspondence course material, the principles and fundamentals of automotive power train components.

Instruction: This correspondence course in the study of automotive power trains presents clutches, clutch principles and elements, operation and maintenance. Also , the course introduces transmissions to include manual shift transmission functions and types, constant mesh and synchromesh transmission. Also included are components bearing and lubrication, transfer assemby, spray unit construction and operation, service and adjustment; universal joints propeller shafts and slip joints, service, and repair; differential and axil assemblies and general types. This correspondence course does not include laboratory exercises; there is a proctored examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in theory of automotive power trains (8/83).

MC-1703-0023

Automotive Brake Systems by Correspondence

Course Number: *Version 1:* 35.15B. *Version 2:* 35.15A; 35.15.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: *Version 1:* 2/89–Present. *Version 2:* 2/81–1/89.

Objectives: To introduce Marine Corps candidates through correspondence to the basic material for understanding the principles and fundamentals of automotive brake systems.

Instruction: This correspondence course in automotive brake systems includes: introduction to types of brake systems, brake drums, brake shoes, mechanical brake systems, hydraulic brake systems, maintenance of parking brake, construction, inspection and adjustments. Also included is maintenance of hydraulic and service brake systems to include inspection adjustment, remove and replace brake components. Service includes inspect hoses and bleed and purge brake system. Introduction to air-hydraulic brake system includes components and brake system location. Maintenance of air-hydraulic brake system covers troubleshooting, testing system adjustment and service of brakes, adjustment of compressed air system components, remove and replace master cylinders, and inspection of hydraulic lines and fittings. Course does not include laboratory exercises.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in automotive brake systems (8/83). There is a proctored final examination required.

MC-1703-0024

Automotive Engine Maintenance and Repair by Correspondence

Course Number: 35.8C; 35.8B.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78–12/84.

Objectives: To introduce the Marine candidate, through correspondence, to the field of automotive engine maintenance and repair and to increase his or her knowledge of constuction, operation, malfunction diagnosis, maintenance, repair and overhaul of the internal combustion engine.

Instruction: This correspondence course in automotive engine maintenance and repair covers construction and operation, engines and engine component design, engine blocks, crankshaft, fly wheels, piston connecting rods, cylinder heads, valve mechanisms, engine malfunctions, diagnosis and remedy, engine disassembly, engine repair ,assembly and test engine (basic engine). This correspondence course does not include laboratory exercises. Proctored final examination is required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in maintenance and repair of automotive engines (8/83).

MC-1703-0025

Motor Transport Staff
Noncommissioned Officer (NCO)

Course Number: 35F.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 9 weeks (314–316 hours). *Version 2:* 10–11 weeks (276–348 hours).

Exhibit Dates: *Version 1:* 8/88–Present. *Version 2:* 6/86–7/88.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to describe the Marine Corps Integrated Maintenance Management System; perform record keeping functions related to motor transport maintenance; establish a tactical motor pool, describe special vehicle operation such as vehicle recovery, deep water fording, vehicle camouflage, vehicle loading, and night driving operations; defend a tactical convoy, describe transmissions, transfer cases, axle assemblies, brake systems, steering systems, and suspension systems employed in current motor transport tactical vehicles; and perform preventive maintenance on these vehicles. *Version 2:* Upon completion of the course, the student will be able to describe the Marine Corps Integrated Maintenance Management System; perform record keeping functions related to motor transport maintenance; establish a tactical motor pool, describe special vehicle operation such as vehicle recovery, deep water fording, vehicle camouflage, vehicle loading, and night driving operations; defend a tactical convoy, describe transmissions, transfer cases, axle assemblies, brake systems, steering systems, and suspension systems employed in current motor transport tactical vehicles; and perform preventive maintenance on these vehicles.

Instruction: *Version 1:* Course covers motor transport maintenance management/administration, operations administration, special motor transport vehicle operations, tactical convoy operations, introduction to automotive components, and test, measurement, and diagnostic equipment, preventive maintenance, repair of diesel vehicle engines and (MOS 3529) first echelon maintenance. *Version 2:* Course covers motor transport maintenance management/administration, operations administration, special motor transport vehicle operations, tactical convoy operations, introduction to automotive components, and test, measurement, and diagnostic equipment, preventive maintenance, repair of diesel vehicle engines and (MOS 3529) first echelon maintenance.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in diesel engine tune-up, 2 in diesel accessory maintenance, and 6 in motor vehicle service and maintenance management (4/89). *Version 2:* In the vocational certificate category, 2 semester hours in diesel engine tune-up, 2 in diesel accessory maintenance (4/89).

MC-1703-0026

Vehicle Recovery

Course Number: CAJ.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2–5 weeks (76–197 hours).

Exhibit Dates: 1/83–8/88.

Learning Outcomes: Upon completion of the course, the student will be able to inspect and prepare his vehicle for safe and efficient operation for the mission; operate and drive the vehicle in accordance with proper procedures including safety to occupants and vehicles; analyze impact on personnel and equipment from spilled fluids and hazardous cargo; recognize and act on potential danger to personnel and equipment from traffic, terrain and obstacles.

Instruction: Covers logistics vehicle operation and site analysis, environmental hazards, towing techniques and emergency lighting.

Credit Recommendation: In the vocational certificate category, 3 semester hours in driver's education and 3 in vehicle systems maintenance and repair (4/89).

MC-1703-0027

Motor Vehicle Operator

Course Number: 35X.

Location: Service Support School, Cp. Lejeune, NC.

Length: 7 weeks (249–253 hours).

Exhibit Dates: *Version 1:* 9/88–Present. *Version 2:* 7/86–8/88.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to demonstrate safe and proper operation of motor vehicles; will know and perform the duties of a military driver; and will demonstrate acquired preventive maintenance responsibilities. *Version 2:* Upon completion of the course, the student will demonstrate by driving test the safe and proper operation of motor vehicles; will know and perform the duties of a military driver, and will demonstrate required preventive maintenance responsibilities.

Instruction: *Version 1:* Methodology includes lectures, laboratory exercises, demonstration, and practical application of driving ability. Content covers vehicle preventive maintenance; traffic rules and regulations; military required forms including trip reports, clearance forms, operations reports; weight limitations; and proper driving techniques. *Version 2:* Methodology includes classroom lectures and demonstration, audio visual lab, and practical application laboratory in the vehicle demonstrating driving ability. Content covers vehicle preventive maintenance; traffic rules and regulations; military required forms including trip reports, clearance forms, operations reports; weight limitations; and proper driving techniques.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in driver education (4/89); in the lower-division baccalaureate/associate degree category, 1 semester hour in automotive engine repair fundamentals, 2 in driveability diagnosis (4/89). *Version 2:* In the vocational certificate category, 2 semester hours in driver education (4/89); in the lower-division baccalaureate/associate degree category, 1 semester hour in automotive engine and repair fundamentals, and 2 in driveability diagnosis (4/89).

MC-1703-0028

AUTOMOTIVE ORGANIZATIONAL MAINTENANCE

Course Number: 35H.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 12 weeks (465 hours). *Version 2:* 15-16 weeks (532-603 hours).

Exhibit Dates: *Version 1:* 7/88-Present. *Version 2:* 10/83-6/88.

Learning Outcomes: Upon successful completion of the course, the student will be able to inspect, service, and repair automotive vehicles.

Instruction: *Version 1:* Lectures and practical exercises in the inspection, service, and repair of tactical automotive vehicles, including shop procedures, power plants, and fuel and electrical systems; fuel and electrical systems trouble diagnosis and tune-up; power trains; chassis, brakes, and suspension systems; diesel and multifuel engines; motor vehicle operaion; and preventive maintenance techniques. *Version 2:* Lectures and practical exercises in the inspection, service, and repair of tactical automotive vehicles, including shop procedures, power plants, and fuel and electrical systems; fuel and electrical systems trouble diagnosis and tune-up; power trains; chassis, brakes, and suspension systems; diesel and multifuel engines; motor vehicle operaion; and preventive maintenance techniques. Jeeps were not included.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 17 semester hours in autmotive maintenance and repair (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 21 semester hours in automotive maintenance and repair (4/89).

MC-1703-0029

RESERVE MOTOR TRANSPORT OFFICER REFRESHER

Course Number: CEL.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (74-75 hours).

Exhibit Dates: 11/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to prepare maintenance schedules; describe Army and Marine Corps motor transport publications; discuss the Marine Corps integrated maintenance management system; use dispatch and operation forms and records; inspect vehicles to identify first echelon maintenance discrepancies; load and secure cargo, organize elements of a convoy.

Instruction: Covers technical publications, Marine Corps integrated maintenance management system, maintenance management, motor transport equipment, dispatch forms and records, vehicle inspection, preparation of vehicles for embarkation, vehicle loads and loadings, and tactical convoy operation. Methodology includes lecture, demonstration, and practical application.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in vehicle maintenance administration and management (4/89).

MC-1703-0030

LOGISTICS VEHICLE SYSTEM OPERATOR

Course Number: 35Z.

Location: Service Support School, Cp. Lejeune, NC.

Length: 4-5 weeks (169 hours).

Exhibit Dates: 1/89-Present.

Learning Outcomes: Upon completion of the course, the student will be able to inspect and prepare a vehicle for safe and efficient operation for the mission; operate and drive the vehicle in accordance with proper operational procedures including safety to all occupants and surrounding vehicles.

Instruction: Covers proper vehicle operation techniques, minor maintenance, emergency procedures, coupling and uncoupling procedures and basic manuevers. Methodology includes lab demonstration, troubleshooting using mock-ups and simulators, practical lab vehicle hands-on operation and a written and driving examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in automotive technology (4/89); in the upper-division baccalaureate category, 2 semester hours in advanced automotive technology (4/89).

MC-1703-0031

AUTOMOTIVE FUEL AND EXHAUST SYSTEMS BY CORRESPONDENCE

Course Number: 35.25b.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 9/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to build and focus upon the characteristics of gasoline and diesel fuels to include volatility, detonation, and additives; the student will also develop intoductory knowledge of the principles of carburetion and its related components; the student will also be introduced to diesel fuel and exhaust systems.

Instruction: This correspondence course presents information about the fundamentals of gasoline engine fuel systems including the tank lines, fuel pump, carburetor, filters, intake manifolds and governors, the maintenance of fuel tanks, fuel pumps, air cleaner carburetor and fuel gauge are included. In addition, the fundamentals, maintenance and repair of diesel engine pumps, injectors, governors, and superchargers are presented. Material also presented on the purpose, type, and maintenance of exhaust systems. The course does not include laboratory exercises. There is a proctored final examination required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in carburetion and diesel fuel systems with introduction to fuel characteristics and exhaust system construction (6/89).

MC-1703-0032

AUTOMOTIVE COOLING AND LUBRICATING SYSTEMS BY CORRESPONDENCE

Course Number: 35.13a.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 12/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the construction and main component parts of the automotive cooling system and lubricating system.

Instruction: This correspondence course consists of four study units which contain statements of unit objectives, text materials and illustrations of applicable equipment to explain the course objectives, and items to teach and fully demonstrate the inspection, correction, and proper maintenance of cooling system. Course includes maintenance of cooling system parts: radiator, water pump, belts and belt adjustements, thermostat, radiator, hoses, and causes of cooling system malfunctions, methods of flushing and procedures for checking temperature sending units and gages including removal and replacement. Also covers purpose lubrication system, types of systems component operation, maintenance procedures, types of oil pumps removal, repair, and replacement procedures. Also includes crank case ventilating system. Course does not include laboratory exercises. There is a proctored final examination required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in cooling and lubricating systems (6/89).

MC-1704-0001

AIR CONTROL ELECTRONICS OPERATOR, AUTOMATED SYSTEM

Course Number: None.

Location: Communication-Electronics School, Twentynine Palms, CA.

Length: 4-5 weeks (140-176 hours).

Exhibit Dates: 1/72-1/88.

Objectives: To train enlisted personnel with some knowledge of air control and anti-air warfare fundamentals to perform as air control electronics operators.

Instruction: Lectures and demonstrations in air control electronics fundamentals, including tactical air operations introduction; electronic warfare; and air traffic controller, weapons controller, and missile direction operations and procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/76).

MC-1704-0002

AIR CONTROL/ANTIAIR WARFARE ELECTRONICS OPERATOR

(Air Control/Antiaircraft Warfare Electronics Operator)

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 5-7 weeks (175-245 hours).

Exhibit Dates: 6/64-1/88.

Objectives: To train enlisted personnel in tactical air control, air support, and antiaircraft missile systems electronics operations.

Instruction: Lectures and demonstrations in air control and air support electronics, including radar indicator operation and adjustment; radio direction finding equipment; radio/telephone procedures; aircraft control information status and plotting; and interpreting aircraft speed, course altitude, and identification from radar indications.

Credit Recommendation: Credit is not recommended because of the military nature of the course (3/74).

MC-1704-0003

MARINE MECHANICAL FUNDAMENTALS

Course Number: None.

Location: Aviation Detachment, Jacksonville, FL.

Length: *Version 1:* 7 weeks (280 hours). *Version 2:* 8 weeks (320 hours).

Exhibit Dates: *Version 1:* 3/64–12/68. *Version 2:* 1/60–2/64.

Objectives: To train enlisted personnel in mechanical fundamentals.

Instruction: Lectures and practical exercises in the fundamentals of electricity, mathematics, physics, aviation familiarization, aviation mechanics, hand tools, aircraft instruments and structures, aviation ordnance, and technical publications.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in general aeronautics (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in general aeronautics (2/74); in the upper-division baccalaureate category, 2 semester hours in general aeronautics (12/68). *Version 2:* In the vocational certificate category, 5 semester hours in general maintenance fundamentals (2/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in general aviation maintenance fundamentals (2/74); in the upper-division baccalaureate category, 3 semester hours in general aviation maintenance fundamentals (12/68).

MC-1704-0004

TACTICAL AIR DEFENSE CONTROLLER
(Tactical Air Defense Controller Enlisted)

Course Number: FG5.

Location: Air Command and Control School, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 5 weeks (171–199 hours).

Exhibit Dates: 9/78–Present.

Objectives: To provide selected enlisted personnel with a thorough knowledge of the functioning and operations of the techniques of ground controlled intercepts and air traffic control procedures in a clear environment.

Instruction: The course provides the formal training necessary for further qualification as a tactical air controller. Topics include air control communications, air intercept control, weapons systems characteristics, flight rules and regulations, and electronic warfare.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/89).

MC-1704-0005

AERIAL OBSERVER
(Air Observer)
(Tactical Aerial Observer)

Course Number: None.

Location: Aerial Observation School, Jacksonville, NC.

Length: 8–10 weeks (299–553 hours).

Exhibit Dates: 1/68–2/86.

Objectives: To train officers to perform as aerial observers.

Instruction: Lectures and practical exercises in aerial observation, including communications, gunfire support, airborne map reading and navigation, visual reconnaissance techniques, target acquisition, aerial photography fundamentals, liaison and utility missions, aerial radiological monitoring, terrain and weather conditions, and tactical reconnaissance of roads, bridges, rivers, beaches, railroads, and urban areas.

Credit Recommendation: Credit is not recommended because of the military nature of the course (2/86).

MC-1704-0006

AIR DEFENSE CONTROL OFFICER,
AUTOMATED SYSTEM (ADCOC)

Course Number: None.

Location: Air Command and Control School, Twentynine Palms, CA.

Length: 9 weeks (335 hours).

Exhibit Dates: 7/73–4/85.

Objectives: To provide personnel with training necessary to operate specific air defense control equipment.

Instruction: Lectures and practical exercises in the Marine air command and control system, surveillance operations, basic control procedure, threat evaluation/weapon assignment, pattern intercepts, and system utilization.

Credit Recommendation: In the vocational certificate category, 4 semester hours in air traffic management and control (2/86).

MC-1704-0007

HYDRAULIC PRINCIPLES AND
TROUBLESHOOTING BY
CORRESPONDENCE

Course Number: 13.45.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to discuss the principles of force and pressure; develop introductory knowledge of hydraulic system components and troubleshooting procedures.

Instruction: This course will cover hydraulic principles, system component identification and troubleshooting procedures for hydraulic systems.

Credit Recommendation: In the vocational certificate category, 2 semester hours in hydraulic principles and introduction to hydraulic system components including troubleshooting procedures (6/89).

MC-1708-0001

ASSAULT AMPHIBIAN VEHICLE CREWMAN
(Amphibian Vehicle Crewman)

Course Number: None.

Location: Assault Amphibian School, Cp. Pendleton, CA; Tracked Vehicle School, Cp. Pendleton, CA.

Length: *Version 1:* 6 weeks (199 hours). *Version 2:* 4–5 weeks (113–168 hours).

Exhibit Dates: *Version 1:* 1/84–Present. *Version 2:* 9/73–12/73.

Objectives: To provide the student with the skills necessary to serve as an amphibian tractor crewman.

Instruction: Lectures and practical exercises in vehicle description, safety procedures, basic radio communications, vehicle recovery, before and after operational checks, basic land and water driving procedures, operation and preventive maintenance of the weapons station and M85 machine gun, and vehicle preventive maintenance.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 2 semester hours in amphibious vehicle operation (7/74).

MC-1710-0001

1. BASIC ENGINEER EQUIPMENT
   MECHANIC
2. BASIC ENGINEER EQUIPMENT
   MECHANIC
   (Engineer Equipment Mechanic)
3. ENGINEER EQUIPMENT MECHANICS
4. ENGINEER EQUIPMENT MECHANIC
   BASIC

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 8–11 weeks (280–412 hours). *Version 2:* 10–15 weeks (398–538 hours). *Version 3:* 14 weeks (490 hours). *Version 4:* 18 weeks (540 hours).

Exhibit Dates: *Version 1:* 5/79–Present. *Version 2:* 5/67–4/79. *Version 3:* 5/62–4/67. *Version 4:* 7/58–4/62.

Objectives: To train enlisted personnel to operate and maintain heavy construction equipment.

Instruction: *Version 1:* Lectures, demonstrations and practical exercises in the operation, maintenance, troubleshooting, and repair of diesel and gasoline engines and basic engineering heavy construction equipment and systems. *Version 2:* Lectures and practical exercises in engine repair and troubleshooting (including ancillary systems), tractors, graders, cranes, mixer, rollers, ditchers, compressors, diesel engines and gasoline engines maintenance, road machinery operation, and power shovel and special equipment operation and maintenance. *Version 3:* Lectures andpractical exercises in engine repair and troubleshooting (including ancillary systems), tractors graders, cranes, mixers, rollers, ditchers, compressors, diesel engines and gasoline engines maintenance, road machinery operation, and power shovel and special equipment operation and maintenance. *Version 4:* Lectures and practical exercises in engine repair and troubleshooting (including ancillary systems), tractors, graders, cranes, mixers, rollers, ditchers, compressors, diesel engines and gasoline engines maintenance, road machinery operation, and power shovel and special equipment operation and maintenance.

Credit Recommendation: *Version 1:* In the vocational certificate category, 8 semester hours in heavy construction equipment operation, maintenance, and repair (4/89). *Version 2:* In the vocational certificate category, 6 semester hours in heavy equipment mechanics (7/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in heavy equipment mechanics (7/74). *Version 3:* In the vocational certificate category, 3 semester hours in automobile engines, 6 in heavy equipment maintenance or civil technology, 4 in heavy equipment operation (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in automobile engines, 4 in heavy equipment maintenance or civil technology, 3 in heavy equipment operation (4/74). *Version 4:* In the vocational certificate category, 3 semester hours in automobile engines, 6 in heavy equipment maintenance or civil technology, 4 in heavy equipment operation (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automobile engines, 4 in heavy equipment maintenance or civil technology, 3 in heavy equipment operation (4/74).

MC-1710-0002

BASIC ENGINEER EQUIPMENT OPERATOR
(Engineer Equipment Operators)

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 8-11 weeks (301-385 hours).

Exhibit Dates: 6/62-12/74.

Objectives: To train enlisted personnel to operate and maintain tractors, graders, cranes, and stationary engineer equipment.

Instruction: Lectures and practical exercises in the operation and maintenance of tractors, graders, cranes, and stationary engineer equipment, including identification and nomenclature of engineer equipment, principles of internal-combustion engines and electrical and lubrication systems, and preventive maintenance procedures for specific equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in heavy equipment operation (4/74).

MC-1710-0003

Construction Foreman

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 19 weeks (540 hours).

Exhibit Dates: 7/55-12/68.

Objectives: To train enlisted personnel to supervise the repair and camouflaging of military structures and facilities.

Instruction: Lectures and practical exercises in the supervision of construction operations, including camouflaging, repair, rigging, lumbering, painting, woodworking, shop planning and management, construction equipment, construction drawing, prefabricated-building erection, building construction methods, estimating, culverts, bridging, demolition, and mine warfare.

Credit Recommendation: In the vocational certificate category, 10 semester hours in construction technology (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in construction technology (7/74); in the upper-division baccalaureate category, credit in construction technology on the basis of institutional evaluation (12/68).

MC-1710-0004

Theory and Construction of Turbine Engines by Correspondence

Course Number: 60.2.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 12/84-Present.

Learning Outcomes: Upon completion of the course, the student will able to describe the basic physics of gas turbine engines, and the detail of turbine engine construction and operation.

Instruction: Topics include physics of gas turbine engines, turbine engine construction, maintenance and operation. A detailed study of the following turbine engine systems: induction, exhaust, fuel metering, ignition, starting, fire protection, lubrication, and cooling.

Credit Recommendation: In the vocational certificate category, 2 semester hours in turbine engine theory, maintenance, and operation (7/87).

MC-1710-0005

Plumbing and Sewage Disposal by Correspondence

Course Number: *Version 1:* 11.21b. *Version 2:* 11.21a.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: *Version 1:* 5/89-Present. *Version 2:* 4/86-4/89.

Learning Outcomes: Upon completion of the course, the student will be able to identify the application of iron and steel pipe and fittings, and copper tubing and fittings; identify terms, tools, and installation techniques associated with these pipes and fittings; identify the water services used for building and water supply lines, including the fixtures and tools associated with installation and the safety precautions that must be followed when using the tools; identify the installation and maintenance associated with a permanent sewage system including drains, stacks, vents, septic tanks, leaching fields, and grease traps.

Instruction: Individual, self-paced, self-study course containing reading assignments and study questions as the end of each unit. Materials include planning, installing, and maintaining of a water system and a sewer system. The student will demonstrate achievement of objectives by answering correctly 70% of all the questions on a final examination.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* VOC 6 semester hours in basic plumbing course (6/89); in the lower-division baccalaureate/associate degree category, 2 in (mechanical and electrical equipment of buildings) in an architectural or construction management technology program (6/89).

MC-1710-0006

Basic Tank Crewman

Course Number: None.

Location: Headquarters, Schools Battalion, Cp. Pendleton, CA.

Length: 4 weeks (154 hours).

Exhibit Dates: 7/65-12/73.

Objectives: To train enlisted personnel to perform as tank crewmen.

Instruction: Lectures and practical exercises in the functions of tank crewmen, including employment of organic communications equipment, protective and decontamination procedures, driving, sighting and fire control instruments, conduct of fire, subcaliber firing, service firing, and preventive maintenance procedures.

Credit Recommendation: Credit is not recommended because of the military nature of the course (4/74).

MC-1710-0007

Tracked Vehicle Repairman Advanced

(Advanced Tracked Vehicle Repairman)

Course Number: None.

Location: Headquarters, Schools Battalion, Cp. Pendleton, CA; Tracked Vehicle School, Cp. Pendleton, CA.

Length: 8-12 weeks (276-424 hours).

Exhibit Dates: 7/58-12/74.

Objectives: To train enlisted personnel to maintain tracked combat vehicles.

Instruction: Lectures and practical exercises in the maintenance of tracked combat vehicles, including maintenance management; operation and inspection of engine, hull, turret, suspension, and power train; electrical components; practical applications; and troubleshooting and repair of transmissions.

Credit Recommendation: In the vocational certificate category, 3 semester hours as an elective in mechanical technology (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in mechanical technology (4/74).

MC-1710-0008

Turret Repairman

Course Number: None.

Location: Tracked Vehicle Repairman School, Cp. Pendleton, CA.

Length: 12 weeks (480 hours).

Exhibit Dates: 7/58-12/74.

Objectives: To train enlisted personnel to repair and maintain the turrets and armament systems of tanks, armored amphibian tractors, and other combat vehicles.

Instruction: Lectures and practical exercises in the repair and maintenance of the turrets and armament of tanks, armored amphibian tractors, and other combat vehicles, including installation of gun and mount mechanisms, basic hydraulics, fundamentals of electrical theory, fire control systems, flame throwers and self-propelled guns, and analysis of various guns and mounts.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour as an elective in mechanical or industrial technology (4/74).

MC-1710-0009

Tank Unit Leaders (Enlisted)

Course Number: None.

Location: Tracked Vehicle Operations School, Cp. Pendleton, CA.

Length: 12 weeks (488 hours).

Exhibit Dates: 7/58-12/74.

Objectives: To train noncommissioned officers to perform as members of tank crews.

Instruction: Lectures and practical exercises in leadership, tactics, and techniques of tank operations, including tank communications equipment, troubleshooting, operation and maintenance of specific equipment electrical systems, engines, and transmissions; flame tank familiarization; turret electrical, hydraulic, and manual controls; turret-associated equipment; driving; map reading; and logistics and leadership training.

Credit Recommendation: Credit is not recommended because of the military nature of the course (4/74).

MC-1710-0010

Assault Amphibious Vehicle Unit Leader

(Amphibious Vehicle Unit Leader)

(Amphibious Vehicle Unit Leaders (Enlisted))

Course Number: None.

Location: Amphibious School, Cp. Pendleton, CA; Schools Battalion, Cp. Pendleton, CA; Tracked Vehicle Operations School, Cp. Pendleton, CA.

Length: *Version 1:* 5 weeks (192 hours). *Version 2:* 5-12 weeks (197-528 hours).

Exhibit Dates: *Version 1:* 1/84-Present. *Version 2:* 7/58-Present.

Objectives: To train selected personnel to supervise amphibious vehicle crews.

Instruction: Lectures and practical exercises in amphibious vehicle operations, including operation, inspection, and maintenance of power train, engines, and turrets; hull, track, and suspension systems; electrical system; communications equipment; indirect and direct fire gunnery procedures; tactics; logistics; and leadership training.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* Credit is not recommended because of the military nature of the course (4/74).

MC-1710-0011

1. Artillery Weapons Repairman (Basic)
2. Artillery Weapons Repairman

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: *Version 1:* 5-6 weeks (219-241 hours). *Version 2:* 7 weeks (296-300 hours).

Exhibit Dates: *Version 1:* 7/60-12/72. *Version 2:* 7/58-6/60.

Objectives: To train noncommissioned officers to maintain and repair artillery weapons and related material and mounts.

Instruction: Lectures and practical exercises in the maintenance and repair of artillery weapons and related material and mounts, including use of measuring instruments and hand tools, inspection techniques, and repair of howitzers, mortars, and cannons.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in mechanical repair technology (5/74). *Version 2:* In the vocational certificate category, 2 semester hours in mechanical repair technology (5/74).

MC-1710-0012

Journeyman Plumbing and Water Supply Man
(Plumbing and Water Supply Journeyman)

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 12 weeks (417 hours).

Exhibit Dates: 1/71-9/82.

Objectives: To qualify noncommissioned officers who have completed the basic plumbing and water supply man course as journeymen.

Instruction: Lectures and practical exercises in the skills of a journeyman plumbing and water supply man, including supply procedures and systems control; installation and repair of plumbing, heating, and sewage systems; water supply equipment and water purification equipment; development of water sources and points; and well drilling.

Credit Recommendation: In the vocational certificate category, 6 semester hours in plumbing and water supply, plumbing and heating, environmental technology, water resources, or water treatment (5/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in plumbing and water supply, plumbing and heating, environmental technology, water resources, or water treatment (5/74); in the upper-division baccalaureate category, 4 semester hours in plumbing and water supply, plumbing and heating, environmental technology, water resources, or water treatment (5/74).

MC-1710-0013

1. Basic Plumbing and Water Supply Man
2. Plumbing and Water Supply Man
3. Plumbing and Water Supply Man

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 4 weeks (176 hours). *Version 2:* 8 weeks (235-300 hours). *Version 3:* 11 weeks (344 hours).

Exhibit Dates: *Version 1:* 8/68-10/82. *Version 2:* 6/62-7/68. *Version 3:* 7/58-5/62.

Objectives: To train enlisted personnel to install, operate, and maintain water supply and plumbing equipment.

Instruction: *All Versions:* Lectures and practical exercises in the installation, operation, and maintenance of water supply and plumbing equipment, including plumbing, sewage, and heating systems; purification and distillation equipment; reconnaissance and development of water points and sources; water distribution equipment; quality control; and portable water supply equipment. *Version 2:* Includes well drilling and jetting, and reciprocating and deep-well pumps. *Version 3:* Includes principles, characteristics, and maintenance of gas and diesel engines, and mine warfare.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in beginning plumbing and water supply or environmental technology (water) (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in beginning plumbing and water supply or environmental technology (water) (5/74); in the upper-division baccalaureate category, 1 semester hour in beginning plumbing and water supply or environmental technology (water) (5/74). *Version 2:* In the vocational certificate category, 6 semester hours in beginning plumbing and water supply or environmental technology (water) (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning plumbing and water supply or environmental technology (water) (5/74); in the upper-division baccalaureate category, 1 semester hour in beginning plumbing and water supply or environmental technology (water) (5/74). *Version 3:* In the vocational certificate category, 8 semester hours in beginning plumbing and water supply or environmental technology (water) (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in beginning plumbing and water supply or environmental technology (water) (5/74); in the upper-division baccalaureate category, 1 semester hour in beginning plumbing and water supply or environmental technology (water) (5/74).

MC-1710-0014

Utilities Chief

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 15 weeks (468 hours). *Version 2:* 15 weeks (518 hours). *Version 3:* 18 weeks (668 hours). *Version 4:* 22 weeks (679 hours). *Version 5:* 27 weeks (780 hours).

Exhibit Dates: *Version 1:* 3/83-2/87. *Version 2:* 1/83-2/83. *Version 3:* 1/72-12/82. *Version 4:* 6/62-12/71. *Version 5:* 7/58-5/62.

Objectives: To train noncommissioned officers (sergeant through gunnery sergeant) to supervise the installation or repair of utilities systems.

Instruction: *Version 1:* Lectures and practical exercises in the installation and repair and/or management of utilities systems to include basic and shop mathematics, basic electrical principles (AC/DC), motors, generators, heating systems, blueprint reading, air conditioning/refrigeration, plumbing, and management (water, plumbing, hygiene, electrical, and maintenance). *Version 2:* Lectures and practical exercises in the installation or repair of utilities systems to include: basic mathematics, basic electrical theory (AC/DC), motors, generators, heating systems, blueprint reading, air conditioning/refrigeration, plumbing, and management (water, plumbing, hygiene, electrical, and maintenance). *Version 3:* Lectures and practical exercises in the installation or repair of utilities systems, including engineering mathematics, electrical theory, generators and motors, heating systems, blueprint reading, air-conditioning and refrigeration systems, water supply and purification systems, plumbing and sewage installations, and interior wiring. *Version 4:* Lectures and practical exercises in the installation or repair of utilities systems, including engineering mathematics, electricaltheory, generators and motors, heating systems, blueprint reading, air-conditioning and refrigeration systems, water supply and purification systems, plumbing and sewage installation, and interior wiring. *Version 5:* Lectures and practical exercises in the installation or repair of utilities systems, including engineering mathematics, electrical theory, generators and motors, heating systems, blueprint reading, air-conditioning and refrigeration systems, water supply and purification systems, plumbing and sewage installation and interior wiring.This version includes additional field work, especially in interior wiring, and instruction on internal-combustion engines.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in refrigeration/air conditioning systems management, 3 in water supply/treatment systems management, and 4 in electrical systems management (2/85); in the lower-division baccalaureate/associate degree category, 2 semester hours in construction blueprint reading and 2 in DC circuits (2/85). *Version 2:* In the vocational certificate category, 1 semester hour in plumbing, 1 in water supply management, 1 in hygiene management (3/83); in the lower-division baccalaureate/associate degree category, 1 semester hour in blueprint reading, 5 in air conditioning/refrigeration management, 2 in electricity concepts, 10 in electrical management (3/83). *Version 3:* In the vocational certificate category, 16 semester hours in refrigeration or electricity (5/74); in the lower-division baccalaureate/associate degree category, 8 semester hours in refrigeration or electricity (5/74). *Version 4:* In the vocational certificate category, 6 semester hours in building construction and supervision (6/74); in the lower-division baccalaureate/associate degree category, 9 semester hours in building construction and supervision (6/74); in the upper-division baccalaureate category, 3 semester hours in building construction and supervision (6/74). *Version 5:* In the vocational certificate category, 9 semester hours in building construction and supervision (6/74); in the lower-division baccalaureate/associate degree category, 9 semester hours in building construction and supervision (6/74); in the upper-division baccalaureate category, 3 semester hours in building construction and supervision (6/74).

MC-1710-0015

Utilities Officers

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 12 weeks (420 hours).

Exhibit Dates: 6/62-12/68.

Objectives: To familiarize warrant officers and lieutenants with the technical aspects of Marine Corps utilities systems.

Instruction: Lectures and practical exercises in the technical aspects of the utilities field, including water supply and plumbing, electrical systems, refrigeration, field problems, internal-combustion engines, Marine

Corps supply system, engineer supply, supply allowances publications, decontamination, and terminology, definitions and symbols.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in building construction/supervision (5/74); in the upper-division baccalaureate category, 3 semester hours in building construction/supervision (5/74).

MC-1710-0016

Engineer Equipment Chief

Course Number: *Version 1:* 13E. *Version 2:* 13E. *Version 3:* None. *Version 4:* None. *Version 5:* None. *Version 6:* None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 12 weeks (388 hours). *Version 2:* 9-11 weeks (345-355 hours). *Version 3:* 11-12 weeks (397-403 hours). *Version 4:* 13 weeks (449 hours). *Version 5:* 14 weeks (490 hours). *Version 6:* 30 weeks (1050 hours).

Exhibit Dates: *Version 1:* 4/89-Present. *Version 2:* 10/82-3/89. *Version 3:* 7/68-9/82. *Version 4:* 5/67-6/68. *Version 5:* 6/62-4/67. *Version 6:* 1/59-5/62.

Objectives: To train noncommissioned officers to supervise the operation and repair of mechanical equipment.

Instruction: *Version 2:* Lectures and practical exercises in the supervision, operation, and maintenance of earth moving equipment; equipment application in road construction and excavation; mechanics, hydraulics and power trains; welding; metalworking and safety. Course teaches those in supervisory positions, the operation and maintenance of mechanical and hydraulic equipment and the application of this equipment in earth work projects. Maintenance management is included. *Version 3:* Lectures and practical exercises in the supervision of mechanical equipment operation and repair, including maintenance procedures; production capabilities of graders, dozers, compacters and other equipment; road design and construction; excavation; basic internal-combustion theory and repair; automotive power train theory and repair; and arc and gas welding. *Version 4:* Lectures and practical exercises in the supervision of mechanical equipment operation and repair, including maintenance procedures; production capabilities of graders, dozers, compacters and other equipment, road design and construction; excavation; basic internal-combustion theory and repair; automotive power train theory andrepair; and arc and gas welding.Includes general mechanical repair. *Version 5:* Lectures and practical exercises in the supervision of mechanical equipment operation and reapir, including maintenance procedures; production capabilities of graders, dozers, compacters and other equipment; road design and construction; excavation; basic internal-combustiontheory and repair; automotive power train theory andrepair; and arc and gas welding. Course includes general mechanical repair with emphasis on sheet metal and welding. *Version 6:* Lectures and practical exercises in the supervision of mechanical equipment operation and repair, including maintenance procedures; production capabilities of graders, dozers, compacters and other equipment; road design and construction; excavation; basic internal-combustion theory and repair; automotive power train theory and repair; and arc and gas welding. Includes general mechanical repair, with emphasis on sheet metal and welding.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in automotive technology, 4 in civil technology (7/87). *Version 3:* In the vocational certificate category, 2 semester hours in automotive technology, 2 in automotive power trains, 4 in civil construction technology (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in automotive technology, 2 in automotive power trains, 4 in civil construction technology (5/74). *Version 4:* In the vocational certificate category, 1 semester hour in automotive technology, 7 in civil construction technology, 1 in mechanical technology (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in automotive technology, 7 in civil construction technology, 1 in mechanical technology (5/74). *Version 5:* In the vocational certificate category, 1 semester hour in automotive technology, 4 in civil construction technology, 1 in manufacturing processes (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in automotive technology, 4 in civil construction technology, 1 in manufacturing processes (5/74). *Version 6:* In the vocational certificate category, 4 semester hours in automotive technology, 8 in civil construction technology (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in automotive technology, 8 in civil construction technology (5/74).

MC-1710-0017

Shore Party Basic Specialist

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 4 weeks (163 hours).

Exhibit Dates: 7/67-12/72.

Objectives: To train BST students (corporal and below) as shore party basic specialists.

Instruction: Lectures and practical exercises on shore party battalion functions, including organization, equipment, mission, and employment; construction; shore party and helicopter support team organization and operations; demolitions; land mine warfare; rigging; roof, floor, and wall construction; HST operations in the LZ; wood cutting and stump removal; minefield installation; foreign mines and boobytrapping techniques; concrete construction; and shore party organization and operations.

Credit Recommendation: In the vocational certificate category, 2 semester hours in construction technology (5/74).

MC-1710-0018

Basic Construction Man

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 10 weeks (300 hours).

Exhibit Dates: 10/56-12/68.

Objectives: To train enlisted personnel to construct, repair, and camouflage military structures and facilities.

Instruction: Lectures and practical exercises in the construction, repair, and camouflage of military structures and facilities. Course includes logging methods; painting; construction drawing; woodworking; standard military buildings; building construction methods; culverts; bridging and rigging.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in construction technology (7/74).

MC-1710-0019

Combat Engineer Advanced

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 13 weeks (489 hours). *Version 2:* 22 weeks (654 hours). *Version 3:* 28 weeks (819 hours).

Exhibit Dates: *Version 1:* 8/67-12/68. *Version 2:* 6/62-7/67. *Version 3:* 7/58-5/62.

Objectives: To train enlisted personnel to supervise combat engineering projects.

Instruction: Lectures and practical exercises in combat engineering, including blueprint reading, construction surveying, route reconnaissance, soils engineering, building construction, bridges, utilities, hand and power woodworking tools operation, estimating procedures, and roads and airfield construction.

Credit Recommendation: *Version 1:* In the vocational certificate category, 10 semester hours in engineering construction (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in engineering construction (6/74); in the upper-division baccalaureate category, 3 semester hours in engineering construction (12/68). *Version 2:* In the vocational certificate category, 10 semester hours in engineering construction (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in engineering construction (6/74); in the upper-division baccalaureate category, 6 semester hours in engineering construction (12/68). *Version 3:* In the vocational certificate category, 8 semester hours in engineering construction (6/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in engineering construction (6/74); in the upper-division baccalaureate category, 6 semester hours in engineering construction (12/68).

MC-1710-0020

Combat Engineer Basic Specialist

(Combat Engineer Basic)

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 4-13 weeks (160-407 hours).

Exhibit Dates: 6/62-12/68.

Objectives: To train enlisted personnel to use hand and power tools and to construct buildings and bridges.

Instruction: Lectures and practical exercises in hand and power tool operation; building layout; foundations and forms; roof, floor, and wall construction; concrete construction; various types of bridges; road maintenance and repair; drainage and ditching; and culvert construction.

Credit Recommendation: In the vocational certificate category, 1 semester hour in hands-on construction (5/74).

MC-1710-0021

Welders

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 6 weeks (185 hours).

Exhibit Dates: 5/62-12/68.

Objectives: To train enlisted personnel in the principles and techniques of oxyacetylene, electric, and inert-gas welding.

Instruction: Lectures and practical exercises in the principles and techniques of oxyacetylene, electric, and inert-gas welding. Course includes oxyacetylene and electric arc welding in flat, vertical, horizontal, and overhead positions; safety precautions; cutting procedures; brazing ferrous and nonferrous metals; soldering techniques; procedures for hard-surfacing metals; procedures for welding armor plate; and tungsten inert-gas welding procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in welding (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in welding (5/74).

MC-1710-0022

TRACKED VEHICLE MAINTENANCE OFFICER/STAFF NONCOMMISSIONED OFFICER MANAGEMENT

(Tracked Vehicle Maintenance Management)

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: 3-4 weeks (125-163 hours).

Exhibit Dates: 1/72-12/74.

Objectives: To train commissioned officers and senior staff NCOs to manage a tracked-vehicle maintenance group.

Instruction: Lectures and practical exercises in the management of a tracked-vehicle maintenance group. Course includes tracked-vehicle familiarization, supply maintenance, and maintenance management.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (7/74).

MC-1710-0023

WEAPONS REPAIR OFFICER

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 9 weeks (360 hours).

Exhibit Dates: 7/58-12/73.

Objectives: To train company grade officers to maintain and repair infantry and artillery weapons, including guided missile and free-rocket launchers and related control equipment.

Instruction: Lectures and practical exercises in the maintenance and repair of infantry and artillery weapons. Course includes repair shop procedures, artillery fundamentals, artillery weapons repair, tank gun mount, guided missile launcher, and inspection and repair of infantry weapons.

Credit Recommendation: In the vocational certificate category, 2 semester hours as an elective in mechanical or industrial technology (7/74); in the lower-division baccalaureate/associate degree category, 2 semester hours as an elective in mechanical or industrial technology (7/74).

MC-1710-0024

ENGINEER EQUIPMENT MECHANIC FOREMAN

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 19 weeks (537 hours).

Exhibit Dates: 7/55-12/68.

Objectives: To train enlisted personnel to supervise the repair of engineer equipment, diesel engines, and gasoline- and diesel-powered construction equipment.

Instruction: Lectures and practical exercises in the supervision of the repair of engineer equipment, diesel engines, and gasoline- and diesel-powered construction equipment, including maintenance and replacement of diesel engines, TD 18-A tractors, gasoline engines, M-R-S tractors, hystaway cranes, tandem rollers, air compressors, cranes, crawler crane shovels, graders, TD 24 tractors, well rigs, concrete mixers, and ditchers.

Credit Recommendation: In the vocational certificate category, 10 semester hours in heavy equipment programs, 4 in automotive area, 4 in diesel mechanics area (7/74); in the lower-division baccalaureate/associate degree category, 10 semester hours in heavy equipment, 4 in automotive area, 4 in diesel mechanics area (7/74).

MC-1710-0025

JOURNEYMAN ENGINEER EQUIPMENT MECHANIC

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 18 weeks (602-637 hours). *Version 2:* 23 weeks (872 hours).

Exhibit Dates: *Version 1:* 11/82-9/84. *Version 2:* 7/70-10/82.

Objectives: To upgrade training of engineer equipment mechanics.

Instruction: *Version 1:* This is an advanced training course involving repair and maintenance of wheeled and tracked vehicles, and stationary equipment. Training includes lectures and practical exercises in the repair of cooling, lubricating, fuel, and air intake/exhaust systems of gasoline and diesel engines; troubleshooting of transmissions and hydraulic systems; diagnosis of problems in brake, steering and final drive systems of wheel and tracked vehicles, and installation and removal of heavy equipment attachments. Instruction also includes training the student to operate various items of wheeled, tracked, and stationary equipment. *Version 2:* Lectures and practical exercises in principles of operation, construction and components of internal combustion engines; operation and repair of the mechanical, air, and hydraulic systems of mobile material handling equipment, tractors, cranes, graders, air compressors, and rock crushers.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 6 semester hours in internal combustion engine repair, 4 in hydraulic systems, 1 in brake systems, 1 in steering systems, 2 in final drive systems, 1 in heavy equipment attachment/removal, and 1 in equipment operation (3/83). *Version 2:* In the vocational certificate category, 5 semester hours in internal combustion engines repair, 2 in mobile material handling equipment repair, 5 in tractors and tractor attachment repair, 5 in crawler and truck mounted crane repair, 2 in grader repair, and 1 in stationary equipment repair (air compressors and rock crushers) (6/75); in the lower-division baccalaureate/associate degree category, 5 semester hours in internal combustion engines, 2 in material handling and 3 in engineering equipment (6/75).

MC-1710-0026

ENGINEER EQUIPMENT FOREMAN

Course Number: None.

Location: Engineer School Battalion, Cp. Lejeune, NC.

Length: 19 weeks (678 hours).

Exhibit Dates: 7/55-12/68.

Objectives: To train officers to supervise the operation of tractors, shovels, cranes, and other road machinery.

Instruction: Lectures and practical exercises in heavy equipment operation and supervision, including tractors, shovels, cranes, and road machinery; diesel engine principles; construction planning; administration and supply procedures; and safety precautions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in heavy construction, 6 in heavy equipment operation (4/74).

MC-1710-0027

ARTILLERY WEAPONS REPAIRMAN (ADVANCED)

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 6 weeks (226-229 hours).

Exhibit Dates: 7/60-12/68.

Objectives: To train noncommissioned officers to supervise the repair of artillery.

Instruction: Lectures and practical exercises in shop management and operation; inspection, disassembly, repair, reassembly, and testing of artillery, tank weapons, and mortars.

Credit Recommendation: In the vocational certificate category, 2 semester hours in mechanical technology (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in mechanical technology (5/74).

MC-1710-0028

TURRET REPAIRMAN

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: 2 weeks (91 hours).

Exhibit Dates: 2/72-1/88.

Objectives: To train noncommissioned officers to diagnose and repair turret mounted artillery.

Instruction: Lectures and practical exercises in the operation and diagnosis of malfunctions of several types of artillery mounted on turrets and the turret operating mechanisms to include procedures for correction of malfunctions.

Credit Recommendation: In the vocational certificate category, 1 semester hour as an elective in mechanical repair technology (5/74).

MC-1710-0029

WEAPONS TECHNICIAN

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 9 weeks (368 hours).

Exhibit Dates: 6/64-12/68.

Objectives: To train personnel to supervise and manage weapons repair facilities.

Instruction: Lectures and practical exercises in basic machine shop practices; organization and administration of repair shops; disassembly, assembly, inspection, repair, and troubleshooting of specific weapons and ancillary equipment to include grenade launchers, rifles, machine guns, hand guns, mortars, rifle scopes, and howitzers.

Credit Recommendation: In the vocational certificate category, 4 semester hours in mechanical technology, 1 in introduction to machine shop (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in industrial management, 3 in mechanical technology, 1 in introduction to machine shop (5/74).

MC-1710-0030

JOURNEYMAN ENGINEER EQUIPMENT OPERATOR

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 13-15 weeks (400-592 hours).

Exhibit Dates: 10/75-5/85.

Objectives: To provide training in equipment operation, rigging, camouflage, and the operation of tractors, graders, excavating equipment, cranes, and forklifts.

Instruction: Lectures and laboratories in camouflage, rigging, and and equipment operation. Lectures also cover Marine Corps Maintenance Management Systems. Rigging and equipment operation includes safety, preventive maintenance, and operations of specific equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in heavy equipment operation (1/86).

MC-1710-0031

PLUMBING AND SEWAGE DISPOSAL BY CORRESPONDENCE

Course Number: 11.21.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 12/78-3/86.

Objectives: To provide basic training in the theory of establishing water supply and sewage disposal systems to include planning, installation, and maintenance.

Instruction: Individual, self-paced, self-study course containing reading assignments, and written lessons containing objective type questions. Materials include the planning, installing and maintaining of a water supply system, the planning and installing of a sewage system. The student will demonstrate achievement of objectives by answering correctly 65% of the questions of the final examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in building mechanical equipment (construction management and architectural technology) (8/83).

MC-1710-0032

CRANE OPERATOR BY CORRESPONDENCE

Course Number: 13.52.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 9/78-9/84.

Objectives: To provide enlisted personnel with basic training in the theory of engineer crane operations, equipment uses, types of attachments and maintenance.

Instruction: Individual, self-paced, self-study course containing reading assignments, and written lessons consisting of objective type questions. Materials include the identification of types of attachments and their uses, the preventive maintenance on the equipment. The student will demonstrate achievement of objectives by correctly answering 65% of the questions on the final examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in construction planning if taken in conjunction with Engineer Equipment Operator by Correspondence, 13.31 (see MC-1601-0014)(1/84).

MC-1710-0033

JOURNEYMAN ENGINEER EQUIPMENT MECHANIC

Course Number: ACU.

Location: Engineer School, Cp. Lejeune, NC.

Length: 16-18 weeks (567-613 hours).

Exhibit Dates: *Version 1:* 3/89-Present. *Version 2:* 10/84-2/89.

Learning Outcomes: Upon completion of the course, the student will be able to provide advanced technical services in diesel and gasoline engine repair, in hydraulic and transmission systems, in brake systems, in oxyacetylene welding, and in track assembly and final drive systems.

Instruction: Instruction includes lectures, demonstrations, and intensive practical exercises in: engine repair including engine construction, cooling and lubrication systems, air intake and exhaust systems, fuel systems, electrical systems, troubleshooting, and tune-up, hyrdaulic and transmission systems, troubleshooting and repair, brake systems, troubleshooting and repair, track assembly and final drive system repair, oxyacetylene welding and cutting operations and an introduction to electric arc welding.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in welding, 2 in track assembly/final drive systems, 2 in brake systems, 4 in hydraulic and transmission systems, and 6 in internal combustion (diesel/gasoline) engine repair (9/87).

MC-1710-0034

JOURNEYMAN ENGINEER EQUIPMENT OPERATOR

Course Number: ACX.

Location: Engineer School, Cp. Lejeune, NC.

Length: 15-16 weeks (514-523 hours).

Exhibit Dates: 6/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to operate and maintain crawler tractors, tractor/scrapper combination, road graders, vibratory compactors, forklifts, cranes, backhoes, and excavators, plan out hauling routes and equipment required, compute the amount of soil to be removed or fill required to complete job.

Instruction: Lectures on maintenance management of crawlers, tractor/scrappers, road graders, compactors, forklifts, cranes, backhoes, and excavators, demonstrations and practical exercises on the operation of crawlers, tractor/scrappers, road graders, compactors, forklifts, cranes, backhoes, and excavators, lectures, demonstrations and applications in logistical estimation to include planning hauling route and equipment required, and computing the amount of soil to be removed or fill required.

Credit Recommendation: In the vocational certificate category, 6 semester hours in heavy equipment operation (9/87).

MC-1710-0035

UTILITIES CHIEF

Course Number: 11E.

Location: Engineer School, Cp. Lejeune, NC.

Length: 15-16 weeks (516 hours).

Exhibit Dates: 3/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to provide technical assistance in the supervision of the installation of utility systems, to include the following: electrical power sources, refrigeration and air conditioning, plumbing and water supply, and hygiene systems.

Instruction: Instruction includes lectures, demonstrations, and practical exercises in basic electrical concepts for AC and DC circuits, mobile electrical power sources, management of refrigeration and air conditioning systems, plumbing project management, water supply systems and purification, hygiene management for camp cleaning and sanitation, and basic maintenance procedures.

Credit Recommendation: In the vocational certificate category, 3 semester hours in refrigeration/air conditioning systems management, 3 in water supply treatment and management, 4 in electrical systems management (9/88); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical blueprint reading, 3 in DC circuits, and 1 in AC circuits (9/88).

MC-1710-0036

UTILITIES OFFICER

Course Number: ACE.

Location: Engineer School, Camp Lejeune, NC.

Length: *Version 1:* 14 weeks (476 hours). *Version 2:* 15 weeks (516 hours).

Exhibit Dates: *Version 1:* 7/89-Present. *Version 2:* 3/87-6/89.

Learning Outcomes: Upon completion of the course, the student will be able to manage utilities to include the following: refrigeration/air conditioning supply, hygiene, electrical, maintenance and field management.

Instruction: Lectures, demonstrations and practical exercises in basic electrical concepts for AC/DC circuits, mobile electrical power sources, management of refrigeration and air conditioning systems, plumbing project management, water supply systems and purification, hygiene management for camp cleaning and sanitation, and basic maintenance procedures.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 3 semester hours in refrigeration/air conditioning systems management, 3 in water supply/treatment management, 4 in electrical systems management (9/88); in the lower-division baccalaureate/associate degree category, 1 semester hour in construction electrical blueprint reading, 3 in DC circuits, and 1 in AC circuits (9/88).

MC-1710-0037

TRACTOR TRAILER OPERATOR

Course Number: 35Z.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (78 hours).

Exhibit Dates: 1/84-1/89.

Learning Outcomes: Upon completion of the course, the student will be able to provide preventive maintenance services, properly operate a tractor and trailer and be prepared to respond to operational emergencies.

Instruction: Covers the nomenclature, design characteristics, proper operation, preventative maintenance, loading, and troubleshooting techniques of the tractor and trailer. Methodology includes lecture, demonstration, and practical application.

Credit Recommendation: In the vocational certificate category, 2 semester hours in tractor trailer operations (4/89); in the lower-division baccalaureate/associate degree category, 1 semester hour in heavy equipment maintenance and repair (4/89).

MC-1710-0038

Semitrailer Refueler Operator

Course Number: CO9.

Location: Service Support School, Cp. Lejeune, NC.

Length: *Version 1:* 4 weeks (153 hours). *Version 2:* 2 weeks (67-80 hours).

Exhibit Dates: *Version 1:* 1/89-Present. *Version 2:* 1/84-12/88.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to perform preventative maintenance services and to operate a tractor semitrailer refueler in the fueling services of fixed wing aircraft. *Version 2:* Upon completion of the course ,the student will be able to perform preventative maintenance services and to operate a semitrailer refueler in the refueling services of fixed wing aircraft.

Instruction: *Version 1:* Course covers the characteristics of fuel, loading and transporting of hazardous materials, fuel sampling, and fueling services to fixed wing aircraft. Included is the operation and preventative maintenance of five ton tactical tractor and semitrailer refueler. Methodology includes lecture, demonstration, and practical application. *Version 1:* Course covers the characteristics of fuel, loading and transporting of hazardous materials, fuel sampling, and fueling services to fixed wing aircraft. Included is the operation and preventative maintenance of a semitrailer refueler. Methodology includes lecture, demonstration, and practical application.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in tractor trailer operations (4/89); in the lower-division baccalaureate/associate degree category, 1 semester hours in heavy equipment maintenance and repair (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in heavy equipment maintenance and repair (4/89).

MC-1710-0039

Crane Operator by Correspondence

Course Number: 13.52a.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 10/84-Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the primary purpose of a crane and excavation, and understand their lifting and fording capabilities; identify the basic attachments to cranes and excavation and understand their purpose, use and care for wire rope; determine basic safety factors in the operation of cranes and excavation and understand hand signals; perform troubleshooting procedures and lubrication procedures.

Instruction: Individual, self-paced, self-study, correspondence course. Material include reading assignments, diagrams, and objective questions. A monitored final exam is taken when the student is ready, and a score of 70% or better is needed to pass the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in equipment maintenance; 1 in safety procedures (6/89).

MC-1710-0040

Materials Handling Equipment by Correspondence

Course Number: 13.40.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 8/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate safe operations of the forklift, 7.5-ton cranes, Lightweight Amphibious Container Handler (HACH) and Rough Terrain Container Handler (RTCH).

Instruction: The following topics will be presented: MC 4000 and MC 6000 forklift operation; 7.5-ton cranes; Lightweight Amphibious Container (LACH) and Rough Terrain Container Handler (RTCH). Safety with equipment and materials is stressed.

Credit Recommendation: In the vocational certificate category, 1 semester hour in heavy equipment operation.

MC-1710-0041

Tractor-Trailer Operator by Correspondence

Course Number: 35.33.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 7/87-Present.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate a fundamental understanding of the qualifications necessary for safe tractor-trailer operation; gain an introductory understanding for driving, loading, safety inspection maintenance and overall tractor-trailer operation.

Instruction: The course of study will include vehicle inspection, control, loading and safe operation of tractor-trailers. Emphasis is placed upon basic operation and general driving operation and safety procedures.

Credit Recommendation: In the vocational certificate category, 1 semester hour in introductory tractor-trailer operation, maintenance and driving (6/89).

MC-1710-0042

Plumbing and Sewage Disposal by Correspondence

Course Number: 11.21b.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 5/89-Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform the functions of plumber in USMC garrison and field facilities and describe the operation of home plumbing equipment.

Instruction: Independent study. Students are required to pass a proctored end-of-course examination.

Credit Recommendation: In the vocational certificate category, 2 semester hours in plumbing (6/90).

MC-1712-0001

Installation, Operation and Maintenance of Diesel Engine Driven Generator Sets by Correspondence

Course Number: 11.19C.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 8/81-Present.

Objectives: To provide personnel with basic training in the theory of operation and installation of field electrical generator equipment, and first aid for shock victims.

Instruction: This is an individual, self-paced, self-study course containing reading assignments, and written lessons of objective type questions. Materials include the identification of the type of diesel driven generators,their installation, operation, and maintenance. The student will demonstrate achievement of objectives by answering correctly 65% of the questions on the final examination.

Credit Recommendation: In the vocational certificate category, credit in first aid based on demonstrated skills (8/83).

MC-1712-0002

Fundamentals of Diesel Engines by Correspondence

Course Number: 13.35.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78-12/86.

Objectives: To provide personnel with a basic understanding of the fundamentals of diesel engines in order to enable them to maintain the engines in the highest degree of operational capability.

Instruction: This correspondence presents self-study to include the advantages and disadvantages of the diesel engine, engine construction, fuel injection, diesel engine principles, combustion, and control of the engine.

Credit Recommendation: In the vocational certificate category, 3 semester hours in fundamentals of diesel engines (8/83). There is a proctored final examination.

MC-1712-0003

Automotive Intermediate Maintenance

Course Number: 35C.

Location: Service Support School, Cp. Lejeune, NC.

Length: 17 weeks (533-649 hours).

Exhibit Dates: *Version 1:* 9/86-7/88. *Version 2:* 8/84-8/86.

Learning Outcomes: *Version 1:* Upon completion of the course, the student will be able to repair and overhaul diesel engines, valve trains, automatic transmissions, transfer cases, rear axles, brakes and steering systems. *Version 2:* Upon completion of the course, the student will be able to troubleshoot, tear down, and repair, all components and required ancillary equipment; repaired units are returned to remanufactured condition.

Instruction: *Version 1:* Methodology used includes classroom and laboratory experiences and competency tests at the 90% level. Content covers overhaul of engines, transmissions automatic and manual, drive lines, rear axles, steering and brake systems. *Version 2:* Methodology includes classroom lectures, audio visual training, lectures and demonstrations. Content covers starters, alternators, water pumps, transmissions, clutches, master cylinders, power brake units, and steering gear components.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in automotive mechanics (4/89); in the lower-division baccalaureate/associate degree category, 3 semester hours in diesel overhaul, 3 in brakes and steering, 3 in automatic transmission, 3 in automotive electronics, 3 in rear axles, and 3 in standard transmission and drive line (4/89). *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in brakes, 3 in clutch and standard transmission, 3-4 in automotive electronics (distributor, starter, alternator), and 3 in engine overhaul (4/89).

MC-1712-0004

COMPRESSION IGNITION ENGINE FUEL SYSTEMS REPAIR

Course Number: 352.

Location: Service Support School, Cp. Lejeune, NC.

Length: 3 weeks (90 hours).

Exhibit Dates: 4/83–Present.

Learning Outcomes: Upon completion of the course, the student will be able to repair and calibrate Detroit Diesel, Robert Bosch, Stanadyne, and Cummings PT fuel systems.

Instruction: Covers the inspection, services, repairs, and tests necessary to repair and calibrate the fuel systems of automotive diesel engines. Methodology includes lecture, demonstration, and practical applications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in diesel fuel system maintenance and repair (4/89).

MC-1712-0005

MOTOR TRANSPORT MAINTENANCE OFFICER

Course Number: CEB.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (64 hours).

Exhibit Dates: 9/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to disassemble, inspect components, reassemble, and adjust an automotive generator, alternator, starter, diesel engine, fuel injection pump, front axle assembly with differential, automatic transmission, power steering gear, and air compressor.

Instruction: Covers intermediate maintenance, organization, facilities and equipment, repair of electrical systems, diesel engine and engine accessory systems, power train systems used in military vehicles, and chassis system components. Methodology includes lectures and laboratory exercises.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in automotive and diesel vehicle maintenance (4/89).

MC-1712-0006

FUNDAMENTALS OF DIESEL ENGINES BY CORRESPONDENCE

Course Number: 13.35b.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 10/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify and discuss basic internal combustion engine principles to include diesel fuel injection and control.

Instruction: This correspondence presents self-study to include the advantages and disadvantages of the diesel engine, engine construction, fuel injection, diesel engine principles, combustion, and control of the engine.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in fundamentals of the internal combustion engine with emphasis on diesel fuel delivery principles (6/89).

MC-1712-0007

DIESEL ENGINE MAINTENANCE AND TROUBLESHOOTING BY CORRESPONDENCE

Course Number: 13.43.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 8/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify and use the multimeter as a diagnostic tool, the student will develop an overview of diesel engine maintenance and troubleshooting procedures for different engine systems; the student will advance in the knowledge of power, hand-tool, and special tool use.

Instruction: The course will cover multimeter and special tool care and use. Power and advanced hand tool use will be introduced and studied. Maintenance and troubleshooting of various diesel engines is studied in-depth.

Credit Recommendation: In the vocational certificate category, 3 semester hours in diesel diagnosis and troubleshooting procedures with special emphasis on multimeter use (6/89).

MC-1713-0001

LAND NAVIGATION BY CORRESPONDENCE

Course Number: 03.28C.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/84–12/88.

Objectives: To provide basic instruction in navigation to include map symbols, grid coordinators, compass, and natural means.

Instruction: This correspondence course consists of seven units of self-study on the use of map symbols and grid coordinates, determining direction by map and compass, measuring distance by map and other means, determining contours, and navigation by natural means such as the sun, moon and stars. This course is followed by a supervised three-hour examination without notes or texts.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in land navigation (3/85).

MC-1713-0002

LAND NAVIGATION BY CORRESPONDENCE

Course Number: 03.62T.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 6/82–12/85.

Objectives: To provide instruction in measuring distance, azimuths, elevations, and coordinates and in land navigation with map and compass.

Instruction: This correspondence course consists of six study units and includes an introduction to land navigation, measuring distances and azimuths, converting azimuths, terrain features and symbols, the lensatic compass and land navigation with map and compass. The course presentation is accomplished using the U. S. Army Training Extension Course (TEC) audio-visual program of six TEC lessons and a TEC viewer, and is followed by a two hour supervised final examination without access to lessons or notes.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in land navigation (3/85).

MC-1714-0001

JOURNEYMAN ELECTRICIAN

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 9 weeks (294 hours). *Version 2:* 10 weeks (327 hours). *Version 3:* 18 weeks (434 hours).

Exhibit Dates: *Version 1:* 10/83–12/84. *Version 2:* 11/82–9/83. *Version 3:* 11/70–10/82.

Objectives: To provide selected enlisted personnel with the knowledge and skills required to perform as journeymen electricians.

Instruction: *Version 1:* Lectures and practical exercises including equipment and maintenance records management, AC and DC theory, motors and generators, interior and exterior wiring and pole line construction. *Version 2:* Coverage of AC/DC electrical theory, including reactance and impedance, interior wiring, pole line construction, motors, generators; supply procedures and organization. *Version 3:* Coverage of AC/DC electrical theory, including reactance and impedance, interior wiring, pole line construction, motors, generators; supply procedures and organization.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electrical installation and 2 in motor and generator operation and service; in the lower-division baccalaureate/associate degree category, 2 semester hours in business records management, 2 in D.C. circuits and 5 in electrical (power) laboratory (3/85). *Version 2:* In the vocational certificate category, 2 semester hours in industrial and residential wiring, motor and generator operation and servicing (3/83); in the lower-division baccalaureate/associate degree category, 2 semester hours in basic AC/DC theory and application (3/83). *Version 3:* In the vocational certificate category, 15 semester hours in electrical technology (11/73).

MC-1714-0002

ELECTRICAL EQUIPMENT REPAIRMAN

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 13 weeks (503 hours).

Exhibit Dates: 9/68–2/82.

Objectives: To train technicians in the repair of electrical equipment and control devices with particular emphasis upon the repair of field power-generating equipment.

Instruction: Mathematics; theory of electricity and simple electrical components; AC and DC current and circuit components; electronics and electronic devices; control devices and their circuits; DC and AC motors and generators; internal-combustion engines; troubleshooting electrical systems; supply and maintenance procedures.

Credit Recommendation: In the vocational certificate category, 10 semester hours in electrical technology (11/73).

MC-1714-0003

BASIC ELECTRICIAN
(Electrician)

Course Number: 11B.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 7 weeks (204-228 hours). *Version 2:* 6 weeks (169 hours). *Version 3:* 6 weeks (220 hours). *Version 4:* 4 weeks (160 hours). *Version 5:* 12 weeks (359 hours). *Version 6:* 18 weeks (524 hours).

Exhibit Dates: *Version 1:* 10/83-9/84. *Version 2:* 10/82-9/83. *Version 3:* 7/71-9/82. *Version 4:* 9/68-6/71.

Objectives: To provide enlisted personnel with basic training in generator operation, pole line construction, and interior wiring.

Instruction: *Version 1:* Lectures and laboratories in basic electrical principles; generator installation, operation and maintenance; pole line construction; and exposed interior wiring. preventive maintenance procedures, pole line construction and wiring.Includes preventive maintenance procedures for power generators. *Version 3:* Lectures and laboratories in basic electrical theory, motor controls, generator operation, pole line construction, and interior wiring. *Version 4:* Lectures and laboratories in basic electrical theory, motor controls, generator operation, pole line construction, and interior wiring. *Version 5:* Lectures and laboratories in basic electrical theory, motor controls, generator operation, pole line construction, and interior wiring. *Version 6:* Lectures and laboratories in basic electrical theory, motor controls, generator operation, pole line construction, and interior wiring.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in principles of electricity and 5 in electrical (power) laboratory (6/88). *Version 2:* In the vocational certificate category, 2 semester hours in electricity, 1 in electrical laboratory (3/83). *Version 3:* In the vocational certificate category, 4 semester hours in electricity, 1 in electrical laboratory (12/77). *Version 4:* In the vocational certificate category, 3 semester hours in electricity, 1 in electrical laboratory (3/74). *Version 5:* In the vocational certificate category, 6 semester hours in electricity, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity, 1 in electrical laboratory (3/74). *Version 6:* In the vocational certificate category, 6 semester hours in electricity, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity, 1 in electrical laboratory (3/74).

MC-1714-0004

Telephone Repair

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 22 weeks (770 hours).

Exhibit Dates: 7/58-12/72.

Objectives: To train enlisted personnel to install and maintain telephone equipment.

Instruction: Lectures and laboratories in DC and AC circuits; simple motors and generators; meters and tools; control office, switchboard, and customer telephone equipment; and teletype equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity, 1 in electrical laboratory (3/74).

MC-1714-0005

Wire Chief

Course Number: *Version 1:* 25Q. *Version 2:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Sub Unit 2, San Diego, CA.

Length: *Version 1:* Self-paced maximum 14 weeks (349 hours). *Version 2:* 14-20 weeks (496-653 hours).

Exhibit Dates: *Version 1:* 5/84-10/87. *Version 2:* 1/72-4/84.

Objectives: To train personnel to supervise the installation of telephone lines and telephone subscriber equipment.

Instruction: For this course after 10/87 see MC-1714-0012. *Version 1:* Self-paced instruction emphasizing basic management techniques of pole line construction, fixed plant operation, and electronic warfare. Includes specific management systems required in a complex communication unit. *Version 2:* Lectures and practical exercises in oral and written communications skills, personnel management concepts, map reading, radio procedure, electronic fundamentals and basic electricity, telephone line techniques, field wire equipment and related systems, station installation, and pole line construction.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in communications administration (2/86). *Version 2:* In the vocational certificate category, 6 semester hours in electrical installation (3/79).

MC-1714-0006

Electricians

Course Number: None.

Location: Engineer School Battalion, Cp. Lejeune, NC.

Length: 15 weeks (390 hours).

Exhibit Dates: 2/56-12/68.

Objectives: To train enlisted personnel to install, operate, maintain, and repair electrical systems and equipment of the Fleet Marine Force.

Instruction: Lectures and practical exercises in the installation, operation, maintenance and repair of electrical systems and equipment of the Fleet Marine Force, including electrical theory and principles, internal-combustion engines, electric motors and generators, electrical distribution and construction, and interior wiring methods and materials.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electricity, 6 in electrical construction and maintenance (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electricity, and 6 in electrical construction and maintenance on the basis of institutional evaluation (4/74).

MC-1714-0007

Field Wireman

Course Number: None.

Location: Communication-Electronics School, Twentynine Palms, CA.

Length: 4 weeks (140 hours).

Exhibit Dates: 7/72-12/73.

Objectives: To train personnel as field wiremen in the Fleet Marine force.

Instruction: Lectures and practical exercises on the responsibilities of field wiremen, including integrated multichannel communication means, switchboard operators perocedure, manual switchboards SB-22/PT and SB-86/P, telegraph-telephone terminal groups AN/TCC-29, field communications, pole climbing techniques, pole line construction, inside wire routing, raising and setting poles and stubs, and suspension strand installation.

Credit Recommendation: In the vocational certificate category, 4 semester hours in lineman occupation (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical technology (6/74).

MC-1714-0008

Journeyman Electrical Equipment Repairman

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 17-18 weeks (564-605 hours).

Exhibit Dates: 3/82-Present.

Objectives: To introduce the apprentice journeyman electrical equipment repairman to the technical skills needed in the repair and maintenance of power generating equipment.

Instruction: Lectures and practical hands-on experience in the maintenance and repair of mobil power generating plants. The equipment is military but the concepts are general enough for civilian application. The prerequisite course (Basic Electrician) (MC-1714-0003) covers manual skills such as pole climbing and wire splicing, and there is no duplication of subject material.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 6 semester hours in AC/DC theory, 3 in solid state theory, 9 in motors/generators (1/88).

MC-1714-0009

Fundamentals of Electricity by Correspondence

Course Number: 11.16C.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 5/81-12/86.

Objectives: To provide personnel with the basic concepts associated with electrical/electronic theory.

Instruction: Individualized, self-study course in electricity to include the following subjects: atomic theory, Ohms law, series circuits, parallel circuits, series/parallel circuits, and transformer theory.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic electricity/electronics (8/83).

MC-1714-0010

Marine Electrician - Fundamentals by Correspondence

Course Number: 11.41.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 1/85-4/86.

Learning Outcomes: Upon completion of the course, the student will be able to make voltage, current and power calculations on simple series and parallel resistive circuits; describe alternating current, phase angle, and power factor; discuss generators, alternators, batteries, three-phase power, and transformers; list causes of accidents; discuss first-aid procedures; and identify electricians tools.

Instruction: A correspondence course consisting of a text with self graded exercises, a final mailed in review lesson, and a final exam. The three main topics of the course are fundamentals of electricity, safety and first-aid, and electricians tools.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electricity and 1 in shop safety (7/87).

MC-1714-0011

Basic Electrician

Course Number: 11B.

Location: Engineer School, Cp. Lejeune, NC.

Length: 7 weeks (204–239 hours).

Exhibit Dates: 10/84–Present.

Objectives: Upon completion of the course, the student will be able to operate generators, construct pole lines and interior wiring.

Instruction: Lectures and laboratories in basic electrical principles, generator installation, operation and maintenance, pole line construction and wiring, preventive maintenance procedures for power generators.

Credit Recommendation: In the vocational certificate category, 3 semester hours in principles of electricity and 1 in electrical power laboratory (10/89).

MC-1714-0012

Wire Chief

Course Number: 25Q.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 14 weeks (507 hours).

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course the student will be able to apply map reading concepts to land navigation; construct pole lines; understand electronic warfare concepts; manage embarkation plans; use various forms and publications.

Instruction: Self-paced instruction on topics in map reading, pole line construction, electronic warfare, organization and deployment. For this course before 11/87 see MC-1714-0005.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

MC-1714-0016

Journeyman Electrician

Course Number: 11K.

Location: Engineer School, Cp. Lejeune, NC.

Length: 9 weeks (285–295 hours).

Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform as journeyman electrician.

Instruction: Lecture and practical exercises including equipment and maintenance record management, AC and DC theory, motors and generators, reactance, impedance, inductance and capacitance, interior and exterior wiring and pole line construction.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in DC electrical theory, 1 in AC electrical theory, 2 in motors and generators, and 1 in electrical power laboratory (10/89).

MC-1715-0001

Technician Electronic Counter-Countermeasures

Course Number: None.

Location: Communication-Electronics School Battalion, San Diego, CA.

Length: 4 weeks (96 hours).

Exhibit Dates: 10/69–12/73.

Objectives: To qualify technicians in the techniques and application of electronic counter-countermeasures.

Instruction: Specific circuit theory; recognition, corrective and/or defensive action taken to combat various types, methods and characteristics of electronic countermeasures which may be encountered by a MACS in an electronic warfare environment.

Credit Recommendation: Credit is not recommended because of the military nature of the course (11/73).

MC-1715-0002

Officer Electronic Warfare

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 2 weeks (98 hours).

Exhibit Dates: 8/69–1/88.

Objectives: To provide instruction to qualify officers in the techniques and application of electronic warfare.

Instruction: History, concepts, terminology and application of past, present, and future techniques; specific circuit theory; recognition, corrective, and/or defensive action taken to combat various types of jamming; methods and characteristics of electronic countermeasures.

Credit Recommendation: Credit is not recommended because of the military nature of the course (11/73).

MC-1715-0003

Artillery Electronic Equipment Repairman
(Artillery Electronic Equipment Repair)

Course Number: 593.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 11-12 weeks (383 hours). *Version 2:* 9–11 weeks (318–407 hours). *Version 3:* 9–11 weeks (318–407 hours).

Exhibit Dates: *Version 1:* 4/84–12/84. *Version 2:* 7/74–3/84. *Version 3:* 1/72–6/74.

Objectives: To train enlisted personnel to test, troubleshoot, and maintain specific military equipment.

Instruction: Introduction to field artillery electronics equipment, including maintenance and repair of a radar chronograph, microwave distance-measuring equipment, field artillery digital computer, and associated equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in troubleshooting techniques (2/86). *Version 2:* In the vocational certificate category, 3 semester hours in communications technology (2/76). *Version 3:* Credit is not recommended because of the limited specialized nature of the course (11/73).

MC-1715-0004

Basic Electronics
(Electronic Fundamentals)

Course Number: None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 2:* Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, Twentynine Palms, CA. *Version 5:* Communication-Electronics School, San Diego, CA. *Version 6:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 12-13 weeks (503-602 hours). *Version 2:* 10–12 weeks (459 hours). *Version 3:* 10-12 weeks (359-370 hours). *Version 4:* 18 weeks (668 hours). *Version 5:* 15 weeks (525 hours). *Version 6:* 15 weeks (516–525 hours).

Exhibit Dates: *Version 1:* 1/84–7/86. *Version 2:* 10/75–12/83. *Version 3:* 7/74–9/75. *Version 4:* 1/72–6/74. *Version 5:* 3/68–12/71. *Version 6:* 7/60–2/68.

Objectives: To train enlisted personnel in the fundamentals of electronics.

Instruction: For this course after 7/86 see MC-1715-0116. *All Versions:* Lectures and practical experience in electrical principles, vacuum tube and semiconductor fundamentals, electronic circuit analysis, and digital and circuit principles. *Version 1:* Includes 96 hours of lectures and practical exercises in the use of digital machines and devices; logic design, Boolean algebra,and block diagrams; logic circuitry; characteristics of hardware and operations of magnetic drum, tape, disc, magnetic care,and other storage devices; analog to digital conversion. *Version 2:* Includes 70 hours of lectures and practical exercises in the use of digital machines and devices; logic design, Boolean algebra,and block diagrams; logic circuitry; characteristics of hardware and operations of magnetic drum, tape, disc, magnetic care,and other storage devices; analog to digital conversion.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in soldering techniques and 1 in instruments and measurements; in the lower-division baccalaureate/associate degree category, 4 semester hours in AC/DC circuit theory, 3 in electronic circuits and devices and 3 in digital fundamentals (2/86). *Version 2:* In the vocational certificate category, 2 semester hours in electronics mathematics, 3 in basic electricity, 3 in basic electronics, 2 in digital circuit fundamentals, 1 in instruments and measurements, 2 in basic computer logic (3/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electricity, 3 in basic electronics, 2 in digital systems fundamentals, 2 in basic computer logic (2/79); in the upper-division baccalaureate category, 6 semester hours in industrial arts education for basic electronics (3/79). *Version 3:* In the lower-division baccalaureate/associate degree category, 9 semester hours in industrial electronics technology (2/76). *Version 4:* In the vocational certificate category, 18 semester hours in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics, 3 in computers (3/74); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74). *Version 5:* In the vocational certificate category, 18 semester hours in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics, 3 in computers (3/74); in the upper-division baccalaureate category, 3 semester hours in electricity and electronics, and additional credit in electronics laboratory on the basis of institutional evaluation (3/74). *Version 6:* In the vocational certificate category, 18 semester hours in electricity and electronics (3/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in electricity and electronics, 3 in computers (3/74); in the upper-division baccalaureate category, 4 semester hours in electricity and electronics, additional credit in laboratory on the basis of institutional evaluation (12/68).

MC-1715-0005

TECHNICIAN THEORY

Course Number: *Version 1:* TA3. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 2:* Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communation-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 16 weeks (620 hours). *Version 2:* 16 weeks (599-714 hours). *Version 3:* 20 weeks (700 hours). *Version 4:* 20 weeks (700 hours).

Exhibit Dates: *Version 1:* 7/77-7/86. *Version 2:* 7/74-6/77. *Version 3:* 3/72-6/74. *Version 4:* 3/68-2/72.

Objectives: To provide enlisted personnel with training in advanced electronic theory as a foundation for equipment-oriented instruction in radar, aviation, and radio technology.

Instruction: For this course after 8/86 see MC-1715-0128. *All Versions:* Lectures and practical laboratory applications in DC and AC circuit analysis, mathematics and physics, electron tube and transistor theory, amplifier circuit analysis, oscillators, switching circuits, power supplies, principles of digital computers, microwave characteristics and devices (including general theory), synchros and servos, modulation and detection, antennas and test instruments. *Version 1:* Encompasses a thorough review of mathematics, and general theoretical principles of electronics. Includes AC/DC electricity, test instruments, soldering and repair techniques to NASA specs, and 73 hours of military management principles.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronics mathematics, 6 in basic electronics, 6 in electronics systems and applications, 6 in digital circuitry, 3 in communication skills (3/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics systems and applications, 3 in mathematics, 6 in basic electronics, 3 in digital circuitry, 3 in communication skills (3/79); in the upper-division baccalaureate category, 6 semester hours in industrial arts education for basic electronics, 3 in management/communication skills (3/79). *Version 2:* In the lower-division baccalaureate/associate degree category, 21 semester hours in electronics engineering technology (2/76). *Version 3:* In the vocational certificate category, certificate in electricity or electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 16 semester hours in electricity or electronics, 4 in mathematics, and, on the basis of institutional evaluation, credit in electrical laboratory (3/74); in the upper-division baccalaureate category, 6 semester hours in computers, servos, and machinery (3/74). *Version 4:* In the vocational certificate category, certificate in electricity or electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 16 semester hours in electricity or electronics, 4 in mathematics, and, on the basis of institutional evaluation, credit in electrical laboratory (3/74); in the upper-division baccalaureate category, 4 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0006

MOBILE COMMUNICATIONS CENTRAL TECHNICIAN (AN/TGC-37(v))

(Communication Central, AN/TGC-37, System Maintenance)

(Mobile Communication Central Technician)

Course Number: *Version 1:* 28E. *Version 2:* None. *Version 3:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 9-12 weeks (302-446 hours). *Version 2:* 7 weeks (257 hours). *Version 3:* 6 weeks (210 hours).

Exhibit Dates: *Version 1:* 6/85-Present. *Version 2:* 11/77-5/85. *Version 3:* 1/72-10/77.

Objectives: To train enlisted personnel in the operation, maintenance, and repair of specific types of telegraph systems.

Instruction: Practical experience in the maintenance, operation, repair and systems analysis of patch panels and switchboards, voice frequency telegraphs, and test equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in telephone and telegraph systems maintenance (9/89). *Version 2:* In the vocational certificate category, 3 semester hours in introduction to telephone and telegraph communications (3/79). *Version 3:* Credit is not recommended because of the limited specialized nature of the course (3/74).

MC-1715-0007

TERMINAL EQUIPMENT THEORY

Course Number: None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 5-6 weeks (200-320 hours). *Version 2:* 8 weeks (242-320 hours). *Version 3:* 8 weeks (242-320 hours). *Version 4:* 8 weeks (242-320 hours).

Exhibit Dates: *Version 1:* 5/79-1/85. *Version 2:* 11/77-4/79. *Version 3:* 7/74-10/77. *Version 4:* 1/72-6/74.

Objectives: To train enlisted personnel in the theory and principles of digital computer circuits and systems.

Instruction: *Version 1:* Laboratories and lectures in the theory of operation and troubleshooting of a central purpose digital computer; basic logic circuits; repair of PC cards and digital circuits. *Version 2:* Laboratories and lectures in the theory of operation and troubleshooting of a central purpose digital computer; basic logic circuits; repair of PC cards and digital circuits. *Version 3:* Lectures and laboratories in basic logic circuits, theory of operation and troubleshooting of a central purpose digital computer; repair of PC cards and digital circuits. *Version 4:* Lectures and laboratories in basic logic circuitry, theory of operation and troubleshooting of the Bi-Tran 6 and TH-85, and use of dual-trace oscilloscopes and pace kits.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in digital electronics and 4 in computer elctronics (2/86). *Version 2:* In the vocational certificate category, 3 semester hours in digital circuits, 3 in computer principles (3/79); in the lower-division baccalaureate/associate degree category, credit in digital computers and computer principles on the basic of institutional evaluation (3/79). *Version 3:* In the lower-division baccalaureate/associate degree category, 7 semester hours in electronic engineering technology (2/76). *Version 4:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

MC-1715-0008

RADIO RELAY REPAIR

Course Number: None.

Location: *Version 1:* Communications-Electronics School, Twentynine Palms, CA. *Version 2:* Communications-Electronics School, San Diego, CA. *Version 3:* Communications-Electronics School, San Diego, CA.

Length: *Version 1:* 11 weeks (385 hours). *Version 2:* 16 weeks (560 hours). *Version 3:* 12-14 weeks (420-490 hours).

Exhibit Dates: *Version 1:* 12/71-12/73. *Version 2:* 12/68-11/71. *Version 3:* 7/58-11/68.

Objectives: To train radio repairmen to repair and maintain telephone-telegraph terminal equipment.

Instruction: Lectures and laboratories in the principles of multiplexing and the theory, operation, and maintenance of telephone-telegraph equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electrical laboratory, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 2:* In the vocational certificate category, 3 semester hours in electrical laboratory, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74). *Version 3:* In the vocational certificate category, 2 semester hours in electrical laboratory, and credit in electrical laboratory on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

MC-1715-0009

GROUND RADIO REPAIR

Course Number: *Version 1:* 27M. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 2:* Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 14-19 weeks (467-704 hours). *Version 2:* 15 weeks (542 hours). *Version 3:* 15 weeks (525 hours). *Version 4:* 7-12 weeks (245-420 hours).

Exhibit Dates: *Version 1:* 5/78–Present. *Version 2:* 7/74–4/78. *Version 3:* 1/72–6/74. *Version 4:* 7/56–12/71.

Objectives: To train enlisted personnel to operate, test and repair ground radio equipment.

Instruction: Lectures and laboratories in FM radio equipment maintenance, including transmitter, receiver, and special circuits operation; and various alignment, testing, overhaul and troubleshooting procedures.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in communications equipment maintenance (2/89). *Version 2:* In the vocational certificate category, 8 semester hours in communications technology (2/76). *Version 3:* In the vocational certificate category, 3 semester hours in electronics, 1 in electrical laboratory (3/74). *Version 4:* In the vocational certificate category, 3 semester hours in electronics, 1 in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0010

Radio Fundamentals

Course Number: *Version 1:* 27V. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA; *Version 2:* Air Ground Combat Training Center, Twentynine Palms, CA, Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 6–8 weeks (210–251 hours). *Version 2:* 6 weeks (222–225 hours). *Version 3:* 6 weeks (240 hours). *Version 4:* 6 weeks (210–240 hours).

Exhibit Dates: *Version 1:* 2/85–Present. *Version 2:* 7/74–4/85. *Version 3:* 1/72–6/74. *Version 4:* 7/61–12/71.

Objectives: To prepare enlisted military personnel to maintain, test, adjust, and repair specific military radio sets.

Instruction: *Version 1:* Lectures and laboratory exercises in theory of operation and troubleshooting procedures involving AM, FM, and SSB transmitters, receivers and antennas. *Version 2:* Lectures and practical exercises in theory, circuitry, operation, and repair of tube and transistorized AM, SSB, and VHF transceivers. *Version 3:* Lectures and practical exercises in theory, circuitry, operation, and repair of tube and transistorized AM, SSB, and VHF transceivers. Includes emergency power generators. *Version 4:* Lectures and practical exercises in theory, circuitry, operation, and repair of tube and transistorized AM, SSB, and VHF transceivers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in radio repair; in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic communications and 1 in electronic communications laboratory (3/89). *Version 2:* In the vocational certificate category, 6 semester hours in communication technology (2/76). *Version 3:* In the vocational certificate category, 6 semester hours in electronic communications, 2 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic communication, 1 in electronic communications laboratory (3/74). *Version 4:* In the vocational certificate category, 6 semester hours in electronic communications, 2 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronic communications (12/68).

MC-1715-0011

Aviation Radio Repair

Course Number: *Version 1:* 66F. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, San Diego, CA; Basic Electronics School, San Diego, CA.

Length: *Version 1:* 9–14 weeks (319–462 hours). *Version 2:* 11–12 weeks (454–565 hours). *Version 3:* 8–15 weeks (350–490 hours). *Version 4:* 14 weeks (490 hours).

Exhibit Dates: *Version 1:* 7/85–Present. *Version 2:* 4/76–6/85. *Version 3:* 7/58–3/76. *Version 4:* 7/56–6/58.

Objectives: To train enlisted personnel to install, inspect, maintain, and repair aviation and ground communication-electronics equipment.

Instruction: *Version 1:* Lectures and practical exercises in the theory, operation, and repair of AM, FM, and SSB radios to the module level. Includes equipment characteristics, digital logic, circuit analysis, alignment, performance testing and troubleshooting test equipment. *Version 2:* Lectures and practical exercises in operating characteristics, installation techniques, circuitry, ultrahigh frequency principles, single-sideband theory, and cryptographic maintenance concepts of the TSEC/KY-28 security system. *Version 3:* Lectures and practical exercises in operating characteristics, installation techniques, circuitry, ultrahigh frequency principles, single-sideband theory, and cryptographic maintenance concepts of the TSEC/KY-28 security system. *Version 4:* Lectures and laboratories in theory of operation of radio circuits, test equipment, antennas, frequency modulators, and power supplies with emphasis on use of test equipment and servicing.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (5/90). *Version 2:* In the vocational certificate category, 3 semester hours in electronic equipment maintenance, 1 in electronic equipment maintenance laboratory (3/79). *Version 3:* In the vocational certificate category, 3 semester hours in electronic communications, 1 in electronic communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronic *Version 4:* In the vocational certificate category, 3 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (3/74).

MC-1715-0012

Telephone Technician

Course Number: None.

Location: Basic Electronics School, San Diego, CA.

Length: 24 weeks (840 hours).

Exhibit Dates: 7/56–12/72.

Objectives: To train enlisted personnel in the maintenance of specific wire telephone systems.

Instruction: Lectures and practical exercises in basic mathematics and electricity, wire telephone techniques, teletype and terminal equipment maintenance.

Credit Recommendation: In the vocational certificate category, 3 semester hours in math and electricity, 1 in laboratory (3/74).

MC-1715-0013

Telephone-Teletype Repair

Course Number: None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, San Diego, CA.

Length: 16–19 weeks (560–665 hours).

Exhibit Dates: 7/62–1/88.

Objectives: To train enlisted personnel who have completed a basic electronics course to repair telephone/teletype equipment.

Instruction: Lectures and laboratories in telephone/teletype equipment repair procedures, and testing, adjustment, modification, maintenance, and troubleshooting techniques.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telephony, 1 in telephony laboratory (3/74).

MC-1715-0014

Sound Equipment Repair

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 7/58–12/68.

Objectives: To train enlisted personnel to install, maintain, and repair audio equipment.

Instruction: Lectures and laboratories in audio theory; tape recorders; PA systems; sound-locating equipment; intercom equipment; and mine detector installation, maintenance, and repair.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronics (3/74).

MC-1715-0015

Terminal Equipment Repair

Course Number: None.

Location: Basic Electronics School, San Diego, CA.

Length: 7 weeks (245 hours).

Exhibit Dates: 7/56–12/68.

Objectives: To train enlisted personnel to repair specific telephone and telegraph equipment.

Instruction: Lectures and practical exercises in the fundamentals of telephony and telegraphy, local terminals, radio transmission, troubleshooting, and field applications.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

MC-1715-0016

Telephone System, Transportable AN/TTC-28

Course Number: None.

Location: Communication-Electronics School, Twentynine Palms, CA; Air Ground Combat Training Center, Twentynine Palms, CA.

Length: 6 weeks (210 hours).

Exhibit Dates: 1/72–12/75.

Objectives: To train central office repairmen to test, adjust, modify, and repair the

AN/TTC-28 transportable telephone system in field maintenance support shops.

Instruction: Lectures include telephone systems introduction, telephone schematic diagram familiarization, and system installation, troubleshooting, and repair procedures.

Credit Recommendation: In the vocational certificate category, 2 semester hours in telephony, 1 in telephony laboratory (2/86).

MC-1715-0017

Marine Tactical Data Systems (MTDS) Fundamentals

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 11 weeks (385 hours).

Exhibit Dates: 5/66–12/68.

Objectives: To provide enlisted personnel with training in basic theory of special-purpose semiconductor and electronic circuits used in digital data handling equipment.

Instruction: Lectures and practical demonstrations in solid-state devices and circuits, counters and other computer circuits, number systems, Boolean algebra and reduction, logic gates, symbolic logic truth tables Vietch diagrams, voltage dividers, semiconductor basics, electronic safety measures, transistor review, oscillators, various diodes, oscilloscopes, radar fundamentals, amplifiers, power supplies, data system servicing techniques and peripheral equipment fundamentals, and data system tactical air operations central timing and control functions.

Credit Recommendation: In the vocational certificate category, 6 semester hours in computer technology, 4 in solid-state electronics, and, on the basis of institutional evaluation, credit in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in computer technology, 3 in solid-state electronics, and, on the basis of institutional evaluation, credit in electrical laboratory (3/74); in the upper-division baccalaureate category, 2 semester hours in digital systems, 2 in solid-state electronics, and credit in electrical laboratory on the basis of institutional evaluation (3/74).

MC-1715-0018

Digital Repair

(Tactical Air Operations Central (TAOC) Digital Repair)

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 14 weeks (490 hours).

Exhibit Dates: 7/67–12/68.

Objectives: To train enlisted personnel to operate, install, adjust, and repair the digital section of the Tactical Air Operations Data System.

Instruction: Lectures and demonstrations in radar IFF data processor group, polar-to-Cartesian converter, correlator, height finder programmer and buffer, automatic tracking unit, intercept computer, information and action unit, operation and maintenance unit, drum fill unit, power distribution and power supplies, basic functioning, installation, adjustment, and repair; supply administration; preventive maintenance; maintenance publications; and peripheral equipment fundamentals.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

MC-1715-0019

Data Handling Repair

(Tactical Air Operations Central (TAOC) Data Handling Repair)

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 14 weeks (490 hours).

Exhibit Dates: 7/67–12/68.

Objectives: To train enlisted personnel to operate, install, adjust, and repair tactical data systems data-handling sections.

Instruction: Lectures and laboratories in circuitry and functioning of digital data programmers, digital data buffers, intercenter data terminals, tactical data communication central buffers, missile battery data terminals, teletype programmers, teletype buffers, intercommunications, communication central groups, operation and maintenance, and power distribution.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (3/74).

MC-1715-0020

Tactical Air Command Central Repairer

(Tactical Air Command Central (TACC AN/TYQ-1) Repair)

Course Number: *Version 1:* FGV. *Version 2:* FGV. *Version 3:* None. *Version 4:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 17 weeks (581 hours). *Version 2:* 14–17 weeks (548–597 hours). *Version 3:* 17 weeks (699 hours). *Version 4:* 15–18 weeks (557–623 hours).

Exhibit Dates: *Version 1:* 6/90–Present. *Version 2:* 7/84–5/90. *Version 3:* 11/78–6/84. *Version 4:* 6/73–10/78.

Objectives: To train enlisted personnel in the operation, testing, maintenance, and repair of the Tactical Air Command Central System. System includes computers, displays, voice communications, and digital-data links.

Instruction: *Version 2:* Lectures and practical exercises at the introductory level in the operation, testing, and repair of all system components. Includes using wire diagnostics and computer repair to the card level, power supply repair, and systems interfaces. Also includes use of special and general purpose test equipment. *Version 3:* Lectures and practical exercises in maintenance test procedures, use of tools and test equipment, digital test sets, integral test features, diagnostic routines, and special failure-reporting procedures, and familiarization with marine, naval, and airborne tactical data systems. *Version 4:* Lectures and practical exercises in maintenance test procedures, use of tools and test equipment, digital test sets, integral test features, diagnostic routines, and special failure-reporting procedures, and familiarization with marine, naval, and airborne tactical data systems.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to systems maintenance and 2 in introduction to computer maintenance (5/87). *Version 3:* In the vocational certificate category, 3 semester hours in use of electronic test equipment (3/79). *Version 4:* Credit is not recommended because of the limited specialized nature of the course (3/74).

MC-1715-0021

Marine Tactical Data System (MTDS) Weapons Controller/Operator

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 4 weeks (175 hours).

Exhibit Dates: 7/69–12/73.

Objectives: To train air controllers to operate and supervise AN/TYA-9 operator shelters.

Instruction: Lectures and practical exercises in manual target detection, acquisition, and rate-aided tracking; automatic detection, acquisition, and tracking of aircraft; and identification of air targets on the basis of flight plans, identification friend-or-foe (IFF) data, speed, communication checks, aircraft orbit points, and prearranged maneuvers. Controllers also learn computer-aided track evaluation and weapon target pairing. Operators also learn automatic vectoring of data link equipped aircraft and voice control of non-data link equipped aircraft.

Credit Recommendation: Credit is not recommended because of the military nature of the course (3/74).

MC-1715-0022

Tactical Data System Handling Repair

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 14 weeks (483 hours).

Exhibit Dates: 6/69–12/73.

Objectives: To train enlisted personnel to maintain tactical data system equipment and associated subunits and circuits.

Instruction: Lectures and laboratories in external and internal digital data links, ground-air-ground data communication, tactical data communication teletype systems, data line programmers and buffers, data link terminals, intercoms, voice communication apparatus, display generation equipment, and data-handling equipment maintenance.

Credit Recommendation: In the vocational certificate category, credit in electrical laboratory or computer technology on the basis of institutional evaluation (3/74).

MC-1715-0023

Analog Repair

(Tactical Air Operations Central (TAOC) Analog Repair)

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 14 weeks (490 hours).

Exhibit Dates: 7/67–12/68.

Objectives: To train enlisted personnel as tactical data systems analog repairmen.

Instruction: Lectures and laboratories in system operation, installation, and repair; interrelation of subunits and circuits; corrective and preventive maintenance procedures; and use of test equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74).

MC-1715-0024

Microwave Equipment Operator

Course Number: CGM.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 3-6 weeks (105-221 hours).

Exhibit Dates: 7/72-Present.

Objectives: To train enlisted personnel to operate microwave equipment.

Instruction: Lectures in microwave propagation, technical manuals introduction, safety precautions, receiver and transmitter analysis, various radio sets analyses, multiplexer analysis and alignment procedures, profile graphs preparation, and preventive maintenance and troubleshooting procedures.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (2/89).

MC-1715-0026

TACTICAL DATA COMMUNICATIONS CENTRAL TECHNICIAN
(Tactical Data Communications Central (TDCC AN/TYQ-3) Technician)

Course Number: OGM.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 23-29 weeks (846-1140 hours). *Version 2:* 44 weeks (1540 hours).

Exhibit Dates: *Version 1:* 11/76-Present. *Version 2:* 12/71-10/76.

Objectives: To train enlisted personnel to install, operate, test, and maintain data communications systems.

Instruction: *Version 1:* Lectures and practical exercise in the operation and maintenance of a specific tactical data communications system. Topics include systems concepts, programming, data flow, and fault isolation. *Version 2:* Lectures and practical exercises in the operation and maintenance of tactical data communications central, including basic digital system theory and computer fundamentals, SSB, transmission lines, MODEMS, components of equipment, and maintenance and troubleshooting of specific functional digital circuits.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems troubleshooting and maintenance and 3 in electronic systems troubleshooting and maintenance (2/89). *Version 2:* In the vocational certificate category, 6 semester hours in electronics or digital communications, 6 in electronics or digital communications laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics or digital communications, 2 in electronics or digital communications laboratory (3/74); in the upper-division baccalaureate category, 3 semester hours as an elective in electronics or digital communications (3/74).

MC-1715-0027

TEST INSTRUMENT REPAIRMAN

Course Number: None.

Location: Supply Center, Albany, GA.

Length: 16-17 weeks (622-648 hours).

Exhibit Dates: 6/69-1/88.

Objectives: To train enlisted personnel who have prior training in basic electronics and radar fundamentals to maintain and repair electrical and electronic test and measuring instruments.

Instruction: Lectures and practical exercises in the maintenance of electrical and electronic test and measuring instruments, including general and specialized electronic theory, logical troubleshooting, circuit analysis, and basic measurement methods and techniques.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electronics, 6 in electronics laboratory (6/75); in the lower-division baccalaureate/associate degree category, 6 semester hours in electronics, 3 in microwave electronics, 3 in electronics or microwave laboratory (6/75); in the upper-division baccalaureate category, credit in electronics laboratory on the basis of institutional evaluation (6/75).

MC-1715-0028

TELEPHONE TELETYPE REPAIR (SPECIAL)

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 14 weeks (490 hours).

Exhibit Dates: 7/62-12/68.

Objectives: To train enlisted personnel to maintain and repair teletype and telephone systems.

Instruction: Lectures and practical experience in the maintenance and repair of teletype and telephone systems, including electrical and mechanical fundamentals, basic electronic circuitry, transistor operation, and troubleshooting and adjustment techniques.

Credit Recommendation: In the vocational certificate category, 5 semester hours in electromechanical communications, 5 in electromechanical communications laboratory (3/74).

MC-1715-0029

RADIO TECHNICIAN

Course Number: None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA; *Version 2:* Communication-Electronics School, Twentynine Palms, CA; *Version 3:* Communication-Electronics School, San Diego, CA; Communication-Electronics School, Twentynine Palms, CA; *Version 4:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 15-18 weeks (558-667 hours). *Version 2:* 13 weeks (455 hours). *Version 3:* 15 weeks (525-538 hours). *Version 4:* 30-32 weeks (1050-1120 hours).

Exhibit Dates: *Version 1:* 7/75-12/85. *Version 2:* 6/73-6/75. *Version 3:* 8/67-5/73. *Version 4:* 5/62-7/67.

Objectives: To train electronics technicians to test, adjust, and repair communication-electronics equipment.

Instruction: For this course after 12/85 see MC-1715-0124. *All Versions:* Lectures and demonstrations in multichannel single-sideband equipment theory and servicing. *Version 1:* Includes portable radio servicing methods. *Version 2:* Instruction includes troposcatter communications systems theory and servicing, direction-finding equipment, and limited cryptographic maintenance. *Version 3:* Instruction includes troposcatter communications systems theory and servicing, direction-finding equipment, and limited cryptographic maintenance. *Version 4:* Instruction includes extensive coverage of mathematics, electron devices and circuits, antennas, and AM and FM systems. All material is general in nature.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic equipment maintenance, 3 in electronic communication systems (3/79); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronic equipment maintenance laboratory (3/79). *Version 2:* In the vocational certificate category, 6 semester hours in electronics, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronics (3/74). *Version 3:* In the vocational certificate category, 6 semester hours in electronics, 2 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electronics (3/74). *Version 4:* In the vocational certificate category, 9 semester hours in electronics, 3 in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in electrical laboratory (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in electrical laboratory (3/74).

MC-1715-0030

COMMUNICATIONS CENTRAL GROUP
AN/TYA-11 TECHNICIAN

Course Number: None.

Location: Communication-Electronics School, Twentynine Palms, CA.

Length: 4 weeks (140 hours).

Exhibit Dates: 6/72-12/73.

Objectives: To train radio technicians to test, adjust, and repair a specific communications terminal system.

Instruction: Lectures and practical exercises in the maintenance and repair of the AN/TYA-11 communications central group, including block-diagram and module-by-module analysis of individual system components, theory of operation, and circuits, antennas, and power distribution information necessary for inspection and testing of equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronics, 1 in electronics laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics laboratory (3/74).

MC-1715-0031

AIR SUPPORT OPERATIONS OPERATOR

Course Number: 67L.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 3-8 weeks (109-240 hours).

Exhibit Dates: 1/72-Present.

Objectives: To provide instruction in the operations and tactical employment of a Direct Air Support Center, Radar Directing Center, and Airborne/Mobile Direct Air Support Center.

Instruction: Lectures and practical exercises in net operator tasks; installation of power connections, air conditioners, antennas, telephone connections, and external transceiver connections; operation of plotter and status board keepers; and ASRT radar operating procedures.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/86).

MC-1715-0032

AIRBORNE RADIO OPERATORS

Course Number: None.

Location: Airborne Operator School, Cherry Point, NC.

Length: 16 weeks (615 hours).

Exhibit Dates: 3/62-1/88.

Objectives: To train enlisted personnel as airborne radio operators.

Instruction: Lectures and practical exercises in international Morse code, code typing, code printing, net operations, and sending and receiving; general radio operating procedures and radiotelegraph and radiotelephone messages; and airborne electronics and equipment.

Credit Recommendation: In the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (12/68).

MC-1715-0033

1. AVIATION FIRE CONTROL REPAIR
2. AVIATION FIRE CONTROL REPAIR
3. AVIATION FIRE CONTROL REPAIR, AN/TPQ-10 (AFC)
   (Aviation Fire Control Repair)
4. AVIATION FIRE CONTROL REPAIR
5. AVIATION FIRE CONTROL REPAIR

Course Number: *Version 1:* 661. *Version 2:* None. *Version 3:* None. *Version 4:* None. *Version 5:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 2:* Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, San Diego, CA. *Version 5:* Basic Electronics School, San Diego, CA.

Length: *Version 1:* 13-14 weeks (533-534 hours). *Version 2:* 8-9 weeks (327-328 hours). *Version 3:* 9 weeks (315 hours). *Version 4:* 8 weeks (280 hours). *Version 5:* 9 weeks (315 hours).

Exhibit Dates: *Version 1:* 7/85-Present. *Version 2:* 7/74-6/85. *Version 3:* 1/72-6/74. *Version 4:* 5/64-12/71. *Version 5:* 7/56-4/64.

Objectives: To provide enlisted personnel who have completed a basic electronics fundamentals course with the technical skills required of aviation fire control repairmen.

Instruction: *Version 1:* Preparation of enlisted personnel in overall concept of operation, installation, and adjustment of military aircraft course directing radar systems. Includes corrective and preventive maintenance procedures; use of test equipment and inherent testing procedures. *Version 2:* Preparation of enlisted personnel in overall concept of operation, installation, and adjustment of military aircraft course directing radar systems. Includes corrective and preventive maintenance procedures; use of test equipment and inherent testing procedures. *Version 3:* Lectures and laboratories in power and control circuits, radar circuits, automatic tracking circuits, computers, and ancillary equipment. *Version 4:* Lectures and laboratories in power and control circuits, radar circuits, automatic tracking circuits, computers, and ancillary equipment. *Version 5:* Lectures and laboratories in theory, maintenance, and troubleshooting of radar sets and computer-transmitter sets.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic equipment maintenance and 1 in electronic laboratory (10/87). *Version 2:* In the vocational certificate category, 3 semester hours in electronic equipment maintenance (3/79). *Version 3:* In the vocational certificate category, 3 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74). *Version 4:* In the vocational certificate category, 3 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68). *Version 5:* Insufficient data for evaluation (3/74).

MC-1715-0034

LIGHT ANTIAIRCRAFT ARTILLERY (AAA) FIRE CONTROL REPAIR

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 16 weeks (560 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train enlisted personnel to operate and maintain lightweight air search radar and fire control systems for lightweight aircraft artillery.

Instruction: Lectures and laboratories in circuit analysis, block diagrams, and field maintenance and operation of M-4 radars, M-10 computers, and M-16 power controls.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electrical laboratory (3/74).

MC-1715-0035

TACTICAL DATA SYSTEMS DIGITAL REPAIR

Course Number: None.

Location: Marine Corps Recruit Depot, San Diego, CA.

Length: 15 weeks (518 hours).

Exhibit Dates: 7/70-12/73.

Objectives: To train enlisted personnel to operate, install, and repair digital processing units and circuits of radar and IFF data processors.

Instruction: Lectures and practical exercises in radar IFF, logic circuitry, pulse circuits, display modules, digital repair, and universal console operations.

Credit Recommendation: In the vocational certificate category, 7 semester hours in digital electronics (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in digital electronics (3/74); in the upper-division baccalaureate category, 1 semester hour in digital electronics laboratory (3/74).

MC-1715-0036

LIGHT ANTIAIRCRAFT ARTILLERY (AAA) FIRE CONTROL REPAIR

Course Number: None.

Location: Basic Electronics School, San Diego, CA.

Length: 16 weeks (560 hours).

Exhibit Dates: 7/56-12/68.

Objectives: To train enlisted personnel to operate, test, and repair light antiaircraft artillery.

Instruction: Lectures and laboratories in theory of operation and repair of the AN/GPG-1 radar set, T-37 computer, and T-21 power control. This is a highly specialized equipment course with limited academic value.

Credit Recommendation: Credit in not recommended because of the limited specialized nature of the course (4/74).

MC-1715-0037

GUIDED MISSILE FIRE CONTROL REPAIR

Course Number: None.

Location: Basic Electronics School, San Diego, CA.

Length: 15 weeks (525 hours).

Exhibit Dates: 7/56-12/68.

Objectives: To train enlisted personnel to operate, maintain, test, and repair guided missile fire control systems.

Instruction: Lectures and practical exercises in theory of operation, installation and adjustment, and maintenance and troubleshooting of AN/MSG-3 systems. Highly specialized equipment course with limited educational value.

Credit Recommendation: Credit in not recommended because of the limited specialized nature of the course (4/74).

MC-1715-0038

TELEPHONE REPAIR

Course Number: None.

Location: Basic Electronics School, San Diego, CA.

Length: 22 weeks (770 hours).

Exhibit Dates: 6/56-12/68.

Objectives: To train enlisted personnel to inspect, test, and maintain basic telephone equipment and cabling.

Instruction: Lectures and laboratories in mathematics, electricity and magnetism, test equipment, power equipment, electronic supplies, teletype, cabling, and field wiring, with emphasis on repair procedures and troubleshooting. Specialized course with little educational value.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

MC-1715-0039

ADVANCED COMMUNICATIONS OFFICER

Course Number: None.

Location: Communication Officers School, Quantico, VA.

Length: *Version 1:* 42 weeks (1497). *Version 2:* 42 weeks (1155-1156 hours). *Version 3:* 42 weeks (1093 hours). *Version 4:* 42 weeks (1034-1108 hours).

Exhibit Dates: *Version 1:* 8/81-Present. *Version 2:* 8/80-7/81 *Version 3:* 8/77-7/81. *Version 4:* 8/75-7/77.

Objectives: To provide professional military education in communications and command and staff duties for Marine officers.

Instruction: *All Versions:* Lectures, demonstrations, and self-paced studies in organization and tactics, amphibious operations, an overview of electrical circuits and electronics, management and command skills, leadership, operational telecommunications including propagation, antennas, modulation, multiplexing, and specialized military systems. *Version 2:* This course in an introductory level presentation of AC and DC circuit theory including characteristics of passive circuit elements and transistors. Principles of operation of AM, SSB, and FM communication equipment and subsystems with emphasis on signal characteristics are included. There is introductory level instruction in communication transmitters and receivers, frequency allocation, antennas and transmission modulation techniques, signaling schemes and mobile electric power generation. Includes installation, operation, and maintenance of specific military equipment. Introductory instruction in automatic data processing with some programming using BASCI language, installation and operation of specific ADP equipment are included. The leadership component is concerned with the training of officers through the development of their skills. A wide range of material is entailed in order to provide for the acquisition of such competencies as planning, organizing, conducting, evaluating, and inspecting field leadership training. Students are required to actively participate in every phase of the instructions. In the management component the student employs management skills and technologies, theories and concepts which will be incorporated into the instructional program. Topics such as statistical information, planning, programming, and budgeting and maintenance management are included. Instruction is offered in the functioning of organizations of the command and staff level, principles and techniques of tactics with emphasis on amphibious operations and support communications, use and applications of justice and military law. *Version 3:* Includes basic DC and AC circuits (excluding network analysis and three phase).

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester hours in data processing, 3 in public speaking, 4 in basic electricity/electronics (11/80); in the upper-division baccalaureate category, 5 semester hours in leadership and management (11/80); in the graduate degree category, 3 semester hours in introduction to principles of research (11/80). *Version 3:* In the vocational certificate category, 6 semester hours in basic electrical circuits excluding laboratory (12/77); in the lower-division baccalaureate/associate degree category, 4 semester hours in basic electrical circuits excluding network analysis and laboratory (12/77). *Version 4:* Credit is not recommended because of the limited specialized nature of the course (12/77).

MC-1715-0040

AVIATION FIRE CONTROL TECHNICIAN

Course Number: 664.

Location: Air Command and Control School, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 7-11 weeks (267-440 hours).

Exhibit Dates: 10/78-Present.

Objectives: To provide instruction in the installation, alignment, and advanced troubleshooting of an aviation fire control system.

Instruction: Lectures and practical exercises in the receiving, transmitting, and timing circuitry of the radar system. Also includes a review of the system computer. Advanced troubleshooting techniques for this system are stressed.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic equipment maintenance (5/90).

MC-1715-0042

SOUND EQUIPMENT REPAIR

Course Number: None.

Location: Basic Electronics School, San Diego, CA.

Length: 6 weeks (210 hours).

Exhibit Dates: 7/56-12/68.

Objectives: To train enlisted personnel to operate, test, and maintain specific sound equipment.

Instruction: Lectures and practical exercises in audio and magnetic recording theory, and operation and maintenance of specific sound equipment, with emphasis on troubleshooting and servicing techniques.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (4/74).

MC-1715-0043

MARINE TACTICAL DATA SYSTEM (MTDS) TECHNICIAN

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 34 weeks (1388 hours).

Exhibit Dates: 7/67-12/68.

Objectives: To train enlisted personnel to install, repair, test, and maintain a tactical data system.

Instruction: Lectures and demonstrations on the operation of special-purpose computers and peripheral equipment; radar data processing and track store data processing; installation, operation, and repair of geographic display units, weapons control systems, bookkeeping elements, internal and external digital data links, and voice communication elements; memory access and monitoring; power supply and distribution; and operation of maintenance and testing equipment.

Credit Recommendation: In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

MC-1715-0044

ADVANCED ELECTRICIAN

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 8 weeks (344 hours).

Exhibit Dates: 1/68-12/73.

Objectives: To provide enlisted personnel with advanced training in the servicing of electrical and electronic equipment.

Instruction: Lectures in basic mathematics, including graphs, logs, algebra, and trigonometry; electrical theory, including terminology, batteries, Ohm's law, electromagnetism, elementary AC circuits, series-parallel circuits, RLC combinations, bridges, conductors, and wiring; power generating equipment, including AC and DC motors, generators, transformers, construction, and characteristics; triodes, amplifiers, and magnetic amplifiers; electrical drawings and symbols; elementary tube electronics, power supplies, semiconductors introduction, diodes and transistors applications and testing procedures; solid-state regulators; and engine generator analyzer set operational testing procedures.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity or electronics (12/68); in the upper-division baccalaureate category, 3 semester hours as an elective in electricity or electronics (4/74).

MC-1715-0045

GROUND RADIO TECHNICIAN

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 24 weeks (840 hours).

Exhibit Dates: 7/56-1/88.

Objectives: To train experienced communication-electronics equipment repairmen to install, inspect, maintain, and repair specific ground radio sets.

Instruction: Lectures and practical exercises in mathematics through trigonometry, vector algebra, and complex numbers; system circuits, vacuum tubes, power supplies, antennas, and test equipment maintenance and repair; high-frequency techniques; servicing procedures for special ground radio sets; and basic transistor theory as applied to radio receivers.

Credit Recommendation: In the vocational certificate category, 36 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in mathematics, 8 in electronics (4/74); in the upper-division baccalaureate category, 3 semester hours in radio and electronics, and credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0046

TACTICAL AIR COMMAND CENTRAL (TACC) TECHNICIAN

Course Number: *Version 1:* FGX. *Version 2:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA.

Length: *Version 1:* 21-29 weeks (783-1100 hours). *Version 2:* 24 weeks (875 hours).

Exhibit Dates: *Version 1:* 7/84-Present. *Version 2:* 12/78-6/84.

Objectives: To train enlisted personnel in the advanced operation, testing, maintenance and repair of a tactical air command central system. System includes computers, displays, voice communications, and digital data links.

Instruction: *Version 1:* Lectures and practical exercises in the operation, testing and repair of the entire central system. Includes computer diagnostics and repair to the card level, power supply repair, and systems interfaces. Use of specialized and general purpose test equipment. In 11/84 a new outline showed increased emphasis devoted to display generation and presentation equipment by 50% and 30% respectively. This was due to a loss in essential lab equipment necessitating increased lecture time. *Version 2:* Lectures and practical exercises in maintenance test procedures, use of tools, digital and analog test equipment, integral test features, diagnostic routines, and special failure-reporting procedures. Included is the interfacing of analog systems with specific computer logic systems.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 3 semester hours in systems maintenance and 3 in computer maintenance (5/87). *Version 2:* In the vocational certificate category, 3 semester hours in computer system software, 3 in computer interfacing and troubleshooting (3/79)

MC-1715-0047

AVIATION RADIO TECHNICIAN

Course Number: *Version 1:* 66G. *Version 2:* None. *Version 3:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palm, CA. *Version 2:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, San Diego, CA; Basic Electronics School, San Diego, CA.

Length: *Version 1:* 3 weeks (105 hours). *Version 2:* 9-11 weeks (335-422 hours). *Version 3:* 24 weeks (840 hours).

Exhibit Dates: *Version 1:* 6/85-7/87. *Version 2:* 2/76-5/85. *Version 3:* 7/56-12/68.

Objectives: To train maintenance personnel to install, inspect, maintain, and repair aviation radio equipment.

Instruction: For this course after 7/87 see MC-1715-0127. *All Versions:* Lectures and practical exercises in circuits, vacuum tubes, power supplies, antennas, and test equipment operation and maintenance; high-frequency techniques; special aviation radio set servicing procedures; and basic transistor theory as applied to radio receivers. *Version 1:* Lectures and practical exercises in aviation radio equipment characteristics, operation and maintenance at the block diagram level. *Version 2:* Lectures and practical exercises relating to operational, adjustment, alignment, and performance verification procedures. Techniques refer to specific military electronic equipment. *Version 3:* Includes mathematics through trigonometry, vector algebra, and complex numbers.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in electronic equipment maintenance (2/86). *Version 2:* In the vocational certificate category, 3 semester hours in electronic equipment maintenance, 2 in electronic communication systems (3/79). *Version 3:* In the vocational certificate category, 36 semester hours in radio and electronics (4/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in mathematics, 8 in electronics (4/74); in the upper-division baccalaureate category, 3 semester hours in radio and electronics and credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0048

1. Reserve Communication Officer Phase I, II, III
2. Reserve Communication Officer Phase I, Phase II

Course Number: None.

Location: Communication Officers School, Quantico, VA.

Length: *Version 1:* Phase I, 2 weeks; Phase II, 2 weeks (Phase I, 80 hours, Phase II, 80 hours). *Version 2:* Phase I, 2 weeks; Phase II, 2 weeks (Phase I, 71 hours, Phase II, 69 hours).

Exhibit Dates: *Version 1:* 7/86-Present. *Version 2:* 4/76-6/86.

Objectives: To train basic school graduates in the responsibilities and duties of a communications officer.

Instruction: Course includes military communications equipment, systems, and planning procedures on a survey basis. Course is offered in two successive phases.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* Credit is not recommended because of the military-specific nature of the course (11/80).

MC-1715-0049

Aviation Electronics Operator

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 5 weeks (175 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train enlisted personnel to locate aircraft on radar plotting, radio-radar status, and aircraft status boards, and to operate ground-based radio and radar used in tactical air control.

Instruction: Lectures and practical exercises in plotting techniques; basic radar theory; operation of radio and telephones, position indicators, height finders, direction finders, radio and radar jamming equipment, and air defense systems; weather; map reading; air traffic control procedures; search and rescue procedures; and aircraft recognition.

Credit Recommendation: Credit in not recommended because of the military nature of the course (3/74).

MC-1715-0050

Weapons Location Equipment Repair

Course Number: None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 4-5 weeks (140-173 hours).

Exhibit Dates: 1/72-12/79.

Objectives: To train enlisted personnel to maintain and troubleshoot weapons location radar sets.

Instruction: Lectures and practical exercises in the maintenance and repair of weapons location radar sets, including fundamental concepts and technology of weapons location radar, power distribution, interpretation of radar schematics, circuit analysis, and alignment and troubleshooting.

Credit Recommendation: In the vocational certificate category, 2 semester hours in communications technology (2/86).

MC-1715-0051

Ground Radar Technician

Course Number: *Version 1:* 27F. *Version 2:* None. *Version 3:* None. *Version 4:* None. *Version 5:* None. *Version 6:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 2:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, Twentynine Palms, CA. *Version 5:* Communication-Electronics School, San Diego, CA. *Version 6:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 22-27 weeks (773-1004 hours). *Version 2:* 17 weeks (641 hours). *Version 3:* 17-20 weeks (595 hours). *Version 4:* 24-28 weeks (840-980 hours). *Version 5:* 20 weeks (700 hours). *Version 6:* 24 weeks (840 hours).

Exhibit Dates: *Version 1:* 4/79-6/87. *Version 2:* 7/75-3/79. *Version 3:* 1/72-4/75. *Version 4:* 7/62-12/71. *Version 5:* 7/58-6/62. *Version 6:* 7/56-6/58.

Objectives: To train enlisted personnel to test, troubleshoot, and maintain specific ground radar equipment.

Instruction: For this course after 6/87 see MC-1715-0117. *All Versions:* Lectures and practical exercises in the installation, operation, and maintenance of radar systems. *Version 4:* Includes hostile fire surveillance radar, radar chronograph, tellurometers, radar beacons, Rawin sets, and FADAC. *Version 5:* Includes review of algebra and trigonometry, vacuum tubes, rectifiers, oscillators, multivibrators, basic electricity and magnetism, transistors, microwave theory, synchros and servo systems, and basic digital theory. *Version 6:* Includes review of algebra and trigonometry, vacuum tubes, rectifiers, oscillators, multivibrators, IFF equipment, Mk 10, indicator groups, Rawin sets, and radar beacons.

Credit Recommendation: *Version 1:* In the vocational certificate category, 6 semester hours in electronic equipment maintenance (2/86). *Version 2:* In the vocational certificate category, 6 semester hours in communications technology (2/76). *Version 3:* Credit is not recommended because of the military-specific nature of the course (4/74). *Version 4:* In the vocational certificate category, 9 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68). *Version 5:* In the vocational certificate category, 3 semester hours in electricity or electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity or electronics (12/68). *Version 6:* In the upper-division baccalaureate category, 3 semester hours in electronics, and additional credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0052

Aviation Radar Repair (B)
(Aviation Radar Repairman (B))

Course Number: None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA; *Version 1:* Communication-Electronics School, Twentynine Palms, CA. *Version 2:* Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 16-17 weeks (560-632 hours). *Version 2:* 13 weeks (455 hours). *Version 3:* 13 weeks (455 hours).

Exhibit Dates: *Version 1:* 11/73-1/88. *Version 2:* 1/72-10/73. *Version 3:* 5/64-12/71.

Objectives: To train enlisted personnel to install, operate, adjust, inspect, and maintain computers and associated radar sets.

Instruction: *All Versions:* Lectures and practical exercises in tracing RF energy flows through the system; automatic frequency control; high-power pulsers; and system components. *Version 3:* Additional circuit evaluation data on synchronizers, modulators, couplers, and transmitters.

Credit Recommendation: *Version 1:* In the vocational certificate category, 5 semester hours in communication technology (2/76). *Version 2:* Insufficient data for evaluation (4/74). *Version 3:* In the vocational certificate category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

MC-1715-0053

Tactical Air Operations Central
(TAOC AN/TYQ-2) Repair

Course Number: FGT.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 2:* Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 18 weeks (657 hours). *Version 2:* 17-18 weeks (651-665 hours). *Version 3:* 21 weeks (729 hours). *Version 4:* 19 weeks (658 hours).

Exhibit Dates: *Version 1:* 11/77–1/90. *Version 2:* 7/74–10/77. *Version 3:* 7/73–6/74. *Version 4:* 1/72–6/73.

Objectives: To train enlisted personnel to test, maintain, and repair defective circuit boards and modules in tactical air operations systems.

Instruction: *All Versions:* Lectures and practical exercises in usage of printed-circuit-board testers, multimeters, electronic and differential voltmeters, and function-generators; malfunction diagnosis and repair of subsystems. *Version 1:* Includes fault testing and repair of circuit cards in both digital and analog circuits and systems. *Version 2:* Topics include diagnostic techniques for specific system and introduction to overall operation and function of a military tactical air operations control. Also includes fault testing and repair of circuit cards system for flip-flops, logic gates, shift registers, and power supply modules. *Version 3:* Instruction includes module identification and repair, system logic operation identification and description, and display alignment and adjustment. Also includes fault testing and repair of circuit cards for flip-flops, logic gates, shift registers, and power supply modules. *Version 4:* Also includes fault testing and repair of circuit cards for flip-flops, logic gates, shift registers, and power supply modules.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in digital circuit fundamentals, 3 in instruments and measurements, 3 in electronic systems maintenance (3/79); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems maintenance (3/79); in the upper-division baccalaureate category, 3 semester hours in industrial arts education for basic electronics (3/79). *Version 2:* In the vocational certificate category, 12 semester hours in electronics technology (2/76). *Version 3:* In the vocational certificate category, 3 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, credit in electrical laboratory on the basis of institutional evaluation (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74). *Version 4:* Insufficient data for evaluation (4/74).

MC-1715-0054

AVIATION RADAR REPAIR (D)

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 12 weeks (420 hours).

Exhibit Dates: 5/64–12/73.

Objectives: To train enlisted personnel to install, operate, and maintain ground radar and relay systems.

Instruction: Lectures and practical exercises in detailed circuit theory of power supplies, video decoders, radars, and data relays. This is a highly specialized equipment course with very little mathematics.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electricity and electronics (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electricity and electronics (4/74); in the upper-division baccalaureate category, credit in electricity and electronics on the basis of institutional evaluation (4/74).

MC-1715-0055

1. AVIATION RADAR REPAIR A
2. AVIATION RADAR REPAIR (A)
3. AVIATION RADAR REPAIR (A) (Aviation Radar Repair)
4. AVIATION RADAR REPAIR

Course Number: *Version 1:* E2H; 66U. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA. *Version 2:* Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, San Diego, CA. *Version 4:* Basic Electronics School, San Diego, CA.

Length: *Version 1:* 13-14 weeks (480 hours). *Version 2:* 16 weeks (560 hours). *Version 3:* 14-15 weeks (490-525 hours). *Version 4:* 10 weeks (350 hours).

Exhibit Dates: *Version 1:* 8/83–Present. *Version 2:* 1/72–12/73. *Version 3:* 7/58–12/71. *Version 4:* 7/56–6/58.

Objectives: To train personnel to install, test, adjust and maintain an aviation radar system.

Instruction: *Version 1:* Lectures and practical exercises on installation and maintenance procedures on all parts of the radar system are presented. Also included are practical exercises on the troubleshooting of electronic circuitry. *Version 2:* Lectures and practical exercises in circuit theory, circuit testing, corrective and preventive maintenance procedures, performance testing, use of associated test equipment, function and application of identification equipment, introduction to electronic warfare and electronic countermeasures. This course is directed toward specialized equipment. *Version 3:* Lectures and practical exercises in circuit theory, circuit testing, corrective and preventive maintenance procedures, performance testing, use of associated test equipment, function and application of identification equipment, introduction to electronic warfare and electronic countermeasures. This course is directed toward specialized equipment. *Version 4:* Lectures and practical exercises in circuit theory, circuit testing, corrective and preventive maintenance procedures, performance testing, use of associated test equipment, function and application of identification equipment, introduction to electronic warfare and electronic countermeasures. This course is directed toward specialized equipment.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in electronic systems troubleshooting (9/87). *Version 2:* In the vocational certificate category, 6 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68). *Version 3:* In the vocational certificate category, 6 semester hours in electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68). *Version 4:* In the vocational certificate category, 2 semester hours in electrical laboratory (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0056

MEDIUM ANTIAIRCRAFT ARTILLERY (AAA) FIRE CONTROL REPAIR

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 16 weeks (560 hours).

Exhibit Dates: 7/54–12/68.

Objectives: To train enlisted personnel who have backgrounds in electronics and basic radar principles to maintain and repair the M-33 fire control system.

Instruction: Lectures and practical exercises in the maintenance and repair of the M-33 fire control system, including detailed circuit theory of power supplies, acquisition and tracking radar systems, computer and plotting boards, and tactical control and communications systems; and adjustment and troubleshooting procedures. Highly equipment oriented, with little mathematics.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electricity and electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and electronics (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

MC-1715-0058

AVIATION RADAR TECHNICIAN

Course Number: None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA. *Version 2:* Communication-Electronics School, San Diego, CA. *Version 3:* Communication-Electronics School, San Diego, CA. *Version 4:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 34 weeks (1198-1265 hours). *Version 2:* 26-33 weeks (910-1155 hours). *Version 3:* 28 weeks (980 hours). *Version 4:* 24 weeks (840 hours).

Exhibit Dates: *Version 1:* 1/72–4/86. *Version 2:* 7/62–12/71. *Version 3:* 7/59–6/62. *Version 4:* 7/56–6/59.

Objectives: To provide senior noncommissioned officers with advanced instruction in the erection, operation, adjustment, repair, and maintenance of specialized aviation radar equipment and associated test equipment.

Instruction: For this course after 4/86 see MC-1715-0122. Operation and troubleshooting procedures for interrogator sets, decoder groups and IFF equipment. Maintenance of computers, synthesizers, transmitters, receivers, antennas, computer correlator detectors, target position computers, IFF data processors and radar display consoles.

Credit Recommendation: *Version 1:* In the vocational certificate category, 12 semester hours in communications technology (2/76). *Version 2:* In the vocational certificate category, 12 semester hours in electronics and credit in electronics laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (12/68). *Version 3:* In the vocational certificate category, 12 semester hours in electronics and credit in electrical laboratory on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electronics (12/68). *Version 4:* In the upper-division baccalaureate category, 3 semester hours in electronics laboratory, and credit in electricity on the basis of institutional evaluation (12/68).

MC-1715-0059

AVIATION RADAR REPAIR (C)

Course Number: *Version 1:* 66W. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 13-14 weeks (492-522 hours). *Version 2:* 12 weeks (443 hours). *Version 3:* 12 weeks (420-445 hours). *Version 4:* 12-17 weeks (455-607 hours).

Exhibit Dates: *Version 1:* 10/85-Present. *Version 2:* 7/78-9/85. *Version 3:* 11/73-6/78. *Version 4:* 5/64-10/73.

Objectives: To train enlisted personnel who are graduates of basic electronics and radar courses in the operation, maintenance and repair of a specific phased array radar system.

Instruction: *Version 1:* Lectures and practical exercises in the theory of operation, reapir, and maintenance of the computer programmer, synthesizer, transmitter, antenna, receiver, display console, data processor and other equipment related to the AN/TPS-32 radar system. *Version 2:* Lectures and practical exercises in operation and troubleshooting procedures for interrogator sets, decoder groups, and IFF test equipment; and maintenance of computer programmers, synthesizers, transmitters, antennas, computer-correlation detectors, target position computers, IFF data processors, and radar display consoles. *Version 3:* Lectures and practical exercises in operation and troubleshooting procedures for interrogator sets, decoder groups, and IFF test equipment; and maintenance of computer programmers, synthesizers, transmitters, antennas, computer-correlation detectors, target position computers, IFF data processors, and radar display consoles. *Version 4:* Lectures and practical exercises in operation and troubleshooting procedures for interrogator sets, decoder groups, and IFF test equipment; and maintenance of computer programmers, synthesizers, transmitters, antennas, computer-correlation detectors, target position computers, IFF data processors, and radar display consoles.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in electronic equipment troubleshooting (4/90). *Version 2:* In the vocational certificate category, 3 semester hours in electronic equipment maintenance (3/79). *Version 3:* In the vocational certificate category, 4 semester hours in communication technology (2/76). *Version 4:* In the vocational certificate category, 6 semester hours in electronics and electrical laboratory (4/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (4/74).

MC-1715-0061

BASIC RADAR

Course Number: None.

Location: Communication-Electronics School, San Diego, CA; Basic Electronics School, San Diego, CA.

Length: 13-14 weeks (455-525 hours).

Exhibit Dates: 7/56-3/79.

Objectives: To train electronics technicians to test, align, troubleshoot, and maintain a basic radar set.

Instruction: Lectures and practical exercises in the testing, alignment, troubleshooting, and maintenance of a basic radar set, including basic radar theory, IFF and indicator group equipment, and alignment and troubleshooting procedures for specific equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in electronics (12/68).

MC-1715-0062

GROUND RADAR REPAIR

Course Number: *Version 1:* 27E. *Version 2:* None. *Version 3:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA; *Version 1:* Communication-Electronics School, Twentynine Palms, CA. *Version 2:* Communication-Electronics School, Twentynine Palms, CA. *Version 3:* Communication-Electronics School, San Diego, CA.

Length: *Version 1:* 5-8 weeks (185-256 hours). *Version 2:* 5 weeks (200 hours). *Version 3:* 9-10 weeks (315-414 hours).

Exhibit Dates: *Version 1:* 7/74-Present. *Version 2:* 1/72-6/74. *Version 3:* 7/58-12/71.

Objectives: To train enlisted personnel with electronics backgrounds to install, operate, adjust, inspect and maintain specific ground radar sets.

Instruction: *All Versions:* Lectures and practical exercises in the installation, operation, adjustment, inspection, and maintenance of specific ground radar sets, including basic theory of radar sets and auxiliary and test equipment, system circuit analysis, and operation of various subsystems in specific equipment. *Version 2:* Includes introduction to digital computer principles and circuits, number systems and symbolic notation, and analysis of a specific ballistics computer within a radar set.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in systems maintenance (11/89). *Version 2:* In the vocational certificate category, credit in electricity or electronics on the basis of institutional evaluation (4/74); in the lower-division baccalaureate/associate degree category, credit in electricity or electronics on the basis of institutional evaluation (4/74). *Version 3:* In the vocational certificate category, 2 semester hours in electricity or electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electricity or electronics on the basis of institutional evaluation (4/74).

MC-1715-0063

RADAR FUNDAMENTALS

Course Number: *Version 1:* 27W. *Version 2:* 27W. *Version 3:* None. *Version 4:* None. *Version 5:* None. *Version 6:* None.

Location: *Version 1:* Air Ground Combat Training Center, Twentynine Palms, CA; *Version 2:* Air Ground Combat Training Center, Twentynine Palms, CA; *Version 3:* Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA. *Version 4:* Communication-Electronics School, Twentynine Palms, CA. *Version 5:* Communication-Electronics School, San Deigo, CA. *Version 6:* Communication-Electronics School Battalion, San Diego, CA.

Length: *Version 1:* 4 weeks (137 hours). *Version 2:* 4 weeks (141-142 hours). *Version 3:* 4-8 weeks (147-292 hours). *Version 4:* 8 weeks (320 hours). *Version 5:* 6 weeks (240 hours). *Version 6:* 6-7 weeks (240-245 hours).

Exhibit Dates: *Version 1:* 4/90-Present. *Version 2:* 8/84-3/90. *Version 3:* 7/74-3/79. *Version 4:* 1/72-6/74. *Version 5:* 11/68-12/71. *Version 6:* 7/62-10/68.

Objectives: To train enlisted personnel in the fundamental concepts of radar principles.

Instruction: *All Versions:* Lectures and practical exercises in the theory of electronics for analysis of radar, pulse circuits and components, including basic theory of power supplies, timing circuits, blocking oscillators, pulse amplifiers, receiver amplifiers, klystrons, and antenna drive systems and use of oscilloscopes, signal generators, voltmeters, and special test equipment. *Version 2:* Includes analysis of individual stages in a representative radar training system. *Version 3:* Includes control rectifier antenna drive and transistor servicing principles. Course is vacuum-tube oriented. *Version 5:* Course is vacuum-tube oriented.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in radar systems (2/89). *Version 3:* In the vocational certificate category, 2 semester hours in communications technology for the 4-week course designed for MOS 5931, 5933 and 5934; 4 semester hours in communications technology for the 8-week course designed for MOS 5942, 5943 and 5945 (2/76). *Version 4:* In the vocational certificate category, 3 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (4/74). *Version 5:* In the vocational certificate category, 2 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, credit in electronics laboratory on the basis of institutional evaluation (4/74). *Version 6:* In the vocational certificate category, 2 semester hours in electronics (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electronics (12/68); in the upper-division baccalaureate category, 2 semester hours in electronics, and credit in electrical laboratory on the basis of institutional evaluation (4/74).

MC-1715-0064

ELECTRONIC TELETYPE REPAIR

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 16 weeks (640 hours).

Exhibit Dates: 11/63-12/68.

Objectives: To train enlisted personnel to maintain and repair telephone and teletype equipment.

Instruction: Lectures and practical exercises in the maintenance and repair of telephone and teletype equipment, including theory of solid-state devices, pulse-forming and -modulation circuits, time division multiplexing, multivibrators, binary arithmetic, computer logic circuits, application of test equipment, specific equipment analysis and operation, and digital fundamentals for application to telephone or teletype systems.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical laboratory, 6 in teletype and telephone repair (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electrical laboratory, 3 in electromechanical technology (4/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (4/74).

MC-1715-0065

Cryptographic Equipment Maintenance Preparatory

Course Number: None.

Location: Communication-Electronics School Battalion, San Diego, CA.

Length: 6 weeks (210-240 hours).

Exhibit Dates: 7/62-12/68.

Objectives: To train enlisted personnel to maintain AN/TGC-14(V) teletype equipment.

Instruction: Lectures and practical exercises in AN/TGC-14 teletypewriter operation, including basic electronics test equipment usage, circuit fundamentals, solid-state components, digital computer fundamentals, and circuit analysis; and teletypewriter repair and maintenance, including disassembly, inspection, reassembly, and testing.

Credit Recommendation: In the vocational certificate category, 1 semester hour in basic electronics, 3 in electromechanical technology (5/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in basic electronics, 2 in electromechanical technology (5/74).

MC-1715-0066

Basic Radio

Course Number: None.

Location: Basic Electronics School, San Diego, CA; Communication-Electronics School Battalion, San Diego, CA.

Length: *Version 1:* 7 weeks (245 hours). *Version 2:* 10 weeks (350 hours).

Exhibit Dates: *Version 1:* 7/58-12/68. *Version 2:* 7/56-6/58.

Objectives: To train enlisted personnel to inspect, test, and maintain basic radio equipment.

Instruction: Lectures and practical exercises in basic radio, including shop practices, radiac instruments, electronics supply, circuit analysis, antennas, frequency modulation, servicing methods, soldering techniques, types of bursts, preventive maintenance of radiac instruments, resistors and electrical circuits, series, combination and parallel circuits, magnets, inductance, frequency modulation transmitters, noise and interference in FM Tran/Rec, theory and use of TS-297 and ME-25A/U, and troubleshooting.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in electricity and radio, 2 in electrical laboratory (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in electricity and radio (12/68); in the upper-division baccalaureate category, 2 semester hours in electricity and radio, and credit in electrical laboratory on the basis of institutional evaluation (6/74). *Version 2:* In the vocational certificate category, 3 semester hours in electricity and radio (4/74); in the lower-division baccalaureate/associate degree category, credit in electricity and radio on the basis of institutional evaluation (4/74).

MC-1715-0067

Operations Officer Electronic Counter-Countermeasures (ECCM)

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 3 weeks (105 hours).

Exhibit Dates: 5/66-12/68.

Objectives: To train personnel in basic concepts of electronic countermeasures and counter-countermeasures.

Instruction: Lectures and practical exercises in electronic countermeasures and counter-countermeasures, including electronic warfare, active countermeasures, active countermeasures recognition, advanced ECM techniques and developments, ECCM transmitter techniques and devices, transmitter avoidance fixes, receiver techniques or nonsynchronous pulses, CFAR principles, transmitter fixes to increase signal-to-noise ratio and for synchronous-pulse jamming, and gain controls.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/74).

MC-1715-0069

Special Anti-Air Warfare (AAW) Batteryman

Course Number: None.

Location: Air Reserve Missile Training Detachment, Twentynine Palms, CA.

Length: 7 weeks (210 hours).

Exhibit Dates: 11/66-12/68.

Objectives: To train enlisted personnel in the equipment and operation of the Hawk guided missile system.

Instruction: Lectures and practical exercises in the equipment and operation of the Hawk guided missile system, including introduction to Hawk; launcher operations; missile test shop operations and handling; loader and generator operations; pulse-acquisition radar operations; range-only radar operations; continuous wave acquisition, high-power illuminator, and continuous wave illuminator radar operations; battery control central operations; assault fire command console operations; orientation and alignment of the battery; battle plan procedures; and battalion operations.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (5/74).

MC-1715-0070

Radio Telegraph Operator

Course Number: None.

Location: Basic Electronics School, San Diego, CA; Communication-Electronics School, San Diego, CA.

Length: 18 weeks (630 hours).

Exhibit Dates: 7/56-12/72.

Objectives: To train enlisted personnel as radiotelegraph operators.

Instruction: Lectures and field exercises in the operation of and preventive maintenance on radio communications equipment. Topics include receiving, sending, typing, communication procedure and security, radio fundamentals, and map reading.

Credit Recommendation: In the vocational certificate category, 3 semester hours in typing, and credit in electronics on the basis of institutional evaluation (3/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in typing (3/74); in the upper-division baccalaureate category, credit in typing on the basis of institutional evaluation (12/68).

MC-1715-0071

CH-46A AN/ALQ-52(V) Navigational TACAN Maintenance

Course Number: None.

Location: Air Maintenance Training Detachment, Jacksonville, NC; Air Maintenance Training Detachment, Santa Ana, CA.

Length: 3 weeks (120 hours).

Exhibit Dates: 1/68-12/73.

Objectives: To train enlisted personnel to maintain, modify, service, and operate a specific navigational system.

Instruction: Lectures and practical exercises in the operation and maintenance of a TACAN navigational system. Course includes primary power distribution, block-diagram analysis, channel servo error operation, T/R RF theory of operation, video decoder, circuit analysis and theory, and troubleshooting procedures. Course is primarily directed to a specific navigation system and has limited general application.

Credit Recommendation: In the vocational certificate category, 1 semester hour in electrical maintenance laboratory (6/74).

MC-1715-0072

Remote Control System Repairman

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 12 weeks (360 hours).

Exhibit Dates: 10/56-12/68.

Objectives: To retrain enlisted personnel in remote control and fire control equipment maintenance.

Instruction: Lectures and practical exercises in the repair and maintenance of remote and fire control equipment. Topics include elementary trigonometry, a brief overview of Ohm's law, troubleshooting of electrical and electronic parts with tube tester and meters, and the function of hydraulic components and synchros.

Credit Recommendation: In the vocational certificate category, 4 semester hours in electronics or electricity (6/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in electronics or electricity (6/74).

MC-1715-0073

Telephone/Switchboard Repair
(Telephone Swirchboard Repair)

Course Number: *Version 1:* 28W. *Version 2:* None. *Version 3:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 14 weeks (470 hours). *Version 2:* 9-11 weeks (334-416 hours). *Version 3:* 8 weeks (280 hours).

Exhibit Dates: *Version 1:* 4/85-1/88. *Version 2:* 7/75-3/85. *Version 3:* 4/73-6/75.

Objectives: To train enlisted personnel to diagnose and repair defects and perform routine maintenance on telephone subsets and switchboards.

Instruction: For this course after 1/88 see MC-1715-0121. *Version 1:* Lectures and practical exercises on installation, operation, repair nad maintenance of tactical telephone systems. Includes manual, semiautomatic and automatic switchboards. *Version 2:* Lectures and practical exercises in the repair and maintenance of telephone subsets and switchboards. Course includes battery-powered subsets, sound and telephone theory, switchboard construction and operation, and basic electricity. *Version 3:* Lectures and practical exercises in the repair and maintenance of telephone subsets and switchboards. Course includes battery-powered subsets, sound and telephone theory, switchboard construction and operation, and basic electricity.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester

hours in telephone systems maintenance (2/86). *Version 2:* In the vocational certificate category, 3 semester hours in basic electricity, 3 in introduction to telephone communications (3/79). *Version 3:* In the vocational certificate category, 6 semester hours in communications technology, 4 in electronics laboratory (7/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in communications technology, 4 in electronics laboratory (7/74); in the upper-division baccalaureate category, 3 semester hours in communications technology (7/74).

MC-1715-0075

Tow Missile Maintenance

Course Number: None.

Location: Schools Division, Albany, GA.

Length: 5 weeks (196 hours).

Exhibit Dates: 3/75–1/88.

Objectives: To train enlisted personnel to maintain and repair the Tow missile launcher system and ancillary equipment.

Instruction: Lectures and practical exercises in the launcher system, field test set, trainer set, and battery charger.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronics laboratory (6/75).

MC-1715-0076

1. Teletype Facsimile Repair
2. Teletypewriter Repair
3. Teletypewriter Repair
   (Teletype Repair)
4. Teletypewriter Repair
   (Teletype Repair)

Course Number: *Version 1:* 26D. *Version 2:* None. *Version 3:* None. *Version 4:* None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 11 weeks (392 hours). *Version 2:* 14 weeks (543 hours). *Version 3:* 11 weeks (407 hours). *Version 4:* 19 weeks (658 hours).

Exhibit Dates: *Version 1:* 6/85–4/87. *Version 2:* 10/78–5/85. *Version 3:* 7/74–9/78. *Version 4:* 11/73–6/74.

Objectives: To train personnel to repair, operate, and maintain several military teletype terminals.

Instruction: For this course after 4/87 see Mc-1715-0120. *All Versions:* Lectures and practical exercises in the repair, maintenance, and operation of several teletype terminals, including coverage of basic electromechanical devices. *Version 4:* Includes basic electronics with Ohm's Law, series parallel resistances, AC and DC theory, semiconductor fundamentals, and RLC circuits.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in teletype/facsimile repair and 1 in electromechanical laboratory (2/86). *Version 2:* In the vocational certificate category, 3 semester hours in electromechanical maintenance and repair, 1 in electromechanical maintenance laboratory (3/79). *Version 3:* In the vocational certificate category, 8 semester hours in electromechanical technology (2/76). *Version 4:* In the vocational certificate category, 3 semester hours in basic electronics and 3 in teletype maintenance (6/75); in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics (6/75).

MC-1715-0077

Tactical Data Communications Central Repairman

Course Number: 28Y.

Location: Communication-Electronics School, Twentynine Palms, CA; Air Ground Combat Training Center, Twentynine Palms, CA.

Length: *Version 1:* 20 weeks (686 hours). *Version 2:* 16–18 weeks (606 hours). *Version 3:* 16 weeks (580 hours).

Exhibit Dates: *Version 1:* 6/89–Present. *Version 2:* 5/77–5/89. *Version 3:* 7/74–4/77.

Objectives: To train enlisted personnel in the installation, maintenance, operation, testing and repair of specific military data communications equipment.

Instruction: Provides instruction at the repairman level on the Tactical Data Communications Central AN/TYQ-3. Includes basic single sideband theory, antenna and transmission line theory, data flow, and systems-oriented tasks. Malfunction isolation is taught at the module or card level.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 3 semester hours in digital systems maintenance, 2 in electronic communications maintenance (3/79). *Version 3:* In the vocational certificate category, 12 semester hours in electronics technology (2/76).

MC-1715-0078

Air Support Control Officer

Course Number: TOA.

Location: Air Ground Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 6-11 weeks (208–408 hours).

Exhibit Dates: 1/72–Present.

Objectives: To train personnel as air support control officers.

Instruction: Lectures and practical exercises in radio net operator duties, plotter/status board techniques, radar operator procedures, and strike controller procedures, under simulated field conditions.

Credit Recommendation: Credit is not recommended because of the military nature of the course (6/88).

MC-1715-0079

Guided Missile Fire Control Repair

Course Number: None.

Location: Communication-Electronics School, San Diego, CA.

Length: 15 weeks (525 hours).

Exhibit Dates: 6/58–12/68.

Objectives: To train enlisted personnel to install, inspect, test, maintain, and repair missile fire control systems and associated air-search radar sets.

Instruction: Lectures and practical exercises in theory, installation, and adjustment of missiles and launchers, including power supplies, acquisition and track radar, synchronization, computer and plotting boards, and troubleshooting.

Credit Recommendation: In the vocational certificate category, 6 semester hours in electrical laboratory (3/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0080

Terrier Missile Launcher System Repairman
(Terrier Missile Launcher System Repair)

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 21 weeks (845–887 hours).

Exhibit Dates: 6/58–12/68.

Objectives: To train enlisted personnel to repair and maintain the Terrier missile launcher, control system, and associated ordnance equipment.

Instruction: Lectures and practical exercises in components, maintenance, and repair of the Terrier missile launcher, including mechanical and hydraulic systems, electrical operation, power units, system intergration, and adjustment and trouble analysis.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electrical laboratory (3/74); in the upper-division baccalaureate category, credit in electrical laboratory on the basis of institutional evaluation (12/68).

MC-1715-0081

Mobile Data Communications Terminal Technician

Course Number: BF2.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 11-14 weeks (418-532 hours).

Exhibit Dates: 7/75–4/87.

Objectives: To train enlisted personnel in the operation and maintenance of specific military communication equipment.

Instruction: For this course after 4/87 see MC-1715-0118. Provides in-depth instruction on the AN/TYC-5 mobile data communication terminal with emphasis on performance testing and troubleshooting of the complete system.

Credit Recommendation: In the vocational certificate category, 12 semester hours in electro/mechanical technology (3/76).

MC-1715-0082

Tactical Air Operations Central (TAOC) Technician
(Tactical Air Operations Central (TAOC) (AN/TYQ-2) Technician)

Course Number: FGP.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 35 weeks (1342 hours). *Version 2:* 30 weeks (1127 hours).

Exhibit Dates: *Version 1:* 9/78–1/90. *Version 2:* 7/75–8/78.

Objectives: To train enlisted personnel to install, operate, test, maintain, and repair specific military equipment.

Instruction: *Version 1:* Lectures and practical exercises covering a specific digital analog data processing and control system. Practical experience is gained by performing system maintenance test procedures and analyzing and correcting instructor-inserted equipment malfunctions. *Version 2:* Lectures and practical exercises covering a comprehensive digital and analog data processing and control system, including a study of digital computers, radar azimuth processing, detection and video signals, data link communications, voice communications, and program processing and control associated with an operational system.

Credit Recommendation: *Version 1:* In the vocational certificate category, 3 semester hours in the use of electronic test equipment, 6 in electronic equipment maintenance (3/79). *Version 2:* In the vocational certificate category, 24 semester hours in electronics technology (2/76).

MC-1715-0083

High Frequency Communication Central Operator

Course Number: BEZ.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 4-7 weeks (146-268 hours).

Exhibit Dates: *Version 1:* 2/89-Present. *Version 2:* 7/75-1/89.

Objectives: To qualify enlisted personnel in the operation of specific military electronic equipment.

Instruction: Provides instruction in the operation, installation, maintenance, and administration of communication equipment.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* Credit is not recommended because of the military-specific nature of the course (12/86).

MC-1715-0084

RD-358 Magnetic Tape Subsystem Accelerated

Course Number: None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 4 weeks (133 hours).

Exhibit Dates: 7/75-3/79.

Objectives: To train enlisted personnel in the operation and maintenance of specific military communication equipment.

Instruction: Lectures and practical exercises in overall operation and microprogramming concepts; installation and operation of third generation digital tape processing equipment; corrective and preventive maintenance procedures; logic diagrams; and microprogram listings.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in electronics engineering technology (2/76).

MC-1715-0085

Mobile Data Central Technician

(Mobile Dial Central Technician)

Course Number: None.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, Twentynine Palms, CA.

Length: 5 weeks (180 hours).

Exhibit Dates: 7/75-12/76.

Objectives: To train enlisted personnel in the repair and maintenance of telephone PBX equipment.

Instruction: Lectures and practical exercises covering the installation, operation, testing, fault identification, adjustment, and repair of PBX equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telephony technology (2/86).

MC-1715-0087

AN/ALE-41 Dispensing System and Associated Peculiar Ground Support Equipment Intermediate Maintenance

Course Number: None.

Location: Marine Corp Air Station, Cherry Point, N.C..

Length: 2 weeks (60 hours).

Exhibit Dates: 2/78-1/90.

Objectives: Provides trained personnel with information at the block-diagram level to maintain and troubleshoot specialized chaff-dispensing equipment.

Instruction: Lectures and laboratory training at the intermediate or systems level in such topics as basic concepts, major assemblies and sub-assemblies, system/aircraft interface and structural considerations. Some time is spent on electronic system theory including power distribution/control, circuit card assembly, converters and drive motors.

Credit Recommendation: In the vocational certificate category, 1 semester hour in avionics maintenance technology (7/80); in the lower-division baccalaureate/associate degree category, 1 semester hour in electromechnical laboratory (7/80).

MC-1715-0088

AN/ARN-84(V) TACAN Receiver Intermediate Maintenance

Course Number: C-102-3090.

Location: Marine Corp Air Station, Cherry Point, NC.

Length: 2 weeks (96 hours).

Exhibit Dates: 2/77-1/90.

Objectives: The course provides fleet maintenance personnel with the theory, operation and troubleshooting of an aircraft receiver.

Instruction: The student gains an understanding of the receiver operation and signal flow path so as to identify defective component or subsystems using a fault-free troubleshooting procedure provided in the maintenance manuals.

Credit Recommendation: In the vocational certificate category, 1 semester hour in repair and maintenance laboratory (7/80).

MC-1715-0089

Microminiature Component Repair

Course Number: E7D.

Location: Air Ground Combat Training Center, Twentynine Palms, CA. Communication-Electronics School, Twentynine Palms, CA.

Length: 4-6 weeks (160-212 hours).

Exhibit Dates: 5/79-Present.

Objectives: To train selected personnel to conduct repairs on circuits characterized by high density circuitry, highly sensitive components, extremely small size and/or multi-lead components.

Instruction: The course encompasses the identification and causes of defective solder connections, the procedures and proper tools required to produce high reliability solder connections, and proper mounting and installation of various components, including microelectronic devices, such as integrated circuits, conformal coatings used and the most effective means of removal and replacement. Circuit baseboards are identified by composition then rebuilt or repaired. Types of interfacial connections and conductor runs are identified and repaired or replaced. Repairs are made to boards containing multiple or subsurface conductor runs, flexible printed wiring boards and printed wiring harnesses, all without causing further degradation to the circuit under repair. Specifications and techniques required for the various types of terminal and connector pins. In addition to the materials used in the microminiature component repair course, various electroplating chemicals, metals, paints, and etchant materials are provided for plating techniques.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in microminiature component repair (2/89).

MC-1715-0090

Installation, Operation, and Operator's Maintenance of Floodlight, Frequency Convertor, and Dummy Load Bank by Correspondence

Course Number: 11.24.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 2/83-12/88.

Objectives: To provide enlisted personnel with basic training in the maintenance, installation, and operation of a A265 floodlight.

Instruction: This individual (self-study) study program covers an electro-mechanical device (Model A254 floodlight) including dummy load load banks, phase voltages, equipment set-up, operation and maintenance. Course concludes with a proctored examination.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electro-mechanical equipment (maintenance and operation) (6/84).

MC-1715-0091

Pole Line Construction Equipment by Correspondence

Course Number: 25.55.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 12/81-Present.

Objectives: To teach students to identify pole lines, construction equipment and hardware; and safety and first aid.

Instruction: This correspondence course consists of study units on safety and first aid, military construction vehicles, pole installation equipment and hardware. There is a proctored final examination; course includes no laboratory work.

Credit Recommendation: Credit is not recommended due to the military-specific nature of the course (8/83).

MC-1715-0092

Field Radio Systems by Correspondence

Course Number: 25.35.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 8/78-12/88.

Objectives: To provide familiarization with the concepts of communications, systems , and technical controls.

Instruction: This correspondence course does not include laboratory exercises; there is a proctored final examination. Course provides information on fundamental communications theory, and control, description, operation, and installation of communications central which is a transportable central exchange system for radio, telephone and telegraph communicatons.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/83).

MC-1715-0093

Fundamentals of Digital Logic by Correspondence

Course Number: 28.6e.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 11/80–12/84.

Objectives: Course provides instruction in the fundamentals of digital logic system.

Instruction: This correspondence course presents study units covering binary arithmetic, Boolean algebra, gates, flip-flops, non logic circuits, magnetic cores, counters, registers, adders, decoders and A/D converters. Instruction does not include laboratory exercises; there is a proctored examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to digital logic (8/83).

MC-1715-0094

Autodin Procedures by Correspondence

Course Number: 25.41a.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 8/78–10/83.

Objectives: To teach students to identify the Automatic Switching Centers (ASC), the tributary station and the Autodin's operation modes.

Instruction: This correspondence course offers a proctored final examination but no laboratory exercises. It is concerned with providing basic knowledge of the Automatic Digital Network (Autodin) communication system. Course coverage consists of an introduction to the Autodin system, preparation of narrative messages for transmission, data pattern messages, and service messages. Study is centered around construction of and routing of these various types of messages through the Autodin communication system.

Credit Recommendation: Credit is not recommended because of the military-spedific nature of the course (8/83).

MC-1715-0095

Introduction to Electronic Warfare by Correspondence

Course Number: 25.26.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 2/82–11/85.

Objectives: To provide students with information and instruction in electronic warfare techniques.

Instruction: This correspondence course, which includes a proctored final examination, has no laboratory work offered. Course includes information about the electronic battlefield, electronic warfare responsibilities, the electronic threat, and countering the threat.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/83).

MC-1715-0096

Pole Line Construction Techniques by Correspondence

Course Number: 25.56.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 8/82–Present.

Objectives: Provides the field wireman with information for the installation of line poles, suspension strands, and aerial cables. In addition, safe operating techniques of pole line construction is stressed.

Instruction: This correspondence course presents study units covering military vehicles used in pole installation, anchor and guy wire installation and suspension. Instruction does not include laboratory exercises.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/83).

MC-1715-0097

Field Switchboard Operations and Installation by Correspondence

Course Number: 25.52b.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 8/80–5/87.

Objectives: To provide instruction on the specialty requirements of the field wireman concerning installing and operating field communications switchboards.

Instruction: This correspondence course is used to prepare Marines to use field telephone switchboard equipment. It consists of generalized information on various switchboard systems including: description, use, operating characteristics, operational tests, and installation.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/83).

MC-1715-0098

Field Wire Techniques by Correspondence

Course Number: 25.51b; 25.51c.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 3/80–10/88.

Objectives: To teach identification of field wire splicing tools, field wire splices, ties, and their uses.

Instruction: This correspondence course which has a final examination but no laboratory exercises is involved with installation, operation, and maintenance of field wire systems. Subjects covered are: field wire splices and ties; pole and tree climbing; wire system orders, reports and records; field wire construction; wire system maintenance. Each topic involves various aspects of fundamental operations, preparation purposes, planning, installation, preventive maintenance, and tests. The course could have relevance to civilian power and phone company training.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course. The training could have relevance to civilian power and phone company training (3/83).

MC-1715-0099

Automatic Telephone Equipment by Correspondence

Course Number: 25.54.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 11/80–Present.

Objectives: To supply the field wireman with the information necessary for the identification, installation, and operation of military automatic telephone equipment.

Instruction: This correspondence course presents study units covering purpose, use, technical characteristics and operation of military switchboards, and dual-tone multifrequency telephone systems. Instruction does not include any laboratory exercises, a proctored examination concludes the course.

Credit Recommendation: Credit is not recommended due to the military-specific nature of the course (8/83).

MC-1715-0100

Field Wire Noncommissioned Officer (NCO) by Correspondence

Course Number: 25.53a.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 9/78–12/84.

Objectives: Provides instruction in field wire techniques that apply to division-sized units.

Instruction: This correspondence course consists of study units covering command and communication organization, planning, installation and operation, and maintenance of field wire units. Instruction does not include laboratory exercises.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/83).

MC-1715-0101

Communications for the Combat Operations Center/Fire Support Coordination Center (COC/FSCC) by Correspondence

Course Number: 25.36.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 2/83–Present.

Objectives: To provide information and instruction on the communication requirements of a combat operations center and fire support coordination center to include responsibilities, planning and system description.

Instruction: This correcpondence course, without laboratory exercises, provides information and instruction on the purpose, function, and requirements of a combat communications center; the purpose, function, and requirements of a fire support coordination center; radio networks within these centers; radio chief and watch supervisor responsibilities; and other factors concerning the location and displacement of these facilities. Some topographical map reading, graph plotting, and simple mathematics are included. A proctored final examination is required for course completion.

Credit Recommendation: Credit is not recommended because of the limited,specialized nature of the course (8/83).

MC-1715-0102

Communications for the FMF Marine by Corespondence

Course Number: 25.20B.

Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 2/80–7/87.
Objectives: To provide FMF Marines with comprehensive coverage of communications procedures,capabilities, limitations, and the importance of equipment maintenance.
Instruction: This correspondence course consists of reading assignments, format guides, and written lessons covering priorities, chain of command, field wire equipment, ties and splices, operation of military field radios, maintenance, safety, waterproofing, radiotelephone nets, procedures, message formats, and communications security. This instruction does not include laboratory exercises.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (8/83).

MC-1715-0103

Radiotelephone, Telegraph, and Visual Communications Procedures by Correspondence

Course Number: 25.3L.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 1/83–12/85.
Objectives: To provide information and instruction in areas of telegraph and visual communications and radio telephone procedures.
Instruction: This correspondence course consists of study units covering message types and formats, radio telephone procedure, Morse code and telegraph procedure, visual communication methods, security,RFI and jamming; there are no laboratory exercises.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/83).

MC-1715-0104

Communication Center by Correspondence

Course Number: 25.40c.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 5/80–11/87.
Objectives: To provide students with a basic knowledge of the organization, function, and basic requirements of a Marine Corps communication center.
Instruction: This correspondence course includes a final examination but no laboratory work. Subjects covered include responsibilities of each part of the communications center, various logs and files maintained, publications used, and security procedures.
Credit Recommendation: Credit is not recommended because of the limited,specialized nature of the course (8/83).

MC-1715-0105

Introduction to Communication Control by Correspondence

Course Number: 25.21.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 1/80–12/84.
Objectives: To orient communications personnel in the organization and function of communications control.
Instruction: This corrrespondence course includes a final examination which is proctored. Subjects covered include the missions and responsibilities of the agencies of communication control, the functions of systems planning, and record keeping.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/83).

MC-1715-0106

Communications Plans and Orders by Correspondence

Course Number: 25.4d.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 7/78–1/85.
Objectives: This course provides training to Marines in recognizing and interpreting combat orders.
Instruction: This correspondence course, which includes a final examination, includes organization and type of staff,plans and orders, planning coordination, and the operations order.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course materials (3/83).

MC-1715-0107

Multichannel Radio Equipment by Correspondence

Course Number: 25.31c.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 11/80–11/85.
Objectives: To provide students with training in the operation of Marine Corps multichannel radio equipment.
Instruction: This correspondence course has a proctored final examination but does not include any laboratory work. Course includes general information about radio transmission, safety, detailed information about each piece of equipment, and operating procedures for the vehicle that carries the equipment.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/83).

MC-1715-0108

VHF (FM) Field Radio Equipment by Correspondence

Course Number: 25.30e.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 12/79–6/84.
Objectives: To provide training to students in .the use of certain Marine Corps FM radio communications sets and the vehicle that carries them.
Instruction: A Marine Corps correspondence course which has a final examination but does not include laboratory work. The provides a detailed study of how to operate and how to do operators maintenance on the FM radio sets and the vehicle that carries the sets.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/83).

MC-1715-0109

Communication Security by Correspondence

Course Number: 25.25.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum of 52 weeks.
Exhibit Dates: 8/80–8/85.
Objectives: To provide communications personnel with instruction in basic Marine Corps communications security.
Instruction: This correspondence course, which includes a final examination, has no laboratory work. Course includes coverage of principles of transmission, physical and cryptographic security, and electronic countermeasures.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the material provided (3/83).

MC-1715-0110

HF-UHF Field Radio Equipment by Correspondence

Course Number: 25.32c.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 10/81–3/87.
Objectives: This correspondence course provides training to students in the operation of Marine Corps radio sets and the vehicle that carries the set.
Instruction: This correspondence course, which has a final examination but no laboratory work, covers the detailed procedures necessary to set-up, operate, and do operator preventive maintenance on specific radio sets and the vehicle that carries the set.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/83).

MC-1715-0111

Field Wire Equipment by Correspondence

Course Number: 25.50b.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum of 52 weeks.
Exhibit Dates: 11/79–7/85.
Objectives: To present specialty qualifications requirements of the field wireman concerning installing, operating, performing preventive maintenance on, and waterproofing field wire equipment.
Instruction: This correspondence course has a final examination but no laboratory exercises. The program is used to acquaint the Marine with various pieces of field wire communications equipment including field telephones, switchboards, voice-frequency conversion units, and wire laying equipment. The course discusses simple preventive maintenance, system interconnections, operations and general procedures.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/83).

MC-1715-0112

Antenna Construction and Propogation of Radio Waves by Correspondence

Course Number: 25.15G; 25.15F.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum of 52 weeks.
Exhibit Dates: 11/80–6/87.
Objectives: To provide training in the theory of radio wave propagation and in the characteristics and construction of antennas.

Instruction: This correspondence course includes a proctored final examination but does not include any laboratory work. Subjects covered include basic electricity, antenna and transmission line theory, and radio wave propagation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in introduction to electronic communications (7/87).

MC-1715-0113

AIMS Maintenance

Course Number: 24X.

Location: Air Ground Combat Center, Twentynine Palms, CA.

Length: 10 weeks (350-399 hours).

Exhibit Dates: 1/84-Present.

Objectives: To train personnel to repair and maintain an air traffic control radar beacon system.

Instruction: Course provides lectures and practical exercises in operation, installation, operational adjustment, and circuitry related to air traffic control radar equipment. Also includes corrective and preventive maintenance, schematic interpretation to the block diagram level, and the use of technical manuals.

Credit Recommendation: In the vocational certificate category, 3 semester hours in electronic systems maintenance and repair (1/90).

MC-1715-0114

Test, Measurement and Diagnostic Equipment

Course Number: 28T.

Location: Marine Corps Logistics Base, Albany, GA.

Length: 21-23 weeks (773-995 hours).

Exhibit Dates: 5/83-Present.

Objectives: To train enlisted Marines to maintain and repair test, measurement and diagnostic equipment.

Instruction: Lectures and practical exercises in soldering techniques, AC/DC circuit, electronic circuits, digital logic, microprocessors and specific electronic test equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in AC/DC circuits, 2 in electronic circuits, 2 in digital logic, 2 in microprocessors and 3 in electronic troubleshooting and repair (11/86).

MC-1715-0115

Small Missile Systems

Course Number: 57L.

Location: Marine Corps Logistics Base, Albany, GA.

Length: *Version 1:* 10-11 weeks (417 hours). *Version 2:* 8-10 weeks (295-400 hours).

Exhibit Dates: *Version 1:* 1/87-Present. *Version 2:* 11/76-12/86.

Objectives: To provide enlisted Marines with sufficient technical training to perform third and fourthechelon maintenance and repair on small missile systems.

Instruction: Lectures and practical exercises in fault isolation, identification, faulty component removal and replacement in the TOW and Dragon weapons systems.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic troubleshooting and repair (11/86).

MC-1715-0116

Basic Electronics

Course Number: 272.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 11-14 weeks (392-524 hours).

Exhibit Dates: 8/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to understand the basic concepts of electricity, electronics, digital logic, basic soldering, computer systems, and maintenance management. The Marine will be able to perform laboratory measurements using the multimeter and the oscilloscope.

Instruction: Lectures and practical exercises in basic mathematics, electricity, electronics, fundamentals of digital logic, soldering and maintenance management. More advanced courses involving repair of specific equipment follow. For this course before 8/86 see MC-1715-0004.

Credit Recommendation: In the vocational certificate category, 2 semester hours in soldering techniques; in the lower-division baccalaureate/associate degree category, 2 semester hours in DC circuits, 2 in AC circuits, 3 in solid state electronics, 3 in digital principles, 3 in basic electronics laboratory and 1 in computer systems and organization (9/89).

MC-1715-0117

Ground Radar Technician

Course Number: 27F.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 9-10 weeks (363 hours).

Exhibit Dates: 7/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to install, calibrate and maintain military radar systems; be able to describe the theory of operation of the system; and be able to troubleshoot the system to the card level.

Instruction: Lectures, demonstrations, and practical exercises on topics specific to military radar systems.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (2/89).

MC-1715-0118

Mobile Data Communications Terminal Technician

Course Number: BF2.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 17 weeks (680 hours).

Exhibit Dates: 5/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to install, maintain, and troubleshoot mobile data communications equipment including peripherals.

Instruction: Lectures and lab exercises on the installation and maintenance of the equipment and its peripherals including tape punch and reader, printers, interface unit, and modem.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems troubleshooting and maintenance (2/89).

MC-1715-0119

Bancroft Maintenance

Course Number: DQH.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 8-9 weeks (290 hours).

Exhibit Dates: 1/89-Present.

Learning Outcomes: Upon completion of the course the student will be able to understand the theory of operation, circuit analysis, and alignment of the Bancroft system and be able to test, troubleshoot, adjust, and perform preventive maintenance on the system.

Instruction: Lectures, demonstrations, and practical exercises on the maintenance of the Bancroft system.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (3/90).

MC-1715-0120

Teletype Repair

Course Number: 26D.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: *Version 1:* 15 weeks (559 hours). *Version 2:* 10-11 weeks (384 hours).

Exhibit Dates: *Version 1:* 6/90-Present. *Version 2:* 5/87-5/90.

Learning Outcomes: Upon completion of the course the student will be able to understand the principles of operation, circuit analysis, alignment, interconnection, performance testing, and troubleshooting of teletype equipment. Student understands site selection and communications security and is able to troubleshoot the system.

Instruction: *Version 1:* Pending evaluation. *Version 2:* Lectures, demonstrations and practical exercises on alignment and adjustment of teleprinters. Also includes extensive information regarding operation/maintenance of teleprinters. For this course before 5/87 see MC-1715-0076.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 3 semester hours in teletype maintenance; in the lower-division baccalaureate/associate degree category, 3 semester hours in electromechanical systems troubleshooting and repair (2/89).

MC-1715-0121

Telephone/Switchboard Repair

Course Number: 28W.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 15-17 weeks (528-563 hours).

Exhibit Dates: 2/88-Present.

Learning Outcomes: Upon completion of the course the student will be able to install, operate, troubleshoot and repair Marine Corps telephone/switchboards and related equipment.

Instruction: For this course before 2/88 see MC-1715-0073. Lectures and practical experience on maintenance of individual telephones, switchboards, radio control sets, and facsimile sets.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telephone systems; in the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/90).

MC-1715-0122

Aviation Radar Technician

Course Number: 66K.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 38 weeks (1389 hours).

Exhibit Dates: 5/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to troubleshoot and maintain a complex computer controlled radar system; able to apply radar circuit principles to the troubleshooting process.

Instruction: Lectures and practical exercises related to the specific radar system. For this course before 5/86 see MC-1715-0058.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in computer systems troubleshooting and maintenance, 3 in electronic systems troubleshooting and maintenance, and 3 in radar systems (2/89).

MC-1715-0123

MICROWAVE EQUIPMENT MAINTENANCE

Course Number: D3C.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 25-26 weeks (882 hours).

Exhibit Dates: 11/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to apply the principles of a limited number of topics from digital electronics, solid state electronics, and electronic communications; able to troubleshoot and maintain a military telephone terminal and various radio communication systems.

Instruction: Lectures and practical exercises on topics in electronics. Emphasis is on circuitry, troubleshooting, and maintenance of the specific telephone equipment.

Credit Recommendation: In the vocational certificate category, 3 semester hours in telephone systems; in the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to electronics and 3 in basic electronics laboratory (2/89).

MC-1715-0124

RADIO TECHNICIAN

Course Number: 27P.

Location: Communications-Electronics School, Twentynine Palm, CA.

Length: 15-16 weeks (508-511 hours).

Exhibit Dates: 1/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to understand and maintain AM receivers and transmitters, FM receivers and transmitters, and single-sideband receivers and transmitters. Student is also able to analyze and repair communications security devices.

Instruction: For this course before 1/86 see MC-1715-0029. Lectures and practical exercises on the characteristics and maintenance of electronic communications equipment.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (10/89).

MC-1715-0125

HIGH FREQUENCY MAINTENANCE

Course Number: DPH.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 2 weeks (68-80 hours).

Exhibit Dates: 8/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to maintain a transceiver. The student will understand the components, characteristics, and synchronization of the equipment by tracing the signal flow of the TCS-4B transmitter and the RCS-4B receiver.

Instruction: Lectures and practical exercises in HF propagation, transmitter and receiver characteristics, system synchronization, block diagrams, power amplifiers, and troubleshooting.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (6/90).

MC-1715-0126

RESERVE MICROWAVE EQUIPMENT OPERATOR

Course Number: 246.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 4 weeks (149-156 hours).

Exhibit Dates: 8/84-7/87.

Learning Outcomes: Upon completion of the course the student will be able to operate a specific piece of microwave equipment used for radio communications.

Instruction: Lectures and practical exercises covering topics in alignment and operation of the communications equipment and in procedures to set up the equipment in the field.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (2/89).

MC-1715-0127

AVIATION RADIO TECHNICIAN

Course Number: 66G.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 5-6 weeks (175 hours).

Exhibit Dates: 8/87-Present.

Learning Outcomes: Upon completion of the course the student will be able to install, inspect, maintain, and repair aviation radio equipment; use test equipment; and follow corrective maintenance procedures.

Instruction: Course provides technician-level training in selected aviation radio equipment. Lectures on theory of operation and circuit analysis, performance testing, alignment procedures, use of test equipment, and corrective maintenance procedures. For this course before 8/87 see MC-1715-0047.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting and maintenance (2/89).

MC-1715-0128

TECHNICIAN THEORY

Course Number: TA3.

Location: Communications-Electronics School, Twentynine Palms, CA.

Length: 16-17 weeks (664 hours).

Exhibit Dates: 8/86-Present.

Learning Outcomes: Upon completion of the course the student will be able to apply principles of algebra, trigonometry, and complex numbers to analysis of problems in electricity and related topics in physics; use common laboratory instruments; understand the principles of DC (does not include network theorems) and AC circuits, semiconductor devices, transistor theory, vacuum tubes, rectifiers and DC power supplies, amplifiers, operational amplifiers, and analysis using circuit techniques; apply the basic principles of digital electronics-logic gates, sequential and combinational logic, counters, adders, and subtractors; apply principles of management and maintenance management; and apply principles of computer organization.

Instruction: For this course before 8/86 see MC-1715-0005. Lectures and practical exercises in technical mathematics, DC and AC circuits, semiconductors, transistor theory, amplifiers, operational amplifiers, and circuit analysis techniques, digital principles, combinational and sequencial logic circuits, computer organization, and principles of management including McGregor's Theory X/Theory Y, Maslow's Theory of Motivation, and Herzberg's Motivation-Hygiene Theory.

Credit Recommendation: In the vocational certificate category, 1 semester hour in soldering; in the lower-division baccalaureate/associate degree category, 3 semester hours in basic electronics laboratory, 2 in DC circuits, 3 in AC circuits, 3 in digital principles, 5 in solid state electronics, 3 in computer systems and organization, 5 in technical mathematics, and 2 in maintenance management; in the upper-division baccalaureate category, 1 semester hour in principles of management (2/89).

MC-1715-0129

INTRODUCTION TO TEST EQUIPMENT BY CORRESPONDENCE

Course Number: 28.7.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 11/88-Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize measurement instruments used to determine voltage, current, and resistance; recognize analog and digital display, parallax, series and shunt loading effects as well as measurement objectives and conditions of proper measurements.

Instruction: Discussion of test equipment to define analog and digital display, electrical characteristics of linear and non-linear components, measurement methods, parallax errors, series and shunt connected loading effects.

Credit Recommendation: In the vocational certificate category, 2 semester hours in electronic test equipment (6/89).

MC-1715-0130

DIRECTION FINDING OPERATIONS BY CORRESPONDENCE

Course Number: 26.1.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 11/88-Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize Soviet communication operating characteristics, terms and conditions of electronic warfare, methods and characteristic definitions of direction-finding operations, and the operating procedures of AN/PRO-10 direction finder set and OAR-3054 direction finder set.

Instruction: Description and historical prospective of Soviet communications systems, development of terms and techniques of electronic warfare, and basic radio propagation theory and techniques of direction finding operations, the operating and preventive maintenance procedure for the AN/PRO-10 and OAR-3054 direction finder sets.

Credit Recommendation: Credit is not recommended, as the subject is limited and specialized as presented and is military-specific in nature (6/89).

MC-1715-0131

Fundamentals of Digital Logic by Correspondence

Course Number: 28.6F.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 1/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize number system organization and arithmatic operations found in digital systems; fundamental logic elements and functions of digital sytems, i.e., AND, NOT, OR, NAND, and NOR; electrical representation of logical functions; logical memory units using discrete transistorized designs, and be aware of monostable and bistable effects of flip flops; the use of flip-flop circuitry in the serial counting function, parallel shift operation, parallel to serial and serial to parallel conversion; the use of discrete transistor circuitry in construction of logical delay elements; the use of magnetic core as a method of memory element storage; input/output operations of memory storage and removal by usage of shift register transistors. To summarize, upon completion, the student is prepared to learn troubleshooting techniques and schematic reading of computing and control sytems designed pricipally with discrete transistorized circuitry and core memory elements.

Instruction: Numeric system design, binary number systems, arithmetic binary operations and counting process of number systems; logical operator functions and descriptions including OR, AND, and NOT conditions; development of electrical representation of logical functions (voltage level to logic level relationship); discrete circuit representation of digital storage elements; discrete circuit representation of waveshaping circuits and circuitry used in control systems discription of magnetic retention of magnetic materials, READ/WRITE operations of core storage; description of serial counting, parallel register operation, memory strorge process, X-OR operation, and SHAFT encoding.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to digital logic (6/89).

MC-1715-0132

Solid State Devices by Correspondence

Course Number: 11.42b.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum

Exhibit Dates: 3/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to recognize semiconductor atomic theory, semiconductor characteristics, definitions of N-type and P-type material, and dynamic effects of current flow through P-N junctions; the student will be able to recognize the NPN & PNP transistors by schematic symbols, wafer diagram, and biasing circuitry required for proper operation, also, the student will be able to recognize distortion conditions, various operating configurations, and proper test, troubleshooting, and repair techniques; the student will be able to recognize symbol semiconductor devices such as zener diodes, tunnel diodes, varactors, SCR's and triacs, furthermore, the student will be able to recognize application circuitry and be aware of the operating functions of dacu devices; the student will be able to recognize semiconductor power supply circuits by their schematic representation, and identify signal conditioning effects at sequential points of the power supply, furthermore, the student will be able to to recognize the use of troubleshooting bridge circuitry, filter components and multiplier circuits for the purpose of troubleshooting; the student will be able to recognize voltage regulation through shunt and series techniques, identify the signal conditions at sequential points of the regulator and decide by output effects component failure of the circuit, furthermore, the student will be able to recognize power supply multiplier circuits and their signal processing effects.

Instruction: Developmental chronology of solid state growth, topical presentation of devices and their applications, the atomic theory and its relation to semiconductor materials, the PN junction response curve and test methods applied to PN junctions; discussion of transistor types, schematic symbols, biasing techniques, distortion and its effects, amplifier configurations, development of transistor current relationships, troubleshooting and handling procedures; functional presentations of semiconductor device elements and their applications, zener effects, tunneling, varactor (capacitive) effects, light emitting SCR's, TRIAC's and detecting materials are covered; functional presentation of specialized transistor devices including the unijunction, field effect and MOSFET elements, their schematic symbols, common packaging configurations and theory of operation; discussion of basic power supply concepts including rectification, filtering, AC/DC conditions, effective value ripple, bridge operation and loading; the system approach is used with impedenace calculations to describe loading effects of filter elements; discussion of power supply regulation and doubling operations including regulation calculations, series and shunt voltage regulation, current regulation and multiplier configurations, signal tracing and other troubleshooting techniques are emphasized. All topics are covered at a minimal mathematical level.

Credit Recommendation: In the vocational certificate category, 3 semester hours in introduction to solid-state devices (6/89); in the lower-division baccalaureate/associate degree category, 2 in survey of electronic devices (6/89).

MC-1715-0133

Radiotelegraph and Visual Communication Procedures by Correspondence

Course Number: 25.61.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 9/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to properly format a military radio telegraph message; follow proper radiotelegraph procedures in message handling.

Instruction: By using numerous examples the student learns military radiotelegraph network requirements and message protocol, morse code symbol recognition, message format and preparation procedures, acronyms to condensed messages, techniques to maintain a radio log, and procedures to receive and transmit a message. Alternate signaling protocol using flashing lights and semaphore flags are also presented.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/89).

MC-1715-0134

The Military Affiliate Radio System (MARS) Operator by Correspondence

Course Number: 25.62.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 6/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the history, system network, and message format of the Military Affiliate Radio System.

Instruction: A historical background of the mission, organization, administration, and group memberships of the Military Affiliate Radio System (MARS) is given. The operator skill requirements for membership within this network is described. The configuration of the networks within the system and their call signals frequencies and power level requirements are described. Message criteria, types, and formats are given using many examples. Radiotelegraph and radiotelephone operation methods, protocol, and techniques of handling message types are described.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/89).

MC-1715-0135

High Frequency Communications System by Correspondence

Course Number: 25.37.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 11/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe the purpose and functional operation of major subsystems of the AN/PSC-95 defense communication system; describe how radio waves propagate in the atmosphere; describe amplitude modulation, frequency shift keying, and voice frequency carrier telegraph.

Instruction: The physical characteristics of a mobile high frequency, single-sideband, receiver/transmitter radio teletype communcation system is functionally described by purpose, front panel controls, operating modes and data signal paths; the functional description covers the transmitter, receiver, teletypewriter, control panels, antenna couplers, power supplies, heating, lighting, air conditioning systems, and test meters. Safety precautions and general maintenance procedures are given. High frequency radio wave propagation, amplitude modulation concepts, frequency shift keying, and voice frequency carrier telegraph are described from a non-mathematical viewpoint.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in communication technology for nontechnical majors (6/89).

MC-1715-0136

Antenna Construction and Propagation of Radio Waves by Correspondence

Course Number: 25.15.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks.
Exhibit Dates: 7/87–Present.
Learning Outcomes: Upon completion of the course, the student will be able to describe how radio waves propagate through the atmosphere, construct several types of antennas, and describe the characteristics of several types of antenna-systems.
Instruction: A discussion of radio wave propagation through the atmosphere covers such subjects as frequency, wavelength, amplitude modulation and frequency modulation, the effect of various atmospheric layers on wave propagation and reflection; characteristics of direct waves, ground waves, sky waves and the causes of skip zones. Definition of usable frequencies due to atmospheric conditions and fading is described. An examination of antenna patterns, polarization, and frequency band, gain, impedence, and physical characteristics of log periodic, ground plane, and portable dipole antenna systems are given; the radiation pattern and step-by-step construction methods for half dipole, two element yagi, long wire antenna, half rhombie antenna, half-sloping 'V', quarter wave, whip and ground plane antennas are described through drawings and tables which provide appropriate wire lengths. The physical characteristics of several types of transmission lines are pictured. Treatment is all nonmathematical.
Credit Recommendation: In the vocational certificate category, 1 semester hour in introduction to antenna theory and construction (6/89).

MC-1715-0137

Radiotelephone and Alternate Communication Procedures by Correspondence

Course Number: 25.60.
Location: Marine Corps Institute, Washington, DC.
Length: 52 weeks maximum.
Exhibit Dates: 8/85–Present.
Learning Outcomes: Upon completion of the course, the student will be able to effectively format military radiotelephone messages; explain administrative rules and procedures of a radiotelephone operator; utilize alternate visual communication techniques.
Instruction: Students learn proper formulation of a military radiotelephone message so as to be reliable, secure, timely, and of sufficient flexability to meet these prior conditions within this area. The student learns the kinds of message categories which exist, techniques to rapidly handprint messages, the phonetic alphabet, pronunciation, world time zones, standarized wording and their meaning, operating rules, communication security measures, types of radio interference, and administration rules and procedures in handling various types of messages including priority levels, cancellations, corrections and methods of requesting information. Alternate visual communication techniques using lights, semaphore flags, display panels, and pyrotechnics are reviewed with the emphasis placed on the alpha-numeric character representation of this visual display. Numerous examples of correct message formats are given.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (6/89).

MC-1717-0001

Operational Communication Chief

Course Number: *Version 1:* None. *Version 2:* None. *Version 3:* None.
Location: Communication-Electronics School, San Diego, CA.
Length: *Version 1:* 18 weeks (631 hours). *Version 2:* 21 weeks (735 hours). *Version 3:* 24 weeks (840 hours).
Exhibit Dates: *Version 1:* 1/72–4/86. *Version 2:* 7/62–12/71. *Version 3:* 7/58–6/62.
Objectives: To train gunnery sergeants as operational communications chiefs.
Instruction: For this course after 4/86 see MC-1717-0004. Lectures and practical exercises in communications facilities operation, electronic systems and equipment operation and characteristics, communication skills, typing radio fundamentals, map and aerial photograph reading, cryptographic operations, electronic supply and maintenance, registered publication system, and Fleet Marine organization and personnel administration.
Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in typing, and credit in electronics on the basis of institutional evaluation (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in typing (2/74). *Version 2:* In the vocational certificate category, 2 semester hours in typing, 1 in electronics (2/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in typing, and credit in electronics on the basis of institutional evaluation (2/74). *Version 3:* In the vocational certificate category, 2 semester hours in electronics (2/74); in the lower-division baccalaureate/associate degree category, 1 semester hours as an elective in electronics for non-electrical-engineering majors (2/74); in the upper-division baccalaureate category, 1 semester hour as an elective in electronics for non-electrical-engineering majors (2/74).

MC-1717-0002

Radio Chief

Course Number: *Version 1:* 25E. *Version 2:* None. *Version 3:* None. *Version 4:* None.
Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communication-Electronics School, San Diego, CA.
Length: *Version 1:* Self-paced maximum 13 weeks (403 hours). *Version 2:* 12 weeks (451 hours). *Version 3:* 17 weeks (540 hours). *Version 4:* 20–22 weeks (700–770 hours).
Exhibit Dates: *Version 1:* 12/84–Present. *Version 2:* 7/75–11/84. *Version 3:* 1/72–6/75. *Version 4:* 7/58–12/71.
Objectives: To train enlisted personnel as radio chiefs.
Instruction: *All Versions:* Lectures and practical exercises in the duties of radio chiefs, including map reading, radio procedures, communications equipment, electronic communication fundamentals, supply and maintenance. *Version 2:* Also included is effective reading, typing, organization and management, and employment. *Version 3:* Topics include effective reading, typing, management, and organization and employment. *Version 4:* Topics include communication and transmission security; basic message front; forms, classes and types of messages; generation of address designators; use of address designators publications; generating address designators from publications; principles of preparing message texts and all forms of headings; preparation of frequency/usage reports; preparation of movement reports; numeral encryption; authentication; sending and receiving; communication procedure; communication center functions and teletype procedure; radios and associated equipment; aerial photograph reading; organization, employment and communications of the fleet Marine force; staff functions; basic wire techniques for remote installations; and visual communication.
Credit Recommendation: *Version 1:* Credit is not recommended because of the military specific nature of the course (2/86). *Version 2:* In the vocational certificate category, 3 semester hours in basic communication skills (3/79). *Version 3:* In the vocational certificate category, 4 semester hours in management, 3 in radio communications (electronics) (7/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in management, 3 in radio communications (electronics) (7/74); in the upper-division baccalaureate category, credit in management and radio communications (electronics) on the basis of institutional evaluation (7/74). *Version 4:* In the vocational certificate category, 3 semester hours in radio communications (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in radio communications (7/74); in the upper-division baccalaureate category, credit in radio communications on the basis of institutional evaluation (7/74).

MC-1717-0003

Ammunition Officer

Course Number: None.
Location: Ordnance School, Quantico, VA.
Length: 8 weeks (253–300 hours).
Exhibit Dates: 7/57–1/88.
Objectives: To train junior officers to perform the duties of a specialist in the supply, storage, and transportation of all types of ammunition other than air-droppable types.
Instruction: Lectures and practical exercises in the construction of specific types of munitions; principles of supply, renovation, storage, transportation and destruction of small arms and artillery ammunition, hand grenades, mortar, land mines, and chemical and nuclear munitions.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in industrial management (5/74).

MC-1717-0004

Operational Communication Chief

Course Number: 25A.
Location: Communications-Electronics School, Twentynine Palms, CA.
Length: 19 weeks (684 hours).
Exhibit Dates: 5/86–Present.
Learning Outcomes: Upon completion of the course the student will be able to operate equipment such as receivers, transmitters, teletype equipment, and communications security devices; understand the operation of a communications center; be familiar with map reading and communications procedures; and be able to manage and plan communications needs.
Instruction: Lectures and practical exercises in radio receiver operation, typing, preventive maintenance of communications security equipment, message verification, communications security, maintenance procedures, electronic warfare, management and counseling. For this course before 5/86 see MC-1717-0001.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in personnel supervision, 1 in maintenance management, and 2 in keyboarding (2/89).

MC-1717-0005

Basic Shop Fundamentals for the Mechanic by Correspondence

Course Number: 13.30.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 2/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify basic hand tools and their use; identify introductory shop safety procedures and fire prevention.

Instruction: The student will be able to evaluate the course of study to include basic hand tool usage, safety, and care; introduction to personal and shop safety will be presented.

Credit Recommendation: In the vocational certificate category, 1 semester hour in hand tool usage, identification, and safety (6/89).

MC-1721-0001

Optical Instrument Repairman

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 11 weeks (420 hours).

Exhibit Dates: 7/54–12/72.

Objectives: To train optical instrument and watch repairmen to repair and supervise the repair of optical instruments and watches.

Instruction: Lectures and practical exercises in the repair of optical instruments and watches, including elementary optics, and cleaning and adjustment of quadrants, telescopes, associated mounts, compasses, azimuths, binoculars, periscopes, range finders, sighting systems, stopwatches, wrist watches, and miscellaneous optical equipment.

Credit Recommendation: In the vocational certificate category, 5 semester hours in mechanical technology (optical option) or optical and instrument repair, 1 in watch repair (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in mechanical technology (optical option) or optical and instrument repair (5/74).

MC-1721-0002

Optical Instrument Repairman Basic

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 7–11 weeks (268–440 hours).

Exhibit Dates: 7/57–12/74.

Objectives: To train enlisted personnel to repair optical instruments.

Instruction: Lectures and practical exercises in basic optics theory; ordnance materials usage for optics; cleaning and lubricating materials in instrument and timepiece repair; levels and level vials use and care; and the cleaning and adjustment of collimating telescopes, quadrants, mounts, binoculars, wrist watches, and fire control instruments.

Credit Recommendation: In the vocational certificate category, 4 semester hours in mechanical technology (optical option), 1 in watch repair (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in mechanical technology (optical option)(5/74).

MC-1721-0003

Instrument Repair Officer

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 5–7 weeks (195–300 hours).

Exhibit Dates: 7/57–7/60

Objectives: To train lieutenants and warrant officers to supervise and control the maintenance and repair of optical sighting and nonelectronic fire control material.

Instruction: Lectures and practical exercises in the supervision and control of maintenance and repair of optical sighting and nonelectronic fire control material. Course includes telescopes, periscopes, mechanical mounts, quadrants, range finders and related equipment, and auxiliary sighting and fire control equipment.

Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (8/74).

MC-1721-0004

Optical Instrument Repairman Advanced

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 4 weeks (180 hours).

Exhibit Dates: 7/58–12/72.

Objectives: To train noncommissioned officers to inspect, maintain, and repair optical sighting and nonelectrical fire control instruments and related equipment, including telescopes, periscopes, range finders, and fire control equipment.

Instruction: Lectures and practical exercises in the inspection, maintenance, and repair of optical sighting and nonelectrical fire control instruments. Course includes training in repair shop procedures and the repair of telescopes, periscopes, mechanical mounts for optical instruments, range finders and related equipment, and auxiliary sighting and fire control equipment.

Credit Recommendation: In the vocational certificate category, 2 semester hours in optical repair techniques (8/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in optical repair techniques (8/74); in the upper-division baccalaureate category, credit in optical repair techniques on the basis of institutional evaluation (8/74).

MC-1723-0001

Metalworking and Welding Operations by Correspondence

Course Number: 13.32F; 13.32E.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78–1/90.

Objectives: To provide personnel with basic training in theory or metals, metalworking, and the welding process.

Instruction: This is an individual, self-paced, self-study course containing reading assignments and written lessons consisting of objectives type questions. Materials include the identification and workable properties of weldable metals. The theory of welding gas and arc and operations of welding equipment, the heat treatment process, metalworking tools, and techniques are presented. The student will demonstrate achievement of objectives by correctly answering 65% of the questions in the final exam.

Credit Recommendation: In the vocational certificate category, 3 semester hours in welding (8/83); in the lower-division baccalaureate/associate degree category, 1 semester hour in industrial processes, 1 in basic welding arc and gas (8/83).

MC-1723-0002

Metalworkers

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 13–15 weeks (360–402 hours).

Exhibit Dates: 7/55–12/68.

Objectives: To train enlisted personnel as metalworkers.

Instruction: Lectures and practical exercises in blueprint reading and sketching, sheet metal layout, applied shop mathematics, care and operation of hand tools and measuring instruments, use of common sheet metal bench machines, oxyacetylene and electric arc welding machines and accessories, basic forging and blacksmithing processes, and identification and heat treatment of metals. Instruction includes safe procedures in setting up and operating inert-gas welding equipment.

Credit Recommendation: In the vocational certificate category, 6 semester hours in metalworking, welding, blacksmithing, or metals technology (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in metalworking, welding, blacksmithing, or metals technology (5/74); in the upper-division baccalaureate category, 2 semester hours in metalworking, welding, blacksmithing, or metals technology (5/74).

MC-1723-0003

Metalsmith Foreman

Course Number: None.

Location: Engineer School Battalion, Cp. Lejeune, NC.

Length: 19 weeks (538 hours).

Exhibit Dates: 10/56–12/68.

Objectives: To provide experienced machinists with advanced training in welding, blacksmithing, sheet metalworking, and metal shop supervision.

Instruction: Lectures and practical exercises in advanced welding, blacksmithing, sheet metal working and supervision of metalworking activities, including mathematics, engineering drawing, shop sketching and pattern layout, oxyacetylene and electric arc welding, and sheet metal work, safety regulations and fire bill.

Credit Recommendation: In the vocational certificate category, 16 semester hours in metalworking, metalsmithing, welding, or metals processing (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in metalworking, metalsmithing, welding, or metals processing (5/74); in the upper-division baccalaureate category, credit in metalworking and welding on the basis of institutional evaluation (12/68).

MC-1723-0004

Weapons Repair Shop Machinist

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 14 weeks (420 hours).

Exhibit Dates: 6/54–12/72.

Objectives: To train shop machinists in advanced machine shop techniques, and to qualify them for higher supervisory, mechanical, or instructional assignments.

Instruction: Lectures and practical exercises in advanced machine shop techniques, including shop instruments and practices, shop mathematics, blueprint reading, machine tools, machine shop practice, heat treatment of metals, and welding.

Credit Recommendation: In the vocational certificate category, 6 semester hours in machine trades or machine technology (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in machine trades or machine technology (5/74); in the upper-division baccalaureate category, 2 semester hours in machine trades or machine technology (5/74).

MC-1723-0005

Basic Metalworker
(Basic Metal Worker)

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 6-11 weeks (208-391 hours). *Version 2:* 5 weeks (200 hours).

Exhibit Dates: *Version 1:* 1/73-Present. *Version 2:* 7/67-12/72.

Objectives: To train enlisted personnel in basic welding and sheet metalworking tasks of the fleet marine force.

Instruction: *All Versions:* Lectures and practical exercises in basic metalworking, including welding equipment and tools; fundamentals of metalworking; theory and technique of oxyacetylene, electric arc and inert gas welding; basic sheet metalworking; safety precautions; hand tools and machinery; lines and line construction; shop sketching; punching, drilling and riveting; sheet metal layout; notching, edges and seams; and sheet metal projects.

Credit Recommendation: *Version 1:* In the vocational certificate category, 4 semester hours in welding, sheet metal fabrication or metals processing (3/89); in the lower-division baccalaureate/associate degree category, 2 semester hours in welding, sheet metal fabrication or metals processing (3/89). *Version 2:* In the vocational certificate category, 4 semester hours in welding, metalwork or metal processing (5/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in welding, metalwork or metal processing (5/74).

MC-1723-0006

Repair Shop Machinist

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 12-14 weeks (480-520 hours).

Exhibit Dates: 7/57-12/72.

Objectives: To train enlisted personnel as repair shop machinists.

Instruction: Lectures and practical exercises in applied mathematics; drawing interpretation and use of technical manuals; simple measuring instruments theory and operation; hand tools operation; lathe, shaper, and milling machine operation; heat treatment of metals; oxyacetylene, electric arc, and inert-gas welding equipment set up and operation; ordnance, automotive, and aviation equipment maintenance.

Credit Recommendation: In the vocational certificate category, 8 semester hours in machinist trades (5/74); in the lower-division baccalaureate/associate degree category, 3 semester hours in machinist trades (5/74); in the upper-division baccalaureate category, 2 semester hours in machinist trades (5/74).

MC-1723-0007

Journeyman Metalworker

Course Number: ACT.

Location: Service Support School Cp. Lejeune, NC.

Length: 9 weeks (264-344 hours).

Exhibit Dates: 9/79-Present.

Objectives: To train noncommissioned officers in the duties of a metalworker at the journeyman level to work in the Fleet Marine Force.

Instruction: Lectures, demonstrations and practical exercises in Marine Corps maintenance management, procedures for requisitioning metalworking tools, equipment and related material; safety rules and regulations governing welding sites and shops; identification of metals; construction prints, shopdrawing; oxyacetylene procedures; sheet metal fabrication; pipewelding and forging; electrical arc welding and inert gas welding.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in advanced welding (4/89).

MC-1723-0008

Metal Working and Welding
Operations by Correspondence

Course Number: 13.32g.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 2/90-Present.

Learning Outcomes: Upon completion of the course, the student will be able to describe arc and gas welding and brazing processes, metal treatment processes, sheet metal forming processes, and read welding and fabrication blue prints.

Instruction: Independent study. Students are required to pass an end-of-course examination.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in arc welding, 1 in gas welding processes, and 1 in sheet metal forming processes (6/90).

MC-1728-0001

Marine Security Guard

Course Number: None.

Location: Marine Security Guard Battalion, Henderson Hall, Arlington, VA.

Length: 5 weeks (150 hours).

Exhibit Dates: 6/67-4/86.

Objectives: To screen, train, and motivate selected personnel for assignment as Marine security guards with the Department of State.

Instruction: Security procedures; protection of lives and property; personal conduct living abroad; training and administration.

Credit Recommendation: In the upper-division baccalaureate category, credit in protective service on the basis of demonstrated skills and/or institutional evaluation (12/68).

MC-1728-0002

Military Functions in Civil
Disturbances by Correspondence

Course Number: 03.16J.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 3/79-Present.

Objectives: To provide the knowedge necessary to control riots or civil disturbances.

Instruction: This correspondence course presents a series of study units covering topics such as crows and mob behavior, riot control principles, types of disturbances, crowd control formations, handling explosive devices and bomb threats, weapons, riot control agents, special equipment, and operations planning. There is special emphasis on laws, policies, and legal considerations. A supervised final examination without notes or textbooks is administered.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in civil disturbances and/or riot control (3/85).

MC-1728-0003

Advanced Legal Services

Course Number: None.

Location: Schools Battalion, Marine Corps Base, Cp. Pendleton, CA; Schools Battalion, Marine Corps Base, Cp. Lejeune, NC.

Length: 2 weeks (57-70 hours).

Exhibit Dates: *Version 1:* 3/86-Present. *Version 2:* 5/74-2/86.

Objectives: To provide senior enlisted personnel with an overview of the administration of legal assistant programs.

Instruction: Lectures and practical exercises in legal administration of investigations, appelate petitions, actions and reviews, administrative discharges, reporter procedures, civil processes and law library.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the vocational certificate category, 1 semester hour as an elective in paralegal training (11/75).

MC-1728-0004

Legal Services Specialist
(Legal Services Man/Reporter, Phase I and Phase II)
(Basic Legal Administration)
(Legal Services Man)

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: 5-8 weeks (220-248 hours).

Course concludes with a proctored examination.

MC-1729-0023

Meats and Meat Cookery by
Correspondence

Course Number: *Version 1:* 33.18B. *Version 2:* 33.18A.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: *Version 1:* 5/88-Present. *Version 2:* 3/82-4/88.

Objectives: To provide service personnel with skills to identify, handle, and process meats.

Instruction: This correspondence course consists of reading assignments, written lessons, and objective type questions that provide food service personnel general background information on meats.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 1 semester hour in food preparation when taken in conjunction with Salads, Sandwiches, and Desserts by Correspondence, 33.20 (MC-1729-0022) and Vegetables, Soups, Sauces, Gravies and Beverages by Correspondence, 33.19 (MC-1729-0024) (3/84). Course concludes with a proctored examination.

MC-1729-0024

Vegetables, Soups, Sauces, Gravies, and Beverages by Correspondence

Course Number: 33.19.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 3/76–7/90.

Objectives: To provide food service personnel with proper techniques in the preparation of vegetables, soups, sauces, gravies, and beverages.

Instruction: This correspondence course consists of reading assignments, written lessons, and objective type questions that provide food service personnel with general backgroundinformation on the basics of receipt, storage, and preparation of vegetables, soups, sauces, gravies and beverages in an appealing manner for dining room consumption.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food preparation with taken in conjunction with Meats and Meat Cookery by Correspondence, 33.18A (MC-1729-0023) and Salads, Sandwiches, and Desserts by Correspondence, 33.20 (MC-1729-0022) (3/84). Course concludes with a proctored final examination.

MC-1729-0025

Dining Facility Sanitation by Correspondence

Course Number: 33.21.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 11/79–11/87.

Objectives: To increase knowledge of sanitary food service principles.

Instruction: This correspondence course will teach students to maintain hygienic standards condusive to good health, and to control contamination from humans, flies, and rodents, by teaching: sanitizing food preparation equipment, sanitizing dining room equipment, sanitizing eating and drinking utensils and scullery equipment, sanitizing cleaning equipment; receiving and processing foods; sanitary storage of foods, handling and storage of cleaning compounds, safe temperature ranges, and vector control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food service operations when taken in conjunction with Food Service Fundamentals by Correspondence, 33.4J (MC-1729-0027) and Garrison Food Service Equipment Maintenance by Correspondence,33.22 (MC-1729-0026)(3/84). Course concludes with a proctored examination.

MC-1729-0026

Garrison Food Service Equipment Maintenance by Correspondence

Course Number: 33.22.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 12/79–12/88.

Objectives: To provide food service personnel with timely procedures for preventive maintenance of furnishing fixtures and equipment.

Instruction: This correspondence course offers reading assignments and written lessons with objective type questionsthat provide food service personnel with a general background in maintenance of dining facilities furnishings, equipment, and fixtures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hours in food service operations when taken in conjunction with Food Service Fundamentals by Correspondence, 33.4J (MC-1729-0027) and Dining Facility Sanitation by Correspondence, 33.21 (MC-1729-0025) (3/84). Course concludes with a proctored examination.

MC-1729-0027

Food Service Fundamentals by Correspondence

Course Number: 33.4J.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 1/82–9/87.

Objectives: To provide the basic aspects of a food service operations.

Instruction: In providing an overview of food service fundamentals, this correspondence course emphasizes the following topical areas: mission and organization, food microbiology and sanitation, food service equipment, utensils, and safety precautions.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hours in food service operations when taken in conjunction with Dining Facility Sanitation by Correspondence, 33.21 (MC-1729-0025) and Garrison Food Service Equipment Maintenance by Correspondence, 33.22 (MC-1729-0026) (3/84). Course concludes with a proctored examination.

MC-1729-0028

Field Food Service by Correspondence

Course Number: 33.17A.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 12/75–12/85.

Objectives: To provide an overview of field food service operations and equipment.

Instruction: This correspondence course provides a general background in food service operations during training maneuvers and combat conditions. Subject matter areas covered include field operation, equipment (field ranges, immersion heaters), field food servicing, equipment and sanitation, and railway kitchen car operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the materials presented (3/84).

MC-1729-0029

Food Service Management by Correspondence

Course Number: 33.15C.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum of 52 weeks.

Exhibit Dates: 3/83–12/84.

Objectives: To provide a general background in procedures used to complete forms and reports used at Marine Corps dining facilities.

Instruction: This correspondence course provides dining facility managers with a source of study materials on the various Marine Corps forms and reports used in their dining operations. Topical areas covered include subsistence procedures and definitions, subsistence accounting, accounting for personnel fed, regulations and control of meals sold, and the subsistence opertional analysis report.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/84).

MC-1729-0030

Food Inspection and Storage, Recipe Conversion, and the Cook's Worksheet by Correspondence

Course Number: 33.14C.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/79–12/84.

Objectives: To describe basic information as to the cook's responsibility for food receiving and storage, recipe conversion, and the cook's worksheet.

Instruction: This correspondence course covers general background in the procedures used in inspecting foods being received and their storage. Other topics covered include the preparation of the stock record and inventory control card, the subsistence issue receipt and the cook's procedure requirement sheet, the Armed Forces Recipe Service, and product and cook's worksheet.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food service management when taken in conjunction with Unit Dining Facility Officer by Correspondence, 33.23, (MC-1729-0031) (3/84). Course concludes with a proctored examination.

MC-1729-0031

Unit Dining Facility by Correspondence

Course Number: 33.23.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 4/82–12/87.

Objectives: To provide unit dining facility officers with an overview of their duties, and the duties of their personnel along with directives, reports, and forms used in the operation. Sanitation inspections are also covered.

Instruction: This course is designed to aid new and prospective officers in the understanding of the organization of the dining facility, and the responsibilities of dining facility personnel. Other topical areas include dining facility directives, reports and forms, and sanitation responsibilities.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food service management when taken in conjunction with Food Inspection and Storage, Recipe Conversion, and the Cook's Worksheet by Correspondence, 33.14C (MC-1729-0030)(3/84). Course concludes with a proctored examination.

MC-1729-0032

Pastry Baking by Correspondence

Course Number: 33.8F.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 3/82–Present.

Objectives: To describe the sanitation and safety procedures needed for pastries; the types of sweetening agents, leavening agents, and flavoring agents are discussed; and yeasts and molds inhibitors are presented.

Instruction: This correspondence course covers yeast doughs, danish pastries, pie crusts, pie fillings, cakes, cookies, and quick breads are covered to a reasonable degree. This course has no laboratory component.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in the theory of baking when taken in conjunction with Field Bread Baking by Correspondence, 33.10F (MC-1729-0033) (3/84). Course concludes with a proctored examination.

MC-1729-0033

Field Bread Baking by Correspondence

Course Number: 33.10F.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 9/77–12/88.

Objectives: The course presents lessons covering a broad spectrum of bread baking activities.

Instruction: The student will be required to understand field bakeries and ice cream production, understand mobile field baking plant components, understand bread ingredients and their functions, understand field bread baking procedures, understand and prevent mold and bacterial invasions, and work with portable field baking equipment. Course covers ice cream production, bread baking, sanitation, operation of machinery, and the theory of fermentation and baking. There is no laboratory included with the course.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hours in theory of baking when taken in conjunction with Pastry Baking by Correspondence, 33.8F, (MC-1729-0032) (3/84). Course concludes with a proctored examination.

MC-1729-0034

Food Service Noncommissioned Officer (NCO)

Course Number: 33N.

Location: Service Support School, Cp. Lejeune, NC.

Length: 10–11 weeks (340–364 hours).

Exhibit Dates: 11/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform the duties of a chief food service specialist utilizing leadership and technical skills; carry out the administrative and supervisory functions required; provide subordinate personnel instruction and guidance necessary to prepare a variety of food and bakery products; learn the faults and causes of improperly prepared food; and erect food service facilities with production resources necessary to produce and serve food under field condition.

Instruction: Covers service support leadership training, administrative functions, including duties, tasks, applicable technical skills and standard forms required, pastry products, cooking faults, and field food operation. Methodology includes classroom and simulated training with emphasis on demonstration, performance critiquing products, and practical applications.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in food production management (4/89).

MC-1729-0035

Basic Baker

Course Number: 33A.

Location: Service Support School, Cp. Lejeune, NC.

Length: 9 weeks (302–329 hours).

Exhibit Dates: 5/84–Present.

Learning Outcomes: Upon completion of the course, the student will be able to apply basic principles of baking to large scale bakery operations including preparation procedures, product evaluation, sanitation control, and service; and produce a variety of bakery products for conventional food service facilities as well as field operations.

Instruction: Covers the various techniques of producing bakery products; how to identify their characteristic qualities; the use and maintenance of bakery equiment, the operation of a mobile bakery plant and ice cream plant, and proper sanitation standards. Methodology includes lectures, actual baking in a simulated operation, testing products and classroom training.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic baking principles (4/89).

MC-1729-0036

Food Service Staff Noncommissioned Officer (NCO)

Course Number: DA2.

Location: Service Support School, Cp. Lejeune, NC.

Length: 9 weeks (296–315 hours).

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to utilize and further develop technical, conceptual, and human skills in order to perform the administrative and supervisory functions required by middle management in a garrison mess operation or field bakery.

Instruction: Covers service support management requirements; duties and responsibilities related to garrison, mess, field, and bakery operations management; this includes preparation of requisition forms, inventory control procedures, product evaluation, production planning, yields, food allowances, and cash control; planning for large scale operations, both stationary and mobile; and establishing a field food service facility. Methodology includes lecture, practical exercises, and testing, performance and evaluation.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in basic food preparation and 3 in operations management (4/89).

MC-1729-0037

Reserve Food Service Refresher

Course Number: FAC.

Location: Service Support School, Cp. Lejeune, NC.

Length: 2 weeks (74 hours).

Exhibit Dates: 1/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to assist with the set up of field food service operations; assemble, operate, clean and maintain all required equipment; and serve food in accordance with standards.

Instruction: Covers operation of immersion water heaters, sanitizers, and field food service equipment; preparation and maintenance of field food service equipment; preparation and service of basic meals. Methodology includes lectures, demonstrations and performance in all components.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to basic food preparation (4/89).

MC-1729-0038

Food Service Fundamentals by Correspondence

Course Number: 33.4h.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 10/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the organizational, structure, sanitation and safety practices, and basic equipment and utensils used in food service operations.

Instruction: In providing an overview of food service fundamentals, this correspondence course emphasizes the following topic areas: mission and organization, food microbiology and sanitation, food service equipment, and utensils.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food service operations (6/89).

MC-1729-0039

Mess Hall Sanitation by Correspondence

Course Number: 33.21a.

Location: Marine Corps Institute, Washington DC.

Length: 52 weeks maximum.

Exhibit Dates: 11/87–3/90.

Learning Outcomes: Upon completion of the course, the student will understand and assess basic sanitation and safety practices in food service operations.

Instruction: This correspondence course will teach students to maintain safety hygenic standards conducive to good health, and to control contamination by teaching sanitation terminology, sanitizing food preparation equipment, sanitizing dining room equipment, sanitizing eating and drinking utensils and scullery equipment, sanitizing cleaning equipment; receiving and processing foods; sanitary storage of foods, handling and storage of cleaning compounds, safe temperature ranges, and vector control.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food service sanitation when taken taken in conjunction with 33.24, the Mess Hall Subsistence Clerk, MC-1729-0040 (6/89).

MC-1729-0040

The Mess Hall Subsistence Clerk by Correspondence

Course Number: 33.24.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 11/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the fundamentals of food forecasting, receiving, storing, issuing, and cost control.

Instruction: Forecasting subsistence requirements, receiving subsistence, issuing susistence items, administration, stock record and inventory control aid, food cost analysis and monetary credit. This correspondence; course concludes with a comprehensive examination.

Credit Recommendation: In the vocational certificate category, 1 semester hour in food purchasing or inventory control (6/89); in the lower-division baccalaureate/associate degree category, 1 in food service sanitation when taken in conjunction with 33.21a Mess Hall Sanitation by Correspondence (MC-1729-0039) (6/89).

MC-1729-0041

Basic Nutrition by Correspondence

Course Number: *Version 1:* 33.16d. *Version 2:* 33.16c.

Location: Marine Corp Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: *Version 1:* 3/90–Present. *Version 2:* 7/87–2/90.

Learning Outcomes: Upon completion of the course, the student will be able to define nutrition, list factors that influence a person's selection of food, identify the health function of nutrition, minerals and other food nutrients, and plan nutritional menus.

Instruction: Instruction covers food and health; nutrients which provide fuel and build and repair tissue; vitamins, minerals, water and fiber; food fuel, body weight, weight control factors, and menu planning; and makes use of unit exercises and comprehensive review lessons with final exam.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* Credit is not recommended because of the limited, specialized nature of the course (6/89).

MC-1729-0042

The Reserve Field Food Service Supervisor by Correspondence

Course Number: 33.33.

Location: Marine Corps Institute, Washington, DC.

Length: 52 week maximum.

Exhibit Dates: 8/88–Present.

Learning Outcomes: Upon completion of the course, the student will be able to explain the planning and administrative functions of a food service supervisor, delineate the steps in setting up a food operation, identify food service equipment and operation procedures, describe food ordering and inventory procedures, and recognize accepted standards of sanitation and safety.

Instruction: Planning, setting up mess operations, operational administration, food production worksheets, cost control, sanitation inspections, and using, cleaning and dismantling food service equipment. Methodology includes unit exercises and a comprehensive review lesson which prepares students for the final exam.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in food service supervision (6/89).

MC-1730-0001

Refrigeration Specialist

Course Number: None.

Location: Engineer School Battalion, Cp. Lejeune, NC.

Length: 14 weeks (430 hours).

Exhibit Dates: 7/55–12/68.

Objectives: To train enlisted personnel to install, maintain, and make minor repairs on, refrigeration and accessory equipment.

Instruction: Lectures and practical exercises in the installation and repair of refrigeration equipment. Course includes the theory of refrigeration and elements of electricity and the application to actual equipment; and the use of filterings and refrigerant piping.

Credit Recommendation: In the vocational certificate category, 15 semester hours in refrigeration theory—fundamentals of electricity, refrigeration controls repair, and troubleshooting (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in refrigeration theory—fundamentals of electricity, refrigeration controls repair, and troubleshooting (5/74).

MC-1730-0002

1. Basic Refrigeration Mechanic
2. Refrigeration Mechanic
3. Refrigeration Mechanic

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 7–9 weeks (216–273 hours). *Version 2:* 4 weeks (160 hours). *Version 3:* 11–12 weeks (330–334 hours).

Exhibit Dates: *Version 1:* 5/82–11/86. *Version 2:* 9/68–4/82. *Version 3:* 7/58–8/68.

Objectives: To train enlisted personnel as refrigeration mechanics.

Instruction: *All Versions:* Lectures and practical exercises in refrigeration equipment maintenance and operation, including electrical theory and circuitry, principles of refrigeration, refrigeration systems and components, and assembly and troubleshooting of specific refrigeration equipment. *Version 2:* Includes mathematics; internal-combustion engine principles as applied to refrigeration, air-conditioning and ventilation systems, and decontamination materials and procedures.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in refrigeration theory, systems, and service and 4 in air conditioning principles and repair (2/85). *Version 2:* In the vocational certificate category, 8 semester hours in refrigeration (5/74); in the lower-division baccalaureate/associate degree category, 4 semester hours in refrigeration and/or electricity (5/74); in the upper-division baccalaureate category, 2 semester hours in refrigeration and/or electricity (5/74). *Version 3:* In the vocational certificate category, 12 semester hours in refrigeration (5/74); in the lower-division baccalaureate/associate degree category, 6 semester hours in refrigeration and/or electricity (5/74); in the upper-division baccalaureate category, 3 semester hours in refrigeration and/or electricity (5/74).

MC-1730-0003

Refrigeration Mechanic by Correspondence

Course Number: 11.14D.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78–12/86.

Objectives: To provide basic training in refrigeration theory, installation, and servicing.

Instruction: This is an individual, self-paced, self-study course with reading assignments and written lessons with objective questions. Material covered includes installation, operation, testing and repair of refrigeration equipment. The student will demonstrate achievement of the objectives by answering correctly 65% of the questions on the final examination, which is required.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in basic refrigeration lecture (8/83).

MC-1730-0004

Journeyman Refrigeration Mechanic

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 7–11 weeks (200–277 hours). *Version 2:* 12 weeks (457 hours).

Exhibit Dates: *Version 1:* 11/79–9/84. *Version 2:* 7/70–10/79.

Objectives: To train noncommissioned officer refrigeration mechanics in the advanced skills of troubleshooting and repair of refrigerating and air conditioning equipment.

Instruction: *Version 1:* Lectures, demonstrations and practical exercises in the Marine Corps maintenance management system, electrical concepts for diagnosing and repairing electrical components of refrigeration and air conditioning equipment and troubleshooting and repair of refrigeration and air conditioning equipment. *Version 2:* Lectures and practical exercises in basic principles of service-oriented refrigeration and air conditioning, basic cycles, mechanical system components, electrical controls and applications to small air conditioning units.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in refrigeration theory, system, and service and 4 in air conditioning principles and repair (2/85). *Version 2:* In the vocational certificate category, 3 semester hours in refrigeration service, 3 in refrigeration service laboratory, 2 in air conditioning principles, 2 in air conditioning principles laboratory, 3 in refrigeration and air conditioning controls (6/75).

MC-1730-0005

Fundamentals of Refrigeration by Correspondence

Course Number: 11.61.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 11/84–Present.

Learning Outcomes: Upon completion of the course, the student will have a fundamental understanding of refrigeration including the use of psychrometric charts, refrigeration cycle, various refrigerants, the proper storage and handling of refrigerants, compressors, evaporators, motors, and overall system components.

Instruction: Instruction shall include the study of fundamentals of refrigeration, various common refrigerants, their toxic effects, complete refrigeration systems, controls, components, and the use of psychrometric charts.

Credit Recommendation: In the vocational certificate category, 3 semester hours in fundamentals of refrigeration (7/87).

MC-1730-0006

Basic Refrigeration Mechanic

Course Number: 11D.

Location: Engineer School, Cp. Lejeune, NC.

Length: 8–9 weeks (270 hours).

Exhibit Dates: 12/86–Present.

Learning Outcomes: Upon completion of the course, the student will be able to install, operate, troubleshoot and maintain all types of refrigeration and air conditioning equipment. The student will understand the basic theory of all types of refrigeration systems, both evaporative and absorbtion systems.

Instruction: Lectures and practical exercises in refrigeration equipment maintenance and operation including electrical theory and circuitry, principles of refrigeration, refrigeration systems and components, assembly and troubleshooting of specific refrigeration equipment, hands-on performance, and field maintenance repair.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 4 semester hours in refrigeration theory systems and service, and 4 in air conditioning principles and repair (4/89).

MC-1730-0007

Journeyman Refrigeration Mechanic

Course Number: 111.

Location: Engineer School, Cp. Lejeune, NC.

Length: *Version 1:* 8 weeks (252 hours). *Version 2:* 7–9 weeks (251–279 hours).

Exhibit Dates: *Version 1:* 8/89–Present. *Version 2:* 10/84–7/89.

Learning Outcomes: Upon completion of the course, the student will be able to perform advanced skills of troubleshooting and repair or refrigeration and air conditioning equipment.

Instruction: Student prerequisites: satisfactory completion of the basic refrigeration mechanic course and have acquired one (1) year field experience. Lectures, demonstrations and practical exercises in the maintenance management systems, to include routine maintenance and preventive maintenance procedures, electrical concepts for diagnosing and repairing electrical components, electrical systems of refrigeration and air conditioning equipment, troubleshooting and repair of refrigeration and air conditioning equipment, practical exercises in basic principles of service-oriented refrigeration and air conditioning, basic cycles, mechanical system components, electrical controls and applications to small capacity air conditioning units.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the lower-division baccalaureate/associate degree category, 4 semester hours in refrigeration theory systems and service, and 2 in air conditioning principles and repair (9/87).

MC-1731-0001

Refrigeration Servicing by Correspondence

Course Number: 11.62.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/85–Present.

Learning Outcomes: Upon completion of the course, the student will be able to perform preventive and corrective maintenance on refrigeration equipment.

Instruction: A correspondence course containing study units, review exams and final examination, installation and preventive maintenance, troubleshooting, servicing refrigeration systems, and repairing major components.

Credit Recommendation: In the vocational certificate category, 1 semester hour in refrigeration theory and 1 in refrigeration maintenance (7/87).

MC-1732-0001

Field Water Supply by Correspondence

Course Number: 11.20.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78–12/86.

Objectives: To provide basic training in the theory of installation, operation, and site selection of a field water supply point.

Instruction: This in an individual, self-paced, self-study course containing reading assignments, and written lessons with objective type questions. Materials include the selection of open water supply site, testing water ph levels, installing field fitter units and distribution points,. The student will demonstrate achievement of objectives by answering correctly 65% of the questions on the final exam.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (8/83).

MC-1732-0002

Bulk Fuel Man by Correspondence

Course Number: 13.37G; 13.37F.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/78–12/84.

Objectives: To provide basic training in petroleum oil and lubricants (POL) pipeline and pumping station operation maintenance theory.

Instruction: This individual, self-paced, self-study course contains reading assignments and written lessons with objective type questions. Materials include the identifying the theory of operations of bulk fuel pumps, regulators, gauges and fitter units. The student will demonstrate achievement of objectives by answering correctly 65% of the questions in a final examination, which is required.

Credit Recommendation: In the vocational certificate category, 2 semester hours in petroleum oil and lubricant (POL) pipeline operations (8/83).

MC-1732-0003

Reverse Osmosis Water Purification Unit by Correspondence

Course Number: 11.22a.

Location: Marine Corps Institute, Washington, DC.

Length: 52 weeks maximum.

Exhibit Dates: 2/89–Present.

Learning Outcomes: Upon completion of the course, the student will be able to identify the fundamentals of the reverse osmosis process, state the characteristics, capabilities, and components of the reverse osmosis water purification unit; operate a reverse osmosis water purification unit including inspection, start-up, adjustments, shutdown, backwash, and element cleaning.

Instruction: Individual, self-paced, self-study course containing reading assignments and study questions with answers to study questions at the end of each unit. Materials include operation and maintaining of a reverse osmosis water purification unit. The student will demonstrate achievement of objectives by answering correctly 70% of the total questiona on a final examination.

Credit Recommendation: In the vocational certificate category, 3 semester hours in water treatment plant operation (6/89).

MC-2101-0001

1. Motor Vehicle Operator
2. Motor Vehicle Operators

Course Number: None.

Location: Service Support School, Cp. Lejeune, NC. *Version 2:* Supply School, Cp. Pendleton, CA.

Length: *Version 1:* 7 weeks (244 hours). *Version 2:* 5–6 weeks (192–212 hours).

Exhibit Dates: *Version 1:* 1/73–12/73. *Version 2:* 8/66–12/72.

Objectives: To train basic motor transport men in the operation of tactical motor vehicles and in the duties of military drivers.

Instruction: *All Versions:* Lectures and practical exercises in the operation of tactical and military motor vehicles, including driving techniques, operator responsibilities, traffic regulations, vehicle recovery and special driving conditions, and principles of automotive vehicles. *Version 1:* Includes psychophysical evaluations and maintenance servicing.

Credit Recommendation: *Version 1:* In the vocational certificate category, 1 semester hour in automotive mechanics (4/74); in the lower-division baccalaureate/associate degree category, 1 semester hour in automotive mechanics (4/74). *Version 2:* In the vocational certificate category, 2 semester hours in driver education programs (4/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in driver education programs (4/74).

MC-2201-0072

Resident Staff Noncommissioned Officer (NCO) Advanced

Course Number: M4F.

Location: Staff Noncommissioned Officer Academy, Quantico, VA; Staff Noncommissioned Officer Academy, El Toro, CA.

Length: 2 weeks (91 hours).

Exhibit Dates: 5/87–Present.

Learning Outcomes: Upon completion of the course, the student will be able to understand the principles of military defensive and offensive tactics, and the role of the effective military manager in peace and in war.

Instruction: Lectures, demonstration, student presentations, guided discussions, and instruction in military management, customs, justice, and unit-level tactics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in military science (3/90).

MC-2202-0001

Naval Officer Reserve Officer Training Course (NROTC)

Course Number: None.

Location: Officer Candidate School, Quantico, VA.

Length: 6 weeks (237–281 hours).

Exhibit Dates: *Version 1:* 8/86–Present. *Version 2:* 3/80–7/86.

Objectives: To motivate and train selected personnel to become commissioned officers.

Instruction: Lectures and practical exercises in weapons information and identification; small-unit tactics; Marine Corps organization, mission, and functions; uniforms and equipment; drill, inspection, and parades; leadership, physical training; land navigation; maps, and military law.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* In the upper-division baccalaureate category, 6 semester hours in advanced military science (11/80).

MC-2202-0002

Naval Reserve Officer
(Naval Reserve Officer Bulldog)

Course Number: RMD.

Location: Staff Noncommissioned Officer Academy, Quantico, VA.

Length: *Version 1:* 7 weeks (506 hours). *Version 2:* 7 weeks (335-336 hours). *Version 3:* 6 weeks (281-282 hours).

Exhibit Dates: *Version 1:* 2/90-Present. *Version 2:* 4/99-1/90. *Version 3:* 8/86-3/88.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate the leadership, moral, and physical qualities required of a commissioned officer.

Instruction: Lectures, guided discussions, demonstrations, practical exercises, and written examinations in: 1) leadership principles and skills, 2) military courtesy and customs, 3) physical fitness training, and 4) military tactics.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 2 semester hours in leadership, 1 in physical training, and 5 in military science (3/90). *Version 2:* In the lower-division baccalaureate/associate degree category, 2 semester houts in leadership, 1 in physical education, 5 in military science (3/90). *Version 3:* In the lower-division baccalaureate/associate degree category, 1 semester hour in leadership, 1 in physical training, and 5 in military science (3/90).

MC-2202-0003

Naval Academy Training

Course Number: RMF.

Location: Staff Noncommissioned Officer Academy, Quantico, VA.

Length: 7 weeks (506 hours).

Exhibit Dates: 2/90-Present.

Learning Outcomes: Upon completion of the course, the student will be able to demonstrate the leadership, moral, and physical qualities required of a commissioned officer.

Instruction: Lectures, guided discussions, demonstrations, practical exercises, and written examinations in: 1) leadership principles and skills, 2) military courtesy and customs, 3) physical fitness training, and 4) military tactics.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in leadership, 1 in physical training, and 5 in military science (3/90).

MC-2204-0001

Drill Instructor

Course Number: None.

Location: Recruit Training Regiment, San Diego, CA; Recruit Depot, Parris Island, SC.

Length: 5-9 weeks (195-381 hours).

Exhibit Dates: 1/59-1/88.

Objectives: To prepare selected noncommissioned officers for duty as drill instructors.

Instruction: Instructional methods; marksmanship; close-order drill; physical training; leadership development; rules, regulations, and procedures of recruit training.

Credit Recommendation: Credit is not recommended because of the military nature of the course (1/74).

MC-2204-0002

1. Assault Amphibian Vehicle Officer
2. Amphibian Vehicle Officer

Course Number: None.

Location: *Version 1:* Assault Amphibian School, Cp. Pendleton, CA; *Version 2:* Schools Battalion, Cp. Pendleton, CA.

Length: *Version 1:* 7-8 weeks (292 hours). *Version 2:* 4-5 weeks (148-203 hours).

Exhibit Dates: *Version 1:* 1/84-Present. *Version 2:* 7/74-12/83.

Objectives: To familiarize students with amphibian tracked vehicles and provide a working knowledge of the duties and responsibilities of an amphibian tracked vehicle platoon commander.

Instruction: Topics include communications; introduction to amphibian vehicles; vehicle operation, maintenance, inspection and safety; armament stations; and field subjects and tactics.

Credit Recommendation: *Version 1:* Pending evaluation. *Version 2:* Credit is not recommended because of the military-specific nature of the course (8/77).

MC-2204-0003

Women Officers Training (Senior)
(Women Officer Training)

Course Number: None.

Location: Basic School, Quantico, VA.

Length: 5 weeks (264 hours).

Exhibit Dates: 8/55-12/68.

Objectives: To provide students with theoretical and practical military instruction necessary to prepare them for appointment as commissioned officers.

Instruction: Lectures on leadership; communications; combat intelligence; military operations; drills, inspections, and ceremonies; and physical training and conditioning.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in business organization and management, 2 in leadership or group organization (12/68).

MC-2204-0004

Marine Warrant Officers, Basic
(Marine Warrant Officer, Basic)

Course Number: None.

Location: Basic School, Quantico, VA.

Length: 10-15 weeks (340-509 hours).

Exhibit Dates: 1/60-5/85.

Objectives: To broaden the general military proficiency of newly appointed warrant officers.

Instruction: Lectures and practical exercises in leadership techniques, physical training, map reading, communication infantry tactics and intelligence weapons, military law, and organization and staff functioning.

Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in advanced military science (11/80).

MC-2204-0005

Women Officer Training (Junior)

Course Number: None.

Location: Marine Corps Schools, Quantico, VA; Basic School, Quantico, VA.

Length: 5-6 weeks (211-264 hours).

Exhibit Dates: 6/55-12/68.

Objectives: To provide students with a basic theoretical and practical understanding of military service in the Marine Corps.

Instruction: Lectures on leadership; drill, command, inspections, and ceremonies; military operations; military customs, courtesies, traditions, and justice; communications; organization, mission and history of armed services.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in business organization and management, 2 in leadership or group organization (12/68).

MC-2204-0006

Mountain Leadership Training, Winter

Course Number: None.

Location: Cold Weather Training Center, Bridgeport, CA.

Length: 4 weeks (168 hours).

Exhibit Dates: 1/59-12/68.

Objectives: To teach selected personnel to function effectively in cold and mountainous terrains.

Instruction: Lectures and practical exercises in leadershiprequirements imposed by cold weather and mountainour terrain; preparation of units; features and limitations of supporting arms and services; tactics involved in security, patrols, and attacks; and survival training.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in camping and survival training (12/68).

MC-2204-0007

Mountain Leadership Training, Summer

Course Number: None.

Location: Cold Weather Training Center, Bridgeport, CA.

Length: 4 weeks (173 hours).

Exhibit Dates: 1/59-12/68.

Objectives: To train enlisted personnel to conduct small-unit operations in mountainous and cold weather environments.

Instruction: Lectures and practical exercises in leadership in cold weather operations, development of a training program, survival training, care of weapons, arctic transportation, mountain engineering, communications, and land navigation.

Credit Recommendation: In the upper-division baccalaureate category, 2 semester hours in camping and survival training (12/68).

MC-2204-0008

Infantry Replacement and Individual Combat Training

Course Number: None.

Location: Headquarters, Marine Corps Base, Cp. Pendleton, CA.

Length: 6 weeks (169 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To provide enlisted personnel with basic infantry training.

Instruction: Lectures and practical exercises in individual combat training, including field fortifications, communications, amphibious training, weapons, and basic tactics.

Credit Recommendation: Credit is not recommended because of the military nature of the course (12/68).

MC-2204-0009

1. Warrant Officer Candidate Screening

(Warrant Officer Candidate)
2. WARRANT OFFICER CANDIDATE SCREENING

Course Number: None.
Location: Officer Candidates School, Quantico, VA. *Version 2:* Training and Test Regiment, Quantico, VA.
Length: *Version 1:* 7-10 weeks (262-301 hours). *Version 2:* 9 weeks (240-281 hours).
Exhibit Dates: *Version 1:* 6/69-1/88. *Version 2:* 1/61-5/69.
Objectives: To train enlisted personnel to be warrant officers.
Instruction: Lectures and practical exercises in leadership, weapons familiarization, physical training, and small-unit tactics.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in advanced military science (12/77). *Version 2:* Credit is not recommended because of the military nature of the course (5/74).

MC-2204-0010

FIELD ARTILLERY BATTERYMAN

Course Number: None.
Location: Artillery School, Cp. Pendleton, CA.
Length: 4 weeks (138 hours).
Exhibit Dates: 10/73-12/73.
Objectives: To qualify enlisted personnel to perform as field artillery batterymen.
Instruction: Lectures and practical exercises on the mission, organization, functioning and maintenance of an artillery battery and its weapons, including laying and referring, reconnaissance, selection and occupation of position, field firing exercises, and fire control equipment.
Credit Recommendation: Credit is not recommended because of the military nature of the course (5/74).

MC-2204-0011

REDEYE GUNNER—PLATOON TRAINING
(ABBREVIATED COURSE)

Course Number: None.
Location: Air Reserve Missile Training Detachment, Twentynine Palms, CA.
Length: 3 weeks (132 hours).
Exhibit Dates: 8/66-6/70.
Objectives: To train enlisted personnel to perform as gunners on the Redeye air defense weapon system.
Instruction: Lectures and practical exercises in the operation and maintenance of the Redeye missile system, including missile firing, identification of friendly and enemy aircraft, tactical employment of weapons, and air control and tactical doctrine.
Credit Recommendation: Credit is not recommended because of the military nature of the course (5/74).

MC-2204-0012

REDEYE GUNNER—PLATOON TRAINING
(Redeye Gunner/Operator)

Course Number: None.
Location: Air Reserve Missile Training Detachment, Twentynine Palms, CA; Redeye Missile School, Twentynine Palms, CA.
Length: 4-9 weeks (135-321 hours).
Exhibit Dates: 8/66-3/79.
Objectives: To train enlisted personnel to perform as gunners on the Redeye air defense weapon system.
Instruction: Lectures and practical exercises in the operation and maintenance of the Redeye missile system, including missile firing, identification of friendly and enemy aircraft, tactical employment of weapons, air control and tactical doctrine, map reading, communications, compass operation, tracking and counterinsurgency, and search-and-scan procedures.
Credit Recommendation: Credit is not recommended because of the military nature of the course (12/68).

MC-2204-0013

TACTICAL AIR OPERATIONS CENTRAL (TAOC) WEAPONS CONTROLLER/OPERATOR
(Weapons Controller/Operator)

Course Number: None.
Location: Communication-Electronics School, San Diego, CA.
Length: 5-6 weeks (175-210 hours).
Exhibit Dates: 5/66-12/73.
Objectives: To train officers and enlisted personnel to operate tactical data systems.
Instruction: Lectures and practical exercises in tactical data system introduction, universal console introduction; advanced, simulated air exercises; advanced air control techniques and procedures; central operator hut operation and supervision; AN/TYA-9 target acquisition; and aircraft tracking and identification.
Credit Recommendation: Credit is not recommended because of the military nature of the course (12/68).

MC-2204-0014

SEA DUTY INDOCTRINATION
(Sea School)

Course Number: 81N.
Location: Recruit Depot, San Diego, CA; Sea School, Portsmouth, VA.
Length: 3-6 weeks (65-192 hours).
Exhibit Dates: 7/58-Present.
Objectives: To train enlisted Marines for duty with a ship's Marine detachment.
Instruction: Lectures and practical exercises on duties and shipboard life of a ship's Marine detachment, including drills, honors, and ceremonies, administrative subjects, small arms training, naval orientation, damage control and fire fighting, Marine standards, and gunnery training.
Credit Recommendation: Credit is not recommended because of the military nature of the course (8/87).

MC-2204-0015

NONCOMMISSIONED OFFICERS (NCO) LEADERSHIP (SENIOR)

Course Number: None.
Location: Recruit Depot, Parris Island, SC.
Length: 3 weeks (120 hours).
Exhibit Dates: 1/63-12/68.
Objectives: To train noncommissioned officers in effective leadership, tactics, and military techniques.
Instruction: Lectures in drill, command, inspections, ceremonies, weapons, map reading, battle tactics, and techniques of military instruction.
Credit Recommendation: Credit is not recommended because of the military nature of the course (5/74).

MC-2204-0016

NONCOMMISSIONED OFFICER (NCO) LEADERSHIP (JUNIOR)

Course Number: None.
Location: Recruit Depot, Parris Island, SC.
Length: 3 weeks (128 hours).
Exhibit Dates: 1/63-12/68.
Objectives: To train noncommissioned officers in effective leadership, tactics, and military techniques.
Instruction: Lectures in drill, command, inspections, ceremonies, weapons, map reading, battle tactics, and techniques of military instruction.
Credit Recommendation: Credit is not recommended because of the military nature of the course (5/74).

MC-2204-0017

FIELD ARTILLERY OPERATIONS MAN

Course Number: None.
Location: Schools Battalion, Cp. Pendleton, CA.
Length: 9 weeks (323 hours).
Exhibit Dates: 12/72-12/74.
Objectives: To train enlisted personnel to be artillery fire direction personnel and forward observers.
Instruction: Lectures and practical exercises in artillery registration, identification and correction computation, use and maintenance of gun direction computer, and firing procedures.
Credit Recommendation: Credit is not recommended because of the military nature of the course (5/74).

MC-2204-0018

WOMAN MARINE NONCOMMISSIONED OFFICER (NCO) LEADERSHIP

Course Number: None.
Location: Woman Officer School, Quantico, VA; Woman Marine Detachment, Quantico, VA; Woman Marine Training Detachment, Quantico, VA.
Length: 4 weeks (138-150 hours).
Exhibit Dates: 7/54-12/68.
Objectives: To provide women Marines with leadership training.
Instruction: Lectures in leadership training for women Marine noncommissioned officers. Course includes leadership, Marine Corps history, organization and management, military law, and physical training.
Credit Recommendation: In the vocational certificate category, 2 semester hours in leadership or human relations (6/74); in the lower-division baccalaureate/associate degree category, 2 semester hours in leadership or human relations (6/74).

MC-2204-0019

AIRBORNE RADIO OPERATOR/LOADMASTER

Course Number: None.
Location: 2nd Marine Aircraft Wing, Cherry Point, NC.
Length: 20-22 weeks (686 hours).
Exhibit Dates: 12/72-1/88.
Objectives: To train enlisted personnel as airborne radio operators/loadmasters.
Instruction: Lectures and practical exercises in the duties of an airborne radio operator/loadmaster. Topics include international Morse code, general operating procedures, airborne electronics, load weight and balance, voice operations, and ground and flight training.
Credit Recommendation: Credit is not recommended because of the military nature of the course (6/74).

MC-2204-0020

INFANTRY WEAPONS ARMORER

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 8 weeks (264 hours).

Exhibit Dates: 1/72-12/74.

Objectives: To train enlisted personnel to manage and organize armories.

Instruction: Lectures and practical exercises in the management of an infantry weapons armory. Course includes inspections, lubricants, preservatives, disassembly, assembly, and function of pistols, machine guns, submachine guns, mortars, flamethrowers, launchers, and shotguns.

Credit Recommendation: In the vocational certificate category, 3 semester hours as an elective in gunsmithing (7/74); in the lower-division baccalaureate/associate degree category, 3 semester hours as an elective in gunsmithing (7/74).

MC-2204-0021

AMPHIBIOUS WARFARE
(Junior Course)
(Junior School)

Course Number: None.

Location: Development and Education Command, Quantico, VA; Education Center, Quantico, VA.

Length: *Version 1:* 39 weeks (1138 hours). *Version 2:* 22 weeks (761 hours). *Version 3:* 22 weeks (678-687 hours). *Version 4:* 40-42 weeks (1232-1335 hours). *Version 5:* 40 weeks (1159-1279 hours).

Exhibit Dates: *Version 1:* 8/75-8/80. *Version 2:* 8/71-7/75. *Version 3:* 8/67-7/71. *Version 4:* 8/62-7/67. *Version 5:* 9/58-7/62.

Objectives: To train officers in amphibious operations.

Instruction: Lectures and practical exercises in command and staff operations; tactics and techniques of amphibious operations; counterinsurgency; nuclear, biological, and chemical warfare; automatic data processing; effective communications; amphibious organization, weapons, and equipment; and management.

Credit Recommendation: *Version 1:* In the lower-division baccalaureate/associate degree category, 4 semester hours in military science, 1 in public speaking (11/80). *Version 2:* In the upper-division baccalaureate category, 3 semester hours in general business (7/74). *Version 3:* In the upper-division baccalaureate category, 3 semester hours in business organization and management, and credit in oral and written communications on the basis of institutional evaluation (12/68). *Version 4:* In the upper-division baccalaureate category, 3 semester hours in business organization and management, 3 in French or Spanish, and credit in oral and written communication on the basis of institutional evaluation (12/68). *Version 5:* In the upper-division baccalaureate category, 3 semester hours in business organization and management, and credit in oral and written communication on the basis of institutional evaluation (12/68).

MC-2204-0022

ARTILLERY WEAPONS REPAIRMAN

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 8 weeks (210 hours).

Exhibit Dates: 1/72-12/74.

Objectives: To train enlisted personnel to repair and maintain field artillery weapons.

Instruction: Lectures and practical exercises in the maintenance and repair of field artillery weapons. Course includes artillery fundamentals, hand tool usage, and artillery maintenance.

Credit Recommendation: Credit is not recommended because of the military nature of the course (7/74).

MC-2204-0024

WOMAN OFFICER CANDIDATE

Course Number: None.

Location: *Version 1:* Officer Candidates School, Quantico, VA. *Version 2:* Woman Officer School, Quantico, VA. *Version 3:* Marine Corps School, Quantico, VA. *Version 4:* Marine Corps School, Quantico, VA.

Length: *Version 1:* 7 weeks (248 hours). *Version 2:* 7 weeks (217-243 hours). *Version 3:* 9-10 weeks (311 hours). *Version 4:* 11 weeks (350 hours).

Exhibit Dates: *Version 1:* 6/76-1/88. *Version 2:* 5/68-5/76. *Version 3:* 3/63-4/68. *Version 4:* 4/62-2/63.

Objectives: To train candidates for appointment or commissioning officers.

Instruction: Lectures and practical exercises to include the history, customs, uniforms, insignias, and awards of the Marine Corps; military law; military security; the role of women in the military; leadership training; military operations and tactics; drill and command development; inspections and ceremonies; world affairs; and organizational procedures.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in advanced military (12/77). *Version 2:* In the upper-division baccalaureate category, 1 semester hour in principles of leadership and organization (7/74). *Version 3:* In the upper-division baccalaureate category, 2 semester hours in leadership or group organization (12/68). *Version 4:* In the upper-division baccalaureate category, 2 semester hours in business organization and management, 2 in leadership or group organization (12/68).

MC-2204-0025

AMPHIBIOUS VEHICLE OFFICER
ORIENTATION

Course Number: None.

Location: Tracked Vehicle Operations School, Cp. Pendleton, CA.

Length: 4 weeks (148 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train officers to supervise amphibious vehicle operations.

Instruction: Lectures and practical exercises in the maintenance of amphibious vehicles; communications; tactics; gunnery operations; and night operations.

Credit Recommendation: Credit is not recommended because of the military nature of the course (8/74).

MC-2204-0026

TANK/AMPHIBIAN VEHICLE OFFICER
(RESERVE)

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: 3 weeks (110 hours).

Exhibit Dates: 5/65-12/68.

Objectives: To train officers to supervise tank, armored-amphibian, and amphibian operations.

Instruction: Lectures and practical exercises in communications, driving, preventive maintenance, gunnery, tactics, field firing, and night operations with tanks, armored amphibians, and amphibians.

Credit Recommendation: Credit is not recommended because of the military nature of the course (8/74).

MC-2204-0027

TANK OFFICERS ORIENTATION

Course Number: None.

Location: Tracked Vehicle Operations School, Cp. Pendleton, CA.

Length: 4 weeks (152 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train officers to be tank officers.

Instruction: Lectures and practical exercises in weapons and equipment maintenance, preventive maintenance, driving, gunnery, and field operations.

Credit Recommendation: Credit is not recommended because of the military nature of the course (8/74).

MC-2204-0028

TANK/AMPHIBIOUS VEHICLE OFFICER

Course Number: None.

Location: Schools Battalion, Cp. Pendleton, CA.

Length: 9 weeks (240 hours).

Exhibit Dates: 10/64-12/68.

Objectives: To train officers in tracked-vehicle operations.

Instruction: Lectures and practical exercises in the duties of a tank/amphibious vehicle officer. Course includes night operations, maintenance procedures, tracked-vehicle power systems, basic driving, and operation of special equipment.

Credit Recommendation: Credit is not recommended because of the military nature of the course (7/74).

MC-2204-0029

SHORE PARTY MAN
(Basic Landing Support Specialist)

Course Number: None.

Location: Engineer School, Cp. Lejeune, NC.

Length: 5-6 weeks (163-191 hours).

Exhibit Dates: 1/71-9/84.

Objectives: To train personnel to perform basic shore party tasks.

Instruction: Lectures and practical exercises in construction, demolitions, land mine warfare, and camouflage and field fortifications.

Credit Recommendation: Credit is not recommended because of the military nature of the course (2/85).

MC-2204-0030

AIR DEFENSE CONTROL OFFICER
(Air Defense Officer)
(Air Defense Control Officer, Automated System)
(Air Defense Control Officer)
(Marine Tactical Data System (MTDS) Weapons Controller)

Course Number: 67P.

Location: Air Ground Combat Training Center, Twentynine Palms, CA; Communications-Electronics School, Twentynine Palms, CA.

Length: 8-12 weeks (283-479 hours).

Exhibit Dates: 12/71-Present.

Objectives: To provide students with knowledge of the functions and operations of a tactical air defense operations center.

Instruction: Lectures and practical exercises in tactical air operations, air intercept control, weapons system characteristics, flight rules and regulations, ground controlled intercepts, and related air traffic control procedures. Course contains 5 weeks training in automated systems.

Credit Recommendation: Credit is not recommended because of the military nature of the course (7/90).

MC-2204-0031

Air Control Electronics Operator
(Air Control Electronic Operator)

Course Number: 67M.
Location: Air Ground Combat Training Center, Twentynine Palms, CA; Air Command and Control Systems School, Twentynine Palms, CA.
Length: 4-7 weeks (132-279 hours).
Exhibit Dates: 7/74-Present.
Objectives: To train enlisted personnel as operators in tactical air operations centers.
Instruction: Lectures and practical exercises in principles of an air defense system, tactical air operations center, radar operation, operation of AN/TYQ-2 equipment, basic air traffic control and pertinent flight regulations, electronic warfare fundamentals, and target identification and intercept.
Credit Recommendation: Credit is not recommended because of the military nature of the course (4/90).

MC-2204-0032

Artillery Scout Observer

Course Number: None.
Location: Schools Battalion, Cp. Pendleton, CA.
Length: 5 weeks (185 hours).
Exhibit Dates: 5/73-12/73.
Objectives: To train enlisted personnel as artillery forward observers.
Instruction: Lectures and practical exercises in communications, organization of the artillery battery, map reading, forward observation procedures, and artillery field firing.
Credit Recommendation: Credit is not recommended because of the military nature of the course (7/74).

MC-2204-0033

Field Artillery Fire Controlman

Course Number: None.
Location: Artillery School, Cp. Pendleton, CA.
Length: 5 weeks (194 hours).
Exhibit Dates: 3/73-12/73.
Objectives: To train enlisted personnel as field artillery fire controlmen.
Instruction: Lectures and practical exercises in artillery mathematics, gunnery and survey, meteorological message, gun direction computer, and artillery field firing.
Credit Recommendation: Credit is not recommended because of the military nature of the course (7/74).

MC-2204-0034

Reserve Amphibious Warfare Phase I, Phase II

Course Number: None.
Location: Amphibious Warfare School, Quantico, VA.
Length: Phase I, 2 weeks; Phase II, 2 weeks (Phase I, 70 hours; Phase 2, 65 hours).
Exhibit Dates: 6/76-1/90.
Objectives: To train officers in amphibious operations.
Instruction: Military tactics, weapons, command and management, and professional skills presented as a survey. Course is offered in two successive phases.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (11/80).

MC-2204-0035

Woman Officer Basic

Course Number: None.
Location: Marine Corps School, Quantico, VA.
Length: *Version 1:* 9 weeks (300-316 hours). *Version 2:* 6-7 weeks (223-254 hours).
Exhibit Dates: *Version 1:* 5/68-4/90. *Version 2:* 8/62-4/68.
Objectives: To train newly commissioned women officers in the duties and functions of company and staff officers.
Instruction: Lectures and practical exercises in military law, leadership, management and administration, military operations, officer assignment and classification, techniques of military instruction, logistics, and communication.
Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, credit in advanced military science at schools which normally offer such credit (7/74). *Version 2:* In the upper-division baccalaureate category, 2 semester hours in business organization and management and, on the basis of institutional evaluation, credit in advanced military science and in instructional methods (7/74).

MC-2204-0036

Nuclear and Chemical Weapons Employment
(Weapons Employment)
(Nuclear, Biological and Chemical (NBC) Weapons Employment)
(Nuclear Weapons Employment)
(Atomic Weapons Employment)

Course Number: None.
Location: Marine Corps School, Quantico, VA.
Length: 3-8 weeks (113-205 hours).
Exhibit Dates: 6/59-1/88.
Objectives: To provide knowledge and preparation necessary for officers to tactically employ nuclear and chemical weapons.
Instruction: Lectures and practical exercises in military, nuclear, and chemical weapons uses and effects, nuclear damage estimations, target analysis, chemical weapons employment, and tactical application of nuclear and chemical weapons.
Credit Recommendation: Credit is not recommended because of the limited specialized nature of the course (6/75).

MC-2204-0037

Platoon Leaders Class (Junior)

Course Number: None.
Location: Officer Candidate School, Quantico, VA; Marine Corps School, Quantico, VA.
Length: 6-7 weeks (205-283 hours).
Exhibit Dates: 6/53-7/86.
Objectives: To train officer candidates for service as Marine Corps officers.
Instruction: Lectures and practical experience in leadership, infantry weapons, small unit tactics, and other general military subjects.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in advanced military science (11/80).

MC-2204-0038

Basic Military Training
(Recruit Training)

Course Number: 809.
Location: Recruit Depot, San Diego, CA. Recruit Depot, Cp. Pendleton, CA. Recruit Depot, Parris Island, SC.
Length: 10-11 weeks (375-410 hours).
Exhibit Dates: 12/76-Present.
Objectives: To provide basic policy guidance and training in the essential subjects required of all marines and to ensure preparedness for follow-on training.
Instruction: Training includes code of conduct, military law, leadership, orientation lectures, history, customs, courtesies, uniform and clothing, mission and organization of the Marine Corps, interior guard, personal health and hygiene, swimming and first aid, close order drill, close combat, observing and reporting, individual movement, camouflage and concealment, field fortifications, helicoptor-borne operations, NBC defense, offensive and defensive combat, mines and boobytraps, physical conditioning, and parades and ceremonies.
Credit Recommendation: In the lower-division baccalaureate/associate degree category, 2 semester hours in marksmanship, 1 in personal health/hygiene, 1 in outdoor skills practicum, 3 in personal conditioning/fitness, and 1 in first aid (4/87).

MC-2204-0039

Naval Gunfire Officer

Course Number: None.
Location: Educational Center, Quantico, VA.
Length: 11 weeks (309 hours).
Exhibit Dates: 6/56-12/68.
Objectives: To prepare officers in all phases of naval gunfire support, shore bombardment, and shore fire control with special emphasis on landing forces.
Instruction: Lectures and practical exercises in the characteristics of naval gunfire, fire support ships, equipment and materiel, gunnery, communications, organization, control and staff functions, operations planning, training, and familiarization with other service organizations.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

MC-2204-0040

Platoon Leaders Class (Senior)

Course Number: None.
Location: Officer Candidate School, Quantico, VA; Marine Corps School, Quantico, VA.
Length: 6-8 weeks (196-305 hours).
Exhibit Dates: 7/54-7/86.
Objectives: To prepare selected personnel to become commissioned officers.
Instruction: Lectures and practical exercises in drill, unit formation, command voice, inspections, parades and reviews, physical conditioning, leadership, weapons, code of conduct, small unit tactics, military law, guard duty, map reading, first aid, and indoctrination.
Credit Recommendation: In the upper-division baccalaureate category, 3 semester hours in advanced military science (11/80).

MC-2204-0041

Amphibious Vehicle Company Officer

Course Number: None.
Location: Tracked Vehicle Operations School, Cp. Pendleton, CA.
Length: 10 weeks (393 hours).
Exhibit Dates: 7/58-12/68.

Objectives: To train company grade officers in the tactical employment of amphibious tractor and armored amphibious units in combat.

Instruction: Lectures and practical exercises in protective maintenance of landing vehicle tank, basic radio communication, map reading, direct and indirect fire gunnery on machine gun and 105mm Howitzer, and tactical employment in night and day operations.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

MC-2204-0042

BASIC COURSE
(Special Basic Course)

Course Number: None.

Location: Basic School, Quantico, VA.

Length: *Version 1:* 21 weeks (763-764 hours). *Version 2:* 21-30 weeks (934-1054 hours). *Version 3:* 29 weeks (1047-1062 hours). *Version 4:* 28-32 weeks (987-1169 hours).

Exhibit Dates: *Version 1:* 10/79-2/85. *Version 2:* 5/64-9/79. *Version 3:* 7/62-4/64. *Version 4:* 7/57-6/62.

Objectives: To train newly commissioned officers to assume company duties.

Instruction: Lectures and practical exercises in amphibious operations, communications, field engineering, infantry weapons, leadership, map and aerial photograph reading, military law, personnel administration, and infantry tactics.

Credit Recommendation: *Version 1:* In the upper-division baccalaureate category, 3 semester hours in advanced military science (11/80). *Version 2:* In the upper-division baccalaureate category, credit in advanced military science at institutions which normally grant such credit (7/74). *Version 3:* In the upper-division baccalaureate category, credit in French or Spanish on the basis of institutional evaluation and credit in advanced military science at institutions which normally grant such credit (7/74). *Version 4:* In the upper-division baccalaureate category, credit in advanced military science at institutions which normally grant such credit (7/74).

MC-2204-0043

SPECIAL INDOCTRINATION

Course Number: None.

Location: Basic School, Quantico, VA.

Length: 6 weeks (219-264 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To familiarize former Naval aviation cadets with the duties of Marine Corps junior officers.

Instruction: Lectures and practical exercises in drill and command, weapons, leadership, map and aerial photograph reading, field engineering, amphibious warfare, and Marine Corps organization, mission, functions, tactics, communications, personnel administration, logistics and supply, and military law.

Credit Recommendation: In the upper-division baccalaureate category, credit in advanced military science at institutions which normally offer such credit (7/74).

MC-2204-0044

INFANTRY WEAPONS ARMORERS
ADVANCED

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: 6-7 weeks (180-203 hours).

Exhibit Dates: 7/58-12/68.

Objectives: To train noncommissioned officers to make and supervise extensive repairs to infantry weapons.

Instruction: Lectures and practical exercises in the use of common and special tools and gages to inspect and repair rifles, handguns, flamethrowers, mortars, shotguns, and machineguns, and blueing.

Credit Recommendation: In the vocational certificate category, 3 semester hours in small arms repair (armorer) (5/74).

MC-2204-0045

ARTILLERY OFFICER ORIENTATION

Course Number: None.

Location: Marine Corps School, Quantico, VA.

Length: 4-5 weeks (145-194 hours).

Exhibit Dates: 10/56-12/72.

Objectives: To train personnel in the duties of the artillery unit officer and the operations of a field artillery firing battery.

Instruction: Lectures and practical exercises in the organization of the field artillery unit, communication and equipment, survey, gunnery, observed fire and fire direction procedures, equipment and materials of field artillery battery.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (7/74).

MC-2204-0046

BASIC MILITARY TRAINING (WOMEN)
Recruit Training (Women)
(Female Recruit Training)

Course Number: None.

Location: Recruit Depot, Parris Island, SC.

Length: 8 weeks (248 hours).

Exhibit Dates: 12/79-Present.

Objectives: To provide basic policy guidance and training in the essential subjects required of all Marines and to ensure preparedness for follow-on training.

Instruction: Training includes code of conduct, military law, leadership, orientation, history, customs, military courtesies, the mission and organization of the Marine Corps, uniform and clothing, interior guard, close order drill, field living, first aid, swimming, observing and reporting, individual movement, and parades and ceremonies.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 1 semester hour in first aid, 1 in personal health/hygiene, 2 in personal conditioning/fitness (9/79).

MC-2204-0047

BASIC MORTARMAN
(Mortarman)

Course Number: 034.

Location: Infantry School, Cp. Lejeune, NC; Infantry Training School, Cp. Pendleton, CA.

Length: 5-7 weeks (173-488 hours).

Exhibit Dates: 7/74-Present.

Objectives: To provide intensive training in weapons and combat skills.

Instruction: Lectures and practical exercises in 81mm mortar; 60mm mortar; offensive, defensive, and patrolling operations; land navigation; and offensive and defensive tactics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/87).

MC-2204-0048

BASIC MACHINEGUNNER
(Machinegunner)

Course Number: 033.

Location: Infantry School, Cp. Lejeune, NC; Infantry Training School, Cp. Pendleton, CA.

Length: 5-7 weeks (134-194 hours).

Exhibit Dates: 7/74-Present.

Objectives: To provide intensive training in weapons and combat skills to produce machinegunners capable of closing with and capturing or destroying the enemy.

Instruction: Course provides instruction in general military subjects pertaining to infantrymen to include tactical employment operations and field exercises in conjunction with riflemen, mortarmen and antitank assaultmen. Topics include camouflage, patrolling operations, and basic offensive and defensive tactics relating to the 7.62 M-60 machinegun.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/87).

MC-2204-0049

ANTITANK ASSAULTMAN

Course Number: None.

Location: Infantry Training School, Cp. Pendleton, CA.

Length: 5 weeks (157 hours).

Exhibit Dates: 7/74-1/88.

Objectives: To provide intensive training in infantry antitank assault weapons.

Instruction: Lectures and practical exercises in general military subjects with emphasis on specialized training in weapons and tactics related to infantry antitank weapons employment on the battlefield.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (6/75).

MC-2204-0050

OFFICER CANDIDATE SCHOOL
(Platoon Leaders (Combined Junior/Senior))
(Officer Candidate)

Course Number: None.

Location: Marine Corps School, Quantico, VA.

Length: 10-12 weeks (361-474 hours).

Exhibit Dates: 7/57-7/86.

Objectives: To motivate and train selected personnel to become commissioned officers.

Instruction: Lectures and practical exercises in weapons information and identification; small unit tactics; Marine Corps organization, mission, and functions; uniforms and equipment; drill, inspection, and parades; leadership; physical training; land navigation; maps; and military law.

Credit Recommendation: In the upper-division baccalaureate category, 6 semester hours in advanced military science (11/80).

MC-2204-0051

BASIC RIFLEMAN
(Rifleman)

Course Number: 031.

Location: Infantry Training School, Infantry School. Cp. Lejeune, NC; Cp. Pendleton, CA.

Length: 5-7 weeks (163-288 hours).

Exhibit Dates: 7/74-Present.

Objectives: To provide infantrymen with training in weapons and combat skills.

Instruction: Lectures and practical exercises in land navigation; supporting arms;

detection of mines and booby traps; helicopter operations; tracked vehicles; technique of fire and combat firing positions; scouting and patrolling; and offensive and defensive tactics.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (5/87).

MC-2204-0052

INFANTRY WEAPONS ARMORER BASIC

Course Number: None.

Location: Ordnance School, Quantico, VA.

Length: *Version 1:* 7 weeks (280 hours). *Version 2:* 4-5 weeks (180-203 hours).

Exhibit Dates: *Version 1:* 5/67-12/68. *Version 2:* 7/58-4/67.

Objectives: To train personnel to repair infantry weapons.

Instruction: Lectures and practical exercises in troubleshooting, disassembly, inspection, repair, reassembly and testing of rifles, pistols, grenade launchers, rocket launchers, and mortars; care and use of hand tools; and repair by component replacement.

Credit Recommendation: *Version 1:* In the vocational certificate category, 2 semester hours in small arms repair (armorer) (5/75). *Version 2:* In the vocational certificate category, 1 semester hour in small arms repair (armorer) (5/75).

MC-2204-0053

STAFF NONCOMMISSIONED OFFICER (NCO) ACADEMY RESERVE

(Reserve Staff Noncommissioned Officer (NCO) Academy)

Course Number: None.

Location: Staff Noncommissioned Officer Academy,CP. Lejeune, NC; Staff Noncommissioned Officer Academy, El Toro, CA.

Length: 2 weeks (68 hours).

Exhibit Dates: 5/78-Present.

Objectives: To develop leadership skills necessary to function as a staff noncommissioned officer in the U.S. Marine Corps.

MC-2204-0055

INFANTRY OFFICER

Course Number: None.

Location: Infantry Officers School, Quantico, VA.

Length: *Version 1:* 8 weeks (375 hours). *Version 2:* 6 weeks (288 hours).

Exhibit Dates: *Version 1:* 10/80-6/85. *Version 2:* 10/76-9/80.

Objectives: To train selected company grade officers in an infantry specialty.

Instruction: Course includes multimedia instruction in specified infantry subjects (small-unit level) with heavy emphasis on field tactics.

Credit Recommendation: *Version 1:* Credit is not recommended because of the military-specific nature of the course (11/80). *Version 2:* Credit is not recommended because of the military-specific nature of the course (11/80).

MC-2204-0056

FUNCTIONS OF THE INFANTRY STAFF NONCOMMISSIONED OFFICER (NCO) BY CORRESPONDENCE

Course Number: 03.10M.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/81-12/85.

Objectives: This course of study covers administrative and tactical subjects related specifically to military operations.

Instruction: This correspondence course consists of study units which include combat intelligence, fire support, air support, and amphibious operations. A supervised final examination without texts or notes is administered.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/85).

MC-2204-0057

THE MARINE MARKSMAN BY CORRESPONDENCE

Course Number: 03.64a; 03.64.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 12/82-12/86.

Objectives: To develop the knowledge, skills, and techniques of marksmanship.

Instruction: This correspondence course presents information through a series of study units covering such topics as service rifle and hand-gun marksmanship, field firing techniques and the care and cleaning of weapons. A supervised final examination without textbook or notes will be administered.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/85).

MC-2204-0058

THE MARINE SQUAD LEADER: COMBAT PLANNING AND ORDERS BY CORRESPONDENCE

Course Number: 03.46C.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 6/82-12/85.

Objectives: To provide instruction in techniques and procedures as needed for squad leaders.

Instruction: Correspondence instruction is offered in troop leading procedures, and in developing plans and combat orders.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/85).

MC-2204-0060

M60 MACHINE GUN BY CORRESPONDENCE

Course Number: 03.20K.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 4/84-8/88.

Objectives: To provide information on the operation of the M60 machine gun.

Instruction: This correspondence course presents a series of study units on the M60 machine gun including such topics as mechanical operations, marksmanship, and firing techniques. A proctored examination concludes the course.

Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/85).

MC-2204-0061

THE 81MM MORTAR NONCOMMISSIONED OFFICER (NCO) BY CORRESPONDENCE

Course Number: 03.31G.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 3/82-6/85.

Objectives: To provide a course of study related to the various elements necessary for the operation of the 81mm mortar platoon.

Instruction: This correspondence course presents a series of study units covering such topics as the organization of the mortar platoon, the operation of each component including the forward observer, and the fire direction center. Various summary exercises are included. A supervised final examination without textbook or notes will be administered.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/85).

MC-2204-0062

LANDMINE WARFARE AND DEMOLITIONS BY CORRESPONDENCE

Course Number: 03.4M.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.

Exhibit Dates: 7/79-7/89.

Objectives: To provide a course of study dealing with explosives, landmines and demolitions used by the Marine Corps.

Instruction: This correspondence course presents a series of study units covering topics such as types of mines and other explosives, laying of breaching minefields, foreign mine warfare, and the use of demolitions charges. A supervised final examination without textbook or notes is administered.

Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (3/85).

MC-2204-0063

MARINE INFANTRY SMALL UNITS IN COUNTERINSURGENCY OPERATIONS BY CORRESPONDENCE

Course Number: 03.30C.

Location: Marine Corps Institute, Washington, DC.

Length: Maximum 52 weeks.
Exhibit Dates: 9/78–12/88.
Objectives: To provide information on counterinsurgency operations in the emerging nations of the world.
Instruction: A series of study units covering topics such as the communist challenge in the underdeveloped countries, civil affairs and civil actions, security and intelligence, and selected civic actions projects is presented through correspondence. A supervised final examination without text books or notes is administered.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/85).

MC-2204-0064

MAINTENANCE OF THE M60 SERIES MACHINE GUNS BY CORRESPONDENCE

Course Number: 21.30.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 5/83–Present.
Objectives: To provide training in the inspection, assembly/disassembly, and repair of the M60 series (7.62 mm) machine gun.
Instruction: This correspondence course consists of six study units to include inspection, assembly/disassembly, functioning, preventive maintenance, and repair of the M60 series (7.62 mm) machine gun used by the Marine Corps. This course is followed by a supervised two hour examination without texts or notes.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/85).

MC-2204-0065

INSPECTION AND REPAIR OF THE CALIBER MACHINE GUN BY CORRESPONDENCE

Course Number: 21.31.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 8/84–Present.
Objectives: To provide training in the inspection, maintenance, and repair of the .50 caliber machine gun used by the Marine Corps.
Instruction: This correspondence course consists of six study units which include assembly/disassembly, preventive maintenance, functioning and repair of the .50 caliber machine gun used by the Marine Corps. The course concludes with a two hour supervised examination without texts or notes.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/85).

MC-2204-0066

INSPECTION AND REPAIR OF SHOULDER WEAPONS BY CORRESPONDENCE

Course Number: 21.28C.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 11/81–Present.
Objectives: To provide information necessary to acquire the skill to inspect and repair infantry shoulder weapons.
Instruction: This course consists of three study units covering the Remington 12 gauge shotgun, 5.56 mm rifle and 40 mm grenade launcher, followed by a two hour supervised examination without textbooks or notes.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/85).

MC-2204-0067

PISTOL AND REVOLVER PREVENTIVE AND CORRECTIVE MAINTENANCE BY CORRESPONDENCE

Course Number: 21.29.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 8/79–12/89.
Objectives: To provide training in the maintenance of the .45 caliber automatic pistol and the .38 caliber revolver.
Instruction: This correspondence course consists of three study units covering maintenance and repair of the .45 caliber automatic pistol and the .38 caliber revolver. The course concludes with a two hour supervised final examination without texts or notes.
Credit Recommendation: Credit is not recommneded because of the limited, specialized nature of the course (3/85).

MC-2204-0068

TACTICS OF THE MARINE RIFLE SQUAD BY CORRESPONDENCE

Course Number: 03.7P.
Location: Marine Corps Institute, Washington, DC.
Length: Maximum 52 weeks.
Exhibit Dates: 5/84–12/85.
Objectives: To provide a course of study in all phases of offensive and defensive combat of the Marine rifle squad.
Instruction: This correspondence course of study offers units covering topics such as the organization, armament, and equipment of the rifle squad, offensive and defensive combat, and special tactics and techniques.
Credit Recommendation: Credit is not recommended because of the limited, specialized nature of the course (3/85).

MC-2204-0069

BASIC LANDING SUPPORT SPECIALIST

Course Number: 131.
Location: Engineer School, Cp. Lejeune, NC.
Length: 4–6 weeks (140–163 hours).
Exhibit Dates: 10/84–Present.
Learning Outcomes: Upon completion of the course, the student will be able to perform tasks normally associated with shore party landing support, such as camouflage, field fortifications, and demolitions.
Instruction: Includes lectures and practical experiences in camouflage, mine warfare, demolitions, amphibious operations, and field fortification construction.
Credit Recommendation: Credit is not recommended because of the military-specific nature of the course (9/89).

MC-2204-0070

AMPHIBIOUS WARFARE

Course Number: RGA.
Location: Air Ground Training and Education Center, Quantico, VA; Amphibious Warfare School, Quantico, VA.
Length: 39 weeks (1183–1303 hours).
Exhibit Dates: 8/84–Present.
Learning Outcomes: Upon completion of the course the student will be able to plan, organize, direct, coordinate, and control task-force operations, including the functions of information gathering, logistics, and human resource management; the officer will also be familiar with aspects of military history and miltary arts and sciences; and will be able to apply management principles to running a small independent organization.

MC-2204-0081

Infantry Officer

Course Number: RGU.
Location: Basic School, Quantico, VA.
Length: 9-10 weeks (532-550 hours).
Exhibit Dates: 7/85-Present.

Learning Outcomes: Upon completion of the course, the student will be able to command and lead an infantry platoon in accomplishing complex missions under conditions of physical and mental stress, and to synchronize the applications of supporting organizations and resources as well as build and sustain individual and group esprit.

Instruction: Through lectures, demonstrations and extensive practical application exercises, the course trains students in infantry tactics and in the capabilities of supporting organizations. There is heavy emphasis on the leader as a problem solver and decision maker.

Credit Recommendation: Credit is not recommended due to the military-specific nature of the course (6/90).

MC-2204-0082

Reserve Warrant Officer Basic

Course Number: R2T.
Location: Basic School, Quantico, VA.
Length: 2 weeks (95-96 hours).
Exhibit Dates: 7/85-Present.

Learning Outcomes: Upon completion of the course the student will be able to lead small groups in the completion of complex tasks; effectively manage subordinate personnel; and coordinate the efforts of supporting organizations.

Instruction: Lectures, demonstrations, and discussions present a survey of personnel and resource management techniques, personal fitness and conditioning activities, and basic military skills with emphasis on the role of the leader in small organizations.

Credit Recommendation: Credit is not recommended due to the limited, specialized content of the program (7/90).

MC-2204-0083

Basic Officer

Course Number: RMG.
Location: Basic School, Quantico, VA.
Length: 23 weeks (969-1096 hours).
Exhibit Dates: 3/85-Present.

Learning Outcomes: Upon completion of the course,the student will be able to lead small groups in the planning for and execution of complex tasks performed under conditions of physical and mental stress; to synchronize the application of supporting organizations and resources; to develop individual and group proficiency through programs to train, motivate, counsel, evaluate, and discipline subordinates; and to build and sustain individual and group esprit and cohesiveness.

Instruction: Lectures, demonstrations and practical application exercises on leadership and management principles including personnel training, counseling, motivation, evaluating and disciplining; interpersonal communication skills, information management, and resource management. There is heavy emphasis on problem solving and decision making processes. Course also includes technical instruction in physical education focusing on personal fitness and hygiene, marksmanship and first aid/water survival techniques. Through extensive use of case studies and historical examples, also provides coverage of defense issues including total and limited war, guerilla warfare, terrorism, laws of land warfare, and personal conduct during combat.

Credit Recommendation: In the lower-division baccalaureate/associate degree category, 3 semester hours in physical education, 1 in cartography (6/90); in the upper-division baccalaureate category, 3 semester hours in leadership (6/90).

MC-2204-0084

Warrant Officer Basic

Course Number: RMN.
Location: Basic School, Quantico, VA.

In the lower-division ccalaureate/associate degree category, 3 mester hours in aviation maintenance chnology (or 1 semester hour in aircraft opeller and electrical systems, 1 in ound operation and servicing, and 1 in eaning and corrosion control), and 3 in DC electrical fundamentals, 3 in electricity/ ectronics, 3 in electricity/electronics laboatory, 12 in aircraft electrical maintenance, 3 in aircraft electrical indicating systems, nd 2 in personnel supervision (5/84).

commendation, AEC

In the vocational certificate category, 3 emester hours in aviation maintenance chnology (or 1 semester hour in propeller d electrical systems, 1 in ground operation and servicing, and 1 in cleaning and orrosion control), and 3 semester hours in DC electrical fundamentals, 3 in electricity/ ectronics, 3 in electricity/electronics laboratory, 12 in aircraft electrical maintenance, 3 in aircraft electrical indicating systems, 3 in maintenance management, and 3 in shop management. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in aircraft propeller and electrical systems, 1 in ground operation and servicing, and 1 in cleaning and corrosion control), and 3 in DC electrical fundamentals, 3 in electricity/electronics, 3 in electricity/electronics laboratory, 12 in aircraft electrical maintenance, 3 in aircraft electrical indicating systems, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, and 3 in principles of management (5/84).

Recommendation, AECS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AEC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, AECM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AEC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

AMC
AMCS
AMCM

Exhibit Dates: 1/71–Present.

Occupational Group: V (Aviation).

Career Pattern

SN: Seaman (E-3). *AM3:* Aviation Structural Mechanic, Third Class (E-4). *AM2:* Aviation Structural Mechanic, Second Class (E-5). *AM1:* Aviation Structural Mechanic, First Class (E-6). *AMC:* Chief Aviation Structural Mechanic (E-7). *AMCS:* Senior Chief Aviation Structural Mechanic (E-8). *AMCM:* Master Chief Aviation Structural Mechanic (E-9).

Description

Summary: Maintains aircraft fuselages, wings, fixed and movable control surfaces, and control mechanisms; removes, installs, and rigs flight control surfaces; fabricates and assembles metal parts; makes minor repairs to aircraft skin, performs non-destructive testing procedures using dye penetrant and zyglo methods; maintains hydraulic systems and components, landing gear, wheels and tires, brakes, and related components; maintains fire extinguishing systems plumbing; makes repairs to bladder and integral fuel systems; performs cable swedging; performs electric arc and gas welding operations; performs corrosion control procedures. *AM3:* Services tires and other compressed air systems; operates and maintains paint spray guns; performs corrosion control; applies paints and finishes on aircraft; performs helicopter preflight inspections; lays out patterns and templates for metal work; changes aircraft wheel and tire assemblies. *AM2:* Able to perform the duties required for AM3; maintains and operates tion Electrician's Mate, Second Class (E-5). *AE1:* Aviation Electrician's Mate, First Class (E-6). *AEC:* Chief Aviation Electrician's Mate (E-7). *AECS:* Senior Chief Aviation Electrician's Mate (E-8). *AECM:* Master Chief Aviation Electrician's Mate (E-9).

Description

Summary: Handles and services aircraft; inspects and maintains aircraft electrical and instrument systems, including: power generation, conversion and distribution systems; interior and exterior lighting; electrical components of aircraft controls, including airframe, engine, propeller, and utility control systems; aircraft electrical starting systems, including starters, starting controls and ignition system components; aircraft engine, flight, and flight control instruments; instrument systems; and non-instrument type indicating warning systems; aircraft automatic flight control system, including automatic pilots, flight director systems, aircraft compasses, and altitude reference systems; aircraft batteries and related electrical components. *AE3:* Observes safety precautions while working with energized and de-energized electrical and electronic equipment; checks electrical bonding and shock mountings for condition; replaces and adjusts electrical limit switches; troubleshoots and corrects DC electrical malfunctions; installs instrument indicator range marks; solves simple DC series, parallel and combination circuits; solves voltage divider and bridge circuits; troubleshoots a full-wave bridge PN junction diode vectifier with PL filter; traces signal flow in a common base, emitter, and collector transistor amplifier circuit; plots a frequency response curve for a direct RIC and transformer-coupled amplifier; acts as fireguard during start; ties down and secures aircraft. *AE2:* Able to perform the duties required for AE3; checks and operates ground support equipment and aircraft servicing equipment; supervises aircraft washing; tests, selects, and replaces circuit parts, including electron tubes and solid state devices; adjusts and aligns parts or circuitry; performs pitot-static tests; removes and replaces instrument indicators, transmitters, and sensors; tests fire detection systems; tests and calibrates flight instrument systems; calibrates fuel quantity, engine temperature, air data, and aircraft instrument systems; troubleshoots engine analyzer systems; performs tests on aircraft lighting systems; fabricates and installs aircraft electrical cables; tests power generating systems, aircraft batteries, circuit components, generator armatures, and voltage regulators; adjusts inverter speed control governors; tests hydraulic valve and actuator electrical components, aircraft pressurization and cabin temperature control, and fuel transfer systems; troubleshoots starting control electrical circuits; performs operational checks of aircraft electrical compass systems; swings and calibrates magnetic compasses; operationally checks automatic flight control and stabilization systems. *AE1:* Able to perform the duties required for AE2; supervises aircraft ground handling and servicing; calibrates engine temperature indicating systems, engine performance indicating and warning systems, air data systems, and aircraft instruments; diagnoses engine analyzer system malfunctions; inspects newly installed wiring on aircraft; makes three-phase wye and delta connections of transformers; diagnoses aircraft pressurization and cabin temperature control system malfunctions; maintains, tests, and adjusts electric and/or electronic control systems of aircraft automatic flight control and stablilization systems; troubleshoots automatic flight control and flight director systems. *AEC:* Able to perform the duties required for AE1; inspects work areas, tools, and aviation equipment to detect potentially hazardous and unsafe conditions and takes appropriate corrective action; prepares reports and maintains equipment records; supervises on-the-job training; prepares preventive maintenance schedules. *AECS:* Able to perform the duties required for AEC; serves as enlisted technical or specialty expert; plans, organizes, and directs work of personnel handling and servicing aircraft; plans and administers on-the-job training programs; supervises the preparation of reports. *AECM:* Able to perform the duties required for AECS; serves as senior enlisted technical or specialty administrator; manages personnel in the handling and servicing of aircraft; ensures maximum efficiency of the work force and equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, AE3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in aircraft propeller and electrical systems, 1 in ground operation and servicing, and 1 in cleaning and corrosion control), and 3 in DC electrical fundamentals (5/84).

Recommendation, AE2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in aircraft propeller and electrical systems, 1 in ground operation and servicing, and 1 in cleaning and corrosion control), and 3 in DC electrical fundamentals, 3 in electricity/electronics, 3 in electricity/electronics laboratory, and 12 in aircraft electrical maintenance (5/84).

Recommendation, AE1

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in aircraft propeller and electrical systems, 1 in ground operation and servicing, and 1 in cleaning and corrosion control), and 3 in DC electrical fundamentals, 3 in electricity/electronics laboratory, 12 in aircraft electrical maintenance, and 3 in aircraft electrical indicating systems. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in aircraft propeller and electrical systems, 1 in ground operation and servicing, and 1 in cleaning and corrosion control), and 3 in DC electrical fundamentals, 3 in electricity/electronics, 3 in electricity/electronics laboratory, 12 in aircraft electrical maintenance, 3 in aircraft electrical indicating systems, and 2 in personnel supervision (5/84).

Recommendation, AEC

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in propeller and electrical systems, 1 in ground operation and servicing, and 1 in cleaning and corrosion control), and 3 semester hours in DC electrical fundamentals, 3 in electricity/electronics, 3 in electricity/electronics laboratory, 12 in aircraft electrical maintenance, 3 in aircraft electrical indicating systems, 3 in maintenance management, and 3 in shop management. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in aircraft propeller and electrical systems, 1 in ground operation and servicing, and 1 in cleaning and corrosion control), and 3 in DC electrical fundamentals, 3 in electricity/electronics, 3 in electricity/electronics laboratory, 12 in aircraft electrical maintenance, 3 in aircraft electrical indicating systems, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, and 3 in principles of management (5/84).

Recommendation, AECS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AEC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, AECM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AEC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

Description

Summary: Maintains aircraft fuselages, wings, fixed and movable control surfaces, and control mechanisms; removes, installs, and rigs flight control surfaces; fabricates and assembles metal parts; makes minor repairs to aircraft skin, performs non-destructive testing procedures using dye penetrant and zyglo methods; maintains hydraulic systems and components, landing gear, wheels and tires, brakes, and related components; maintains fire extinguishing systems plumbing; makes repairs to bladder and integral fuel systems; performs cable swedging; performs electric arc and gas welding operations; performs corrosion control procedures. *AM3:* Services tires and other compressed air systems; operates and maintains paint spray guns; performs corrosion control; applies paints and finishes on aircraft; performs helicopter preflight inspections; lays out patterns and templates for metal work; changes aircraft wheel and tire assemblies. *AM2:* Able to perform the duties required for AM3; maintains and operates ground support equipment; services fuel, oil, and hydraulic systems; performs preflight, throughflight, and postflight inspections; assembles and installs aircraft equipment and parts; replaces airframe pressure seals; performs metal repairs; fabricates and installs metal members of structure of aircraft; inspects and repairs integral and bladder-type fuel cells; services and maintains brake systems; services, maintains, and inspects landing gear controls, struts, locks, doors, and linkages. *AM1:* Able to perform the duties required for AM2; supervises aircraft servicing operations; performs quality assurance inspection of corrosion removal; supervises and interprets maintenance and use of maintenance directives; supervises inspections, mintenance, and repair of aircraft systems; rigs and adjusts landing gear nose wheel steering mechanisms; removes and replaces landing gear assemblies. *AMC:* Able to perform the duties required for AM1; serves as shop supervisor; supervises personnel in all categories of equipment maintenance and repair; prepares preventive maintenance schedules; organizes and maintains technical library; prepares and submits budget requests; plans and supervises on-the-job training. *AMCS:* Able to perform the duties required for AMC; serves as enlisted technical or specialty expert; plans, organizes, and directs the work of personnel maintaining aircraft structures; plans and administers on-the-job training programs; supervises the preparation of reports. *AMCM:* Able to perform the duties required for AMCS; serves as senior enlisted technical or specialty administrator; manages personnel in the maintenance of aircraft structures; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, AM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology, (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in flight control systems) (5/84).

Recommendation, AM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in flight control systems), and 3 in aircraft fuel systems, 3 in landing gear systems, 3 in airframe structural repairs, 3 in assembly and rigging, and 3 in aircraft hydraulic systems (5/84).

Recommendation, AM1

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in flight control systems), and 3 in aircraft fuel systems, 3 in landing gear systems, 3 in airframe structural repairs, 3 in assembly and rigging, 3 in aircraft hydraulic systems, and 3 in airframe inspections. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in flight control systems), and 3 in aircraft fuel systems, 3 in landing gear systems, 3 in airframe structural repair, 3 in assembly and rigging, 3 in aircraft hydraulic systems, 3 in airframe inspections, and 2 in personnel supervision (5/84).

Recommendation, AMC

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in flight control systems), and 3 in aircraft fuel systems, 3 in landing gear systems, 3 in airframe structural repair, 3 in assembly and rigging, 3 in aircraft hydraulic systems, 3 in airframe inspections, 3 in maintenance management, and 3 in shop management. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in flight control systems), and 3 in aircraft fuel systems, 3 in landing gear systems, 3 in airframe structural repair, 3 in assembly and rigging, 3 in aircraft hydraulic systems, 3 in airframe inspections, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, and 3 in principles of management (5/84).

Recommendation, AMCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, AMCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for AMC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

ASM2
ASM1
ASMC
ASMCS
ASMCM

Exhibit Dates: 1/71-Present.

Occupational Group: V (Aviation).

Career Pattern

SN: Seaman (E-3). *ASM3:* Aviation Survivalman, Third Class (E-4). *ASM2:* Aviation Survivalman, Second Class (E-5). *ASM1:* Aviation Survivalman, First Class (E-6). *ASMC:* Chief Aviation Survivalman (E-7). *ASMCS:* Senior Chief Aviation Survivalman (E-8). *ASMCM:* Master Chief Aviation Survivalman (E-9).

Description

Summary: Inspects, maintains, and repairs parachutes, survival equipment flight and protective clothing, small arms, oxygen and fire extinguisher systems; instructs aviation personnel in the use and operation of parachutes, survival equipment and techniques, safety practices, and aviation ordnance handling; qualified in aircraft handling and aircraft handling equipment; practices and observes all safety precautions and practices. *ASM3:* Inspects, repairs, packs, and maintains personnel and cargo delivery parachutes; understands parachute loft working procedures; uses hand stitching and sewing machine making fabric repairs; makes minor repairs and adjustments to sewing machines; inspects survival equipment, salvage pumps, oxygen masks, and ordnance and pyrotechnics; inspects and services inflatable survival equipment; services oxygen systems and components; understands aircraft handling and procedures; inspects and maintains small arms and other aviation ordnance. *ASM2:* Able to perform the duties required for ASM3; instructs aviation personnel in survival equipment, parachutes, oxygen, and fire extinguisher systems; tows, taxis, and secures aircraft; serves as a member of an aircraft handling team; accomplishes preflight and postflight servicing of aircraft systems and equipment; identifies aircraft corrosion factors; prepares survival training programs; uses tools and precision measuring equipment and related electrical testing devices; uses related drawings, blueprints, and manuals. *ASM1:* Able to perform the duties required for ASM2; instructs in procedures for rigging and launching survival equipment; repairs and calibrates special tools; uses and maintains records, forms, publications, and manuals; performs quality assurance; supervises shop procedures, repairs sewing machines, and determines reparability of related equipment; maintains custody of small arms. *ASMC:* Able to perform the duties required for ASM1; trains and supervises personnel in all categories of equipment operation, maintenance, and repair; prepares maintenance schedules; organizes and maintains a technical library; insures safe working conditions; plans and supervises training programs. *ASMCS:* Able to perform the duties required for ASMC; serves as enlisted technical or specialty expert; plans, organizes, and directs the work of personnel operating, servicing, and maintaining parachutes, survival and rescue equipment, related aircraft systems, small arms, aviation ordnance, preflight and postflight inspections; analyzes system malfunctions; plans and administers on-the-job training programs; supervises the preparation of reports; uses the computerized maintenance system and establishes safety procedures and practices. *ASMCM:* Able to perform the duties required for ASMCS; serves as senior enlisted technical or specialty administrator; manages personnel in the operation, maintenance, and procurement of related equipment; ensures maximum efficiency of the work force and equipment.

Recommendation, ASM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft systems) (5/84).

Recommendation, ASM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance tehnology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft systems), and 3 in aircraft system technology and 3 in parachute inspection and rigging (5/84).

Recommendation, ASM1

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft systems), and 3 in aircraft system technology, 3 in parachute inspection and rigging, 3 in industrial safety, and 3 in textile machine repair. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft systems), and 3 in aircraft system technology, 3 in parachute inspection and rigging, 3 in industrial safety, 3 in textile machine repair, and 2 in personnel supervision (5/84).

Recommendation, ASMC

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft systems), and 3 in aircraft system technology, 3 in parachute inspection and rigging, 3 in industrial safety, 3 in textile machine repair, 3 in maintenance management, and 3 in shop management. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft systems), and 3 in aircraft system technology, 3 in parachute inspection and rigging, 3 in industrial safety, 3 in textile machine repair, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, and 3 in principles of management (5/84).

Recommendation, ASMCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ASMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, ASMCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ASMCS. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

CGR-AT-001

AVIATION ELECTRONICS TECHNICIAN

AT3
AT2
AT1
ATC
ATCS
ATCM

Exhibit Dates: 1/71–Present.

Occupational Group: V (Aviation).

Career Pattern

SN: Seaman (E-3). *AT3:* Aviation Electronics Technician, Third Class (E-4). *AT2:* Aviation Electronics Technician, Second Class (E-5). *AT1:* Aviation Electronics Technician, First Class (E-6). *ATC:* Chief Aviation Electronics Technician (E-7). *ATCS:* Senior Chief Aviation Electronics Technician (E-8). *ATCM:* Master Chief Aviation Electronics Technician (E-9).

Description

Summary: Handles and services aircraft; performs related aircraft inspections, line maintenance and aircraft changes; operates, maintains, repairs, calibrates, tunes, and aligns avionics systems (communications, navigation, and microwave equipment); makes authorized repairs and adjustments to associated test equipment. *AT3:* Understands electrical and electronic theory, conductors, insulators, resistors, capacitors, and inductors; solves problems using Ohm's Law, basic meter movements including ammeters, voltmeters and ohmmeters; understands AC theory, solid state devices, power supply devices, amplifiers, oscillators, filters, modulation integrated circuits, synchro and servo systems, microphones and head sets; uses binary conversions, Boolean algebra, and truth tables, AND and NAND gates, OB and NOR inverters and memory circuits and multivibrator; sets and adjusts tranceivers; operates communications equipment; performs preventive maintenance, basic troubleshooting, and minor repairs on communication and navigation systems; locates defective circuits and makes electrical connections by soldering and splicing; observes safety procedures and precautions on or around aircraft; eliminates electrical hazards; handles and services aircraft; identifies corrosion problems; operates common aircraft safety devices and uses related drawings, blueprints, and manuals. *AT2:* Able to perform the duties required for AT3; serves as a member of an aircraft handling team; operates ground service equipment; accomplishes normal postflight servicing on aircraft; performs corrosion inspections; demonstrates use of survival and emergency equipment; uses related tools and precision measuring devices; accomplishes equipment changes, fabricates electronic cables; operates, repairs, adjusts, aligns, and calibrates communication and navigation equipment. *AT1:* Able to perform the duties required for AT2; establishes safeguards; supervises aircraft ground handling; supervises aircraft servicing operations; analyzes test equipment for defects and determines corrective action; performs quality control inspections and evaluations; supervises an electronic shop; sets compensation of loop antennas; maintains files, records, publications, reports, and directives. *ATC:* Able to perform the duties required for AT1; inspects work areas, tools, and aviation equipment to detect potentially hazardous and unsafe conditions and takes appropriate corrective action; prepares tool, equipment, and material evaluation reports; maintains aircraft, ground support equipment, and other aviation equipment records; supervises assignment and training programs to ensure that personnel are assigned and trained for maximum utilization; supervises and trains personnel in the maintenance and repair of aeronautical components. *ATCS:* Able to perform the duties required for ATC; serves as enlisted technical or specialty expert; plans, organizes, and directs work of personnel handling and servicing aircraft; plans and administers on-the-job training programs; supervises the preparation of reports. *ATCM:* Able to perform the duties required for ATCS; serves as senior enlisted technical or specialty administrator; manages personnel in the handling and servicing of aircraft; ensures maximum effficiency of the work force and equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, AT3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in DC electrical fundamentals, 3 in AC electrical fundamentals, and 3 in navigation and communication systems (5/84).

Recommendation, AT2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft electrical systems), and 3 in DC electrical fundamentals, 3 in AC electrical fundamentals, 3 in navigation and communication systems, 3 in circuit theory, 3 in electrical/electronics laboratory, and 6 in navigation and communication system maintenance (5/84).

Recommendation, AT1

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft electrical systems), and 3 in DC electrical fundamentals, 3 in AC electrical fundamentals, 3 in navigation and communication systems, 3 in circuit theory, 3 in electrical/electronics laboratory, 6 in navigation and communication system maintenance, and 6 in electrical systems maintenance. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft electrical systems), and 3 in DC electrical fundamentals, 3 in AC electrical fundamentals, 3 in navigation and communication systems, 3 in circuit theory, 3 in electrical/electronics laboratory, 6 in navigation and communication systems maintenance, 6 in electrical systems maintenance, and 2 in personnel supervision (5/84).

Recommendation, ATC

In the vocational certificate category, 3 semester hours in aviation maintenance technology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft electrical systems), and 3 in DC electrical fundamentals, 3 in AC electrical fundamentals, 3 in navigation and communication systems, 3 in circuit theory, 3 in electrical/electronics laboratory, 6 in navigation and communication systems maintenance, 6 in electrical systems maintenance, 3 in maintenance management, and 3 in shop management. In the lower-division baccalaureate/associate degree category, 3 semester hours in aviation maintenance tehcnology (or 1 semester hour in cleaning and corrosion control, 1 in ground operation and servicing, and 1 in aircraft electrical systems), and 3 in DC electrical fundamentals, 3 in AC electrical fundamentals, 3 in navigation and communication systems, 3 in circuit theory, 3 in electrical/electronics laboratory, 6 in navigation and communication systems maintenance, 6 in electrical systems maintenance, 3 in personnel supervision, 3 in maintenance management, 3 in shop management, and 3 in principles of management (5/84).

Recommendation, ATCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ATC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, ATCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ATC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

Boatswain's Mate

BM3
BM2
BM1
BMC
BMCS
BMCM

Exhibit Dates: 1/71-Present.

Occupational Group: I (Deck).

Career Pattern

SN: Seaman (E-3). *BM3:* Boatswain's Mate, Third Class (E-4). *BM2:* Boatswain's Mate, Second Class (E-5). *BM1:* Boatswain's Mate, First Class (E-6). *BMC:* Chief Boatswain's Mate (E-7). *BMCS:* Senior Chief Boatswain's Mate (E-8). *BMCM:* Master Chief Boatswain's Mate (E-9).

Description

Summary: Proficient in marlinspike, deck, and boat seamanship; manages, supervises, and administers personnel and facilities; serves as deck watch officer and boat coxswain; trains, directs, and supervises personnel in seamanship, maintenance, rigging, deck equipment and boats; supervises damage control and working parties; maintains discipline; serves as member of gun crews or gun mount captains; operates and maintains heavy equipment used in loading and buoy tending work. *BM3:* Participates as crewman aboard thirty-foot or larger boat during various standard and emergency situations; performing as a coxswain, manuevers alongside a vessel underway, and docks under average conditions; demonstrates proper procedures for dealing with lawbreakers; interviews suspects and witnesses; collects evidence; demonstrates procedures for search and seizure. *BM2:* Able to perform the duties required for BM3; overhauls blocks; operates sailmaker equipment; performs decorative rope work; makes preparations for refueling and replenishment at sea. *BM1:* Able to perform the duties required for BM2; supervises individual work parties; supervises loading, storage and discharge of cargo and supplies; supervises anchor detail. *BMC:* Able to perform the duties required for BM1; supervises complete replenishment and refueling operations; acts as on-scene commander and/or search and rescue mission coordinator. *BMCS:* Able to perform the duties required for BMC; serves as enlisted technical or specialty expert; plans, organizes, and directs work of personnel; supervises the preparation of reports; plans and administers on-the-job training programs. *BMCM:* Able to perform the duties required for BMCS; serves as senior enlisted technical or specialty administrator; ensures maximum efficiency of the work force; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, BM3

In the vocational certificate category, 3 semester hours in vessel maintenance, 3 in seamanship, and 1 in rigging; if qualification code was HW (Surfman) or HX (Boat Coxswain), credit in small boat handling on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in vessel maintenance and 3 in seamanship; if qualification code was HW (Surfman) or HX (Boat Coxswain), credit in small boat handling on the basis of institutional evaluation (5/84).

Recommendation, BM2

In the vocational certificate category, 6 semester hours in vessel maintenance, 6 in seamanship, and 4 in rigging; if the qualification code was HW (Surfman) or HX (Boat Coxswain), credit in small boat handling on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 6 semester hours in vessel maintenance, 6 in seamanship, 1 in general office procedures, and 3 in law enforcement; if qualification code was HW (Surfman) or HX (Boat Coxswain), credit in small boat handling on the basis of institutional evaluation (5/84).

Recommendation, BM1

In the vocational certificate category, the recommendation is the same as that for BM2. In the lower-division baccalaureate/associate degree category, 6 semester hours in vessel maintenance, 6 in seamanship, 1 in general office procedures, 3 in law enforcement, and 2 in personnel supervision; if qualification code was HW (Surfman) or HX (Boat Coxswain), credit in small boat handling on the basis of institutional evaluation (5/84).

Recommendation, BMC

In the vocational certificate category, the recommendation is the same as that for BM2. In the lower-division baccalaureate/associate degree category, 6 semester hours in vessel maintenance, 6 in seamanship, 1 in general office procedures, 3 in law enforcement, 3 in personnel supervision, and 3 in principles of management; if qualification code was HW (Surfman) or HX (Boat Coxswain), credit in small boat handling on the basis of institutional evaluation (5/84).

Recommendation, BMCS

In the vocational certificate category, the recommendation is the same as that for BM2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for BMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, BMCM

In the vocational certificate category, the recommendation is the same as that for BM2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for BMC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

FN: Fireman (E-3). *DC3:* Damage Controlman, Third Class (E-4). *DC2:* Damage Controlman, Second Class (E-5). *DC1:* Damage Controlman, First Class (E-6). *DCC:* Chief Damage Controlman (E-7). *DCCS:* Senior Chief Damage Controlman (E-8). *DCCM:* Master Chief Damage Controlman (E-9).

Description

Summary: Repairs and performs maintenance on damage control equipment for preserving water tight integrity; utilizes techniques and skills in carpentry, firefighting, pipefitting, anchoring, welding, laying out, assembling, measuring devices, and nuclear, biological, and chemical (NBC) warfare and defense; instructs and coordinates damage control parties; instructs and supervises personnel in technique of NBC warfare defense, including the use of personnel decontamination stations and protective shelters. *DC3:* Operates, stores, and performs maintenance on firefighting equipment and damage control equipment; inspects and tests installed damage control equipment and systems; performs brazing, electrical arc welding, and oxyacetylene welding and cutting; repairs ship plumbing and piping systems; performs carpentry tasks; controls discharging and pumping of waste in restricted water; completes maintenance data forms; orders repair parts and tools. *DC2:* Able to perform the duties required for DC3; performs gas-free testing of voids and compartments to assure safe entry; inspects fire main, sprinklers, and ventilation systems; performs repairs to ship structure using heavy gauge metal; completes maintenance reports; inventories installed equipment. *DC1:* Able to perform the duties required for DC2; organizes and supervises damage control and firefighting parties; prepares training records; reviews completed maintenance data forms; prepares weekly maintenance schedules. *DCC:* Able to perform the duties required for DC1; plans and conducts damage control exercises; maintains shop records and prepares progress reports; supervises training programs; estimates time, personnel, and material requirements; prepares quarterly maintenance schedules; supervises damage control maintenance technician shop. *DCCS:* Able to perform the duties required for DCC; prepares directives and instruction for attaining organizational objectives; establishes and implements a program for interviewing, evaluating, and assigning personnel to assure maximum utilization; prepares correspondence; organizes and evaluates training programs; administers a long-range planned maintenance program. *DCCM:* Able to perform the duties required for DCCS; reviews personnel, equipment, and material requirements and forecasts future requirements; plans, organizes, implements, and controls activities; develops operating budgets and monitors expenditures.

Recommendation, DC3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in welding, 2 in blueprint interpretation, 2 in carpentry, and 2 in plumbing and pipefitting (5/84).

Recommendation, DC2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in welding, 3 in blueprint interpretation, 3 in carpentry, 3 in plumbing and pipefitting, and 3 in introduction to hydraulic systems (5/84).

Recommendation, DC1

In the vocational certificate category, 3 semester hours in welding, 3 in blueprint interpretation, 3 in carpentry, 3 in plumbing and pipefitting, 3 in introduction to hydraulic systems, and 3 in construction technology. In the lower-division baccalaureate/associate degree category, 3 semester hours in welding, 3 in blueprint interpretation, 3 in carpentry, 3 in plumbing and pipefitting, 3 in introduction to hydraulic systems, 3 in construction technology, and 2 in personnel supervision (5/84).

Recommendation, DCC

In the vocational certificate category, the recommendation is the same as that for DC1. In the lower-division baccalaureate/associate degree category, 3 semester hours in welding, 3 in blueprint interpretation, 3 in carpentry, 3 in plumbing and pipefitting, 3 in introduction to hydraulic systems, 3 in construction technology, 3 in personnel supervision, and 3 in principles of management (5/84).

Recommendation, DCCS

In the vocational certificate category, the recommendation is the same as that for DC1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DCC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, DCCM

In the vocational certificate category, the recommendation is the same as that for DC1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DCC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

DENTAL TECHNICIAN

DT3
DT2
DT1
DTC
DTCS
DTCM

Exhibit Dates: 1/71–12/82.

Occupational Group: VIII (Medical).

Career Pattern

SN: Seaman (E-3). *DT3:* Dental Technician, Third Class (E-4). *DT2:* Dental Technician, Second Class (E-5). *DT1:* Dental Technician, First Class (E-6). *DTC:* Chief Dental Technician (E-7). *DTCS:* Senior Chief Dental Technician (E-8). *DTCM:* Master Chief Dental Technician (E-9).

Description

Summary: Performs clinical and administrative duties, assisting the dental officer in treatment of patients, giving first aid, preparing and carrying out dental administrative assignments, giving oral prophylactic treatment under supervision, and assisting in the preventive dental program; may be qualified in other areas, such as dental prosthetic laboratory techniques and maintenance and repair of dental equipment; must be prepared to assist in the prevention and treatment of nuclear, biological, and chemical (NBC) warfare casualties. *DT3:* Prepares patients for dental treatment; identifies, sharpens, cares for and sets up instruments for all phases of dentistry; instructs patients in daily oral health care; assists dental officers in all phases of dentistry; performs basic x-ray procedures; composes, prepares and charts dental conditions; performs cardiopulmonary resuscitation (CPR) and basic first aid. *DT2:* Able to perform the duties required for DT3; supervises central sterilization procedures; presents oral health materials; performs preventive maintenance on dental handpieces, air compressors, autoclaves and sterilizers, dental operating room accessory equipment, and motor chair; processes oral x-rays; acts as an oral surgery assistant; dispenses post-operative medication; prepares and maintains official reports, patient records, and dental material reports. *DT1:* Able to perform the duties required for DT2; treats and manages mass casualties; exposes and processes total dental x-rays; supervises dental administrative office appointment systems, and accounting activities, including supplies. *DTC:* Able to perform the duties required for DT1; serves as administrative assistant to senior administrative staff. *DTCS:* Able to perform the duties required for DTC; serves as enlisted technical or specialty expert; administers dental/medical training programs; reviews all medical reports and presents them to appropriate command; provides direction and supervision to enlisted personnel in the performance of their duties. *DTCM:* Able to perform the duties required for DTCS; serves as senior enlisted technical or specialty administrator; provides senior-level supervision and administration to all enlisted personnel; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment.

Recommendation, DT3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR) and 1 in advanced first aid; add the credit for Dental Technician A School, exhibit CG-0701-0001 (9/84).

Recommendation, DT2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR), 1 in advanced first aid, 2 in expanded dental office procedures, and 1 in preventive maintenance, recordkeeping, and sanitation; add the credit for Dental Technician A School, exhibit CG-0701-0001 (9/84).

Recommendation, DT1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR), 1 in advanced first aid, 4 in expanded dental office procedures, 1 in preventive maintenance, recordkeeping, and sanitation, 1 in personnel supervision, and 1 in dental record management and preventive medicine; add the credit for Dental Technician A School, exhibit CG-0701-0001 (9/84).

Recommendation, DTC

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in cardiopulmonary resuscitation (CPR), 1 in advanced first aid, 4 in expanded dental office procedures, 1 in preventive maintenance, recordkeeping, and sanitation, 3 in personnel supervision, 1 in dental record management and preventive medicine, and 3 in office management; add the credit for Dental Technician A School, exhibit CG-0701-0001 (9/84).

Recommendation, DTCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DTC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (9/84).

Recommendation, DTCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for DTC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, and 2 in introduction to health care administration (9/84).

CGR-EM-001

ELECTRICIAN'S MATE

EM3
EM2
EM1
EMC
EMCS
EMCM

Exhibit Dates: 1/71–Present.

Occupational Group: III (Engineering and Hull).

Career Pattern

FN: Fireman (E-3). *EM3:* Electrician's Mate, Third Class (E-4). *EM2:* Electrician's Mate, Second Class (E-5). *EM1:* Electrician's Mate, First Class (E-6). *EMC:* Chief Electrician's Mate (E-7). *EMCS:* Senior Chief Electrician's Mate (E-8). *EMCM:* Master Chief Electrician's Mate (E-9).

Description

Summary: Operates, installs, maintains, and repairs motors, generators, switchboards, and control equipment; installs, maintains, and repairs power and lighting circuits and electrical fixtures; performs tests for short circuits, grounds, and other casualties and repairs or rebuilds electrical equipment in an electric shop. *EM3:* Draws and interprets schematic diagrams of electrical circuits; operates test equipment used in servicing electrical and electronic equipment; has proficiency in DC and AC circuitry, including resonance; understands repair and servicing procedures for vacuum tubes and solid-state devices as well as the operating principles and construction of AC and DC motors and generators, gyroscopes, circuit breakers and storage batteries;

knows procedures for starting and paralleling generators and switchboards. *EM2:* Able to perform the duties required for EM3; operates and constructs AC/DC voltage regulators and magnetic amplifiers; services circuit breakers, degaussing systems, armature commutators, solenoids, servo-mechanisms, electric galley equipment, and normal, alternate, and emergency power distribution systems for shipboard lighting and power; stands watch on main propulsion machinery and controls; locates, prepares, and maintains records, reports, and publications; maintains inventory. *EM1:* Able to perform the duties required for EM2; makes authorized repairs and calibration of test equipment; services AC and DC motor and generator controllers; operates and maintains ship propulsion equipment along with the control and auxiliary control systems; understands the principles of gyrocompass and dead-reckoning equipment. *EMC:* Able to perform the duties required for EM1; takes complete charge of the engine room on a large vessel or the engineering department on a small vessel or shore installation; instructs classes; prepares power failure reports; makes time and material repair estimates and prepares shipyard availability work requests and schedules; may also serve as an inspector in a shipyard; prepares preventive maintenance schedules; organizes and maintains technical library; prepares and submits budget requests; plans and supervises on-the-job training. *EMCS:* Able to perform the duties required for EMC; serves as enlisted technical or specialty expert; plans, organizes, and directs the work of personnel operating and maintaining electrical systems; plans and administers on-the-job training programs; supervises the preparation of reports. *EMCM:* Able to perform the duties required for EMCS; serves as a senior enlisted technical or specialty administrator; manages personnel in the operation, maintenance, procurement, and survey of electrical equipment; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, EM3

In the vocational certificate category, 6 semester hours in electrical maintenance procedures and 9 in basic electricity. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory (3/84).

Recommendation, EM2

In the vocational certificate category, 6 semester hours in electrical maintenance procedures, 9 in basic electricity, and 3 in recordkeeping. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory and 3 in recordkeeping (3/84).

Recommendation, EM1

In the vocational certificate category, 6 semester hours in electrical maintenance procedures, 9 in basic electricity, 3 in recordkeeping, and 3 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in recordkeeping, 3 in basic logic circuits, 3 in maintenance management, and 2 in personnel supervision (3/84).

Recommendation, EMC

In the vocational certificate category, the recommendation is the same as that for EM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in recordkeeping, 3 in basic logic circuits, 3 in maintenance management, 3 in personnel supervision, and 3 in principles of management (3/84).

Recommendation, EMCS

In the vocational certificate category, the recommendation is the same as that for EM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for EMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/84).

Recommendation, EMCM

In the vocational certificate category, the recommendation is the same as that for EM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for EMC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/84).

Exhibit Dates: 1/71–Present.

Occupational Group: III (Engineering and Hull).

Career Pattern

SN: Seaman (E-3). *ET3:* Electronics Technician, Third Class (E-4). *ET2:* Electronics Technician, Second Class (E-5). *ET1:* Electronics Technician, First Class (E-6). *ETC:* Chief Electronics Technician (E-7). *ETCS:* Senior Chief Electronics Technician (E-8). *ETCM:* Master Chief Electronics Technician (E-9).

Description

Summary: Operates, maintains, repairs, calibrates, tunes, and adjusts electronic equipment used for communication, cryptography, detection, recognition, identification, navigation, and electronic surveillance. *ET3:* Has knowledge of electricity/electronics; reads and interprets schematic diagrams; uses electronic test equipment to localize and replace faulty components. *ET2:* Able to perform the duties required for ET3; provides technical guidance to subordinate personnel; performs preventive maintenance on electronic equipment; keeps equipment maintenance logs. *ET1:* Able to perform the duties required for ET2; prepares preventive maintenance schedules and work requests; maintains equipment status reports; supervises shipping and handling procedures. *ETC:* Able to perform the duties required for ET1; supervises the operation of the electronic shop; supervises the use, filing, and maintenance of publications, logs, and records; plans, organizes, and administers the maintenance program for the repair of electronic equipment; generates work requests; plans and supervises on-the-job training programs; prepares and submits budget requests; organizes and maintains technical library. *ETCS:* Able to perform the duties required for ETC; serves as enlisted technical or specialty expert; plans, organizes, and directs personnel in the operation and maintenance of electronics equipment; plans and administers on-the-job training programs; supervises the preparation of reports. *ETCM:* Able to perform the duties required for ETCS; serves as senior enlisted technical or specialty administrator; ensures maximum efficiency of the work force and the equipment; manages the operation and maintenance procedures of electronic equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, ET3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in principles of instrumentation, 3 in circuit theory, and 3 in basic computer principles (3/84).

Recommendation, ET2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in principles of instrumentation, 3 in circuit theory, and 3 in basic computer principles (3/84).

Recommendation, ET1

In the vocational certificate category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in principles of instrumentation, 3 in circuit theory, 3 in basic computer principles, and 3 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 diagnostic procedures, 3 in principles of instrumentation, 3 in circuit theory, 3 in basic computer principles, 3 in maintenance management, and 2 in personnel supervision (3/84).

Recommendation, ETC

In the vocational certificate category, the recommendation is the same as that for ET1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in principles of instrumentation, 3 in circuit theory, 3 in basic computer principles, 3 in maintenance management, 3 in personnel supervision, and 3 in principles of management (3/84).

Recommendation, ETCS

In the vocational certificate category, the recommendation is the same as that for ET1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ETC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/84).

Recommendation, ETCM

In the vocational certificate category, the recommendation is the same as that for ET1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for ETC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/84).

CGR-FT-001

FIRE CONTROL TECHNICIAN

FT3
FT2
FT1
FTC
FTCS
FTCM

Exhibit Dates: 1/71–Present.

Occupational Group: II (Ordnance).

Career Pattern

SN: Seaman (E-3). *FT3:* Fire Control Technician, Third Class (E-4). *FT2:* Fire Control Technician, Second Class (E-5). *FT1:* Fire Control Technician, First Class (E-6). *FTC:* Chief Fire Control Technician (E-7). *FTCS:* Senior Chief Fire Control Technician (E-8). *FTCM:* Master Chief Fire Control Technician (E-9).

Description

Summary: Operates and maintains shipboard weapons control systems; performs preventive and corrective maintenance, including troubleshooting, testing, analyzing, adjusting, and repairing. *FT3:* Operates all weapons control systems; performs equipment maintenance, including troubleshooting, testing, analyzing, adjusting, and repairing of power drives, fire control radar equipment, target designation equipment, radar signal processing equipment, and analog and digital computer (comprised of electromechanical assemblies, optical devices, electron tube circuitry and solid state circuitry); performs optical and electrical alignment of weapons control systems and gun mount installations. *FT2:* Able to perform the duties required for FT3; calculates conventional weapons ballistic corrections; maintains records and logs; provides technical assistance to subordinate personnel. *FT1:* Able to perform the duties required for FT2; supervises and trains personnel in all phases of weapons control systems maintenance; prepares reports and work lists. *FTC:* Able to perform the duties required for FT1; supervises and trains personnel in all phases of weapons control systems operation and employment; implements weapons department administrative procedures; prepares preventive maintenance schedules; organizes and maintains technical library; prepares and submits budget request; plans and supervises on-the-job training. *FTCS:* Able to perform the duties required for FTC; serves as enlisted technical or specialty expert; plans, organizes, and directs work of personnel operating and maintaining weapons control systems; plans and administers on-the-job training programs; supervises the preparation of reports. *FTCM:* Able to perform the duties required for FTCS; serves as senior enlisted technical or specialty administrator; manages personnel in the operation, maintenance, and procurement of weapons control systems equipment; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty area.

Recommendation, FT3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic principles, 3 in circuit theory, 3 in radar principles, and 3 in introduction to analog computers (3/84).

Recommendation, FT2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic principles, 3 in circuit theory, 3 in radar principles, 3 in introduction to analog computers, and 3 in recordkeeping (3/84).

Recommendation, FT1

In the vocational certificate category, 3 semester hours in basic AC/DC theory, 3 in diagnostic principles, 3 in circuit theory, 3 in radar principles, 3 in introduction to analog computers, 3 in recordkeeping, and 3 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic principles, 3 in circuit theory, 3 in radar principles, 3 in introduction to analog computers, 3 in recordkeeping, 2 in personnel supervision, and 3 in maintenance management (3/84).

Recommendation, FTC

In the vocational certificate category, the recommendation is the same as that for FT1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic principles, 3 in circuit theory, 3 in radar principles, 3 in introduction to analog computers, 3 in recordkeeping, 3 in personnel supervision, 3 in maintenance management, and 3 in principles of management (3/84).

Recommendation, FTCS

In the vocational certificate category, the recommendation is the same as that for FT1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for FTC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/84).

Recommendation, FTCM

In the vocational certificate category, the recommendation is the same as that for FT1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for FTC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/84).

GUNNER'S MATE

GM3
GM2
GM1
GMC
GMCS
GMCM

Exhibit Dates: 1/71–Present.

Occupational Group: II (Ordnance).

Career Pattern

SN: Seaman (E-3). *GM3:* Gunner's Mate, Third Class (E-4). *GM2:* Gunner's Mate, Second Class (E-5). *GM1:* Gunner's Mate, First Class (E-6). *GMC:* Chief Gunner's Mate (E-7). *GMCS:* Senior Chief Gunner's Mate (E-8). *GMCM:* Master Chief Gunner's Mate (E-9).

Description

Summary: Operates, maintains, and repairs small arms, torpedo tubes, guns and mounts, launchers, and associated handling equipment. *GM3:* Operates guns, mounts, launchers, ammunition hoists, projectile hoists, and associated equipment; operates, maintains, stows, and issues small arms and associated equipment; constructs basic electronic circuits; measures current and voltage in electronic circuits; uses schematic diagrams; uses and cares for hand tools; maintains ordnance logs, and ammunition stock records. *GM2:* Able to perform the duties required for GM3; diagnoses and repairs electronic control systems; conducts inventories and prepares requisitions; organizes and administers a program on safety instruction. *GM1:* Able to perform the duties required for GM2; instructs in the handling and storage of ammunition and maintenance of records; develops, implements, and supervises a weapons departmental training program. *GMC:* Able to perform the duties required for GM1; supervises maintenance of ordnance electrical and electronic systems; supervises handling and storage of explosive ordnance components; serves as shop supervisor; prepares preventive maintenance schedules; organizes and maintains technical library; prepares and submits budget requests; plans and supervises on-the-job training. *GMCS:* Able to perform the duties required for GMC; serves as enlisted technical or specialty expert; plans, organizes, and directs the work of personnel in operation, maintenance, and repair procedures; plans and administers on-the-job training programs; supervises the preparation of reports. *GMCM:* Able to perform the duties required for GMCS; serves as senior enlisted technical or specialty administrator; manages personnel in operation, maintenance, and repair procedures; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, GM3

In the vocational certificate category, 2 semester hours in introduction to electricity and electronics, 2 in hydraulic systems maintenance, 2 in electronics systems maintenance, 1 in industrial safety, 1 in use and care of hand tools, and 1 in blueprint reading. In the lower-division baccalaureate/associate degree category, 2 semester hours in introduction to electricity and electronics, 2 in hydraulic systems maintenance, 2 in electronics systems maintenance, 2 in gunsmithing, 1 in industrial safety, 1 in use and care of hand tools, and 1 in blueprint reading (5/84).

Recommendation, GM2

In the vocational certificate category, 3 semester hours in introduction to electricity and electronics, 3 in hydraulic systems maintenance, 3 in electronics systems maintenance, 1 in industrial safety, 1 in use and care of hand tools, and 1 in blueprint reading. In the lower-division baccalaureate/associate degree category, 3 semester hours in introduction to electricity and electronics, 3 in hydraulic systems maintenance, 3 in electronics systems maintenance, 3 in gunsmithing, 1 in industrial safety, 1 in use and care of hand tools, and 1 in blueprint reading (5/84).

Recommendation, GM1

In the vocational certificate category, 4 semester hours in introduction to electricity and electronics, 4 in hydraulic systems maintenance, 4 in electronics systems maintenance, 1 in industrial safety, 1 in use and care of hand tools, and 1 in blueprint reading. In the lower-division baccalaureate/associate degree category, 4 semester hours in introduction to electricity and electronics, 4 in hydraulic systems maintenance, 4 in electronics systems maintenance, 4 in gunsmithing, 1 in industrial safety, 1 in use and care of hand tools, 1 in blueprint reading, and 2 in personnel supervision (5/84).

Recommendation, GMC

In the vocational certificate category, the recommendation is the same as that for GM1. In the lower-division baccalaureate/associate degree category, 4 semester hours in introduction to electricity and electronics, 4 in hydraulic systems maintenance, 4 in electronics systems maintenance, 4 in gunsmithing, 1 in industrial safety, 1 in use and care of hand tools, 1 in blueprint reading, 3 in personnel supervision, and 3 in principles of management (5/84).

Recommendation, GMCS

In the vocational certificate category, the recommendation is the same as that for GM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for GMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, GMCM

In the vocational certificate category, the recommendation is the same as that for GM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for GMC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

HOSPITAL CORPSMAN

HM3
HM2
HM1
HMC
HMCS
HMCM

Exhibit Dates: 1/71–12/82.

Occupational Group: VIII (Medical).

Career Pattern

SN: Seaman (E-3). *HM3:* Hospital Corpsman, Third Class (E-4). *HM2:* Hospital Corpsman, Second Class (E-5). *HM1:* Hospital Corpsman, First Class (E-6). *HMC:* Chief Hospital Corpsman (E-7). *HMCS:* Senior Chief Hospital Corpsman (E-8). *HMCM:* Master Chief Hospital Corpsman (E-9).

Description

Summary: Performs the duties as assistant in the prevention and treatment of disease and injuries, and in the administration of medical departments ashore and afloat. *HM2:* Performs basic first aid; assists with physical examinations; provides nursing care to patients; assists in the procurement, storage and issue of medical supplies; instructs in personal hygiene, first aid, and self aid; assists in the maintenance of sanitary conditions; is prepared to assist in the prevention and treatment of nuclear, biological and chemical warfare casualties; composes health care records. *HM2:* Able to perform the duties required for HM3; performs advanced first aid procedures; performs cardiopulmonary resuscitation; assists in the transportation of the sick and injured; administers medicines and parental solutions; dispenses commonly used pharmaceutical preparations; prepares and maintains medical reports; prepares basic radiologic reports; performs basic radiologic procedures, including urinalysis and blood counts. *HM1:* Able to perform the duties required for HM2; performs advanced laboratory procedures, including microbiology and parasitology; performs supervisory duties; performs minor surgical techniques; performs special radiographic techniques; coordinates a radiation health program; mixes compounds. *HMC:* Able to perform the duties required for HM1; supervises assigned personnel; maintains a medical records department. *HMCS:* Able to perform the duties required for HMC; serves as enlisted technical or specialty expert; administers medical/dental training programs; reviews all medical reports and presents them to appropriate commands; provides direction and supervision to enlisted personnel in the performance of their functions; supervises procurement, storage, account, preservation, and allocation of medical and dental materials. *HMCM:* Able to perform the duties required for HMCS; serves as senior enlisted technical or specialty administrator; provides senior level supervision and administration to all enlisted personnel; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment.

Recommendation, HM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in advanced first aid; add the credit for Hospital Corpsman A School, exhibit CG-0703-0001 (9/84).

Recommendation, HM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in advanced first aid, 1 in cardiopulmonary resuscitation (CPR), 2 in nursing techniques, 1 in introduction to laboratory techniques, and 1 in preventive medicine; add the credit for Hospital Corpsman A School, exhibit CG-0703-0001 (9/84).

Recommendation, HM1

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in advanced first aid, 1 in cardiopulmonary resuscitation (CPR), 3 in nursing techniques, 1 in introduction to laboratory techniques, 1 in preventive medicine, 1 in microbiology and parasitology techniques, 1 in radiation prevention, and 1 in personnel supervision; add the credit for Hospital Corpsman A School, exhibit CG-0703-0001 (9/84).

Recommendation, HMC

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 2 semester hours in advanced first aid, 1 in cardiopulmonary resuscitation (CPR), 3 in nursing techniques, 1 in introduction to laboratory techniques, 1 in preventive medicine, 1 in microbiology and parasitology techniques, 1 in radiation prevention, 3 in personnel supervision, and 3 in ward management; add the credit for Hospital Corpsman A School, exhibit CG-0703-0001 (9/84).

Recommendation, HMCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (9/84).

Recommendation, HMCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 for field experience in health care management, and 2 in introduction to health care administration (9/84).

SN: Seaman (E-3). *HS3:* Health Services Technician, Third Class (E-4). *HS2:* Health Services Technician, Second Class (E-5). *HS1:* Health Services Technician, First Class (E-6). *HSC:* Chief Health Services Technician (E-7). *HSCS:* Senior Chief Health Services Technician (E-8). *HSCM:* Master Chief Health Services Technician (E-9).

Description

Summary: Performs duties as assistant in the prevention and treatment of disease and injuries, as assistant to the dental officer in treatment of patients, and in the administration of medical departments ashore and afloat. *HS3:* Performs basic first aid; assists with physical examinations; provides nursing care to patients; assists in the procurement, storage, and issue of medical supplies; instructs in personal hygiene, first aid, and self aid; assists in the maintenance of sanitary conditions; is prepared to assist in the prevention and treatment of nuclear, biological, and chemical warfare casualties; composes health care and dental records; prepares patients for dental treatment; assists dental officers in all phases of dentistry; provides dental health prevention education and performs basic x-ray procedures. *HS2:* Able to perform the duties required for HS3; performs advanced first aid procedures; performs the duties required for HS3; performs advanced first aid procedures; performs cardiopulmonary resuscitation; assists in the transportation of the sick and injured; administers medicines and parental solutions; dispenses commonly used pharmaceutical preparations; prepares and maintains medical reports; prepares basic radiologic reports; performs basic radiologic procedures; processes x-rays; performs basic laboratory procedures including urinalysis and blood counts; supervises central sterilization procedures; performs basic preventive maintenance on instruments; acts as oral surgery assistant. *HS1:* Able to perform the duties required for HS2; performs advanced laboratory procedures including microbiology and parasitology; performs supervisory duties; performs minor surgical techniques; performs special radiographic techniques; coordinates a radiation health program; mixes compounds; supervises both medical and dental offices and accounting systems, including supplies. *HSC:* Able to perform the duties required for HS1; supervises assigned personnel; maintains a medical and dental records department. *HSCS:* Able to perform the duties required for HSC; serves as enlisted technical or specialty expert; administers medical/dental training programs; reviews all medical reports and presents them to appropriate commands; provides direction and supervision to enlisted personnel in the performance of their functions; supervises procurement, storage, accounting, preservation, and allocation of medical and dental materials. *HSCM:* Able to perform the duties required for HSCS; serves as senior enlisted technical or specialty administrator; provides senior level supervision and administration to all enlisted personnel; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment.

Recommendation, HS3

In the lower-division baccalaureate/associate degree category, 2-3 semester hours in clinical experience (in areas related to nursing techniques, laboratory techniques, dental office procedures, and preventive medicine) based on institutional evaluation of the student's work experience; add credit for the Health Services Technician A School in exhibit CG-0709-0009 (10/87).

Recommendation, HS2

In the lower-division baccalaureate/associate degree category, 7 semester hours in clinical experience (in areas related to nursing techniques, laboratory techniques, dental office procedures, and preventive medicine); add credit for the Health Services Technician A School in exhibit CG-0709-0009 (10/87).

Recommendation, HS1

In the lower-division baccalaureate/associate degree category, 11 semester hours in clinical experience (in areas related to nursing techniques, laboratory techniques, dental office procedures, and preventive medicine), and 1 in personnel supervision; add credit for the Health Services Technician A School in exhibit CG-0709-0009 (10/87).

Recommendation, HSC

In the lower-division baccalaureate/associate degree category, 11 semester hours in clinical experience (in areas related to nursing techniques, laboratory techniques, radiation prevention, dental office procedures, and preventive medicine), and 6 in personnel supervision; add credit for the Health Services Technician A School in exhibit CG-0709-0009 (10/87).

Recommendation, HSCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HSC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (10/87).

Recommendation, HSCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for HSC. In the upper-division baccalaureate category, 3 semester hours for field experience in management, 3 in management problems, 3 for field experience in health/dental care management, and 2 in introduction to health care/dental administration (10/87).

CGR-MK-001

MACHINERY TECHNICIAN

MK3
MK2
MK1
MKC
MKCS
MKCM

Exhibit Dates: 1/71-Present.

Occupational Group: III (Engineering and Hull).

Career Pattern

FN: Fireman (E-3). *MK3:* Machinery Technician, Third Class (E-4). *MK2:* Machinery Technician, Second Class (E-5). *MK1:* Machinery Technician, First Class (E-6). *MKC:* Chief Machinery Technician (E-7). *MKCS:* Senior Chief Machinery Technician (E-8). *MKCM:* Master Chief Machinery Technician (E-9).

Description

Summary: Operates, maintains, and repairs internal combustion engines, propulsion boilers, steam turbines, and main propulsion power transmission equipment; operates, maintains, and repairs auxiliary fireroom, refrigeration, air conditioning, electrical, and machine shop equipment; organizes, leads, and participates in damage control repair parties, and performs maintenance-related administrative functions. *MK3:* Starts, operates, and checks diesel, gas turbine and gasoline engines; lines up fuel systems for receiving and transferring fuel; operates fuel oil centrifuges; performs maintenance or separator/coalescer filter units; operates lubricating oil and cooling systems; conducts tests on engine oil and cooling water; operates distilling plants; operates refrigeration and air conditioning systems; using hot gas method, defrosts refrigeration units; tests for refrigerant leaks; repacks and adjusts pump stuffing boxes; repacks pressure valves; grinds valve seats and discs; operates auxiliary equipment such as air compressors, laundry, galley, and boat handling equipment; operates hydraulic equipment; performs minor maintenance on hydraulic equipment; uses and cares for basic machine shop handtools and measuring instruments; interprets simple diagrams and blueprints; use oxyacetylene and electric-arc equipment to perform minor brazing, cutting and welding operations; performs specific gravity tests on storage batteries; performs operational maintenance on small boats. *MK2:* Able to perform the duties required for MK3; inspects gas turbine compressors and turbines for axial and radial clearances; inspects test-runs and adjusts diesel and gasoline engines; removes, inspects, and repairs liners, pistons, cylinder heads, valves, piston rings and pins, bearings, pumps, gears, and shafting on gasoline and diesel engines; performs functional tests on gas turbine starting systems; tests unit injectors and other types of fuel nozzles on diesel and gas turbine engines; purges diesel injection systems; chemically treats internal combustion engine cooling system water; services cooling system head exchangers; repairs and maintains distilling plants; performs required maintenance and vacuum pumps and sealing systems; changes and adds lubricating oil in refrigerant compressors; adjusts temperature and pressure controls; evacuates, dehydrates, tests, and recharges refrigerant systems; overhauls, checks and aligns pumps; adjusts valves; repairs auxiliary equipment; fabricates and installs hydraulic system hoses, tubing and fittings; uses dial indicators, micrometers, burdge gages, and depth gages; operates engine lathe for cutting threads, turning tapers, and plain turning; checks electrical distribution systems for grounds; parallels two AC generators; performs megger tests on motors and generators; uses appropriate manuals, prints and other materials to obtain technical repair information. *MK1:* Able to perform the duties required for MK2; overhauls and/or repairs internal combustion engines; inspects and adjusts mechanical and hydraulic governors; coordinates, monitors and controls operation of gas turbines and gas turbine generators; maintains and adjusts fuel system of gasoline, diesel, and gas turbine engines; performs procedures for refueling helicopter; takes reduction gear and thrust bearing clearances; makes minor and emergency repairs to reduction gears; plugs and/or replaces heat exchanger tubes on distilling plants; tests and renews oil seals in refrigerant compressors; performs major repairs on refrigeration and air conditioning compressors; repairs or replaces temperature control valves; troubleshoots and corrects hydraulic system malfunctions; supervises all phases of lathe operations; troubleshoots electrical control circuits; starts and secures gyro compasses; prepares and maintains engineering maintenance reports and records. *MKC:* Able to perform the duties required for MK1; conducts operational tests and makes required adjustments upon completion of an engine overhaul; analyzes reports of discrepancies and malfunctions, and determines corrective action; performs inspections on gas turbine engines, and boiler watersides and firesides; disassembles, cleans, repairs, and assembles fuel oil heaters, and conducts required hydrostatic tests; checks main reduction gears for backlash and alignment; disassembles, inspects, repairs, reassembles, and tests constant pressure pump governors, estimates time, labor, and materials required for repair of machinery, structures, equipment, or systems; supervises engineering department on ship; prepares work requests and schedules. *MKCS:* Able to perform the duties required for MKC; serves as enlisted technical or specialty expert; provides technical information concerning maintenance, operation, capabilities, and limitation of engineering equipment and machinery; trains personnel in the principles of operation, and supervises them on all engineering equipment; trains personnel in casualty control procedures; prepares technical and non-technical lesson plans for instruction of enlisted personnel in maintenance, operating, training, and administration; plans, organizes, and directs work of personnel; supervises the preparation of reports. *MKCM:* Able to perform the duties required for MKCS; serves as senior enlisted technical or specialty administrator; organizes and directs subordinate personnel in the operation, repair, overhaul, and procurement of ship propulsion and auxiliary equipment and supplies; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, MK3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 1 semester hour in internal combustion engines and 2 in air conditioning and refrigeration (5/84).

Recommendation, MK2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in internal combustion engines, 1 in hydraulics, 3 in air conditioning and refrigeration, 2 in basic electricity, 2 in lathe operations, and 2 in precision measuring instruments (5/84).

Recommendation, MK1

In the vocational certificate category, 4 semester hours in internal combustion engines, 2 in hydraulics, 6 in air conditioning and refrigeration, 2 in basic electricity, 2 in lathe operations, and 2 in precision measuring instruments. In the lower-division baccalaureate/associate degree category, 4 semester hours in internal combustion engines, 2 in hydraulics, 6 in air conditioning and refrigeration, 2 in basic electricity, 2 in lathe operations, 2 in precision measuring instruments, and 2 in personnel supervision (5/84).

Recommendation, MKC

In the vocational certificate category, 6 semester hours in internal combustion engines, 6 in air conditioning and refrigeration, 2 in hydraulics, 2 in lathe operations, 2 in basic electricity, and 2 in precision measuring instruments. In the lower-division baccalaureate/associate degree category, 6 semester hours in internal combustion engines, 6 in air conditioning and refrigeration, 2 in hydraulics, 2 in lathe operations, 2 in basic electricity, 2 in precision measuring instruments, 3 in personnel supervision, and 3 in principles of management (5/84).

Recommendation, MKCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MKC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, MKCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MKC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (5/84).

CGR-MST-001

MARINE SCIENCE TECHNICIAN

MST3
MST2
MST1
MSTC
MSTCS
MSTCM

Exhibit Dates: 1/71-Present.

Occupational Group: I (Deck).

Career Pattern

SN: Seaman (E-3). *MST3:* Marine Science Technician, Third Class (E-4). *MST2:* Marine Science Technician, Second Class (E-5). *MST1:* Marine Science Technician, First Class (E-6). *MSTC:* Chief Marine Science Technician (E-7). *MSTCS:* Senior Chief Marine Science Technician (E-8). *MSTCM:* Master Chief Marine Science Technician (E-9).

Description

Summary: Observes, records, and analyzes environmental and scientific data; conducts field monitoring and laboratory analysis for chemical and oil identification; operates and maintains Coast Guard data processing systems; retrieves and assimilates data from remote sensing and local observations; employs numerical models and provides environmental information for conducting Coast Guard operations. *MST3:* Prepares and maintains user documentation of basic data processing procedures; operates small programmable computers; uses standard meteorological equipment; conducts meteorological observations; works with and maintains standard oceanographic instrumentation; demonstrates safety precautions in operation of a chemistry laboratory in accordance with Coast Guard regulations. *MST2:* Able to perform the duties required for MST3; maintains a tape or disk library; decodes and plots standard meteorological observations; analyzes surface and upper air charts; inspects areas for hazardous waste materials and suggests corrective measures; forecasts and plots ice, tide, and current data. *MST1:* Able to perform the duties required for MST2; schedules program runs; troubleshoots terminal, peripheral, and program failures and corrects as necessary; performs operator checks and preventive maintenance on small computers; develops oil sampling programs; processes results of pollution investigations; interprets results of chemical analysis; supervises personnel in making standard meteorological observations; prepares written instructions; organizes and evaluates training programs; develops and implements a program for evaluating personnel. *MSTC:* Able to perform the duties required for MST1; plans, implements, and monitors safety programs; prepares and submits budget requests; instructs and supervises personnel in the use and maintenance of scientific data collection. *MSTCS:* Able to perform the duties required for MSTC; serves as enlisted technical or specialty expert; plans and organizes activities to achieve objectives; develops budgets and monitors expenditures. *MSTCM:* Able to perform the duties required for MSTCS; serves as senior enlisted technical or specialty administrator; performs operational administrative functions; establishes objectives and sets priorities; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, MST3

In the lower-division baccalaureate/associate degree category, 3 semester hours in marine instrumentation, 3 in basic computer science, and 3 in basic meteorology (7/84).

Recommendation, MST2

In the lower-division baccalaureate/associate degree category, 3 semester hours in marine instrumentation, 3 in basic computer science, 3 in basic meteorology, 3 in physical science, and 2 in meteorology (7/84).

Recommendation, MST1

In the lower-division baccalaureate/associate degree category, 3 semester hours in marine instrumentation, 3 in basic computer science, 3 in basic meteorology, 3 in physical science, 2 in meteorology, and 2 in personnel supervision (7/84).

Recommendation, MSTC

In the lower-division baccalaureate/associate degree category, 3 semester hours in marine instrumentation, 3 in basic computer science, 3 in basic meteorology, 3 in physical science, 2 in meteorology, 3 in personnel supervision, and 3 in principles of management (7/84).

Recommendation, MSTCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MSTC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (7/84).

Recommendation, MSTCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for MSTC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (7/84).

CGR-PA-001

PUBLIC AFFAIRS SPECIALIST
(PHOTOJOURNALIST)

PA3
PA2
PA1
PAC
PACS
PACM

Exhibit Dates: 1/73-Present.

Occupational Group: IV (Administrative and Clerical).

Career Pattern

SN: Seaman (E-3). *PA3:* Photojournalist Third Class (E-4). *PA2:* Photojournalist Second Class (E-5). *PA1:* Photojournalist First Class (E-6). *PAC:* Chief Photojournalist (E-7). *PACS:* Senior Chief Photojournalist (E-8). *PACM:* Master Chief Photojournalist (E-9).

Description

Summary: Supervises or participates in the administration of public affairs activities in the area of media relations, community relations, and internal information programs; arranges and conducts interviews; prepares news releases, fact sheets, and feature stories; writes and edits news copy; operates photographic equipment; prepares art work and designs layout for various publications. *PA3:* Researches and writes news releases and feature articles; covers news events; processes news photographs and writes captions; prepares material for media release; arranges and conducts interviews; edits news copy; prepares art work and designs layout for various Coast Guard publications. *PA2:* Able to perform the duties required for PA3; supervises inventories of office equipment; evaluates photographic equipment and makes acquisition recommendations; has increased practical experience and knowledge of visual/photographic theory. *PA1:* Able to perform the duties required for PA2; supervises operation of a district office; has increased knowledge of how public affairs programs interact with the media; acts as representative of the Coast Guard to the community; operates 16 millimeter equipment and uses 35 millimeter for special photographic techniques. *PAC:* Able to perform the duties required for PA1; administers public affairs office; supervises work assignments; prepares budgets; coordinates interagency efforts. *PACS:* Able to perform the duties required for PAC; serves as enlisted specialty expert; provides leadership, supervision and administration to the entire rating; organizes, directs and coordinates instructional and training programs. *PACM:* Able to perform the duties required for PACS; serves as senior enlisted specialty administrator; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the office corps in the overall supervision and administration of personnel.

Recommendation, PA3

In the lower-division baccalaureate/associate degree category, 3 semester hours in interviewing, 3 in news writing, 1 in feature writing, 3 in news reporting, 2 in news editing, 2 in technical writing, 3 in basic audiovisual materials, 3 in still photography, 1 in technical photography, 3 in layout/design, and 1 for field experience in public affairs; if served as Cinematographer (identified by qualification code 41), add 3 semester hours in film production; if served as electronic Media Specialist (identified by qualification code 42), add 3 semester hours in video production (6/84).

Recommendation, PA2

In the lower-division baccalaureate/associate degree category, 3 semester hours in interviewing, 3 in news writing, 2 in feature writing, 3 in news reporting, 3 in news editing, 3 in technical writing, 3 in basic audiovisual materials, 3 in still photography, 1 in technical photography, 3 in layout/design, 2 for field experience in public affairs, 2 in art direction, 2 in office management, 1 in principles of accounting, and 2 for field experience in film and video; if served as Cinematographer (identified by qualification code 41), add 3 semester hours in film production; if served as Electronic Media Specialist (identified by qualification code 42), add 3 semester hours in video production (6/84).

Recommendation, PA1

In the lower-division baccalaureate/associate degree category, 3 semester hours in interviewing, 3 in newswriting, 3 in feature writing, 3 in news reporting, 3 in news editing, 3 in technical writing, 3 in basic audiovisual materials, 3 in still photography, 1 in technical photography, 3 in layout/design, 3 for field experience in public affairs, 2 in art direction, 3 in office management, 1 in principles of accounting, 2 for field experience in film and video, and 2 in personnel supervision; if served as Cinematographer (identified by qualification code 41), add 3 semester hours in film production; if served as Electronic Media Specialist (identified by qualification code 42), add 3 semester hours in video production (6/84).

Recommendation, PAC

In the lower-division baccalaureate/associate degree category, 3 semester hours in interviewing, 3 in news writing, 3 in feature writing, 3 in news reporting, 3 in news editing, 3 in technical writing, 3 in basic audiovisual materials, 3 in still photography, 1 in technical photography, 3 in layout/design, 3 for field experience in public affairs, 2 in art direction, 3 in office management, 1 in principles of accounting, 2 for field experience in film and video, 3 in personnel supervision, and 3 in principles of management; if served as Cinematographer (identified by qualification code 41), add 3 semester hours in film production; if served as Electronic Media Specialist (identified by qualification code 42), add 3 semester hours in video production. In the upper-division baccalaureate category, 2 semester hours in organizational communication and 3 for field experience in management (6/84).

Recommendation, PACS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for PAC. In the upper-division baccalaureate category, 3 semester hours in organizational communication and 3 for field experience in management (6/84).

Recommendation, PACM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for PAC. In the upper-division baccalaureate category, 3 semester hours in organizational communication and 6 for field experience in management (6/84).

PORT SECURITYMAN

PS3
PS2
PS1
PSC
PSCS
PSCM

Exhibit Dates: 1/71–Present.

Occupational Group: VI (Port Security).

Career Pattern

SN: Seaman (E-3). *PS3:* Port Securityman, Third Class (E-4). *PS2:* Port Securityman, Second class (E-5). *PS1:* Port Securityman, First Class (E-6). *PSC:* Chief Port Securityman (E-7). *PSCS:* Senior Chief Port Securityman (E-8). *PSCM:* Master Chief Port Securityman (E-9).

Description

Summary: Enforces the regulations and orders relative to the protection and security of vessels, harbors, ports, and waterfront facilities; supervises and controls the safe handling, transportation, stowage, and storage of explosives and other dangerous cargoes; in restricted areas, prevents unauthorized persons from entering upon the vessel or waterfront facility, and carefully examines all authorized persons; assists in combating fires. *PS3:* Performs general police patrol duty; arrests persons and collects evidence; controls access to restricted areas; conducts surveillance of vessels and identifies offenses; inspects vessels, cargo, and waterfront facilities; inspects documentation; reports on pollution and monitors cleanup; supervises cargo loading; inspects and operates fire equipment. *PS2:* Able to perform the duties required for PS3; conducts investigations and interviews; processes applications; takes fingerprints; conducts vessel searches, using electronic survey equipment; identifies various types of oil. *PS1:* Able to perform the duties required for PS2; writes investigative reports; instructs subordinate personnel in fingerprinting techniques, procedures for manning a security zone, use of service pistol, and safety requirements for explosives; serves as liaison with other law enforcement agencies; completes permit applications for explosives and other dangerous cargo; conducts investigations of pollution incidents; analyzes pollution reports; supervises cleanup of pollution incidents; knows fire rescue techniques; supervises use of loading equipment to determine safe operation; supervises layout of firefighting equipment. *PSC:* Able to perform the duties required for PS1; plans and conducts training programs; supervises cargo transfers and inspection procedures; prepares local pollution contingency plan; cooperates with private cleanup contractors; evaluates fire equipment performance; plans, implements, and monitors security of vessels, harbors, and ports. *PSCS:* Able to perform the duties required for PSC; serves as safety officer; develops budgets and monitors expenditures; supervises and directs law enforcement procedures, explosives-loading detail, and the loading, stowing, security, and offloading of dangerous cargo. *PSCM:* Able to perform the duties required for PSCS; serves as senior enlisted technical or specialty administrator; manages and supervises operations and procedures involving security and law enforcement, dangerous cargo, and safety and fire prevention; develops training and safety programs; establishes objectives and sets priorities; performs operational administrative functions; prepares correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, PS3

In the lower-division baccalaureate/associate degree category, 6 semester hours in criminal procedures, 6 in marine cargo handling, 2 in basic marine pollution analysis, and 3 in basic fire safety (7/84).

Recommendation, PS2

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for PS3. In the upper-division baccalaureate category, 3 semester hours in advanced criminal procedures, 3 in advanced marine cargo handling, and 2 in advanced marine pollution analysis (7/84).

Recommendation, PS1

In the lower-division baccalaureate/associate degree category, 6 semester hours in criminal procedures, 6 in cargo handling, 2 in basic marine pollution analysis, 3 in basic fire safety, and 2 in personnel supervision. In the upper-division baccalaureate category, 3 semester hours in advanced criminal procedures, 3 in advanced marine cargo handling, 2 in advanced marine pollution analysis, 3 in interagency law enforcement liaison, and 6 in advanced fire safety technology (7/84).

Recommendation, PSC

In the lower-division baccalaureate/associate degree category, 6 semester hours in criminal procedures, 6 in marine cargo handling, 2 in basic marine pollution analysis, 3 in basic fire safety, 3 in personnel supervision, and 3 in principles of management. In the upper-division baccalaureate category, 3 semester hours in advanced criminal procedures, 3 in advanced marine cargo handling, 2 in advanced marine pollution analysis, 3 in interagency law enforcement liaison, 6 in advanced fire safety technology, 3 in advanced hazardous cargo handling, and 3 in advanced marine pollution control and cleanup (7/84).

Recommendation, PSCS

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for PSC. In the upper-division baccalaureate category, 3 semester hours in advanced criminal procedures, 3 in advanced marine cargo handling, 2 in advanced marine pollution analysis, 3 in interagency law enforcement liaison, 6 in advanced fire safety technology, 3 in advanced hazardous cargo handling, 3 in advanced marine pollution control and cleanup, 3 for field experience in management, and 3 in management problems (7/84).

Recommendation, PSCM

In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for PSC. In the upper-division baccalaureate category, 3 semester hours in advanced criminal procedures, 3 in advanced marine cargo handling, 2 in advanced marine pollution analysis, 3 in interagency law enforcement liaison, 6 in advanced fire safety technology, 3 in advanced hazardous cargo handling, 3 in advanced marine pollution control and cleanup, 6 for field experience in management, and 3 in management problems (7/84).

SN: Seaman (E-3). *QM3:* Quartermaster Third Class (E-4). *QM2:* Quartermaster Second Class (E-5). *QM1:* Quartermaster First Class (E-6). *QMC:* Chief Quartermaster (E-7). *QMCS:* Senior Chief Quartermaster (E-8). *QMCM:* Master Chief Quartermaster (E-9).

Description

Summary: Stands watch as assistant to the officers of the deck and to the navigator; serves as helmsmen during time when precise ship control is required; performs communications, navigation, and bridgewatch duties; procures, corrects, uses, and stows navigational charts and publications; maintains navigational instruments and keeps navigational time; participates in ceremonies conducted in accordance with national and foreign observance and customs; sends and receives visual messages; serves as executive petty officer. *QM3:* Inventories, procures, uses and corrects nautical charts and publications; uses basic course plotting instruments, lead line, depth sounder, and compass; indentifies aids to navigation; handles plain language radiocommunications and visual communication; maintains compass record book and weather observation sheet. *QM2:* Able to perform the duties required for QM3; uses Coast Guard publications concerning Nautical Rules of the Road, manuevering board and relative bearings; selects charts for voyage planning; determines danger angles and danger bearings; determines ship's position by celestial observations; conducts basic weather observations and understands their significance; supervises bridge personnel; inventories installed equipment and spare parts; orders repair parts and tools. *QM1:* Able to perform the duties required for QM2; adjusts compasses and prepares deviation tables; adjusts and aligns sextants and stadimeters; interprets weather charts; plots probable path and location of storm centers; prepares a great circle track using various methods; maintains the ship's equipment configuration accounting system; prepares weekly shcedules of preventive maintenance; supervises preventive maintenance procedures; prepares oceanographic reports such as wave observation log ship's ice log, adjusted track log, and sounding journal; supervises and trains personnel in navigation, watchstanding, and use and care of navigational charts, tables, and publications. *QMC:* Able to perform the duties required for QM1; understands the use and time requirements on various files and logs; understands various types of messages; prepares quarterly schedules of preventive maintenance; requisitions equipment; interviews, selects, and evaluates personnel for the navigation department; plans emergency drills; conducts briefings; understands the law of cyclonic storms and storm avoidance measures; understands the limitations of radar and loran aids to navigation; understands the use of radio direction finding (RDF) equipment; organizes and maintains technical library; prepares and submits budget requests; plans and supervises on-the-job training. *QMCS:* Able to perform the duties required for QMC; serves as enlisted technical or specialty expert; plans, organizes, and directs the work of subordinate personnel; plans and administers on-the-job training programs; supervises the preparation of reports. *QMCM:* Able to perform the duties required for QMCS; serves as senior enlisted technical or specialty administrator; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, QM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in technical mathematics, 1 in introduction to meteorology, 3 in coastwise navigation and piloting, and 1 in office procedures, and credit in celestial navigation on the basis of institutional evaluation (5/84).

Recommendation, QM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in technical mathematics, 1 in introduction to meteorology, 3 in coastwise navigation and piloting, and 3 in office procedures, and credit in celestial navigation on the basis of institutional evaluation (5/84).

Recommendation, QM1

In the vocational certificate category, the recommendation is the same as that for QM2. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in technical mathematics, 1 in introduction to meteorology, 3 in coastwise navigation and piloting, 3 in office procedures, and 2 in personnel supervision, and credit in celestial navigation on the basis of institutional evaluation (5/84).

Recommendation, QMC

In the vocational certificate category, the recommendation is the same as that for QM2. In the lower-division baccalaureate/associate degree category, 3 semester hours in seamanship, 3 in technical mathematics, 1 in introduction to meteorology, 3 in coastwise navigation and piloting, 3 in office procedures, 3 in personnel supervision, and 3 in principles of management, and credit in celestial navigation on the basis of institutional evaluation (5/84).

Recommendation, QMCS

In the vocational certificate category, the recommendation is the same as that for QM2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for QMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (5/84).

Recommendation, QMCM

In the vocational certificate category, the recommendation is the same as that for QM2. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for QMC. SN: Seaman (E-3). *RD3:* Radarman Third Class (E-4). *RD2:* Radarman Second Class (E-5). *RD1:* Radarman First Class (E-6). *RDC:* Chief Radarman (E-7). *RDCS:* Senior Chief Radarman (E-8). *RDCM:* Master Chief Radarman (E-9).

Description

Summary: Operates radar and associated equipment in order to collect, process, display, evaluate, and disseminate information related to the movement of ships, aircraft, missiles, and natural objects; performs duties related to navigation and piloting by plotting own ship's track by radar fixes and radio direction finders; is conversant with Nautical Rules of the Road as used in collision avoidance. *RD3:* Prepares and maintains records and logs for Combat Information Center operations and operating equipment; has knowledge of interior communications and equipment; plots ranges, bearings, and fixes on nautical charts, including dead reckoning; operates fathometers and radio direction finders; knows Nautical Rules of the Road as used in collision avoidance and use of radar in fog; has knowledge of basic search procedures, and solution of basic maneuvering board problems; operates military-specific equipment. *RD2:* Able to perform the duties required for RD3; prepares requisitions for supplies, instructs personnel in principles of equipment operation; sets up controlled radio equipment in accordance with plans; has knowledge of whistle signals, basic lights, distress signals, and the use of bridge-to-bridge radio telephone; knows search and rescue procedures; performs routine preventive maintenance on electronic equipment; solves advanced maneuvering board problems; knows procedures in advisory air control in situations requiring control of aircraft. *RD1:* Able to perform the duties required for RD2; computes statistics necessary for operational reports; organizes communication equipment and personnel to implement communications plans; plans, organizes and schedules preventive maintenance programs for electronic equipment; provides command with technical advice concerning capabilities, limitations, reliability, and operation of radar equipment. *RDC:* Able to perform the duties required for RD1; prepares training reports; understands concepts of electronic warfare, including early warning and utilization of radar under conditions of radar jamming and interference; has knowledge of current naval publications concerning functions and procedures of radar and related equipment; prepares preventive maintenance schedules; organizes and maintains technical library; prepares and submits budget requests; plans and supervises on-the-job training programs; supervises the preparation of reports. *RDCM:* Able to perform the duties required for RDCS; serves as senior enlisted technical or specialty administrator; manages personnel in the operation, maintenance, and procurement of radar and associated equipment; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, RD3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic radar use and operation and 3 in coastwise navigation and piloting (radar navigation) (3/84).

Recommendation, RD2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic radar use and operation, 3 in coastwise navigation and piloting (radar navigation), and 3 in record keeping (3/84).

Recommendation, RD1

In the vocational certificate category, 3 semester hours in basic radar use and operation, 3 in coastwise navigation and piloting (radar navigation), 3 in record keeping, and 3 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic radar use and operation, 3 in coastwise navigation and piloting (radar navigation), 3 in record keeping, 3 in maintenance management, and 2 in personnel supervision (3/84).

Recommendation, RDC

In the vocational certificate category, the recommendation is the same as that for RD1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic radar use and operation, 3 in coastwise navigation and piloting (radar navigation), 3 in record keeping, 3 in maintenance management, 3 in personnel supervision, and 3 in principles of management (3/84).

Recommendation, RDCS

In the vocational certificate category, the recommendation is the same as that for RD1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for RDC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/84).

Recommendation, RDCM

In the vocational certificate category, the recommendation is the same as that for RD1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for RDC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/84).

SN: Seaman (E-3). RM3: Radioman Third Class (E-4). RM2: Radioman Second Class (E-5). RM1: Radioman First Class (E-6). RMC: Chief Radioman (E-7). RMCS: Senior Chief Radioman (E-8). RMCM: Master Chief Radioman (E-9).

Description

Summary: Transmits, receives, and processes all forms of telecommunications through various transmission media; operates, monitors, and controls telecommunication transmission reception, terminal, and processing equipment. *RM3:* Prepares messages in correct format for transmission via military and commercial circuits; prepares telegrams in international and domestic form; transmits and receives on radio-telephone and radio-teletype circuits using standard procedures and keeping the required logs; completely processes, routes, and files traffic within own unit; has knowledge of basic communication systems; types 45 words per minute. *RM2:* Able to perform the duties required for RM3; provides technical guidance to subordinate personnel. *RM1:* Able to perform the duties required for RM2; instructs and supervises subordinate personnel in operation and procedures of communication system; organizes duties and assigns personnel; requisitions supplies and parts. *RMC:* Able to perform the duties required for RM1; coordinates maintenance efforts to optimize equipment operating condition; instructs classes; prepares and submits budget requests; plans and supervises on-the-job training; organizes and maintains technical library. *RMCS:* Able to perform the duties required for RMC; serves as enlisted technical or specialty expert; plans, organizes, and supervises communication activities; prepares equipment reports; plans and administers on-the-job training programs. *RMCM:* Able to perform the duties required for RMCS; serves as senior enlisted technical or specialty administrator; manages personnel in the operation of telecommunications equipment; ensures maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, RM3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in office practices, 3 in radio communications, and 3 in word processing (3/84).

Recommendation, RM2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in office practices, 3 in radio communications, and 3 in word processing (3/84).

Recommendation, RM1

In the vocational certificate category, 3 semester hours in typing, 3 in office practices, 3 in radio communications, 3 in word processing, and 2 in maintenance management. In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in office practices, 3 in radio communications, 3 in word processing, 3 in maintenance management, and 3 in personnel supervision (3/84).

Recommendation, RMC

In the vocational certificate category, the recommendation is the same as that for RM1. In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 3 in office practices, 3 in radio communications, 3 in word processing, 3 in maintenance management, 3 in personnel supervision, and 3 in principles of management (3/84).

Recommendation, RMCS

In the vocational certificate category, the recommendation is the same as that for RM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for RMC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/84).

Recommendation, RMCM

In the vocational certificate category, the recommendation is the same as that for RM1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for RMC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/84).

Description

Summary: Opens, maintains and closes military pay records; prepares payroll certification sheets, travel transportation requests and pay records; accounts for property equipage, supplies and materials; operates data processing equipment; prepares and maintains all required forms, records, correspondence, reports and files; provides counseling on travel/transportation entitlements and procedures. *SK3:* Operates office machines including adding machines, duplicating equipment, copying machines, microfiche reading equipment, and microfiche copying equipment; files correspondence; prepares and maintains payroll records; provides supply support including preparation of requisitions for units; familiar with major components of automated data processing (ADP) equipment and knows the common terminology. *SK2:* Able to perform the duties required for SK3; initiates routine correspondence and establishes correspondence files; initiates and supervises the preparation of required reports; controls inventory; prepares bills of lading and processes shipments in accordance with regulations; operates office machines including graphotypes and addressographs. *SK1:* Able to perform the duties required for SK2; operates an office typewriter at 40 words per minute; applies automated supply procedures; assigns, supervises and trains personnel in the supply department; trains subordinates in the proper use of supply publications; audits required inventory store reports for all categories of materials; identifies sources and uses of funds and supervises budgeting procedures. *SKC:* Able to perform the duties required for SK1; computes the cubic dimensions of weight of material and equipment; lays out physical areas of offices, issue rooms, and storerooms plans, and supervises on-the-job training; organizes and supervises procedures for inventory management; audits year-end financial reports; prepares store replenishment data and forecasts unit requirements for various lengths of time and climatic conditions. *SKCS:* Able to perform the duties required for SKC; serves as enlisted specialty expert; maintains and directs supply functions, including those related to security, fiscal control procedures, and transportation; analyzes supply reports, identifies problem areas, and recommends corrective strategies; plans and administers on-the-job training programs; supervises the preparation of reports. *SKCM:* Able to perform the duties required for SKCS; serves as senior enlisted specialty administrator; plans and organizes controls in compliance with policy statements; establishes goals and priorities; reviews and evaluates personnel, equipment and material requirements; establishes and directs training programs; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corp in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty areas.

Recommendation, SK3

In the vocational certificate category, 1 semester hour in filing and records management, 1 in office machines, and 1 in clerical procedures. In the lower-division baccalaureate/associate degree category, 1 semester hour in filing and records management, 1 in office machines, 1 in clerical procedures, and 2 in data processing concepts (6/84).

Recommendation, SK2

In the vocational certificate category, 2 semester hours in filing and records management, 2 in office machines, 1 in clerical procedures, and 2 in record keeping. In the lower-division baccalaureate/associate degree category, 2 semester hours in filing and records management, 2 in office machines, 1 in clerical procedures, 2 in record keeping, 3 in inventory control, and 2 in data processing concepts (6/84).

Recommendation, SK1

In the vocational certificate category, 2 semester hours in filing and records management, 2 in office machines, 2 in clerical procedures, 2 in record keeping, 1 in automated record keeping, 2 in typing, and 2 in business mathematics. In the lower-division baccalaureate/associate degree category, 2 semester hours in filing and records management, 2 in office machines, 2 in clerical procedures, 2 in record keeping, 1 in automated record keeping, 3 in inventory control, 2 in data processing concepts, 2 in typing, 2 in business mathematics, and 2 in personnel supervision (6/84).

Recommendation, SKC

In the vocational certificate category, 2 semester hours in filing and records management, 2 in office machines, 2 in clerical procedures, 2 in record keeping, 1 in automated record keeping, 2 in typing, 2 in business mathematics, and 3 in communication skills. In the lower-division baccalaureate/associate degree category, 2 semester hours in filing and records management, 2 in office machines, 2 in clerical procedures, 2 in record keeping, 1 in automated record keeping, 3 in inventory control, 2 in data processing concepts, 2 in typing, 2 in business mathematics, 3 in personnel supervision, 3 in communication skills, and 3 in principles of management (6/84).

Recommendation, SKCS

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for SKC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (6/84).

Recommendation, SKCM

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, the recommendation is the same as that for SKC. In the upper-division baccalaureate category, 6 semester hours for field experience in management, 3 in management problems, and 3 in supply management (6/84).

SONAR TECHNICIAN

ST3
ST2
ST1
STC
STCS
STCM

Exhibit Dates: 1/71–Present.

Occupational Group: II (Ordnance).

Career Pattern

SN: Seaman (E-3). *ST3:* Sonar Technician, Third Class (E-4). *ST2:* Sonar Technician, Second Class (E-5). *ST1:* Sonar Technician, First Class (E-6). *STC:* Chief Sonar Technician (E-7). *STCS:* Senior Chief Sonar Technician (E-8). *STCM:* Master Chief Sonar Technician (E-9).

Description

Summary: Operates, troubleshoots, repairs, and performs maintenance on shipboard sonar, oceanographic, and underwater fire control equipment, and associated equipment for the solution of anti-submarine warfare problems. *ST3:* Operates, locates, and analyzes equipment casualties; makes repairs, adjustments, alignments, and performs organizational and intermediate maintenance in surface sornar and allied equipment; performs corrective and preventive maintenance on all anti-submarine warfare sensors, weapons, and countermeasure systems and test equipment, including those utilizing solid state microminiature technology. *ST2:* Able to perform the duties required for ST3; provides technical assistance to subordinate personnel. *ST1:* Able to perform the duties required for ST2; organizes anti-submarine attack teams; supervises the use and upkeep of surface ship sonar and underwater equipment; evaluates equipment operation and determines sonar performance data. *STC:* Able to perform the duties required for ST1; trains and supervises personnel in all categories of equipment maintenance and repair; prepares preventive maintenance schedules; organizes and maintains technical library; prepares and submits budget requests; plans and supervises on-the-job training. *STCS:* Able to perform the duties required for STC; serves as enlisted technical or specialty expert; plans, organizes, and directs the work of personnel operating and maintaining sonar oceanographic and underwater fire control equipment; plans and administers on-the-job training programs; supervises the preparation of reports. *STCM:* Able to perform the duties required for STCS; serves as senior enlisted technical or specialty administrator; manages personnel in the operation, maintenance, and procurement of sonar, oceanographic, and underwater fire control equipment; ensure maximum efficiency of the work force and the equipment; prepares general correspondence concerning fiscal, supply, and administrative matters; assists in the formulation of plans, policies, and budget requirements; may supplement the officer corps in the overall supervision and administration of personnel and equipment; may also supervise personnel in other specialty area.

Recommendation, ST3

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in circuit theory, 3 in microminiature technology, 3 in introduction to analog computers, and credit in oceanography on the basis of institutional evaluation (3/84).

Recommendation, ST2

In the vocational certificate category or in the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in circuit theory, 3 in microminiature technology, 3 in introduction to analog computers, and credit in oceanography on the basis of institutional evaluation (3/84).

Recommendation, ST1

In the vocational certificate category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in circuit theory, 3 in microminiature technology, 3 in introduction to analog computers, 3 in maintenance management, and credit in oceanography on the basis of institutional evaluation. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in circuit theory, 3 in microminiature technology, 3 in introduction to analog computers, 3 in maintenance management, 2 in personnel supervision, and credit in oceanography on the basis of institutional evaluation (3/84).

Recommendation, STC

In the vocational certificate category, the recommendation is the same as that for ST1. In the lower-division baccalaureate/associate degree category, 3 semester hours in basic AC/DC theory, 3 in diagnostic procedures, 3 in circuit theory, 3 in microminiature technology, 3 in introduction to analog computers, 3 in maintenance management, 3 in personnel supervision, 3 in principles of management, and credit in oceanography on the basis of institutional evaluation (3/84).

Recommendation, STCS

In the vocational certificate category, the recommendation is the same as that for ST1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for STC. In the upper-division baccalaureate category, 3 semester hours for field experience in management and 3 in management problems (3/84).

Recommendation, STCM

In the vocational certificate category, the recommendation is the same as that for ST1. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for STC. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (3/84).

Description

Summary: Performs general clerical administrative and secretarial duties including typewriting, filing, records management, office publications maintenance, and office equipment operation; maintains personnel service and accounting records; serves as reporter and fact finding body, and acts as office manager. *YN3:* Prepares, routes, and forwards office correspondence; establishes, maintains and disposes of office files; prepares, interprets, and transcribes messages (a straight-copy typing rate of at least 30 words per minute); prepares and distributes mail; performs duties as receptionist; prepares applications, statistical reports, and personnel management information entries; prepares security and legal correspondence, benefits and entitlements forms; familiar with current word processing concepts. *YN2:* Able to perform the duties required for YN3; orders publications and forms; performs personnel transfer procedures; types personnel papers for changes in rating (a straight-copy typing rate of at least 40 words per minute); prepares personnel papers relating to enlistment, discharge, financial records, and courts martial; counsels personnel regarding rights, benefits, and pay systems; able to perform basic functions on word processing equipment; monitors filing and record maintenance, retention and disposal. *YN1:* Able to perform the duties required for YN2; coordinates records disposal program; composes and types office correspondence (a stright-copy typing rate of at least 50 word per minute); transcribes recorded dictation at a minimum rate of 6 word per minute; demonstrate knowledge of forms management; prepares preliminary papers for general courts martial; assists in supervising and training office personnel in military entitlements and procedures; assists in supervision of maintenance of records; performs advanced functions of word processing equipment. *YNC:* Able to perform the duties required for YN1; takes recorded dictation at 60 words per minute; transcribes recorded dictation material at 8 words per minute; composes correspondence directives; demonstrates proper office management concepts and techniques; prepares recommendations for administrative discharges and handling classified matter; demonstrates knowledge of military justice system; administers training programs for clerical personnel; supervises and trains office personnel in military pay entitlements and procedures. *YNCS:* Able to perform the duties required for YNC; serves as enlisted specialty supervisor; provides direction and supervision to enlisted personnel; plans and administers on-the-job training programs; serves as senior enlisted advisor in matters concerning enlisted personnel; demonstrates technical and specialty expertise; functions as office supervisor; interviews, assigns, supervises, and evaluates office personnel; devises, implements and evaluates word processing systems. *YNCM:* Able to perform the duties required for YNCS; functions as senior enlisted technical and specialty administrator; assumes management, supervisory, and administrative responsiblility; responsible for organizing, directing and coordinating programs of instruction for subordinates; supplements officer corps in overall supervision and administration; establishes goals, objectives, and priorities in administration of office functions; evaluates and makes recommendations regarding office personnel, equipment, supplies, and budgets.

Recommendation, YN3

In the vocational certificate category, 2 semester hours in typing, 1 in filing and records management, 1 in clerical procedures, 1 in office machines, and 1 in communication skills (written). In the lower-division baccalaureate/associate degree category, 2 semester hours in typing, 1 in filing and records management, 1 in clerical procedures, 1 in office machines, 1 in communication skills (written), and 2 in word processing concepts; if qualification code was 02 (Verbatim Reporter) or 03 (Legal Clerk), add 3 semester hours in legal practices and procedures (6/84).

Recommendation, YN2

In the vocational certificate category, 3 semester hours in typing, 2 in filing and records management, 2 in clerical procedures, 1 in office machines, and 1 in communication skills (written). In the lower-division baccalaureate/associate degree category, 3 semester hours in typing, 2 in filing and records management, 2 in clerical procedures, 1 in office machines, 1 in communication skills (written), 3 in word processing concepts, and 2 in word processing applications; if qualification code was 02 (Verbatim Reporter) or 03 (Legal Clerk), add 3 semester hours in legal practices and procedures (6/84).

Recommendation, YN1

In the vocational certificate category, 4 semester hours in typing, 2 in filing and records management, 2 in clerical procedures, 1 in office machines, 2 in communication skills (written), and 2 in machine transcription. In the lower-division baccalaureate/associate degree category, 4 semester hours in typing, 2 in filing and records management, 2 in clerical procedures, 1 in office machines, 2 in communication skills (written), 3 in word processing concepts, 3 in word processing applications, 2 in machine transcription, and 2 in personnel supervision; if qualification code was 02 (Verbatim Reporter) or 03 (Legal Clerk), add 3 semester hours in legal practices and procedures (6/84).

Recommendation, YNC

In the vocational certificate category, 4 semester hours in typing, 2 in filing and records management, 3 in clerical procedures, 1 in office machines, 3 in communication skills (written), and 2 in machine transcription. In the lower-division baccalaureate/associate degree category, 4 semester hours in typing, 2 in filing and records management, 3 in clerical procedures, 1 in office machines, 3 in communication skills (written), 3 in word processing concepts, 3 in word processing applications, 2 in machine transcription, 3 in personnel supervision, and 1 in office management; if qualification code was 02 (Verbatim Reporter) or 03 (Legal Clerk), add 3 semester hours in legal practices and procedures (6/84).

Recommendation, YNCS

In the vocational certificate category, the recommendation is the same as that for YNC. In the lower-division baccalaureate/associate degree category, 4 semester hours in typing, 2 in filing and records management, 3 in clerical procedures, 1 in office machines, 3 in communication skills (written), 3 in word processing concepts, 3 in word processing applications, 2 in machine transcription, 3 in personnel supervision, 3 in office management, 3 in principles of management, and 3 in word processing management; if qualification code was 02 (Verbatim Reporter) or 03 (Legal Clerk), add 3 semester hours in legal practices and procedures. In the upper-division baccalaureate category, 3 semester hours for field experience in management (6/84).

Recommendation, YNCM

In the vocational certificate category, the recommendation is the same as that for YNC. In the lower-division baccalaureate/associate degree category, the recommendation is the same as that for YNCS. In the upper-division baccalaureate category, 6 semester hours for field experience in management and 3 in management problems (6/84).

Coast Guard Warrant Officer Exhibits

CGW-AVI-001

Aviation Engineering

Exhibit Dates: 1/65–Present

Career Pattern

May have progressed to Aviation Engineering Warrant Officer from Aviation Machinists' Mate (AD), Aviation Electrician's Mate (AE), or Aviation Structural Mechanic (AM).

Description

Serves as an officer technical specialist in aircraft maintenance; provides technical advice and information concerning capabilities, limitations and reliability of aircraft powerplants, accessories, airframes and equipment; directs and supervises practices and procedures for service, maintenance, overhaul, repair, inspection, alteration, modification, adjustment, preservation, and depreservation of aircraft powerplants, accessories, airframes and equipment; formulates and supervises training programs; prepares, maintains, and submits personnel and materiel records, logs, reports, and accounts.

Recommendation

In the lower-division baccalaureat/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in aviation maintenance systems operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

CGW-BOSN-001

Boatswain

Exhibit Dates: 1/65–Present

Career Pattern

May progress to Boatswain Warrant Officer from Boatswain's Mate (BM), Marine Science Technician (MST), Quartermaster (QM), and Radarman (RD).

Description

Supervises and directs personnel in all aspects of deck seamanship, small craft operations, emergency skills, navigation, search operations, gunnery operations and cargo and buoy handling operations; serves as specialist on inspection duties; develops and supervises training programs; prepares, maintains, and submits personnel, materiel, and operational records, reports, and accounts; prepares correspondence and administers budgets.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in general ship operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 for field experience in management, and 3 in budget administration (12/85).

CGW-COMM-001

Communications

Exhibit Dates: 1/65–Present

Career Pattern

May have progressed to Communications Warrant Officer from Radioman (RM).

Description

Serves as an officer technical specialist in the field of communications; supervises and directs communication personnel in conduct of radio and wire communications; plans and supervises instructional programs; prepares, maintains, and submits personnel, material, operational records, and accounts; prepares correspondence and administrative budgets; provides technical liaison with other civilian and military communication facilities.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in communications systems operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (2/86).

CGW-ELC-001

Electronics

Exhibit Dates: 1/65–Present

Career Pattern

May have progressed to Electronics Warrant Officer from Aviation Electronics Technician (AT), Electronics Technician (ET), Sonar Technician (ST), or Telephone Technician (TT).

Description

Serves as an officer technical specialist in the field of electronics; supervises and directs personnel in all aspects of electronic repair of equipment, operation of electronic repair facilities, and maintenance of operational equipment; plans and supervises instructional programs; handles personnel duties, budget matters, records, and requisition of supplies; provides technical liaison with other services and commercial organizations; prepares technical and administrative reports.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in electronics systems operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (2/86).

CGW-FS-001

Finance and Supply

Exhibit Dates: 1/65–Present

Career Pattern

May have progressed to Finance and Supply Warrant Officer from Storekeeper (SK) or Subsistence Specialist (SS).

Description

Serves as a technical specialist in the field of finance and supply, organizes, plans, and supervises the work of 5–30 persons engaged in procuring, storing, inventorying and issuing of suppies, including persons who work in disbursing offices, supervises and directs people in the preparation of estimates of requirements, inventories of supplies and equipment, audit of records and budget, computation of pay, preparation of vouchers, and allocation of materials; disburses public funds as agent cashier and as assistant disbursing officer, supervises computing of pay, posting of payments, the balancing of cash and check disbursements, and the auditing of accounts, supervises the preparation and the maintaining of supply department records and inventories, supervises preparation of correspondence and the maintaining of filing systems for publications and directives.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in accounting systems, 3 in personnel supervision, and 3 for field experience in budgeting. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

CGW-MAT-001

Materiel Maintenance

Exhibit Dates: 1/65–Present

Career Pattern

May have progressed to Materiel Maintenance Warrant Officer from Damage Controlman (DC) or Avaition Survivalman (ASM).

Description

Serves as an operational and technical specialist in the fields of repair, maintenance, damage control and fire fighting aboard ship and at shore units; serves as assistant to engineering and repair officers, as shop superintendent, and as technical advisor concerning uses, capabilities, limitations and reliability of ship repair, fire fighting and damage control equipment and as officer in charge of maintenance and repair detachments ashore; organizes and supervises personnel in ship repair and maintenance; provides technical advice and information concerning use, characteristics, and limitations of building and construction materials; organizes and supervises maintenance and repair forces on work involving repairs to buildings, towers, docks, bulkheads, street paving and pipelines, including water and sewer lines; develops and supervises training programs; supervises preparation, maintenance, and submission of personnel and materiel records and reports; supervises procurement, stowage preservation, and utilization practices for repair parts, building materials, and equipment.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in maintenance activities and programs. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

CGW-MED-001

Medical Administration

Exhibit Dates: 1/65–Present.

Career Pattern

Progressed to Medical Administration Warrant Officer from Health Services Technician (HS).

Description

Serves as an officer technical specialist in the field of medical administration; administers nonprofessional aspects of medical and dental facilities; manages administrative functions such as fiscal, supply, personnel, records, and other related medical matters; promotes and manages environmental sanitation programs; administers and serves as instructor in medical training programs; performs medical service planning and logistic duties; serves as assistant to inspectors in reviewing administrative organization and operations of medical and dental facilities.

Recommendation

In the upper-division baccalaureate category, 3 semester hours in organizational management, 3 in personnel management, 3 in accounting and control, 3 in administrative policy, and 3 in data collection and record management (2/86).

CGW-ENG-001

Naval Engineering

Exhibit Dates: 1/65–Present.

Career Pattern

May have progressed to Naval Engineering Warrant Officer from Electrician's Mate (EM) or Machinery Technician (MK).

Description

Serves as an officer technical specialist in the field of engineering and in machinery repair on uses, capabilities, limitations, and reliability of engineering equipment; directs and supervises handling, storage, installation, operation, testing, maintenance, and repair of engineering equipment; develops and supervises training programs; prepares, maintains, and submits personnel and material records and reports; supervises procurement, preservation and accounting practices for supplies and repair parts.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in marine propulsion systems operations. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

CGW-PERS-001

Personnel Administration

Exhibit Dates: 1/65–Present.

Career Pattern

May have progressed to Personnel Administration Warrant Officer from Data Processing Technician (Emergency Rating) or Yeoman (YN).

Description

Serves as a technical specialist in general and personnel adminstration; provides technical advice and information concerning officer and enlisted personnel regulations and administration; organizes and supervises personnel in an administrative or personnel office of up to 20 persons; supervises personnel in preparing and processing correspondence, reports, personnel records, and accounts; knows and uses computers and their programs for records; administers funds for travel and procurement, and the allocation of officer materials and equipment; prepares office organization, work flow, and layout charts; prescribes procedures and techniques for work improvement; prepares official correspondence, administrative directives, regulations, and orders.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in business communications, 3 in personnel supervision, and 3 for field experience in office management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

CGW-PYA-001

Physician's Assistant

Exhibit Dates: 8/75–Present.

Career Pattern

May have progressed to Physician's Assistant from Hospital Corpsman (HM) or Health Services Technician (HS).

Description

Serves as an officer technical specialist, qualified by academic and practical training to provide patient services under the supervision and direction of a licensed physician; performs diagnostic and therapeutic tasks; in support of a primary care physician, engages in continuing medical education, health maintenance, and community health; has practical training in principles of education and applied psychology as it relates to their day-to-day clinical activities; may serve in Naval hospitals, clinics, and branch clinics. NOTE: Appointment to Physician's Assistant Warrant Officer is based upon graduation from an accredited Physician's Assistant program and satisfactory completion of the appropriate licensing examination.

Recommendation

In the upper-division baccalaureate category, 6 semester hours in management, 6 in methods of instruction, and 2 in applied psychology. In the graduate degree category, 3 semester hours in eduational principles (2/86).

CGW-PSS-001

Port Safety and Security

Exhibit Dates: 7/83–Present.

Career Pattern

May progress to Port Safety and Security Warrant Officer from Port Securityman (PS).

Description

Serves as a port safety and security specialist; provides information and advice concerning physical security procedures, Coast Guard law enforcement procedures, and jurisdiction; supervises port safety and security personnel in port emergency response operations, including fire fighting and hazardous material spills; prepares and reviews reports; prescribes methods and procedures for law enforcement and security operations; supervises dissemination of regulations to subordinate personnel.

Recommendation

In the lower-division baccalaureate/associate degreee category, 3 semester hours in technical communications and 3 in personnel supervision (12/85).

CGW-INF-001

Public Information

Exhibit Dates: 1/65–Present.

Career Pattern

Progressed to Public Information Warrant Officer from Public Affairs Specialist (PA).

Description

Serves as an officer technical specialist in public information; provides information on photography, the news media, community relations, and internal relations; organizes, directs, and coordinates operations and upkeep of a public information office; prepares and monitors budgets for the operation of a public information office; writes and edits major stories and speeches, television and motion picture scripts; establishes and supervises comprehensive training programs.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in writing for mass media, 3 in curriculum design and organization, 3 in business communications, and 3 in audio/visual-photographic technology. In the upper-division baccalaureate category, 3 semester hours in public relations, 3 in budget administration, and 6 for field experience in public affairs (3/86).

CGW-WEPS-001

Weapons

Exhibit Dates: 1/65–Present.

Career Pattern

May have progressed to Weapons Warrant Officer from Fire Control Technician (FT) or Gunner's Mate (GM).

Description

Serves as an operational and technical specialist in gunnery and ordnance; serves as assistant gunnery and ordnance repair officer; directs and supervises assembly, installation, operation, testing, maintenance, and repair of ordnance equipment; supervises testing, handling, stowage, preservation, requisitioning, issuing, and accounting practices and procedures for all ammunition and ammunition components; supervises stowage, preservation, security, requisitioning, and accounting practices and procedures for all ordnance equipment and repair parts; develops and supervises training programs; prepares, maintains, and submits ordnance, personnel, material, and operational record, reports, and accounts.

Recommendation

In the lower-division baccalaureate/associate degree category, 3 semester hours in technical communications, 3 in personnel supervision, and 3 for field experience in inventory systems management. In the upper-division baccalaureate category, 3 semester hours in principles of management, 3 in management problems, 3 in budget administration, and 3 for field experience in management (3/86).

Marine Corps Enlisted MOS Exhibits

MCE-6012-001

Aircraft Mechanic, A-4/TA-4/QA-4

6012

Exhibit Dates: 4/87–Present.

Occupational Field: 60 (Aircraft Maintenance).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6011 (Aircraft Mechanic – Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6012 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects and maintains aircraft airframes and airframe components; performs duties related to flightline operations. *Levels I and II:* Operates and maintains applicable aircraft maintenance ground support equipment; obtain license as required; directs aircraft taxiing; performs daily preflight and post-flight inspections and assists the pilot and crew in the performance of those inspections; assists during periodic airframe inspection; practices applicable safety procedures and precaution on the flight line and in hangar deck areas; performs hot and cold refueling of aircraft; performs oil analysis sampling and uses various types of fuels and lubricants; removes and installs aircraft power plants, components, and parts as required; recognizes and assists in corrective treatment and/or preventive maintenance of corrosion; uses precision measuring equipment required in the performance of duties; assists in the performance of calendar inspection; operates assigned fire fighting equipment; follows weight and balance limitations for applicable aircraft; performs starting and ground turn-up functions when authorized; uses technical publications in skill area. *Level III:* Able to perform the duties required for Level II; performs duties as flightline section leader or standardization team chief; conducts informal on-the-job technical training. *Level IV:* Able to perform the duties required for Level III; assists in the supervision and administration of flightline hangar deck area and related operations ashore and afloat; plans, schedules, and directs work center assignment; performs duties as maintenance department noncommissioned officer in charge.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 9 semester hours in aircraft airframe maintenance and inspection, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft airframe maintenance and inspection, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6013-001

Aircraft Mechanic, A-6/EA-6

6013

Exhibit Dates: 4/87–Present.

Occupational Field: 60 (Aircraft Maintenance).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6011 (Aircraft Mechanic – Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6013 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects and maintains aircraft airframes and airframe components; performs duties related to flightline operations. *Levels I and II:* Operates and maintains applicable aircraft maintenance ground support equipment; obtain license as required; directs aircraft taxiing; performs daily preflight and post-flight inspections and assists the pilot and crew in the performance of those inspections; assists during periodic airframe inspection; practices applicable safety procedures and precaution on the flight line and in hangar deck areas; performs hot and cold refueling or aircraft; performs oil analysis sampling and uses various types of fuels and lubricants; removes and installs aircraft power plants, components, and parts as required; recognizes and assists in corrective treatment and/or preventive maintenance of corrosion; uses precision measuring equipment required in the performance of duties; assists in the performance of calendar inspection; operates assigned fire fighting equipment; follows weight and balance limitations for applicable aircraft; performs starting and ground turn-up functions when authorized; uses technical publications in skill area. *Level III:* Able to perform the duties required for Level II; performs duties as flightline section leader or standardization team chief; conducts informal on-the-job technical training. *Level IV:* Able to perform the duties required for Level III; assists in the supervision and administration of flightline hangar deck area and related operations ashore and afloat; plans, schedules, and directs work center assignment; performs duties as maintenance department noncommissioned officer in charge.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 9 semester hours in aircraft airframe maintenance and inspection, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft airframe maintenance and inspection, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6014-001

Aircraft Mechanic, F-4/RF-4

6014

Exhibit Dates: 4/87–Present.

Occupational Field: 60 (Aircraft Maintenance).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). In the lower-division baccalaureate/associate degree category, 9 semester hours in aircraft airframe maintenance and inspection, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft airframe maintenance and inspection, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6018-001

Aircraft Mechanic, OV-10

6018

Exhibit Dates: 4/87–Present.

Occupational Field: 60 (Aircraft Maintenance).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6011 (Aircraft Mechanic – Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6018 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects and maintains aircraft airframes and airframe components; performs duties related to flightline operations. *Levels I and II:* Operates and maintains applicable aircraft maintenance ground support equipment; obtain license as required; directs aircraft taxiing; performs daily preflight and post-flight inspections and assists the pilot and crew in the performance of those inspections; assists during periodic airframe inspection; practices applicable safety procedures and precaution on the flight line and in hangar deck areas; performs hot and cold refueling of aircraft; performs oil analysis sampling and uses various types of fuels and lubricants; removes and installs aircraft power plants, components, and parts as required; recognizes and assists in corrective treatment and/or preventive maintenance of corrosion; uses precision measuring equipment required in the performance of duties; assists in the performance of calendar inspection; operates assigned fire fighting equipment; follows weight and balance limitations for applicable aircraft; performs starting and ground turn-up functions when authorized; uses technical publications in skill area. *Level III:* Able to perform the duties required for Level II; performs duties as flightline section leader or standardization team chief; conducts informal on-the-job technical training. *Level IV:* Able to perform the duties required for Level III; assists in the supervision and administration of flightline hangar deck area and related operations ashore and afloat; plans, schedules, and directs work center assignment; performs duties as maintenance department noncommissioned officer in charge.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 9 semester hours in aircraft airframe maintenance and inspection, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 12 semester hours in aircraft airframe maintenance and inspection, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6022-001

Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6051 (Aircraft Hydraulic/Pneumatic Mechanic Trainee), is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6052 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects, maintains, and repairs aircraft hydraulic/pneumatic systems and system components. *Levels I and II:* Uses color code charts of aircraft piping and lines; reads schematic diagrams, shop sketches, blueprints, and interprets applicable technical data; under supervision, performs component repairs; knows and uses fluids and gases in applicable systems; uses precision measuring equipment; assists in or performs inspections required; fabricates replacement lines of tubing and hoses. *Level III:* Able to perform the duties required for Levels I and II; performs component repair of hydraulic/pneumatic components as required; uses and maintains hydraulic/pneumatic test equipment; observes applicable material control procedures; conducts informal on-the-job training; plans, schedules and directs work center assignments. *Level IV:* Able to perform the duties required for Level III; performs and supervises the maintenance/repair requirements for aircraft hydraulic/pneumatic systems components; supervises an aircraft hydraulic/pneumatic check crew or maintenance unit; performs duties as quality assurance inspector; supervises and administers an organizational maintenance level aircraft hydraulic/pneumatic work center.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 6 semester hours in hydraulic/pneumatic systems repair, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 9 semester hours in hydraulic/pneumatic systems repair, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

The MOS designator 6051 (Aircraft Hydraulic/Pneumatic Mechanic Trainee), is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6053 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects, maintains, and repairs aircraft hydraulic/pneumatic systems and system components. *Levels I and II:* Uses color code charts of aircraft piping and lines; reads schematic diagrams, shop sketches, blueprints, and interprets applicable technical data; under supervision, performs component repairs; knows and uses fluids and gases in applicable systems; uses precision measuring equipment; assists in or performs inspections required; fabricates replacement lines of tubing and hoses. *Level III:* Able to perform the duties required for Levels I and II; performs component repair of hydraulic/pneumatic components as required; uses and maintains hydraulic/pneumatic test equipment; observes applicable material control procedures; conducts informal on-the-job training; plans, schedules and directs work center assignments. *Level IV:* Able to perform the duties required for Level III; performs and supervises the maintenance/repair requirements for aircraft hydraulic/pneumatic systems components; supervises an aircraft hydraulic/pneumatic check crew or maintenance unit; performs duties as quality assurance inspector; supervises and administers an organizational maintenance level aircraft hydraulic/pneumatic work center.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 6 semester hours in hydraulic/pneumatic systems repair, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 9 semester hours in hydraulic/pneumatic systems repair, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6054-001

AIRCRAFT HYDRAULIC/PNEUMATIC
MECHANIC, F-4/RF-4

6054

Exhibit Dates: 4/87–Present.

Occupational Field: 60 (Aircraft Maintenance).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6051 (Aircraft Hydraulic/Pneumatic Mechanic Trainee), is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6054 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects, maintains, and repairs aircraft hydraulic/pneumatic systems and system components. *Levels I and II:* Uses color code charts of aircraft piping and lines; reads schematic diagrams, shop sketches, blueprints, and interprets applicable technical data; under supervision, performs component repairs; knows and uses fluids and gases in applicable systems; uses precision measuring equipment; assists in or performs inspections required; fabricates replacement lines of tubing and hoses. *Level III:* Able to perform the duties required for Levels I and II; performs component repair of hydraulic/pneumatic components as required; uses and maintains hydraulic/pneumatic test equipment; observes applicable material control procedures; conducts informal on-the-job training; plans, schedules and directs work center assignments. *Level IV:* Able to perform the duties required for Level III; performs and supervises the maintenance/repair requirements for aircraft hydraulic/pneumatic systems components; supervises an aircraft hydraulic/pneumatic check crew or maintenance unit; performs duties as quality assurance inspector; supervises and administers an organizational maintenance level aircraft hydraulic/pneumatic work center.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 6 semester hours in hydraulic/pneumatic systems repair, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 9 semester hours in hydraulic/pneumatic systems repair, 6 in aviation maintenance technology, 3 in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

Credit is recommended for Levels III and IV.

Description

Summary: Inspects and maintains aircraft safety equipment. *Levels I and II:* Performs, under close supervision and training, routine duties incident to inspection or replacement of aircraft safety systems and components; uses technical and maintenance publications; disassembles, inspects and assembles aircraft-related safety equipment air conditioning and pressurization systems, fire extinguishing systems, oxygen systems, and follows approved procedures related to special explosive cartridges used in escape systems. *Level III:* Able to perform the duties required for Level II; tests aircraft for pressure tightness; removes, checks, rigs, and adjusts ejection seats, components, and/or seat and canopy components; analyzes aircraft oxygen system malfunctions; inspects and adjusts firing mechanisms for emerging escape systems; conducts informal on-the-job training within assigned skill designator; tests for carbon monoxide contamination; inspects and adjusts pressure control units; replaces defective indicators and controls. *Level IV:* Able to perform the duties required for Level III; plans, schedules, and directs work assignments; performs duties as quality assurance inspector, and prepares and submits required reports and records.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 3 semester hours in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 3 semester hours in industrial safety, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

AIRCRAFT STRUCTURES MECHANIC, A-4/
TA-4/OA-4
6092

Exhibit Dates: 4/87–Present.

Occupational Field: 60 (Aircraft Maintenance).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6091 (Aircraft Structures Mechanic – Trainee), is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6092 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects, maintains, and repairs aircraft structures and structural components. *Levels I and II:* Uses metalworking tools in the maintenance and repair of aircraft structures and structural components; uses shears, brakes, grinders, and presses; refers to and complies with technical publications such as color code charts, schematic diagrams, sketches, blueprints and instructions; inspects and maintains powered and non-powered hand tools and related support equipment; performs periodic inspections of system components and assists in removal and replacement of aircraft component parts such as wings, control surfaces, landing gear, arresting gear and tanks; inspects and repairs aircraft with respect to metal (aluminum alloy), composites, fiberglass, rubber, and plastic; makes simple dies, templates, and jigs to be used in metal working and fabrication of aircraft parts; does riveting of all types; uses established procedures to control and prevent aircraft corrosion; observes acceptable industrial safety practices and documents work performed. *Level III:* Able to perform the duties required for Level II; organizes work assignments; heat-treats metal alloys used in aircraft; classifies parts for use in the repair of aircraft; repairs, maintains, and rigs wings, airframe, and cockpit control mechanisms; performs major structural inspections and repairs; repairs aircraft deicing systems, cockpit enclosures, radomes, and surface repairs; conducts on-the-job and technical training. *Level IV:* Able to perform the duties required for Level III; designs cradle structures for moving, handling, and securing aircraft or equipment ashore/afloat; plans, schedules, and directs work center assignments; performs and supervises the complete repair of aircraft structures and structural components; performs aircraft weighing; supervises, directs, and administers an organizational maintenance level aircraft structural repair work center ashore/afloat.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 9 semester hours in airframe structures repairs, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 12 semester hours in airframe structures repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in industrial safety. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

Credit is recommended for Levels III and IV.

Description

Summary: Inspects and maintains air frames, power plants, and aircraft components; performs duties related to flight line operations. *Levels I and II:* Operates and maintains special shop and ground support equipment; assists in performing pre-flight and post-flight inspections; practices ground safety procedures in flight line and hangar areas; accomplishes hot and cold refueling of aircraft and understands the use of air frame and power plant fluids and lubricants including the color codes for lines and tubing; under supervision, removes and installs aircraft components and parts as required; uses technical publications, bulletins, diagrams, and material control procedures; observes weight and balance limitations and understands the use of precision measuring tools. *Level III:* Able to perform the duties required for Level II; performs inspection and maintenance duties on the various systems of the aircraft including the fuel, flight control, rotor, utility, and power plant systems; checks the cockpit controls, switches, and safety devices; accomplishes engine starting, tune-up procedures and taxiing of aircraft; removes and installs equipment, components, and parts as required; recognizes corrosion and applies corrective treatment or preventive maintenance; performs duties as section or crew leader, or quality assurance inspector; conducts informal technical training programs, and assists in the supervision and administration of aircraft maintenance operations. *Level IV:* Able to perform the duties required for Level III; plans, schedules, and directs aircraft maintenance work center activities; supervises flight line and hangar operations; administers formal and informal technical training.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 9 semester hours in airframe structures repairs, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 12 semester hours in airframe structures repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in industrial safety. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6115-001

Helicopter Mechanic (CH-53E)

6115

Exhibit Dates: 4/87–Present.

Occupational Field: 61 (Aircraft Maintenance).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6111 (Aircraft Mechanic - Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6115 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Inspects and maintains air frames, power plants, and aircraft components; performs duties related to flight line operations. *Levels I and II:* Operates and maintains special shop and ground support equipment; assists in performing pre-flight and post-flight inspections; practices ground safety procedures in flight line and hangar areas; accomplishes hot and cold refueling of aircraft and understands the use of air frame and power plant fluids and lubricants including the color codes for lines and tubing; under supervision, removes and installs aircraft components and parts as required; uses technical publications, bulletins, diagrams, and material control procedures; observes weight and balance limitations and understands the use of precision measuring tools. *Level III:* Able to perform the duties required for Level II; performs inspection and maintenance duties on the various systems of the aircraft including the fuel, flight control, rotor, utility, and power plant systems; checks the cockpit controls, switches, and safety devices; accomplishes engine starting, tune-up procedures and taxiing of aircraft; removes and installs equipment, components, and parts as required; recognizes corrosion and applies corrective treatment or preventive maintenance; performs duties as section or crew leader, or quality assurance inspector; conducts informal technical training programs, and assists in the supervision and administration of aircraft maintenance operations. *Level IV:* Able to perform the duties required for Level III; plans, schedules, and directs aircraft maintenance work center activities; supervises flight line and hangar operations; administers formal and informal technical training.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 9 semester hours in airframe structures repairs, 3 in aviation maintenance technology, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 12 semester hours in airframe structures repair, 6 in aviation maintenance technology, 3 in personnel supervision, 3 in maintenance management, and 3 in industrial safety. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6111 (Aircraft Mechanic - Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6154 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Maintains, inspects and repairs helicopter hydraulic/pneumatic systems and system components. *Levels I and II:* Uses color code charts of helicopter piping and lines; reads schematic diagrams, shop sketches, blueprints and interprets applicable technical data; under supervision, performs component repairs; knows and uses fluids and gases in applicable systems; uses precision measuring equipment; assists in or performs inspections required by maintenance requirement cards and completes maintenance/repairs as required. *Level III:* Able to perform the duties required for Levels I and II; performs complete repair of helicopter braking systems; removes and replaces hydraulic/pneumatic systems and/or components; uses and maintains hydraulic/pneumatic test equipment; observes applicable material control procedures; conducts informal on-the-job training; plans, schedules and directs work center assignments. *Level IV:* Able to perform the duties required for Level III; performs and supervises the maintenance/repair requirements of helicopter hydraulic/pneumatic systems components; supervises a helicopter hydraulic/pneumatic check crew or maintenance unit; performs duties as quality assurance inspector; supervises and administers an organizational maintenance level helicopter hydraulic/pneumatic work center.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 12 semester hours in hydraulic systems repair and 3 in aviation maintenance technology (12/88).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 15 semester hours in hydraulic systems repair, 6 in aviation maintenance technology, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (12/88).

MCE-6155-001

HELICOPTER HYDRAULIC/PNEUMATIC MECHANIC (CH-53E)

The MOS designator 6311 (Aircraft Communications/Navigation Systems Technician - Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6312 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Installs, removes, inspects, tests, maintains and repairs components, subsystems and ancillary equipment of installed aircraft communications, navigation and deceptive electronics countermeasures systems. *Levels I and II:* Applies theory of operation of vacuum tubes, transistors, solid state devices, integrated circuit components, transformers, motors, generators, and electronic control circuitry including resistance, capacitance, inductance, as applicable; uses electronic schematics, wiring diagrams and technical data contained in publications pertaining to avionics systems, test equipment, and aircraft; observes safety precautions while working on and around aircraft; diagnoses and isolates systems failures of installed equipment using appropriate test equipment and publications; performs corrective actions of corrosion of electronic components; completes maintenance test forms; operates ground support equipment to perform maintenance of installed systems; performs avionics systems maintenance in accordance with acceptable procedures; performs priodic inspections and completes maintenance repair actions in accordance with appropriate technical documents; performs operational tests of installed systems. *Level III:* Able to perform the duties required for Level II; performs maintenance functions for systems including removal, installation, adjustment, alignment of systems components, and repair on replacement of associated aircraft wiring and interconnecting devices; performs inspections of completed maintenance actions; conducts technical training within assigned area; monitors source data collection and assists in the preparation of reports and records; assists in the planning and scheduling of work assignments and supervises maintenance performed on installed systems. *Level IV:* Able to perform the duties required for Level III; possesses a through understanding and working knowledge of sound management principles, work shop supervision, proper training methods, and approved maintenance procedures; coordinates maintenance actions and insures appropriate maintenance documentation is accomplished.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft electronic maintenance, and 3 in communications/navigation maintenance (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft electronic maintenance, 3 in communications/navigation maintenance, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job perfomance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6311 (Aircraft Communications/Navigation Systems Technician - Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6323 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Installs, removes, inspects, tests, maintains and repairs components, subsystems and ancillary equipment of installed aircraft communications, navigation and deceptive electronics countermeasures systems. *Levels I and II:* Applies theory of operation of vacum tubes, transistors, solid state devices, integrated circuit components, transformers, motors, generators and electronic control circuitry including resistance, capacitance, inductance, as applicable; uses electronic schematics, wiring diagrams and technical data contained in publications pertaining to avionics systems, test equipment, and aircraft; observes safety precautions while working on and around aircraft; diagnoses and isolates systems failures of installed equipment using appropriate test equipment and publications; performs corrective actions of corrosion of electronic components; completes maintenance test forms; operates ground support equipment to perform maintenance of installed systems; performs avionics systems maintenance in accordance with acceptable procedures; performs operational tests of installed systems. *Level III:* Able to perform the duties required for Level II; performs maintenance functions for systems including removal, installation, adjustment, alignment of systems components, and repair on replacement of associated aircraft wiring and interconnecting devices; performs inspections of completed maintenance actions; conducts technical training within assigned area; monitors source data collection and assists in the preparation of reports and records; assists in the planning and scheduling of work assignments and supervises maintenance performed on installed systems. *Level IV:* Able to perform the duties required for Level III; possesses a thorough understanding and working knowledge of sound management principles, work shop supervision, proper training methods, and approved maintenance procedures; coordinates maintenance actions and insures appropriate maintenance documentation is accomplished.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft electronic maintenance, and 3 in communications/navigation maintenance (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft electronic maintenance, 3 in communications/navigation maintenance, 3 in personnel supervision, and 3 in maintenance management. In the upper division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6324-001

AIRCRAFT COMMUNICATIONS/NAVIGATION
SYSTEMS TECHNICIAN, (U/AH-1)

6324

Exhibit Dates: 4/87–Present.

Occupational Field: 63 (Avionics).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6311 (Aircraft Communications/Navigation Systems Technician - Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6324 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Installs, removes, inspects, tests, maintains and repairs components, subsystems and ancillary equipment of installed aircraft communications, navigation and deceptive electronics countermeasures systems. *Levels I and II:* Applies theory of operation of vacuum tubes, transistors, solid state devices, integrated circuit components, transformers, motors, generators, and electronic control circuitry including resistance, capacitance, inductance, as applicable; uses electronic schematics, wiring diagrams and technical data contained in publications pertaining to avionics systems, test equipment, and aircraft; observes safety precautions while working on and around aircraft; diagnoses and isolates systems failures of installed equipment using appropriate test equipment and publications; performs corrective actions of corrosion of electronic components; completes maintenance test forms; operates ground support equipment to perform maintenance of installed systems; performs avionics systems maintenance in accordance with acceptable procedures; performs operational tests of installed systems. *Level III:* Able to perform the duties required for Level II; performs maintenance functions for systems including removal, installation, adjustment, alignment of systems components, and repair or replacement of associated aircraft wiring and interconnecting devices; performs inspections of completed maintenance actions; conducts technical training within assigned area; monitors source data collection and assists in the preparation of reports and records; assists in the planning and scheduling of work assignments and supervises maintenance performed on installed systems. *Level IV:* Able to perform the duties required for Level III, possesses a thorough understanding and working knowledge of sound management principles, work shop supervision, proper training methods, and approved maintenance procedures; coordinates maintenance actions and insures appropriate maintenance documentation is accomplished.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft electronic maintenance, and 3 in communications/navigation maintenance (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft electronic maintenance, 3 in communications/navigation maintenance, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6325-001

AIRCRAFT COMMUNICATIONS/NAVIGATION SYSTEMS TECHNICIAN V-22

6325

Exhibit Dates: 7/89–Present.

Occupational Field: 63 (Avionics).

Career Pattern

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The designator 6331 (Aircraft Electrical Systems Technician – Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6332 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Installs, removes, inspects, tests, maintains and repairs aircraft electrical components, systems and auxiliary equipment. *Levels I and II:* Operates and maintains applicable shop and ground support equipment; practices ground safety procedures and precautions in flight line or hangar operations or in test areas where dangerous voltages or other conditions may exist; demonstrates and applies the knowledge of wire repair; assists in the inspection and testing of electrical components by applying the theory of operation of transistors, diodes, solid state components, integrated circuits, motors, servos, power transmissions and other electrical devices; demonstrates the use of electrical schematics, wiring diagrams, color codes, publications and other technical data; under supervision and by using appropriate test equipment, diagnoses failures on aircraft electrical systems including the power supply system, lighting and control systems, power plant system, and automatic flight control system. *Level III:* Able to perform the duties required for Level II; performs corrective action on corroded or deteriorated electronic components; performs the removal, installation, adjustment, alignment, and replacement of components and wiring in interconnecting devices; conducts pre-flight and post-flight operational tests on the aircraft electrical system. *Level IV:* Able to perform the duties required for Level III; possesses a thorough understanding of sound management principles, work center supervision, proper methods of training personnel, and approved electrical systems maintenance; organizes and administers facilities for the maintenance and repair of aircraft electrical systems; performs quality assurance inspections for maintenance and repair of electrical equipment; assists in the planning and supervision of work center assignments.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 3 semester hours in

electrical/electronic laboratory, 9 in aircraft electrical maintenance, and 3 in electromechanical laboratory (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft electrical maintenance, 3 in electromechanical laboratory, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

MCE-6333-001

Aircraft Electrical Systems
Technician, A-6/EA-6/TC-4C
6333

PVT: Private (E-1). *PFC:* Private First Class (E-2). *LCP:* Lance Corporal (E-3). *CPL:* Corporal (E-4). *SGT:* Sergeant (E-5). *SSGT:* Staff Sergeant (E-6). *GYSGT:* Gunnery Sergeant (E-7). NOTE: MOS duties are not defined in terms of rank or paygrade, but by levels. Level I identifies tasks that are taught in the classroom; the individual is able to perform simple parts of tasks. Level II identifies those tasks that are part of on-the-job-training; the trainee can do most tasks pertaining to a particular system and needs supervision on more difficult parts of tasks. Level III indicates that the individual can perform all essential tasks without supervision. Level IV indicates a high level of proficiency in job performance; individual can perform advanced technical functions, instruction, inspection, and supervision. The MOS designator 6331 (Aircraft Electrical Systems Technician - Trainee) is used to identify individuals in Levels I and II. Upon completion of Level II, MOS 6343 is awarded. Credit is recommended for Levels III and IV.

Description

Summary: Installs, removes, inspects, tests, maintains and repairs aircraft electrical components, systems and auxiliary equipment. *Levels I and II:* Operates and maintains applicable shop and ground support equipment; practices ground safety procedures and precautions in flight line or hangar operations or in test areas where dangerous voltages or other conditions may exist; demonstrates and applies the knowledge of wire repair; assists in the inspection and testing of electrical components by applying the theory of operation of transistors, diodes, solid state components, integrated circuits, motors, servos, power transmissions and other electrical devices; demostrates the use of electrical schematics, wiring diagrams, color codes, publications and other technical data; under supervision and by using appropriate test equipment, diagnoses failures on aircraft electrical systems including the power supply system, lighting and control systems, power plant system, rotor and drive system, and automatic flight control system. *Level III:* Able to perform the duties required for Level II; performs corrective action on corroded or deteriorated electronic components; performs the removal, installation, adjustment, alignment, and replacement of components and wiring in interconnecting devices; conducts pre-flight and post-flight and operational tests on the aircraft electrical system. *Level IV:* Able to perform the duties required for Level III; possesses a thorough understanding of sound management principles, work center supervision, proper methods of training personnel, and approved electrical systems maintenance; organizes and administers facilities for the maintenance and repair of aircraft electrical systems; performs quality assurance inspections for maintenance and repair of electrical equipment; assists in the planning and supervision of work center assignments.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft maintenance, and 3 in electromechanical laboratory (12/88).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 3 semester hours in electrical/electronic laboratory, 9 in aircraft maintenance, 3 in electromechanical laboratory, 3 in personnel supervision, and 3 in maintenance management. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (12/88).

Summary: Inspects, removes, tests, repairs, installs, and maintains components, subsystems, and related equipment of aircraft attack systems. *Levels I and II:* Applies theory of operation of vacuum tubes, transistors, generators, synchros, servos electromechanical drive mechanisms, transmisssion lines, antenna, impedance, resistance, capacitance, and inductance; uses electronic schematics, block diagrams, wiring diagrams, color codes, and other technical data in appropriate technical publications; uses technical publications to obtain data for supply purposes; observes safety precautions; demostrates working knowledge of emergency first aid; isolates and diagnoses systems failures; operates ground support equipment used in performances of maintenance; possesses necessary operating licenses and performs maintenance and inspections on ground support equipment; performs maintenance action to include inspection and repairs according to applicable technical publications. *Level III:* Able to perform the duties required for Levels I and II; performs operational tests, of installed systems; removes, adjusts, aligns and installs components, and repairs or replaces associated wiring and interconnecting devices; performs necessary corrective actions on corroded electrical components. *Level IV:* Able to perform the duties required for Level III; performs quality assurance inspection for maintenance actions; plans and schedules workshop assignments; supervises maintenance actions; conducts technical training; monitors collection of source data and completes reports and records; possesses working knowledge of sound management principles, workshop supervision, proper personnel training methods and accepted avionics maintenance procedures; organizes and administers maintenance and repair facilities.

Recommendation, Level III

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting, 3 in electromechanical systems troubleshooting, and 3 in industrial safety (8/89).

Recommendation, Level IV

In the lower-division baccalaureate/associate degree category, 3 semester hours in electronic systems troubleshooting, 3 in electromechanical systems troubleshooting, 3 in industrial safety, 3 in maintenance management, and 3 in personnel supervision. In the upper-division baccalaureate category, 2 semester hours for field experience in management if rank was Staff Sergeant (SSG) and 3 semester hours for field experience in management if rank was Gunnery Sergeant (GYSGT) (8/89).

Appendix A

The Evaluation Systems

The American Council on Education has developed and refined comprehensive procedures and criteria for the evaluation of military learning experiences. This appendix outlines the historical development of the *Guide;* defines which courses can be found in the *Guide;* provides background information on Coast Guard ratings and warrant officer specialities and Marine Corps MOS's; describes the evaluation systems used to prepare the recommendations for military formal courses and occupations; and includes definitions and guidelines pertaining to categories of educational credit, the semester hour standard, categories of apprentice training, and clock hours and contact hours.

BACKGROUND

Early editions of the *Guide to the Evaluation of Educational Experiences in the Armed Services* were prepared in response to specific needs. Immediately after World War II, the consensus in the civilian educational community was that the practice of granting blanket credit to World War I veterans as a reward for length of service was educationally unsound. Educators concluded that military learning experiences applicable to civilian curricula should be assessed by faculty for potential credit. Therefore, in December 1945, at the request of civilian educational institutions and the regional accrediting associations, the American Council on Education established the Commission on Accreditation of Service Experiences—renamed the Commission on Educational Credit and Credentials in 1979—to evaluate military educational programs and to assist institutions in granting credit for such experiences. Accordingly, the first edition of the *Guide* was published to assist educational institutions in evaluating service courses completed by returning veterans.

The extension of the World War II G.I. Bill to include veterans of the Korean conflict, and the subsequent enrollment of many veterans in colleges and universities, created a need for the second edition, published in 1954.

The 1968 edition was prepared in anticipation of the increased enrollment of veterans resulting from the educational assistance provided under the Veterans Readjustment Benefits Act of 1966, and with the expectation that many would apply for educational credit for their learning experiences in the armed services. In addition, technological advances had necessitated major changes in service training, with a resulting need for new or revised educational credit recommendations.

The 1974 edition was prepared primarily to respond to three emerging considerations. First, because of the growth in vocational and technical programs and the emergence of the concept of postsecondary education, there was a need to evaluate courses for possible credit in the vocational and technical categories in addition to the baccalaureate and graduate categories of previous editions. Second, active-duty service men and women were enrolling in increasing numbers in civilian educational programs and were seeking credit for military formal courses soon after completing their service school training. Third, credit recommendations were needed for the many courses initiated or revised by the military since 1968.

The 1974 edition marked the beginning of a new approach to reporting evaluations of formal military training. At its fall 1973 meeting, the Commission approved the concept of an ongoing *Guide* system. Elements of that system include the publication of biennial editions of the *Guide* through computerized composition, continual staff review of courses, and the computerized storage of course information for a more rapid updating of credit recommendations and for an improved ability to respond to inquiries related to course identification and credit recommendations.

Over the years the recommendations contained in the *Guide* have assisted education institutions in granting credit to hundreds of thousands of service men and women. Surveys conducted by ACE showed that most of the nation's colleges and universities use the formal course recommendations in awarding credit to veterans and active-duty service personnel. The recommendations have been widely accepted because military formal courses share certain key elements with traditional postsecondary programs: they are formally approved and administered, are designed for the express purpose of achieving learning outcomes, are conducted by qualified persons with specific subject-matter expertise, and are structured to provide for the reliable and valid assessment of student learning.

Until 1975, however, no mechanism existed for providing recognition for the learning a service man or woman attained through such learning experiences as self-instruction, on-the-job training, and work experience. As a first step in providing recognition for such learning experiences, the Commission in 1975 implemented a program for the evaluation of learning represented by demonstrated proficiency in Army enlisted military occupational specialties (MOS's). The MOS evaluation procedures were developed, tested, and refined during a feasibility study conducted by the Council and sponsored by the U.S. Department of the Army. Evaluators made recommendations for educational credit and advanced standing in apprentice training programs. Subsequently, the occupational assessment program of the Commission was expanded to include Navy general rates, ratings, warrant officers and limited duty officers, Army warrant officer MOS's, Navy warrant officer and limited duty officer specialities, Coast Guard enlisted ratings and warrant officers and selected Marine Corps MOS's. A small number of Naval Enlisted Classifications (NECs) have also been evaluated.

The recommendations for advanced standing in apprentice training programs are the result of the cooperative efforts of the American Council on Education and labor and industry. Since the Navy programs are now registered with the Bureau of Apprenticeship and Training, recommendations are no longer made for advanced standing in apprenticeship programs.

The recommendations reflect the Commission's belief that it is sound educational practice to give recognition for learning, no matter how or where that learning has been attained, provided that the learning is at the appropriate level, is in the appropriate area, and is applicable to an individual's postsecondary program of study or apprenticeship program.

THE COURSES

Courses listed in the *Guide* are normally service school courses conducted on a formal basis, i.e., approved by a central authority within each service and listed by the service in its catalog. These courses are conducted for a specified period of time with a prescribed course of instruction, in a structured learning situation, and with qualified instructors.

Most courses are given on a full-time basis. After 1981 The Center began evaluation of courses that are 45 academic hours in length. Prior to that time courses evaluated were at least of two weeks duration; or, if less than two weeks in length, the course had to include a minimum of sixty contact hours of instruction. Before 1973 the minimum length requirement was three weeks or 90 contact hours.

Recommendations for formal courses offered between World War II and 1954 are available in the 1954 edition of the *Guide* or from The Center for Adult Learning and Educational Credentials upon written request by education officials. Courses in this *Guide* have a start date no earlier than 1954. In addition, military Subject Standardized Tests (SSTs) are evaluated by the American Council on Education, and are included in the *Handbook to the Guide*.

THE COURSE EVALUATION SYSTEM

In the fall of 1973, the Commission on Educational Credit and Credentials of the American Council on Education approved the following procedures and guidelines for the evaluation of military formal courses.

The Evaluation Process

Courses are evaluated by teams of at least three subject-matter specialists (college and university professors, deans, and other academicians). Through discussion and the application of evaluation procedures and guidelines, team members reach a consensus on the amount and category of credit to be recommended.

Evaluation materials include the course syllabus, training materials, tests, textbooks, technical manuals, and examinations. Additional information is obtained from interviews with instructors and program administrators, classroom observations, and examination of instructional equipment and laboratory facilities.

Each team of evaluators has two major tasks for each course: the formulation of a credit recommendation and the preparation of the course's description. The credit recommendation consists of the category of credit, the number of semester hours recommended, and the appropriate subject area. Using the information provided in the military syllabus, evaluators phrase the course description (which appears in the *Guide* exhibits under the headings "Objectives" or "Learning Outcomes" and "Instruction") in terms meaningful to civilian educators. The course description supplements the credit recommendations by summarizing the nature of a given course.

Throughout the evaluation process, evaluators exercise professional judgment in applying the evaluative criteria and procedures. This position reflects the Commission's belief that sound educational evaluation is more dependent on professional judgment and expertise than on rigid application of criteria.

The Commission on Educational Credit and Credentials continually reviews its criteria and procedures. Evaluators are encouraged to provide feedback and recommendations for consideration by the Commission.

Selection of Evaluators

Nominations for course evaluators are requested from postsecondary institutions, professional and disciplinary societies, education associations, and regional accrediting associations.

The criteria for the selection of formal course evaluators are as follows:

1. Area of an evaluator's competence, as evidenced by formal training and experiences, will closely approximate area of student training to be evaluated.
2. Preference will be given to candidates with five or more years of postsecondary teaching or administrative experience, including curriculum development.
3. Preference will be given to candidates who are generally receptive to the recognition of learning that occurs in a variety of settings.

THE COAST GUARD ENLISTED OCCUPATIONAL CLASSIFICATION SYSTEM

Enlisted Rating Structure

The Coast Guard Enlisted Rating Structure is used for classifying enlisted personnel, identifying personnel qualifications, and reporting personnel requirements and resources. It also provides the framework for enlisted career development through paths of advancement from paygrades E–1 (recruit) through E–9 (master chief petty officer). For ACE purposes, there are two main types of occupational classifications in the Enlisted Ratings Structure:

1. General Rates (Apprenticeships)—Identifications assigned to personnel at paygrades E–1, E–2, and E–3. There are two general rates: Seaman and Fireman. They each involve the performance of entry-level tasks and lead to the ratings.
2. Ratings—Broad occupational fields that encompass similar duties and functions and that, in most instances, provide paths of advancement and career development for personnel from paygrades E–4 (petty officer third class) to E–9 (master chief petty officer). Ratings require performance of routine tasks at the lower paygrades and more difficult tasks at progressively higher paygrades. The relationship between petty officer designations and paygrades is shown below.

Petty Officer Classification	Pay Grade
Petty Officer Third Class (PO3)	E–4
Petty Officer Second Class (PO2)	E–5
Petty Officer First Class (PO1)	E–6
Chief Petty Officer (CPO)	E–7
Senior Chief Petty Officer (SCPO)	E–8
Master Chief Petty Officer (MCPO)	E–9

General rates and ratings are organized in career patterns. A career pattern provides the normal path of advancement from recruit (paygrade E–1) to master chief petty officer (paygrade E–9). An example of a career pattern using the Seaman general rate and the Quartermaster rating is shown here.

Title	Pay Grade
Seaman Recruit	E–1
Seaman Apprentice	E–2
Seaman	E–3
Quartermaster Third Class	E–4
Quartermaster Second Class	E–5
Quartermaster First Class	E–6
Chief Quartermaster	E–7
Senior Chief Quartermaster	E–8
Master Chief Quartermaster	E–9

Standards for Advancement

The Coast Guard's requirements for enlisted minimum skills are defined and contained in two types of minimum standards: Military Standards and Occupational Standards. Military standards consist of qualifications (knowledge and practical factors) which specify the skills and knowledge required as a minimum for advancement to specific pay grades. These include military requirements and professional development standards. Occupational standards specify the skills and knowledges which apply to enlisted personnel as a minimum for advancement in a specific general rate or rating in addition to the military standards. They are divided into practical and knowledge factors and are presented as individual qualification items. For both military standards and occupational standards, each higher paygrade represents more complex duties, increased skills, and greater responsibility.

Special Qualifications

The Coast Guard's special qualifications, identified by Qualification Codes, supplement the enlisted rating structure by identifying special skills and knowledge that require a more refined or specific identification by the assignment of qualification codes to enlisted personnel who meet the stated eligibility requirements. Qualification codes are normally attained by the completion of a technical school or, in some cases, on-the-job training. Because of the specialized nature and limited scope of the skills and qualifications required, qualification codes have not been evaluated.

The Coast Guard Enlisted Evaluation and Advancement System

The Coast Guard regularly evaluates the occupational proficiency of its men and women. In fact, the demonstration of occupational proficiency is directly linked to the advancement system. Individuals are allowed to take the advancement examination after meeting these four criteria: (1) demonstrate that they can perform the tasks required for the next higher paygrade, (2) complete the appropriate correspondence and/or residence courses for the next higher paygrade, (3) serve a minimum length of time in their paygrade and in the service, and (4) be recommended by their commanding officer.

The primary evaluation technique is the written examination for each paygrade of each rating. It contains 175–200 multiple-choice questions that are based on the occupational standards and tasks for each paygrade of a given rating. It is given more weight than any other factor in the evaluation process. Persons are not advanced in their rating until they have demonstrated that they are proficient in the next higher paygrade of the rating. A final multiple score is computed for each individual. It is composed of the following factors:

Factor	*Maximum Credit*
Servicewide Exam Score	80
Performance Marks	50
Time in Service	20
Time in Paygrade	20
Medals and Awards	10
Bonus Points	2
Total Possible	182

THE COAST GUARD WARRANT OFFICER CLASSIFICATION SYSTEM

Warrant officers are technical officer specialists who perform duties that are technically oriented and acquired through experience and training, and that are limited in scope in relation to other officer categories.

There are four grades of warrant officers: Warrant Officer, W–1 (WO1) (discontinued in 1975); Chief Warrant Officer, W–2 (CWO2); Chief Warrant Officer, W–3 (CWO3); and Chief Warrant Officer, W–4 (CWO4). The grades reflect salary increases and are normally indicative of the length of time a person has served as a warrant officer. The grades do not signify differences in job duties. A position requiring a warrant officer may be filled by any qualified warrant from WO1 to CWO4.

Selection and Evaluation

The warrant officer program provides an opportunity for appointment to commissioned warrant officer status for selected senior enlisted personnel. Competition is keen and individuals generally start preparing early in their careers. Potential candidates normally improve their skills through on-the-job training and specialized training through schools and correspondence courses.

Selection boards, composed of senior officers of experience, maturity, and varied backgrounds, are convened annually. Each candidate's qualifications are evaluated and the board recommends those deemed best qualified.

Selection boards also meet annually to recommend those qualified for promotion. Performance is the major key to promotion. The selection procedure for promotion has always recognized the outstanding performer; mediocre performers are judged not to be competitive enough. Evaluations are recorded on Officer Evaluation Reports, an objective appraisal of performance by the senior reporting officer.

Time-in-grade is another criterion for promotion. Until May 1967, the time-in-grade requirements were:

Promotion to W–2: 2 years in grade W–1
Promotion to W–3: 4 years in grade W–2
Promotion to W–4: 4 years in grade W–3.

After May 1, 1967, grade W–1 was discontinued; time-in-grade requirements are now:

Promotion to W–3: 4 years in grade W–2
Promotion to W–4: 4 years in grade W–3.

THE MARINE CORPS ENLISTED OCCUPATIONAL CLASSIFICATION SYSTEM

The Marine Corps MOS system is composed of Occupational Fields and MOS's within each field. The occupational system is constructed on the concept that similar skill and knowledge requirements are grouped in functional areas (occupational fields), which provide for the most efficient and effective classification, assignment, promotion, and utilization of personnel.

An MOS code has four digits and a descriptive title. The MOS describes a group of related duties and tasks that extend over one or more grades. The first two digits designate the occupational field and the last two digits identify the promotional channel and the specialty within the occupational field. The fourth digit may be a skill designator, which identifies additional skill or knowledge requirements usually acquired through experience or advanced schooling. A "0" in the fourth digit indicates a *basic MOS* (see next paragraph), and a "1" indicates trainee status. In some occupational fields, primarily the aviation fields, the skill designator may refer to the particular type of aircraft on which the Marine is qualified.

Each occupational field contains a *basic MOS*, which represents the learner level (e.g., MOS 6000 is a Basic Aircraft Maintenance Marine). It is assigned as a specific MOS in that field when assigned for training. When in retraining status, a Marine's primary MOS will be changed to the basic MOS.

There are two main categories of MOS's. Category "A" enlisted MOS's (occupational fields 01 through 73) are assigned as primary MOS's. Enlisted personnel are promoted on the basis of holding a category A primary MOS. A category A MOS identifies the primary skill and knowledge of a Marine.

Category "B" MOS's (8000–9599 series) are used to identify billets. They may be assigned only as additional MOS's. These MOS's designate a particular skill or training that is in addition to a Marine's primary MOS.

The relationship between rank and paygrade is shown here:

Private (PVT)	E-1
Private First Class (PFC)	E-2
Lance Corporal (LCP)	E-3
Corporal (CPL)	E-4
Sergeant (SGT)	E-5
Staff Sergeant (SSGT)	E-6
Gunnery Sergeant (GYSGT)	E-7
First Sergeant (1STSGT)/Master Sergeant (MSGT)	E-8
Sergeant Major (SGT/MAJ)/ Master Gunnery Sergeant (MGYSGT)	E-9

Performance Evaluation System

At this time only the *aircraft maintenance* and *avionics* occupational fields have established a performance evaluation system that meets ACE's criteria. The evaluation program, known as *Individual Training Standards System (ITSS), Maintenance Training Management and Evaluation Program (MATMEP),* provides for the evaluation of a Marine's job performance. It is a standardized, documentable, level-progressive, technical skills management and evaluation program for enlisted aviation technical maintenance training.

The *ITSS (MAPMEP)* is organized as a two-way grid. The row headings identify the specific duties and tasks which define an MOS. The column headings identify the skill levels at which each MOS duty and task is performed. When a Marine can perform a particular task at a specified level of skill, the Marine's supervisor evaluates the performance. If the Marine performs satisfactorily, the supervisor dates and signs the *ITSS (MATMEP)*. When all duties and tasks defining a particular skill level can be performed satisfactorily by a Marine, the supervisor dates and signs the *ITSS (MATMEP)* summary sheet in the location designated "Completed Level ______". When a Marine's *ITSS (MATMEP)* summary sheet indicates that the Marine has completed Level III, this indicates that *all* the MOS-requisite tasks have been certified at Level III and that the ACE credit recommendations may be applied.

For aircraft maintenance and avionics MOS's, Marines typically attend one of the formal training schools. This training is then followed by formal and informal on-the-job training at a fleet duty post. The *ITSS (MATMEP)* Levels I and II reflect the initial training or apprentice levels of an MOS. Upon completion of the initial training school, a Marine is typically certifiable at Level I. After one or two years of post-school on-the-job experience, the Marine may be certified as a Level II performer.

Level III MOS attainment represents an advanced or skilled level of performance of an assigned job and indicates that a Marine can perform the technical aspects of the task or job with little or no supervision. It ordinarily takes three or four years of working in an MOS for a Marine to attain Level III certification.

Level IV indicates that the Marine is a highly skilled performer and is able to supervise lower-skill-level-MOS holders on a regular basis and can perform shop management duties related to the MOS.

It should be noted that a Marine's level of certification is not directly related to the Marine's military rank. Both military rank and skill level are associated with the length of time a Marine has served—the longer the time in service the more likely is a Marine to hold a higher rank and the more likely is a Marine to have acquired a higher level of MOS skill. However, rank and MOS skill proceed on independent tracks in many instances. In certain instances (e.g., when a longer-serving Marine switches from one MOS to another), a corporal may be certified at a higher skill level in a specific MOS than a sergeant in the same MOS.

ACE Credit Recommendations

Credit has been recommended for Levels III and IV in 18 *aircraft maintenance* and *avionics* MOS's. These evaluations may be found beginning on page 4-1 in this volume.

To document proficiency, institutions should verify that Level III or Level IV has been attained by checking the *ITSS (MATMEP)* summary sheet. This sheet is available to Marines from their duty station supervisors. The form must be signed by a certifying officer.

ACE OCCUPATIONS EVALUATION SYSTEM

The ACE evaluation system for occupations has three major components: the selection of evaluators, the materials required for evaluation, and the procedures and guidelines evaluators use in reaching decisions and making recommendations.

Selection of Evaluators

Nominations for evaluators are requested from postsecondary institutions; professional associations; disciplinary societies; education associations; regional accrediting associations; state departments of education; and state credentialing, licensing, and certifying agencies.

The criteria for selection of evaluators are as follows:

1. The area of an evaluator's competency, as evidenced by formal occupational training, knowledge, and experience, will closely approximate the skills, competencies, and knowledge required for proficiency in the occupation being evaluated.
2. When recommendations were made for apprenticeship programs, preference was given to candidates who were experienced in administration of apprentice training programs when an occupation was related to an apprenticeable trade.
3. Preference will be given to candidates with five or more years of postsecondary teaching or administrative experience, including curriculum development.
4. Preference will be given to candidates who are generally receptive to the recognition of learning that occurs in a variety of settings.

An evaluator candidate is interviewed by an ACE staff member to determine whether the individual meets the selection criteria.

Evaluations are conducted by teams of at least three specialists. An effort is also made to attain a diverse geographic representation among evaluators. Teams are formed based on the occupations to be evaluated. Because skills required for proficiency in an occupational specialty do not always fall neatly into civilian educational and occupational fields and often encompass two or more fields, most evaluation teams include a curriculum generalist. Provision is also made for an evaluation team, when it finds it cannot thoroughly evaluate a specialty, to refer it to another team or other specialists for further evaluation.

Materials Required for Evaluation

In order to make a recommendation, evaluators first identify the skills, competencies, and knowledge associated with a given occupational specialty. The materials relevant for each evaluation are made available to ACE staff members and evaluators by the Military services. Materials include the official Coast Guard manuals that describe the duties and qualifications for each occupation; rate training manuals and other publications used by Coast Guard enlisted men and women in the day-to-day performance of their duties and to prepare for their advancement examinations; and the advancement examination. Marine Corps materials include the official MOS manual that describes the duties and qualifications for each MOS; individual training standards manuals; and the Maintenance Training Management and Evaluation Program (MATMEP) task list. Additional information is obtained by observing and interviewing Coast Guard men and women and Marines during visits to bases and units.

Evaluation Procedures and Guidelines

Evaluators identify the skills, competencies, and knowledge required of service men and women who are qualified in a given occupational specialty and relate that demonstrated learning to the same attributes acquired by students who have completed a comparable postsecondary course or curriculum and by tradesmen and apprentices who have completed a related apprentice training program. Because the evaluations are based on a comparison of learning outcomes, the amount of time a given individual may have spent acquiring occupational proficiency is not taken into consideration. The emphasis is on translating the learning demonstrated through occupational proficiency into terms used in formal civilian postsecondary education systems to recognize the same learning. This reflects the belief of the Commission on Educational Credit and Credentials that the value of learning is not dependent on where or how the learning occurs.

Evaluation teams are assigned four tasks in the evaluation process: (1) to identify the learning represented by occupational proficiency by reviewing the pertinent written materials and by observing men and women performing their occupations and interviewing them and their supervisors; (2) to prepare a description of the duties, skills, competencies, and knowledge required for each specialty; (3) to make recommendations for each specialty based on discussion and consensus; and (4) to make specific comments and suggestions about the specialties (especially in those instances when neither educational credit nor advanced standing in an apprentice training program is recommended), which are forwarded by ACE to Coast Guard or Marine Corps headquarters.

THE RECOMMENDATIONS

In order to interpret exhibits correctly, readers should become thoroughly familiar with the definitions and guidelines utilized by evaluators in formulating the recommendations. The following paragraphs include definitions and guidelines pertaining to categories of educational credit, the semester hour standard, categories of apprentice training, and clock hours and contact hours.

Categories of Credit

Educational credit is a concept used by postsecondary institutions to quantify and record a student's successful completion of a unit of study. Postsecondary education consists of courses and programs of instruction for persons who are high school graduates or the equivalent, or who are beyond compulsory school age. ACE evaluators utilize the following categories of educational credit when formulating credit recommendations:

Vocational Certificate. This category describes course work of the type normally found in certificate or diploma (nondegree) programs that are usually a year or less in length and designed to provide students with occupational skills. This course work can also be found in curricula leading to associate degrees in applied science. Course content is specialized and the accompanying shop, laboratory, or similar practical components emphasize procedural more than analytical skills.

Lower-Division Baccalaureate/Associate Degree. This category describes course work of the type normally found in the first two years of a baccalaureate program and in programs leading to the Associate in Arts, the Associate in Science, or the Associate in Applied Science degree, the traditional transfer associate degrees. The instruction stresses development of analytical abilities at the introductory level. Verbal, mathematical, and scientific concepts associated with an academic discipline are introduced, as are basic principles. Occupationally oriented courses in this category are normally designed to prepare a student to function as a technician in a particular field.

Upper-Division Baccalaureate. This category describes courses of the type found in the last two years of a baccalaureate program. The courses involve specialization of a theoretical or analytical nature beyond the introductory level. Successful performance by students normally requires prior study in the area.

Graduate Degree. This category describes courses with content of the type found in graduate programs. These courses often require independent study, original research, critical analysis, and the scholarly and professional application of the specialized knowledge or discipline. Students enrolled in such courses normally have completed a baccalaureate program.

Semester Hours

Credit recommendations for courses are not derived by simple arithmetic conversion. Evaluators exercise professional judgement and consider only those portions of a course that can be equated with civilian postsecondary curricula. Intensive courses offered by the military do not necessarily require as much outside preparation as many regular college courses. Evaluators consider the factors of pre- and post-course assignments, prior work-related experience, the concentrated nature of the learning experience, and the reinforcement of the course material gained in the subsequent work setting.

The recommendations for military occupations are based on the skills, competencies, and knowledge gained, as demonstrated through proficiency in the rating, without reference to how much time elapsed during the learning process. The semester hour is used as a standard to express how many semester hours of appropriate course work a student would normally complete to attain the same learning outcomes or attest to the same level of competency.

Credit recommendations are expressed in semester credit hours. In determining semester hour recommendations, evaluators will be guided by, but not restricted to, the following standard definitions:

1. One semester credit hour for the equivalent of 15 hours of classroom contact plus 30 hours of outside preparation; or
2. One semester credit hour for the equivalent of 30 hours of laboratory work plus necessary outside preparation, normally expected to be 15 hours; or
3. One semester credit hour for the equivalent of not less than 45 hours (contact hours) of shop instruction.

Other Recommendations

The Defense Activity for Non-Traditional Education Support (DANTES) maintains the educational records of the service men and women who have completed SSTs, CLEP examinations, and GED Tests.

The results of courses and tests that were taken under the auspices of USAFI (United States Armed Forces Institute, disestablished 1974) which carry academic credit and were submitted prior to June 30, 1974, are available at no cost from DANTES Contractor Representative (transcripts),P.O. Box 2879, Princeton, New Jersey 08541.

Results of Subject Standardized Tests and CLEP examinations taken under the auspices of DANTES after July 1, 1974, are available at a nominal charge from DANTES Contractor Representative (CLEP), Educational Testing Service, P.O. Box 2819, Princeton, New Jersey 08541. Servicemembers and veterans are required to pay a $10.00 fee for USAFI transcripts. Military education personnel can obtain them free of charge.

Test reports for GED Tests taken after July 1, 1974, can be obtained from DANTES Contractor Representative (GED), GED Testing Service, American Council on Education, One Dupont Circle, Washington, DC 20036-1193.

In addition, credit recommendations for USAFI courses and tests and for DANTES Subject Standardized Tests are available from ACE and published in the *Handbook to the Guide.*

APPLICATION FOR THE EVALUATION OF LEARNING EXPERIENCES DURING MILITARY SERVICE

(Date)

TO: (Name and address of educational institution, agency, or employer)

EVALUATION REQUEST FOR:

(Name of Applicant)

(Social Security Number)

ATTENTION:

Dear Official:

The applicant named above has requested that the attached summary of educational achievements, accomplished while in the Armed Forces of the United States, be forwarded to you for review and evaluation.

The American Council on Education publishes the *Guide to the Evaluation of Educational Experiences in the Armed Services* which includes postsecondary credit evaluations of military learning experiences. The 1954 edition of the *Guide* contains recommendations for formal courses offered by the Armed Services during the period 1941 to 1954. The current edition contains credit recommendations for (1) military training courses offered after 1954; (2) Army military occupational specialties (MOS's) for enlisted personnel and warrant officers; (3) ratings held by Navy and Coast Guard enlisted personnel; and (4) occupational designators held by Navy and Coast Guard warrant officers and Navy limited duty officers. In addition to recommendations for semester hour credits, some Army enlisted MOS's and Navy ratings also have recommendations for advanced standing in apprentice training programs.

The American Council on Education maintains an advisory service to provide credit recommendations for courses and tests, MOS's, ratings, and other occupations evaluated after the publication date of the current *Guide*. Credit recommendations are provided to officials of schools, state departments of education or other educational institutions, employers, apprenticeship training directors, labor union and trade association officials, military education officers and applicants. *Credit recommendations are not provided to officials at the applicant's request.* Authorized persons may write directly to the Military Evaluations Program Office, American Council on Education, One Dupont Circle, N.W., Washington, D.C. 20036-1193.

The evaluation of this applicant's learning experiences, as well as any guidance which you may provide, should be sent directly to the applicant at the address shown in block 6 on page 3. Your interest is genuinely appreciated.

Sincerely,

(Education Officer)

Privacy Act Statement

AUTHORITY:	5 USC 301 and EO 9397, November 1943 (SSN).
PRINCIPAL PURPOSE:	To permit authorized agencies to evaluate military experience for academic placement and/or employment.
ROUTINE USES:	Used at the request of the individual for the evaluation of military training.
DISCLOSURE:	Voluntary; however, failure to provide requested information impedes the evaluation process by educational institutions or potential employers.

INSTRUCTIONS TO APPLICANT

DD Form 295 is for your convenience in applying for evaluation of your educational experiences during military service. Give as much detailed information as possible. Include additional information on separate sheets, if necessary.

You are encouraged to write a preliminary letter to the school or agency concerned, explaining your interest in its evaluation of your records for the continuance of your education. Training, correspondence study, or special experiences not described on this form, which you believe would be of interest to those reviewing your case, should be included in this letter.

The applicant should:

a. Complete items 1 through 15

b. If you have attended college or completed any college correspondence courses, ask that college to send a transcript to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY COLLEGE OR UNIVERSITY COURSES ON THIS FORM.

c. If you have completed any college-level standardized examinations for credit, such as USAFI or DANTES Subject Standardized Tests, or CLEP, ask the appropriate agency to send a score report to the Registrar of the evaluating agency that this form is addressed to. DO NOT LIST ANY EXAMINATIONS ON THIS FORM.

d. After completion, submit this DD Form 295 to the Certifying Officer.

INSTRUCTIONS TO CERTIFYING OFFICER

(Custodian of Personnel Records)

DD Form 295 is intended to provide factual information that schools and other evaluating agencies require for evaluation of the applicant's educational achievement. CERTIFYING OFFICERS WILL NOT MAKE RECOMMENDATIONS REGARDING CREDIT TO BE AWARDED.

The certifying officer should:

a. Complete items 16 through 18

b. Insure that the information provided in Section II is documented in the applicant's Service Record. Names of schools or courses should not be abbreviated.

c. Send this DD Form 295 to the Education Officer.

INSTRUCTIONS TO EDUCATION OFFICER

The education officer should:

a. Complete item 19.

b. Counsel the service member.

c. Complete page 1. The name and address of the evaluating agency should be the same as that listed at the top of page 3 of this form.

PAGE 1 IS IN ADDITION TO, AND NOT A SUBSTITUTE FOR, THE LETTER TO BE WRITTEN TO THE EVALUATING AGENCY BY THE APPLICANT.

d. Mail DD Form 295 directly to the designated evaluating agency.

INSTRUCTIONS

1. Prepare in duplicate. Retain original and duplicate in service record until separated from the Coast Guard. In case of immediate reenlistment, transfer original to new service record and forward duplicate with closed out service record to Commandant (PE). If individual does not immediately reenlist, the original copy shall be securely stapled to the individual's copy of Report of Separation from the Armed Forces of the United States (DD 214) and the individual notified that he should retain this page and present it with his discharge certificate should he desire to reenlist at any time either in the Regular Coast Guard or in the Coast Guard Reserve.
2. **ITEM 1.** Enter, as occurring, any changes in rate and acquirement of a designator and/or mechanical skill, such as completion of propeller (aviation), carburetor (aviation), refrigeration training.
3. **ITEM 2.** Enter date of receipt of all medals and awards received during current and/or prior period of service.
4. **ITEM 3.** School commands will complete upon graduation or disenrollment from a service school.
5. **ITEM 4.** Complete all entries as soon as practicable after enlistment. A man who has reached E-4 and has no test scores in his records, and no apparent future need for them exists, need not be examined solely for the purpose of recording such scores.
6. **ITEM 5.** To be completed when an individual completes Coast Guard Institute Courses.
7. **ITEM 6.** To be completed when an individual completes an USAFI, Navy, or Civilian Institution correspondence course, or an off-duty residence course.

2. DESCRIPTION OF DUTIES:

DOCUMENTS ATTACHED

3. PERFORMANCE OF DUTIES: Measures an officer's ability to get things done

	1		3		5		7	N/O
a BEING PREPARED Demonstrated ability to anticipate to identify what must be done to set priorities and to prepare for accomplishing unit and organizational missions under both predictable and uncertain conditions	○	Got caught by the unexpected Appeared to be controlled by events/crises Set vague or unrealistic goals if any Set wrong priorities Tended not to follow existing operating procedures plans or systems Not always prepared to meet operational or administrative responsibilities ○	○	Anticipated well Rarely caught unprepared Set high but realistic goals Took prompt positive action to meet changing or unexpected situations Skillfully used existing operating procedures plans or systems and "did homework" to stay well prepared for responsibilities and missions ○	○	Always ready Never caught unprepared Always looked beyond the immediate events/problems Set the "right" priorities and controlled events Achieved highest possible state of preparation for accomplishing responsibilities and missions Turned potential adversity into opportunity ○	○	○
b USING RESOURCES Demonstrated ability to delegate to provide follow-up control and to utilize people money material and time effectively	○	Overlooked/underused available resources Wasted materials or improperly utilized publications and equipment Did not always provide subordinates adequate resources and direction Over/undersupervised did not delegate wisely Assigned wrong personnel to a given job Failed to follow up ○	○	Successfully used available resources publications and equipment to complete assigned tasks Budgeted own/others time productively Found ways to cut waste Delegates made logical work assignments Ensured subordinates had adequate tools materials time and direction Followed up ○	○	Got the most out of people used all available resources to the best advantage Consistently came up with ways to save own and subordinates time eliminate waste and "do more with less" in producing high quality work Always followed up and knew what was going on ○	○	○
c GETTING RESULTS The quality/quantity of the officer's work accomplishments The effectiveness or impact the results had on the officer's unit and/or the Coast Guard	○	Usually met specified goals in routine situations Occasionally produced or accepted work that needed upgrading or redoing Results maintained the status quo ○	○	Got the job done in all routine situations and in many unusual ones Fulfilled identified goals and requirements even when resources were scarce Produced finished quality work and required same from subordinates Results had a positive impact on department and/or unit ○	○	Got results which far surpassed your expectations in all situations Always found ways to do more and do it better in spite of resource constraints Own work and that of subordinates was consistently of high quality never needed redoing Results had significant positive impact on department and/or unit ○	○	○
d RESPONSIVENESS The degree to which the officer responded replied or met deadlines in a timely manner	○	Needed reminding did not report back Tended to miss due dates or deadlines without justification Slow or late responding to requests memos letters or calls Resisted changes in policy direction or responsibilities ○	○	Reported back kept you informed Dependably completed projects and met deadlines Made timely responses to requests memos letters and calls Took changes in policy direction or responsibilities in stride ○	○	Highly conscientious kept superiors well informed Always completed projects early Was unusually prompt in responding to all requests memos letters and calls Extremely flexible responded enthusiastically to changes in policy direction or responsibilities ○	○	○
e OPERATIONAL/SPECIALTY EXPERTISE The acquisition of both knowledge and skills and the demonstration of both technical competency and proficiency in an operational/specialty billet (Includes seamanship airmanship engineering commercial vessel safety SAR law etc as appropriate)	○	Failed to meet acceptable standards or demonstrate satisfactory progress in operational or specialty qualification Required excessive guidance or supervision Experienced difficulty grasping concepts or demonstrating proficiency Failed to maintain qualifications Recommendations were occasionally unreliable Avoided opportunities to further develop or demonstrate operational or specialty expertise ○	○	Competent authority on specialty or operational issues Excellent acquisition and application of operational or specialty expertise (knowledge and skills) for assigned duties Needed minimal supervision Sought increased responsibility Recommendations were reliable Showed steady professional growth through education training and professional reading ○	○	Superior operational or specialty expertise (knowledge and skills) Remarkable grasp of complex issues concepts and situations Rarely needed guidance or supervision Attitude reflected a "follow my lead" approach Rapid professional growth An achiever Advice typically flawless Professional development beyond requirements Significant achievements beyond performance of duties Noteworthy examples ○	○	○
f COLLATERAL DUTY/ADMINISTRATIVE EXPERTISE The level of service knowledge technical and managerial skills the officer demonstrated in collateral duties or in administrative responsibilities (Includes CMCO morale civil rights committees etc as appropriate)	○	Required excessive guidance or supervision in routine activities Slow to develop or "come up to speed" ○	○	Rapidly acquired necessary knowledge Very competent dealing with complex issues problems or situations Adept at determining and then applying correct procedures to manage the department or unit efficiently and accomplish command objectives Rarely needed guidance or supervision ○	○	Significant efficiency or organizational contributions to the unit or Coast Guard or improvements to existing methods in areas of professional responsibility Accomplishments had wide ranging impacts Noteworthy examples ○	○	○
g WARFARE EXPERTISE The acquisition of both knowledge and skills and the demonstration of both technical competency and proficiency in a readiness billet The officer's interest in the Coast Guard's warfare role as demonstrated by involvement in warfare related education training and experience regardless of billet	○	Failed to meet acceptable standards or demonstrate satisfactory progress in acquisition of warfare expertise in a readiness billet Lacked either motivation interest adaptability or aptitude Tunnel vision Avoided opportunities to develop expertise including acquisition of essential knowledge or enhancement of skills when not in a readiness billet Lacking basic vocabulary ○	○	Utilized available opportunities to participate in operational readiness exercises or sought knowledge and experience in a designated crisis action position Conversant on military readiness and warfare issues with both knowledge and appreciation for Coast Guard's role Steady growth in warfare expertise through education, training experience, or professional reading, regardless of billet ○	○	Superior in-depth plan format knowledge and content development skills Authority on maritime naval strategy, overall joint military strategy and national political strategy Participated in planning execution and/or after-action exercise analysis in CPX fleet or field Command Post environment Professional development or contribution beyond billet requirements Excellent candidate for demanding readiness billet ○	○	○

CG-5311 (Page 2) (Rev. 12-88)

c. COMMENTS

4. INTERPERSONAL RELATIONS: Measures how an officer affects or is affected by others.

	1		3		5		7	N/O
a. WORKING WITH OTHERS Demonstrated ability to promote a team effort, to cooperate, and work with other people or units to achieve common goals.	○	Sometimes disregarded the ideas and feelings of others or caused hostility because of failure to inform or consult, impatient or impolite, talked too much or listened too little. Was inflexible, lost temper or control. Was slow to resolve conflicts. Not a team player. ○	○	Encouraged open expression of ideas and respected the views/ideas of others. Worked comfortably with others of all ranks/positions. Kept others informed, consulted others. Got different people and organizations to work together without mandates. Carried share of load. Helped others resolve conflicts and stay focused on team goals. ○	○	Excelled at getting all ranks/positions to work together. Skillfully used knowledge of group dynamics. Inspired cooperation among diverse individuals or groups. Stimulated open expression of ideas. Channeled group conflict into creative energy, achieved goals not otherwise obtainable. ○	○	○
b. HUMAN RELATIONS The degree to which this officer fulfilled the letter and spirit of the Commandant's Human Relations policy in personal relationships and official actions.	○	Exhibited discriminatory tendencies toward others due to their religion, age, sex, race or ethnic background. Allowed bias to influence appraisals or the treatment of others. Used position to harass others, was disrespectful, made slurring remarks. Did not hold subordinates accountable for their human relations responsibilities. ○	○	Treated others fairly and with dignity regardless of religion, age, sex, race or ethnic background. Carried out work, training, and appraisal responsibilities without bias. Held subordinates accountable for living up to the spirit of the Commandant's Human Relations Policy. ○	○	Through leadership and demonstrated strong personal commitment, promoted fair and equal treatment of others in all situations regardless of religion, age, sex, race or ethnic background. Actively campaigned against prejudicial actions or behavior by others. Made clearly noteworthy contributions to this end. ○	○	○

c. COMMENTS

5. LEADERSHIP SKILLS: Measures an officer's ability to guide, direct, develop, influence, and support others in their performance of work.

	1		3		5		7	N/O
a. LOOKING OUT FOR OTHERS The officer's sensitivity and responsiveness to the needs, problems, goals, and achievements of others.	○	Showed little concern for the safety, problems, needs, or goals of others. Overlooked or tolerated unfair, insensitive, or abusive treatment of others. May have been accessible to others but unresponsive to their personal needs. Seldom acknowledged or recognized subordinates' achievements. ○	○	Cared about people, recognized and responded to their needs. Concerned for their safety/well being. Was accessible. Listened and helped with personal or job related problems, needs and goals. When unable to assist, suggested or provided other resources. "Went to bat" for people. Rewarded deserving subordinates in a timely fashion. ○	○	Demonstrated a commitment to develop and nurture a caring community in others. Personally ensured resources were available to meet people's needs and that limits of endurance were not exceeded. Was always accessible to others and their problems. Extremely conscientious in ensuring subordinates received appropriate and timely recognition. ○	○	○
b. DEVELOPING SUBORDINATES The extent to which an officer used coaching, counseling, and training, and provided opportunities for growth to increase the skills, knowledge, and proficiency of subordinates.	○	Showed little interest in training or development of subordinates. May have unnecessarily withheld authority or over supervised. Did not challenge subordinates' abilities. Tolerated marginal performance or criticized excessively. Did not keep subordinates informed, provided little constructive feedback. ○	○	Provided opportunities and encouraged subordinates to expand their roles, handle important tasks, and learn by doing. Held subordinates accountable, provided timely praise and constructive criticism. Provided opportunities for training which supported professional growth. ○	○	Created challenging situations which prompted an unusually high level development of people. Unit or work group ran like "clockwork." People always knew what was going on and routinely handled the unexpected. Developed comprehensive and creative training programs, promoted a commitment to learning and personal development. ○	○	○
c. DIRECTING OTHERS The officer's effectiveness in influencing or directing others in the accomplishment of tasks or missions.	○	An officer who had difficulty controlling and influencing others effectively. Did not instill confidence or enhance cooperation among subordinates and others. Set work standards which were vague or misunderstood. Tolerated late or marginal performance. Faltered in difficult situations. ○	○	A leader who earned the support and commitment of others. Set high work standards and expectations which were clearly understood and required subordinates to meet them. Evenhanded. Kept others motivated and on track even when "the going got tough." ○	○	A strong leader who commanded respect and inspired others to achieve results not normally attainable. People wanted to serve under his/her leadership. Communicated high work standards and expectations which were clearly understood. Got superior results even in time critical and difficult situations. Won people over rather than imposing will. ○	○	○
d. EVALUATIONS The extent to which an officer, as Reported-on Officer, Supervisor, Reporting Officer, Reviewer, Administrative Reviewer, or Commanding Officer conducted, or required others to conduct, accurate, uninflated, and timely evaluations for enlisted, civilian, and officer personnel.	○	Failed to prepare and/or submit enlisted, civilian, or officer evaluations which were accurate or timely. Reports were often returned for improvement. Provided little or no counseling to subordinates. Subordinates failed to submit timely, administratively correct, or substantively supported evaluations. Failed to reject reports to subordinates that were unacceptable. ○	○	Prepared uninflated enlisted, civilian, and officer evaluations which were consistently submitted on time. Evaluations clearly measured performance and behavior against published standards. Narratives were fair, concise, descriptive, and contained specific observations. Few evaluations, if any, were returned by COMDT. ○	○	No reports submitted late or returned by COMDT for correction. No reports of subordinates submitted late or returned for correction. Rejected reports to subordinates for improvement to meet high standards. Comments were specific and always supported numerical evaluations. Set high standards for counseling subordinates. ○	○	○

CG 5311 (Page 3) (Rev. 12-88)

e. COMMENTS

6. COMMUNICATIONS SKILLS: Measures an officer's ability to communicate in a positive, clear, and convincing manner.

a. SPEAKING AND LISTENING How well an officer spoke and listened in individual exchanges, large or small groups, briefings or public situations; demonstrated ability to express verbal thoughts clearly, coherently, logically and extemporaneously.	1 ○	Weak speaking or listening skills. Utilized inappropriate language or mannerisms. Expressed thoughts lacked preparation, confidence, common sense or logic. Rambled or lost the audience. Failed to listen carefully. Argumentative. Identify specific situations that required better skills. ○	3 ○	Accomplished speaker comfortable in both public and private situations. Spoke in an articulate, confident and credible manner with appropriate gestures and without distracting mannerisms. Not visibly uncomfortable in extemporaneous presentations. Listened attentively to others and the audience. ○	5 ○	Displayed a remarkable ability to identify and discuss key issues. Able to express thoughts clearly, coherently, and extemporaneously with creativity. Captivated and persuaded audiences. Chosen by superiors to make presentations on complex or sensitive issues or when outcome had critical significance. ○	○	○
b. WRITING How well an officer communicated through written material and proofread before submission; demonstrated ability to prepare or review communication for superiors, self, or subordinates, and to express written thoughts clearly, coherently, logically and persuasively.	○	Written material frequently required revision for clarity, lack of proofreading, or requirements of the Coast Guard Correspondence or Style Manuals. ○	○	Written material set example for brevity, clarity, logic, persuasion, and tact. Correspondence grammatically correct and appropriate for the audience. Conscientious proofreader. Material from subordinates reflected the same high standards. ○	○	Expressed complex and controversial material in such a clear and persuasive way that achievement of stated objectives was materially aided. Meticulous proofreader. Written material responsible for [illegible] achievement, mission accomplishment, or published material brought [illegible]. Noteworthy examples. ○	○	○

c. COMMENTS

7. SUPERVISOR AUTHENTICATION

a. NAME AND SIGNATURE | b. GRADE | c. SSN | d. TITLE OF POSITION

8. REPORTING OFFICER COMMENTS:

9. PERSONAL QUALITIES: Measures selected qualities which illustrate the character of the individual.

a. INITIATIVE Demonstrated ability to move forward, make changes, and seek responsibility without guidance and supervision.	○	Postponed needed action. Implemented change only when confronted by necessity or directed to do so. Often overtaken by events. May have suppressed initiative of subordinates. Was unsupportive of changes directed by higher authority. ○	○	Strove to do the job better. Developed new ideas, methods, and practices. Got things done. Made improvements; worked smarter, not harder. Self starter, not afraid of making mistakes. Supported new ideas, methods/practices, and efforts of others to bring about constructive change. Anticipated problems and took timely action to avoid/resolve them. ○	○	Aggressively sought out [illegible] responsibility. [illegible] innovative [illegible] promoted [illegible] new ideas, methods or practices which resulted in significant improvements to unit or Coast Guard. Did not promote change for sake of change. Made sure others' ideas/practices [illegible] have given [illegible] ○	○	○
b. JUDGMENT Demonstrated ability to arrive at sound decisions and make sound recommendations by using experience, common sense, and analytical thought in the decision process.	○	Sometimes indecisive or showed uncertainty when making decisions. May have acted too quickly or too late. Did not take advantage of good sources of information. Did not keep superiors informed. Needed watching; repeated mistakes. Made too many wrong decisions/recommendations. ○	○	Demonstrated analytical thought and common sense in making proper decisions or recommendations. Recognized developing problems and considered facts and alternatives. Asked for help when needed. Results demonstrated sound judgment in most cases. ○	○	Always did the right thing at the right time. Combined keen analytical thought and insight to make timely and successful decisions. Focused on the key issues and the most relevant information even in complex situations. ○	○	○
c. RESPONSIBILITY Demonstrated commitment to getting the job done and to hold one's self accountable for own and subordinates' actions; courage of convictions; ability to accept decisions contrary to own views and make them work.	○	Usually could be depended upon to do the right thing. Normally accountable for own work. May have accepted less than satisfactory work or tolerated indifference. Tended not to get involved or speak up. Provided minimal support for decisions counter to own ideas. ○	○	Placed goals of Coast Guard above personal ambitions and gains. Possesses high standard of honor and integrity. Held self and subordinates accountable. Kept commitments even when uncomfortable or difficult to do so. Spoke up when necessary, even when position was unpopular. Supported organizational policies/decisions which may have been counter to own ideas. ○	○	Uncompromising honor and integrity. Went the extra mile and more. Always held self and subordinates accountable for production and actions. Had the courage to stand up and be counted. Succeeded in making even unpopular policies/decisions work. ○	○	○
d. STAMINA The officer's ability to think and act effectively under conditions that were stressful and/or mentally or physically fatiguing.	○	Performance became marginal under stress or during periods of extended work. Made poor decisions, overlooked key factors, focused on wrong priorities, or lost sight of safety considerations. Balked at putting in necessary overtime. Became rattled in stressful situations. ○	○	Performance was sustained at a high level when under stress or during periods of extended work without loss of productivity or safety. Stayed cool when the pressure was on. Willingly worked extra hours when necessary to get the job done. ○	○	Thrived under stressful situations. Performance reached an unusually high level when under stress or during periods of extended work. Productivity remained at an extremely high level with no increased risk to personnel and/or equipment. ○	○	○
e. HEALTH AND WELL-BEING The extent to which an officer exercised moderation in the use of alcohol. The degree to which an officer maintained weight standards. The measure of an officer's effort to invest in the Coast Guard's future by caring for his or her health.	○	Failed to meet minimum standards of weight control or sobriety. ○	○	Maintained weight standards. Used alcohol only discriminately or not at all; job performance and social behavior was never affected. Encouraged similar behavior in others and held subordinates accountable. Intemperate alcohol use by subordinates not tolerated. ○	○	Remarkable vitality, enthusiasm, alertness, and energy level. Consistently contributed at high standards. Demonstrated a significant commitment, beyond setting an example, to the well-being of self and subordinates. Contributed a leadership role in the civilian/military community outside normal duties. Noteworthy examples. ○	○	○

CG-5311 (Page 4) (Rev. 12-88)

f. COMMENTS

10. REPRESENTING THE COAST GUARD: Measures how an officer's ability to bring credit to the Coast Guard through looks and actions

a. MILITARY BEARING The extent to which an officer appeared neat, smart and well groomed in uniform or civilian attire, conformed to military traditions, customs, and courtesies, and set standards for subordinates' performance.	1 ○	Occasionally failed to conform to military traditions, or customs and courtesies. Unable or unwilling to consistently appear neat, smart, and well-groomed in uniform and civilian attire. Standards set in Uniform Regulations not maintained. Performance of subordinates was marginal or unacceptable. ○	3 ○	The typically excellent officer. Demonstrated great care in maintaining and wearing uniforms. Meticulous grooming. Immaculate civilian attire. Precise in rendering military courtesies. Maintained military formality, precedence, etiquette, and deference to both rank and privilege. Required same of subordinates. ○	5 ○	The typically distinguished officer. Clearly set standards for CG uniform and grooming excellence. Set or inspired similar standards in others. Performance of subordinates was exceptional. Exemplified the finest traditions of military customs, etiquette and protocol in very visible situations. Significant contributions to public recognition. Noteworthy examples. ○	7 ○	N/O ○
b. PROFESSIONALISM How an officer applied knowledge and skills in providing service to the public. The manner in which the officer represented the Coast Guard.	○	Misinformed/unaware of Coast Guard policies and objectives and how they relate to own areas of responsibility. Bluffed rather than admit ignorance. Did little to enhance self-image or image of Coast Guard. Was ineffective when working with others. Led a personal life which infringed on Coast Guard responsibilities or image. ○	○	Well versed in how Coast Guard objectives, policies, procedures serve the public, considered an expert in some areas. Was straightforward, cooperative, and evenhanded in dealing with the public and government. Aware of impact actions/impressions may cause on others. Supported CG ideals. Personal life reinforced CG image. ○	○	The ideal officer to represent the Coast Guard. Inspired confidence and trust; clearly conveyed dedication to CG ideals in both public and private life. Worked creatively and confidently with representatives of public and government. Left everyone with a very positive image of self and Coast Guard. ○	○	○
c. DEALING WITH THE PUBLIC How an officer acted when dealing with other services, agencies, businesses, the media, or the public.	○	Appeared ill-at-ease with the public or media. Inconsistent in application of CG programs to public sector. Faltered under pressure. Took antagonistic or condescending approach. Made inappropriate statements. Embarrassed Coast Guard in a social situation. ○	○	Dealt fairly and honestly with the public, media and others at all levels. Responded promptly. Showed no favoritism. Didn't falter when faced with difficult situations. Was comfortable in social situations. Sensitive to concerns. ○	○	Always self assured and in control when dealing with public, media and others at all levels. Straightforward, impartial and diplomatic. Applied CG rules/programs fairly and uniformly. Showed unusual social grace. Responded with great poise to provocative actions of others. ○	○	○

d. COMMENTS

11. LEADERSHIP AND POTENTIAL.

(Describe demonstrated leadership ability and overall potential for greater responsibility, promotion, special assignment, and command.)

12. COMPARISON SCALE AND DISTRIBUTION.

(Compare this officer with others of the same grade whom you have known in your career.)

UNSATISFACTORY	A QUALIFIED OFFICER	ONE OF THE MANY COMPETENT PROFESSIONALS WHO FORM THE MAJORITY OF THIS GRADE			AN EXCEPTIONAL OFFICER	A DISTINGUISHED OFFICER
○	○	○	○	○	○	○

13. REPORTING OFFICER AUTHENTICATION

a. NAME AND SIGNATURE	b. GRADE	c. SSN	d. TITLE OF POSITION	e. DATE

14. REVIEWER AUTHENTICATION

☐ COMMENTS ATTACHED (Required when the Reporting Officer is not a Coast Guard Officer)

a. NAME AND SIGNATURE	b. GRADE	c. SSN	d. TITLE OF POSITION	e. DATE

15. RETURN ADDRESS.

(Name and address to which a copy will be sent when the original is filed in the officer's record.)

16. HEADQUARTERS VALIDATION

PRIVACY ACT STATEMENT
This information is requested under the authority of 14 U.S.C. 633 to determine an officer's suitability for promotion or job assignment. Submission of this information is mandatory. Failure to provide it could adversely affect promotion opportunities and job assignments or lead to disciplinary action.

OCCUPATIONAL TITLE INDEX

The following columns cross-reference Coast Guard and Marine Corps enlisted occupations to exhibit ID numbers. Titles are listed alphabetically.

Aircraft Communications/Naviagation Systems Technician (CH-53) MCE-6323-001
Aircraft Communications/Navigation Systems Technician (CH-46) MCE-6322-001
Aircraft Communications/Navigation Systems Technician V-22 MCE-6325-001
Aircraft Communications/Navigation Systems Technician, (U/AH-1) MCE-6324-001
Aircraft Communications/Navigation Systems Technician, A-4/TA-4/QA-4 MCE-6312-001
Aircraft Communications/Navigation Systems Technician, A-6/TC-4C/EA-6A MCE-6313-001
Aircraft Communications/Navigation Systems Technician, AV-8 MCE-6315-001
Aircraft Communications/Navigation Systems Technician, F/A-18 MCE-6317-001
Aircraft Communications/Navigation Systems Technician, KC-130/OV-10 MCE-6316-001
Aircraft Communications/Navigation Systems Technician, OV-10 MCE-6318-001
Aircraft Communications/Navigation Systems Technician, RF-4/F-4 MCE-6314-001
Aircraft Electrica Systems Technician (CH-46) MCE-6342-001
Aircraft Electrical System Technician, A-4/TA-4/QA-4 MCE-6332-001
Aircraft Electrical Systems Technician (CH-53) MCE-6343-001
Aircraft Electrical Systems Technician (CH-53E) MCE-6345-001
Aircraft Electrical Systems Technician (U/AH-1) MCE-6344-001
Aircraft Electrical Systems Technician, A-6/EA-6/TC-4C MCE-6333-001
Aircraft Electrical Systems Technician, AV-8 MCE-6335-001
Aircraft Electrical Systems Technician, F/A-18 MCE-6337-001
Aircraft Electrical Systems Technician, KC-130/OV-10 MCE-6336-001
Aircraft Electrical Systems Technician, RF-4/F-4 MCE-6334-001
Aircraft Hydraulic/Pneumatic Mechanic, A-4/TA-4/QA-4 MCE-6052-001
Aircraft Hydraulic/Pneumatic Mechanic, A-6/EA-6 MCE-6053-001
Aircraft Hydraulic/Pneumatic Mechanic, AV-8/TAV-8 MCE-6055-001
Aircraft Hydraulic/Pneumatic Mechanic, F-4/RF-4 MCE-6054-001
Aircraft Hydraulic/Pneumatic Mechanic, F/A-18 MCE-6057-001
Aircraft Hydraulic/Pneumatic Mechanic, KC-130 MCE-6056-001
Aircraft Hydraulic/Pneumatic Mechanic, OV-10 MCE-6058-001
Aircraft Maintenance Administration Clerk MCE-6046-001
Aircraft Maintenance Data Analysis Technician MCE-6047-001
Aircraft Mechanic, A-4/TA-4/QA-4 MCE-6012-001
Aircraft Mechanic, A-6/EA-6 MCE-6013-001
Aircraft Mechanic, AV-8A/TAV-8 MCE-6015-001
Aircraft Mechanic, F-4/RF-4 MCE-6014-001
Aircraft Mechanic, F/A-18 MCE-6017-001
Aircraft Mechanic, KC-130 MCE-6016-001
Aircraft Mechanic, OV-10 MCE-6018-001
Aircraft Power Plants Mechanic, F-404 MCE-6027-001
Aircraft Power Plants Mechanic, J-52 MCE-6022-001
Aircraft Power Plants Mechanic, J-79 MCE-6024-001
Aircraft Power Plants Mechanic, Rolls Royce Pegasus MCE-6025-001
Aircraft Power Plants Mechanic, T-56 MCE-6026-001
Aircraft Power Plants Mechanic, T-76 MCE-6023-001
Aircraft Safety Equipment Mechanic, A-4/TA-4/OA-4 MCE-6082-001
Aircraft Safety Equipment Mechanic, A-6/EA-6 MCE-6083-001
Aircraft Safety Equipment Mechanic, AV-8/TAV-8 MCE-6085-001
Aircraft Safety Equipment Mechanic, F-4/RF-4 MCE-6084-001
Aircraft Safety Equipment Mechanic, F/A-18 MCE-6087-001
Aircraft Safety Equipment Mechanic, KC-130 MCE-6086-001
Aircraft Safety Equipment Mechanic, OV-10 MCE-6088-001
Aircraft Structures Mechanic, A-4/TA-4/OA-4 MCE-6092-001
Aircraft Structures Mechanic, A-6/EA-6 MCE-6093-001
Aircraft Structures Mechanic, AV-8/TAV-8 MCE-6095-001
Aircraft Structures Mechanic, F-4/RF-4 MCE-6094-001
Aircraft Structures Mechanic, F/A-18 MCE-6097-001
Aircraft Structures Mechanic, KC-130 MCE-6096-001
Aircraft Structures Mechanic, OV-10 MCE-6098-001
Aircraft Weapons Systems Specialist A-4/TA-4/OA-4 MCE-6352-001
Aircraft Weapons Systems Specialist, A-6/TC-4C MCE-6353-001
Aircraft Weapons Systems Specialist, AV-8 MCE-6355-001
Aircraft Weapons Systems Specialist, EA-6 MCE-6359-001
Aircraft Weapons Systems Specialist, F-4J/S MCE-6354-001
Aircraft Weapons Systems Specialist, F/A-18 MCE-6357-001
Aviation Electrician's Mate CGR-AE-001
Aviation Electronics Technician CGR-AT-001
Aviation Machinist's Mate CGR-AD-001
Aviation Structural Mechanic CGR-AM-001
Aviation Survivalman CGR-ASM-001

Boatswain's Mate CGR-BM-001

Damage Controlman CGR-DC-001
Dental Technician CGR-DT-001

Electrician's Mate CGR-EM-001
Electronics Technician CGR-ET-001

Fire Control Technician CGR-FT-001

Gunner's Mate CGR-GM-001

Health Services Technician CGR-HS-001
Helicopter Hydraulic/Pneumatic Mechanic (CH-46) MCE-6152-001
Helicopter Hydraulic/Pneumatic Mechanic (CH-53) MCE-6153-001
Helicopter Hydraulic/Pneumatic Mechanic (CH-53E) MCE-6155-001
Helicopter Hydraulic/Pneumatic Mechanic (U/AH-1) MCE-6154-001
Helicopter Mechanic (CH-46) MCE-6112-001
Helicopter Mechanic (CH-53) MCE-6113-001
Helicopter Mechanic (CH-53E) MCE-6115-001
Helicopter Mechanic (U/AH-1) MCE-6114-001
Helicopter Power Plants Mechanic (T-400) MCE-6125-001
Helicopter Power Plants Mechanic (T-53) MCE-6124-001
Helicopter Power Plants Mechanic (T-58) MCE-6122-001
Helicopter Power Plants Mechanic (T-64) MCE-6123-001
Helicopter Structures Mechanic (CH-46) MCE-6142-001
Helicopter Structures Mechanic (CH-53) MCE-6143-001
Helicopter Structures Mechanic (U/AH-1) MCE-6144-001
Hospital Corpsman CGR-HM-001

Machinery Technician CGR-MK-001
Marine Science Technician CGR-MST-001

Photojournalist CGR-PA-001
Port Securityman CGR-PS-001
Public Affairs Specialist CGR-PA-001

Quartermaster CGR-QM-001

Radarman CGR-RD-001
Radioman CGR-RM-001

Sonar Technician CGR-ST-001
Storekeeper CGR-SK-001
Subsistence Specialist CGR-SS-001

Telephone Technician CGR-TT-001

Yeoman CGR-YN-001

Coast Guard Warrant Officer Title Index

The following titles cross reference Coast Guard Warrant Officer occupations to exhibit ID numbers. Titles are listed alphabetically.

Aviation Engineering	CGW-AVI-001
Boatswain	CGW-BOSN-001
Communications	CGW-COMM-001
Electronics	CGW-ELC-001
Finance and Supply	CGW-FS-001
Materiel Maintenance	CGW-MAT-001
Medical Administration	CGW-MED-001
Naval Engineering	CGW-ENG-001
Personnel Administration	CGW-PERS-001
Physician's Assistant	CGW-PYA-001
Port Safety and Security	CGW-PSS-001
Public Information	CGW-INF-001
Weapons	CGW-WEPS-001

Keyword Index

This index is designed to provide rapid access to the courses described in the course exhibit section. Titles of courses are arranged alphabetically under keywords which have been extracted verbatim from the titles. For example, the keyword *Data Processing* is followed by all titles containing the words *Data Processing.*

To locate a specific course, identify a word or group of words in the title which seems to be unique of descriptive. For example, the title *Data Processing Specialist, COBOL* can be found under the keywords *Data Processing* or *COBOL.* Similarly, the title *Russian Technician* can be found under the keyword *Russian.*

The ID number for each course is displayed to the right of the title. Refer to that number in the course exhibit section for a full description of the course.

A-10
Fighter Weapons Instructor A-10
AF-1406-0061
Weapon Control Systems Mechanic (A-7D, A-10, AC-130, F-5) by Correspondence

Defense Language Proficiency Test (DLPT) Credit Recommendations

As of October 1st, 1990, credit recommendations based on scores earned through the Defense Language Proficiency Test (DLPT) III and IV are available for certain languages. The recommendations are valid for examinations taken after October 1, 1990. The list will be updated as DLPTs in other languages are developed and implemented.

The DLPT Testing Program was evaluated by ACE's Credit by Examination Program. The following chart lists the languages by category of difficulty, the passing scores and the credit recommendations for each of the three areas tested: listening, reading and speaking. The chart includes the languages that fall within each category.

Example

A servicemember receives the following scores for the Spanish DLPT test: 25 in listening, 32 in reading, and 37 in speaking. You would use Category I on the chart. In this case, a total of 9 semester hours is recommended: For a listening score of 25, 1 semester hour in the lower-division baccalaureate/associate degree category; for a reading score of 32, 2 semester hours in the lower-division baccalaureate/associate degree category; and for a speaking score of 37, 4 semester hours in the lower-division baccalaureate/associate degree category and 2 semester hours in the upper-division baccalaureate category.

Credit Recommendations

Language Difficulty Category	DLPT III/IV Converted Score	Listening	Reading	Speaking
CATEGORY I *French* *Spanish* *Portuguese* *Italian*	25–29	1LD	1LD	1LD
	30–35	2LD	2LD	3LD
	36–39	4LD	4LD	4LD + 2UD
	40 & above	4LD + 4UD	4LD + 3UD	4LD + 5UD
CATEGORY II *German* *Romanian*	25–29	1LD	1LD	1LD
	30–35	3LD	3LD	3LD
	36–39	4LD + 2UD	4LD + 2UD	4LD + 2UD
	40 & above	4LD + 5UD	4LD + 5UD	4LD + 5UD
CATEGORY III *Czech* *Vietnamese* *Polish* *Turkish* *Russian* *Persian*	25–29	2LD	2LD	2LD
	30–35	4LD	4LD	4LD
	36–39	4LD + 3UD	4LD + 3UD	4LD + 3UD
	40 & above	4LD + 6UD	4LD + 6UD	4LD + 6UD
CATEGORY IV *Arabic* *Korean* *Chinese*	25–29	3LD	3LD	3LD
	30–35	5LD	5LD	5LD
	36–39	5LD + 3UD	5LD + 3UD	5LD + 3UD
	40 & above	5LD + 7UD	5LD + 7UD	5LD + 7UD

LD = Lower-Division Baccalaureate/Associate Degree Category
UD = Upper-Division Baccalaureate Category

Course Number Index

The following columns cross-reference military course numbers to ID numbers for the courses listed in the course exhibit section. Readers who desire to trace courses for which they only have military course numbers as references may find the applicable courses by referring to the cross-reference list.

Each ID number begins with prefix initials which identify a specific branch of the Armed Services. The following prefixes are used:

AF—Air Force
AR—Army
CG—Coast Guard
DD—Department of Defense
MC—Marine Corps
NV—Navy

REQUEST FOR COAST GUARD RATING AND WARRANT OFFICER EXHIBITS

Officials should use this form only for requesting exhibits that contain the phrase, "Pending evaluation." As occupations are evaluated, they will be listed in the *Update.* When you want to obtain the recommendation for a newly-evaluated occupation, identify the exhibit you are requesting by using the complete *exhibit I.D. number* (e.g., NER-BT-001), and the title of the occupation. Include the applicant's name if you would like the name mentioned in the reply. Submit the form to The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036-1193, ATTN: Military Evaluations.

Exhibit I.D. Number	Title of Occupation Please print; do not abbreviate.	Name of Applicant

REQUEST FOR MARINE CORPS ENLISTED MOS EXHIBITS

Officials should use this form only for requesting exhibits that are not in the *Handbook*. As occupations are evaluated, they will be listed in the *Update*. When you want to obtain the recommendation for a newly-evaluated occupation, identify the exhibit you are requesting by using the Marine Corps MOS designator and the title of the occupation. Include the applicant's name if you would like the name mentioned in the reply. Submit the form to The Center for Adult Learning and Educational Credentials, American Council on Education, One Dupont Circle, Washington, DC 20036-1193, ATTN: Military Evaluations.
